

Bonaparte comes forward, proves himself by his successes, and is placed upon the throne where for fifteen years he holds entire sway, as great a despot as the kings who had preceded him. He rises, shines in all his glory, and in 1815 meets his fate at Waterloo. The revolution, in progress for twenty-six years, is now at an end, and though it has drenched the soil of Europe in blood, it has conclusively proved that the only true form of government is a government "of the people, by the people and for the people."

FRANK SEEGMIER, Cor. Secy.

WEATHER AND CROPS.

Regarding the last week's weather, United States Observer Salisbury says: Another cold week has been added to the list, and as a consequence but little growth has taken place. The temperature of the week, excepting the 22nd, which was a warm day, averaged 8 to 10 degrees below the normal.

In the northern section the rainfall of the 23rd was very heavy, and rain and snow continued on the 24th; low lands were thus made too wet to plow in the northern counties where plowing is unfinished.

Severe frosts on the 18th, 19th and 24th occurred throughout the Territory. Not so much damage was done in the Salt Lake valley as was feared at first, owing principally to the fact that fruit blossoms and vegetables were not far enough advanced. The frost of the 24th is likely to have done more damage. Ice formed one-half inch in thickness on ditches in some localities in Salt Lake county.

In the extreme north plowing and seeding are well under way, and will soon be finished. Grain did not grow during the week, but the weeds did, and got a start. In Utah county apricots are in bloom, and peaches in bud. No damage to fruit by frost of 18th and 19th.

Southern Section.

In Millard county the week was so cool as to retard the growth of grain, and too cool for seeds to germinate.

Frost injured fruit blossoms in Sevier county, also in Grand county. On the 17th ice was one-eighth inch thick. In Washington county the fruit outlook is better than it was a week ago.

All over the south the season is two to three weeks late. The nights are cold and frosty, and crops are backward.

Northern Section.

BOX ELDER COUNTY.

Bear River City—Weather unusually cold during the last week, which stopped all grain from growing; weeds became quite numerous.

Box Elder—Mild and pleasant, with about one-half inch of precipitation and has had a telling effect upon the grain. Plowing and seeding are now general.

Cache Junction—Plowing is at its busiest part. Fall grain has not grown much, nor grass.

Corinne—The warm sunshine of the 21st and 22nd was very beneficial to all crops.

CACHE COUNTY.

Benson—Very dull, cloudy weather. Average temperature for the week, 40.

Logan—Some plowing done, and a little seeding. It has been rather wet; some flurries of snow.

Milville—No damage by frost on 18th and 19th because there was nothing planted. Early part of the week was very cold, but the weather is now warm, and planting has commenced in earnest.

Newton—Plowing and seeding have commenced. The ground is in good condition, but the weather continues to be cold. Fall grain and lucern have made no headway; no gardens have yet been put in.

RICH COUNTY.

Randolph—Weather very blustery. Farmers are trying to put in crops, but make little headway. Lucern and clover were injured by frost on the 19th and 24th.

MORGAN COUNTY.

Peterson—Very changeable; snow and rain; the 20th, 21st and 22nd pleasant and warm, causing lucern and grass to shoot up. Storm of 23rd stopped plowing on low lands. Spring wheat has been sown on uplands.

WEBER COUNTY.

Harrillville—Small grain mostly all in; grass and fall crops doing well.

Hooper—No damage by frost on 18th and 19th. From present appearances there will be an abundant fruit crop this season.

DAVIS COUNTY.

Farmington—Week cold and windy; rain has fallen every day, but not enough to hinder farm work very much. Ice on morning of 24th.

Layton—Some fruit trees are in bloom now.

Wood's Cross—One and one-half inches of rain fell on Saturday evening; it rained and snowed on Sunday; cold wind on Monday, 24th. No danger to crops, unless to fruits.

Mill Creek—Heavy rain on 23d, followed by snow; resulted in a severe frost, causing ice over 1/2 inch thick.

WASATCH COUNTY.

Heber—Thunderstorm 18th and 19th; cold, and snowstorm stopped plowing. Some garden truck showing up green.

SUMMIT COUNTY.

Upton—The entire week has been very cold; raining and snowing, preventing any kind of farming. The spring is late.

UTAH COUNTY.

Lehi—Apricots slightly injured by frost of 24th. Spring grain is coming up fine. Prospects for water is good, and a good season generally is looked for.

Lake View—Severe frost on 19th doing damage to a-paragus and early peas. Grain not all in yet. Apricots in bloom; peach buds starting.

Springville—Most upland already plowed and sown to spring grain. Season unusually backward.

JUAB COUNTY.

Levan—Slightly warmer, still there has been but one right clear, sunny day. Land now in good condition, and most small grain is in. Cold and cloudy weather has kept fruit back, so no damage by the frosts.

SANPETE COUNTY.

Moroni—Growth of grass and alfalfa

is very slow. On the night of the 22nd there was a light shower. No damage by frost.

Spring City—Cold and frosty week; nothing forward enough to damage.

Wales—Small grain crops mostly in; grain growing slowly; grass starting.

Southern section.

MILLARD COUNTY.

Leamington—The nights were too cold for all kinds of crop; nothing is growing much.

Oak City—Cold and dry; crops making slow progress.

Scipio—Weather quite variable; everything growing nicely; grain coming up well. The valley being cold and late, there were no hurtful results from the frosts of the 18th and 19th. Rain on Saturday and Sunday evenings just what was needed.

Meadow—Cold and cloudy; nights frosty; some high winds. No harm to fruit or crops. Plenty of snow in the mountains; water beginning to rise; prospect of plenty of water.

Kanosh—Frost and high wind of 19th slightly injured peach and apricot blossoms. Some lucern patches froze to the ground. Ice appeared on ditches 1/2 to 3/4 inches in thickness.

SEVIER COUNTY.

Richfield—Frost injured fruit blossoms, such as apricots, peaches, etc. Farmers have commenced sowing grain. Too cold for gardening.

GRAND COUNTY.

Moab—On the morning of the 17th ice 1/2 inch in thickness, which injured some of the strawberry blossoms.

Richardson—Dry weather was not favorable to growth of garden seeds. Spring cool, and two weeks later than last year.

WAYNE COUNTY.

Koosharen—Weather has been too cold to do much work in the fields; just commenced putting in crops.

Teasdale—Weather favorable to farming; would estimate 75 per cent of small grain is in. Winds high and drying; will have to water grain up.

Caineville—Cloudy, cold and windy; crops backward.

BEAVER COUNTY.

Beaver—Season very late; crops are doing very well, though set back a little by frosts.

Minersville—The week has been too cold for any growth in vegetation; the latest spring for several years.

IRON COUNTY.

Parowan—Windy, drying the ground. Watering of lucern has commenced. What grain has come up looks promising.

Kanarra—Favorable for putting in spring grain and all field work.

GARFIELD COUNTY.

Loosee—Cold and backward; crops not doing very well; frost every night. Range begins to look a little green.

WASHINGTON COUNTY.

Virgin City—Still cold and frosty. Peas, radishes and such things are doing well. Spring grain looks well. Fruit crop looks better than expected a week ago; there will be a fair crop if there is no more frost.
