MINING, BUSINESS AND STOCKS.

STOCK EXCHANGE GOVERNING BOARD

Matter of Increasing Monthly Dues Being Considered.

PRESENT RATE TOO LOW

To Meet Running Expenses of Organization—May be Raised to $5 Per Month—Finances Need Fixing Up.

It is very probable that the new administration, now conducting the affairs of he mining exchange, will take steps to increase the revenues of that organization.

The former governing board was charged with extravagance; but some of the members defend themselves by making the assertion that the receipts of the exchange are not sufficient to keep up the running expenses and at the same time maintain a healthy surplus in the treasury, hence the low state of the finances.

The resources of the organization are derived from the assessment of $3 per month upon each member; the listing fees of $50, and fines. The expenses run about $240 per month, which includes a salary of $100 per month to the regularly employed caller; $60 per month to the secretary; $40 per month to the marker. The balance of the expenditures goes for rent, light and sundry items.

The membership of the exchange consists of 70 persons, all told. The dues which they pay over to the treasurer each month amounts to $210; so, it can be seen that this does not make ends meet by considerable, and if there happens to be a letting up in receipts of listing fees, or Caller Jones falls into a lenient mood and fails to exact fines upon the members, it then gives the governing board something to worry about.

Some members of the exchange believe dues of $5 per month, or $60 per year, are none too high, and it is probable that the rate will be increased to that sum.

As to the proposed rules, talked about so much by the former board, they will probably be consigned to the waste basket by the new administration.

ON MINING EXCHANGE.

The Trading Was Brisk This Forenoon.

Trading was fairly brisk on the mining exchange this morning; but with the exception of Daly, there were no advances in prices of much consequence. There seemed to be a flood of buying orders for the old Park City stock which is striving hard to get back some of its old time prominence. Yesterday morning the shares sold at $3.45; in the afternoon the price jumped up several points, and this morning it reached the $3.80 landing. Daly-Judge and Daly-West both held up well in the bidding and a number of sales were quoted at firm prices. Con. Mercur did not participate in the selling. Lower Mammoth appeared in the pit weaker and dropped to 58 cents. California was ushered out around 27 cents, and Yankee Con. at 41 cents. Little Bell was called again but no one seems to have any stock for sale. New York Bonanza showed no improvement over yesterday.

The closing quotations and sales were:

FROM MINES OF EASTERN OREGON

Robinson Bros., Prominent Assayers Of That Section, in Salt Lake.

MUCH WORK IS BEING DONE

Many More Are Employed and Good Values Are Being Taken Out of Properties About Famous North Pole.

The latest news from the famous Sumpter mining district in eastern Oregon is brought down by Will W. and Chester C. Robbins, leading assayers and mineralogists in that section, who are quartered at the Kenyon. Will W. Robbins is general manager of the South Pole, the extension of Alexander Baring's ten million dollar mine, the North Pole. Both are situated in the well known Cracker Creek district. Mr. Robbins reports the North Pole as employing about 200 men, who are keeping the 20-stamp mill and 100 ton cyanide plant busy, besides which the mine is shipping large quantities of concentrates carrying values from $200 to $1,200 per ton to the Everett reduction works on Puget Sound. The North Pole, it may be remembered, produced over a million dollars last year.

The South Pole is employing 15 men in drifting on the vein. In one of its tunnels, which has been run 300 feet, a cross-cut is being made which is 45 feet wide and neither wall in sight. Satisfactory values are being obtained. Another cross-cut is being made from another tunnel which has penetrated the mountain 800 feet. Air compressors and Burleigh drills will be installed in the spring. The Cracker-Oregon on the same vein is working 20 men and the owners, Killen, Warner & Stewart, have just completed their 10-stamp mill and hoist. The Golconda is looking well, and its output amounts to $12,000 per month with 10 stamps, which will be more than doubled when the new hoist now being put in is completed and the 20 stamps get to running on ore. Fifty-five men are at work on this property.

The well-known Columbia is as great a producer as ever, and with 70 men is taking out about $50,000 per month. The Red Boy-Concord has 65 men at work and its output is $20,000 per month. It has just paid six per cent on its preferred capital of $400,000 for the past year. The Bonanza is reported as having encountered another body of high grade ore on its 800 foot level. The old-time E & E is being cleaned out preparatory to putting a force of men at work to make it the big mine again that it was some years ago. The smelter at Sumpter (100 tons' capacity) is employing 100 men in its construction, and is expected to be blown in by July 1. The town of Sumpter is booming and was never so good before. This is the first visit of the Messrs. Robbins to Salt Lake and they express themselves as surprised and delighted with the city.

PEERY IS PRESIDENT.

New Executive of Stock Exchange Gets Into the Harness.

At the meeting of the newly elected governing board of the mining exchange held late yesterday afternoon, the following officers were elected: President, D. H. Peery; first vice president, M. M. Miller; second vice president, Ralph Guthrie; third vice president, Herman Hill; treasurer, J. B. Thompson; secretary James A. Shorten. President Peery announced the names he had selected for chairmen of the several committees, as follows: Arrangements, Herman Bamberger; arbitration, N. A. Page; listing, W. H. Farnsworth; membership, W. H. Child; rules, John W. Hatfield. The chairmen are to choose their colleagues and report at a meeting to be held this afternoon at 4 o'clock.

The services of the regularly employed attorney will be dispensed with on the first of next month.

BLACKBIRD MEETING.

Conflicting Interests Are Represented at Annual Session.

The annual meeting of the stockholders of the Blackbird Mining company is in session at the company's offices in the McCornick block, this afternoon.

The Dubois interests are represented and Dr. Franklin and his associates are present. It is hoped that the conflicting interests will agree upon some basis for a continuance of work upon this company's splendid Beaver county properties. It is believed today that a truce will be patched up.

TO CHANGE ARTICLES.

Ima Gold Mine of Idaho to Have Another Name.

The stockholders of the Ima Gold Mining company, operating in Lemhi county, Ida., held an informal meeting yesterday afternoon for the purpose of discussing the matter of amending the articles of incorporation. Among the alterations proposed is an increase of the capitalization to 2,000,000 shares of the par value of $1 each, and the changing of the corporate name.

No definite action was taken, but a decision will be reached at a later meeting.

READY TO SINK SHAFT.

Start to be Made from 850 Level of Utah Mine.

Word has been received at the local offices of the Utah mine of Fish Springs that everything is in readiness at that property to commence the work of sinking the main shaft deeper.

It is now down 850 feet, and the start will be made from that point.

concentrates

An Oregon Mine Sold.

A special dispatch from Grant's Pass, Ore., states that the sale of the Opp mines of Jacksonville, that state, to an eastern syndicate has been consumated. The consideration named was $150,000.

Shut Down at Mullan.

(Special to the "News.")

Mullan, Ida., Jan. 27.—All the men working in the Morning mine and concentrator were laid off yesterday morning. About 400 are idle. Tailings from the mill blocked the flume that carries water to run the compressor, which caused the shut down. The probabilities are that operations will be resumed about the first of next month.

HAS FAITH IN BINGHAM MINES

Recent Acquisition of President White, of Bingham Con.

BUYS HIGHLAND BOY EX.

His Holdings Are Said to be Extensive—Probably Interested in Merger With the Yampa Group.

President E. L. White of the Bingham Consolidated Mining company has again pinned his faith to the "old reliable" camp. It has been ascertained that during his late visit to Utah he became extensively interested in the Highland Boy Extension mine, by the purchase of a large block of stock.

About this time certain talent was at work endeavoring to effect a consolidation of the Highland Boy Consolidated with the Yampa, with the result, it is stated, that an understanding has been reached between the principal interests and that it is only a matter of fixing up a few details until it will be an accomplished fact. Mr. White is undoubtedly quite satisfied and gave his sanction to the merger of the two properties.

The acquisition of the Sampson and Yosemite, under an option to the Bingham Con., while Mr. White was in the city, is another evidence of his regard for Bingham mining propositions.

BOILERS HAVE ARRIVED.

Comstock Mill Will Soon be Ready For Commission.

Manager Dusseldorf, of the Comstock mine, of Park City, is elated over receiving word that the belated engine and boilers for the new mill have arrived. They will be installed without delay, so it is now only a matter of a short time until the plant will be ready to go into commission.

The balance of the machinery is all in place.

Witcher Jones Ill.

The news reached Salt Lake yesterday afternoon that Witcher Jones, who started east a few days ago, for the purpose of working up another deal on the Iron county iron lands, was taken seriously ill in Denver. His relatives were very much alarmed over his condition and members of his family departed for the Colorado capital last evening.

Case Drawing to Close.

The litigation between the Salt Lake-Tonopah and the Tonopah Mining Co., which has been in progress at Carson City, Nevada, for several weeks, is drawing to a close. The testimony has all been submitted and the arguments of the attorneys is next in order.

The case involves a dispute over title to certain portions of the Stone Cabin claim of the Salt Lake company.

Columbia Concentrates.

Another shipment of concentrates will be forwarded from the Columbia mine of Bingham tomorrow. This property comes forward with its product with commendable regularity and has the earmarks of becoming one of the camp's noted producers. Manager Cook expects to visit the mine tomorrow.

Machinery For the Wizard.

Two carloads of machinery, says the Baker City Herald, were transferred from the O. R. & N. to the Sumpter Valley railway yesterday for shipment to the Golden Wizard mine, in the Deer creek district, of which J. M. McPhee is general manager. This makes the third consignment of machinery to this rich little property since last May.

MINING CONCENTRATES.

The daily output of the Daly-West mine last week was 300 tons.

The Ophir Hill mine, of Ophir, marketed 5 cars of concentrates today.

James W. Neill, M. E., expects to depart for Butte, probably this evening.

Joseph Treloar, superintendent of the Victor mine of Tintic, is in the city today.

J. C. Dick, the well known mining engineer, left this morning for Kimberly.

Electric drills are soon to be installed at the Alta Vista mine at Silver City, Ida.

A force of 25 men is to be put to work at once at the Sanger mine near Baker City, Ore.

Pat Ryan returned yesterday from a trip to Old Mexico, where he has some mining interests.

Manager Ernest Bamberger of the Keystone, of Park City, went out to that property today.

Joe Ferron, of the Glasgow & Western Exploration company, returned yesterday from Nevada.

An assessment of 2 cents a share has been levied on the issued stock of the Tetro mine of Tintic.

Willard F. Snyder, of the Western Exploration company, has returned from a trip to Gold Mountain.

A new shaft house and steam plant has been installed recently at the midway mine, near Tonopah.

It is said that recent developments made in the York mine of Bingham are of a most encouraging nature.

Manager C. L. Hanson of the California-Tonopah mine, of Tonopah, is expected to arrive in the city today.

John H. McKenzie, who has been the manager of the Le Roi mine in British Columbia, for sometime, has resigned.

Th late assessment of Martha Washington stock becomes delinquent today. The sale takes place on Friday, the 14th.

For a consideration of $135,000, Prof. W. H. Tibbals has bonded some British Columbia property for eastern clients.

Taylor & Brunton reported the arrival today of 13 cars of ores and concentrates; 5 from Stockton, 2 from Idaho and 6 from Tintic.

The annual meeting of the Dalton Gold Mining company is being held this afternoon at the company's office in the McCornick block.

Superintendent P. W. McCree, of the Yankee Con, of Tintic, has resigned. He will be succeeded by J. P. Turner, formerly of the United States mines.

Arrangements are being perfected, according to the Baker City, Herald, for the resumption of work at the famous old E. & E. mine near that place.

S. F. Kershaw has been awarded a contract for pushing ahead the tunnel on the Elgin Mining company's property near Diamond another 200 feet.—Mammoth Record.

Development work is to be resumed at the Black Rock property in Beaver Lake district, Beaver county. Supt. Walter Jones departed for camp last night to see that things are started up.

A. E. Jacobson, superintendent of the Columbus Con. mine of Alta is in the city, he having come down from camp to attend yesterday's annual meeting of shareholders. He states that much snow has fallen in the mountains within the past few days.

Monroe York received a letter Friday from R. A. Hendricks, who is on Bear creek, that he had bonded 14 claims located on Bear creek, belonging to himself and sons, and other parties to a Denver company for $30,000, 5 per cent of which is to be paid on signing of papers.—Weiser Signal.

Ore is now leaving Bingham at the rate of about 30,000 tons per month, or nearly a third more than from any other Utah camp. It is mostly sent to the Highland Boy, Bingham Consolidated and United States smelters. Two non-producing mines—the Boston Consolidated and Yampa—could double this output for an indefinite period if they had smelters in connection.—Bingham Bulletin.

Arthur J. Lee returned Tuesday evening from Grand county, where he put in two days examining an uranium property with A. B. Frenzel, an expert from Denver, the latter being much pleased with the showing there and the vein which is exposed, taking several hundred pounds of the ore east with him for an analysis. Mr. Lee has an interest in the claims, as well as a long time option on the property. It is six miles from the railroad and very easy of access, there being a good wagon road the entire distance.—Price Advocate.

W. J. Prisk, superintendent of the Sinker tunnel, came over from Silver City yesterday. Mr. Prisk said his company would not do any more work in the tunnel until it utilized its water power. They have a fall of 700 feet at one point and a 500- foot fall further down. The company will put in a water wheel and large air compressor, so that the air drills in the tunnel can be operated more cheaply than has been done heretofore.—Boise Statesman.

CHIEF STOCKS SCORED GAINS

New York, Jan. 27.—Opening gains of ⅛ to ½ were scored by practically all the leading active stocks. The orders in the market were very small and the ticker almost came to a standstill immediately after the opening. Rights to subscribe for new Manhattan stock sold at 6¾. Prices yielded again shortly after the opening, making the market irregular. Manhattan, selling ex rights, opened at 145⅝ and then receded to below 145. Amalgamated Copper rose a point. The increased net earnings of Jersey Central for December caused a light demand for the coalers. St. Paul was firm. Locomotive, Chicaga Terminal preferred and General Electric rose 1 to 1½. The smelting stocks, Colorado Fuel and National Lead rose 1 to 2. The market in general was very dull and sluggish but inclined to firmness. The promising outlook on the Venezuelan situation caused an easier tone for sterling exchange.

Bonds were regular at noon.

Amalgamated Copper rose a fraction, Colorado & Southern 2 and St. Louis and Santa Fe 1 point. The general dullness was unrelieved.

MONEY AND BONDS.

Money on call, steady at 3@3¾ per cent. Prime mercantile paper, 5½ per cent. Sterling exchange, easy, with actual business in banker's bills at 4.86.625 @4.86.875 for demand and at 4.83.75@4.84 for 60 days. Posted rates, 4.84½ and 4.87½@4.88. Commercial bills, 4.822⅝@4.83⅜.

Rock Island System

How Can They Do It?

A frequent question about the fifty cent luncheon in our dining cars. That's but one point of excellence in our service.

Magnificent trains with through sleeping cars between Denver, Colorado Springs and Pueblo and Chicago, Omaha, St. Louis, Kansas City, Little Rock, Memphis and Hot Springs, Ark. Close connections for New York, Boston, Philadelphia, Baltimore, Washington, and all points East and South.

Ask for low excursion rates to come. E. DRAKE, Dist. Pass. Agt., Salt Lake. HAL S. RAY, Gen. Agt., Denver, Colo.

Lewis' 98 % Lye.

Powdered and Perfumed. (PATENTED)

The strongest and purest made. Unlike other Lyes, it is finely powdered, packed in a can having two lids, one easily cut and the other removable for constant use. It will make the best Perfumed Hard Soap in 20 minutes without boiling. It is the best for cleansing waste pipes, disinfecting sinks, closets, cleaning paints, bottles, barrels; washing trees and killing insects; for engineers and machinists' uses; for painters, to remove old paints, etc.
