A vigorous war of words is going on in Germany, between the Jews and their Teutonic fellow countrymen. It is estimated that in the German States there are no less than 600,000 of the Israelites, and the number is continually increasing, until it is said that the country is being overrun by northern Jews, who are eating up the country in all fields of activity, besides seizing on the periodical press. The fight is a sharp one, and is becoming a sub-The Pacific Mail Steamship Co., ha ve entre 1 nto an agreement with the Atlantic steamship companys for all the overland passenger traffic, and cablegrams have been received of the departure of a large number of emigrants from Liverpool for the Pacific slope. ## ADULTERATION AND HOME MANUFACTURE.

THE appropriation by the Legislature as a premium for the manufa ture of sugar in Utah from Utah products, is a wise and timely men sure. We have shown in these columns that this Territory can proand that with proper encouragement the manufacture of these needful articles can be made so profitable that there will be no need for im-portations. portations.

There is another side to this question. The sugars and syrups brought into the markets of the world are largely adulterated, and one great ad-vantage of the home made goods will be their purity and genuineness. On this subject we copy the following letter from Professor Mariner to Mr. G. T. Angell, of Boston, who has collected some valuable information on the subject of food adulterations: "Dear Sir.—In answer to your tion. The sugars and syrups brought
