

MINING, BUSINESS AND STOCKS

GOLDFIELD MEN IN SEVEN TROUGHS

Much Mining Equipment En Route
To This Attractive Nevada
Gold Camp.

DEVELOPMENT WORK PLANNED

Building Boom Has Started—The
Bolismaker Group—Other
Mining News.

Special Correspondence.

Vernon, Humboldt county, Nevada, Feb. 4.—Harry Coffey, prominent merchant and mining man of Goldfield made the announcement today after having inspected the Wonder mine of this camp that the Seven Troughs Wonder Mining company had secured the necessary funds and had definitely decided to install a 20-horse power gasoline hoist and sink to the 220-foot level, in the present shaft. The machinery was ordered several days ago and it is only a matter of a few weeks until the Wonder property will be equipped in a modern manner. The Wonder will be the third property in the new camp to equip itself for deep mining, the Seven Troughs and the Kindergarten mines having already begun the installation of gasoline hoists. The record of frequent strikes on the property of the Seven Troughs mining district is still unbroken. The latest ore disclosures to excite the camp is the uncovering of a vein in the property of Cavanagh and Emory. The vein is a strong one showing several feet of quartz and talc with streaks of enrichment that show free gold. The grounds are known as the Seven Troughs mine on the east, extending again the productive mining territory down into what is known as the lower porphyry belt. Almost simultaneously with the discovery of ore on the Bolismaker group comes the news of the opening of an ore body of considerable consequence on an adjoining group.

Mining activity finds its reflection in the growth of activity in the towns of the Seven Troughs. The weather, with its springlike weather and the disappearance of the snow the volume of commerce is steadily swelling until summer recently improved exchange conditions can hardly handle it. The arrival in Lovelock yesterday of nine loads of lumber from Truckee for the building boom is the signal for a building boom. The Seven Troughs, Atoughs, Hart and Cavanagh have just rightminded an \$8,000 building for a saloon in Vernon and Culbert L. Olson, secretary of the Seven Troughs, has ordered 10,000 more of lumber to begin a hotel in Seven Troughs.

SALE OF CARISA.

tion is January Dividend Was Passed—there Mining Exchange Transactions.

There were some sales of Carisa. Copper reported during the forenoon calls of the mining exchange, with stock going at 56 and 57 cents. The fact that this Tintic mine passed its usual monthly dividend in January has brought about some inquiry as to the cause and effect. The new manager, Sidney M. Bamberger, has made the statement that the dividend payments have been heavier than the extraordinary dividends of the past. Some of the large holders of the stock, too, favor spending the money in clearing up the company's small floating indebtedness and conducting a more vigorous campaign of development. There is little reason to believe, then, that the stock will experience much of a rally for some little time. There was some trading in Nevada Hills today at lower prices, while Stray Dog held its own around 50 cents a share. Mountain Lake was at 12 1/2 cents, while a little change in either Beck Tunnel or Colorado Mining. Daily Judge continues soft, but the Swansons are stronger and are probably being influenced by the availability of these properties being unwatred. The new Tintic Smelting company will get its water supply from these mines.

PLANT WILL COVER A SITE CONSISTING OF FORTY ACRES.

Some idea of the magnitude of Ely's great smelter can be obtained from the fact that the buildings of the plant will cover 40 acres of land, says the News of Ely. This is the estimate of Charles A. Ely, representative of the American Bridge company of Chicago, who is here to assist in the designing of the steel frame work of the cluster of big buildings which are to go up at the smelter site. The concern represented by Mr. Ely has been continuing to furnish the frame of the building, and his duty here is to put the designs drawn at the smelter draughting rooms in shape for the workmen at the foundry of his company.

Designs for the first unit of the concentrator have already been finished and sent to the foundry. The first unit will cover eight acres. There will be three units of equal size, so that the concentrator, when finished, will alone cover 24 acres. The first and other units required in the operation of the smelter will swell the acreage covered by buildings to about 40 acres.

SERVICE IMPROVED.

Rio Grande Doing Better by Its Bingham Patrons.

Manager L. Hanchett of the Newhouse mines expressed considerable satisfaction today over the gradual improvement in the freight service being accorded the patrons of the Rio Grande Western railroad in Bingham. He expressed the confidence that the management of the Rio Grande will have some of the tangles straightened out and that there will be less for the operators to complain about.

A CARD.

This is to certify that all druggists are authorized to refund your money if Ely's Honey and Tar fails to cure your cough or cold. It stops the cough, soothes the throat, and prevents pneumonia and consumption. Contains no opiates. The genuine is in a yellow package. Refuse substitutes sold by F. J. Hill Drug Co.

UTAH APEX STRIKE.

One of Milling Grade Encountered in the Parvane Tunnel.

Some important developments have been made in the Parvane tunnel being driven by the Utah Apex Mining company of Bingham. Manager Walter C. Orem was advised that a vein of milling ore had been encountered and that the entire face was in mineral. The vein appears to be following the strike of the tunnel, but no effort has been made to cut it to ascertain the width. Mr. Orem says the existence of this vein is not indicated on the surface by cropings, hence its appearance entirely unexpected. It was found 2,300 feet in from the portal. The values run principally in lead.

The new tramway has been in commission for two days.

It has scarcely had time to get limbered up—it appears to be giving a very satisfactory account of itself.

Ely's Big Smelter.

Plant Will Cover a Site Consisting of Forty Acres.

Some idea of the magnitude of Ely's great smelter can be obtained from the fact that the buildings of the plant will cover 40 acres of land, says the News of Ely. This is the estimate of Charles A. Ely, representative of the American Bridge company of Chicago, who is here to assist in the designing of the steel frame work of the cluster of big buildings which are to go up at the smelter site. The concern represented by Mr. Ely has been continuing to furnish the frame of the building, and his duty here is to put the designs drawn at the smelter draughting rooms in shape for the workmen at the foundry of his company.

Designs for the first unit of the concentrator have already been finished and sent to the foundry.

The first unit will cover eight acres. There will be three units of equal size, so that the concentrator, when finished, will alone cover 24 acres. The first and other units required in the operation of the smelter will swell the acreage covered by buildings to about 40 acres.

The smelter warehouse is about completed and ready to receive the ore.

The foundations of the other buildings. Much of this grading is being done by contract.

SERVICE IMPROVED.

Rio Grande Doing Better by Its Bingham Patrons.

Manager L. Hanchett of the Newhouse mines expressed considerable satisfaction today over the gradual improvement in the freight service being accorded the patrons of the Rio Grande Western railroad in Bingham. He expressed the confidence that the management of the Rio Grande will have some of the tangles straightened out and that there will be less for the operators to complain about.

The fuel situation is much improved, particularly at the Cactus mine and mine in Beaver county.

The latter will run through about 1,000 tons of ore per day until about March 1, when the plant will probably be brought up to its capacity of 1,200 tons per day.

BLACK DOLLY ARTICLES FILED

Salt Lake and Pleasant Grove Citizens Launch a New Fire Clay Concern.

PROPERTY BEING WORKED.

Improvements in Contemplation—Where Ground is Located—Of Officials of Company.

A new fire clay concern was launched in this city today with the filing of articles of incorporation in the county clerk's office of the Black Dolly Fire Clay company. The headquarters of the company are in this city, but its clay beds are located about two miles east of Pleasant Grove, Utah county, where the company owns 120 acres of an excellent quality of black dolly fire clay.

A great deal of development work has already been done on the property by the owners, there being a tunnel 250 feet in length on one of the claims which tap the clay and run across an immense body of it for a distance of 85 feet. Another tunnel has been run below the main tunnel and the clay has been tapped in at about 100 feet. The clay is pronounced by experts as the best fire clay in the state and it is now being used by several smelters. This state is well supplied with the Mammoth Copper company smelter at Kennett, Cal., for lining converters.

A number of important improvements will be made in the manner of extracting the clay and active work on these will be commenced at once. It is contemplated utilizing the clay for manufacturing purposes within the next few months. The capital stock of the company is \$25,000, divided into shares of the par value of \$1 each. The officials of the company are: Israel Cole, president; E. A. Cole, vice president; Harry S. Harper, secretary and treasurer and manager. These officers, with Heber Cole and R. W. Clough, compose the board of directors of the company. The claims owned by the company in full satisfaction of the entire capital stock are the Black Jack, Black Jack Nos. 1, 2, 3, 4 and 5 placer claims, located in an unorganized mining district east of Pleasant Grove.

COLUMBUS CON. REPORT.

Statement of President Jacobson Now Ready for Printer.

The annual report of Tony Jacobson, president and manager of the Columbus Consolidated Mining company, was released yesterday afternoon and will at once be printed in pamphlet form and sent to the stockholders. The report contains in comprehensive detail the operations of the company during the past year, from which the following is taken:

"During the year there has been mined 1,690.2 tons of first class ore, which, according to smelter returns, an average moisture of 2.7 per cent. Of this amount there has been settled for by the smelter 1,314.6 tons dry weight, for which we received the net sum of \$24,212.92, giving an average value of \$18.43 per ton. The ore still on hand at the mine 380 tons net weight, which, according to mine assays, is worth \$65 per ton. There was also mined 1,239 tons of milling ore, of a gross value of \$11.15 per ton.

"There has been run during the year a total of 3,304 feet of tunnels, drifts and crosscuts; 283 feet of shaft sinking; entirely unexpected. It was found 2,300 feet in from the portal. The values run principally in lead.

"The new tramway has been in commission for two days. It has scarcely had time to get limbered up—it appears to be giving a very satisfactory account of itself.

Ely's Big Smelter.

Plant Will Cover a Site Consisting of Forty Acres.

Some idea of the magnitude of Ely's great smelter can be obtained from the fact that the buildings of the plant will cover 40 acres of land, says the News of Ely. This is the estimate of Charles A. which have been giving very good service during the past year.

ACTIVITY AT GOLD SPRINGS.

Jennie Company in Market With Ore—Mill Construction.

Charles A. Short, manager of the Jennie Gold Mining company's properties at Gold Springs, Iron county, came up from the south this morning on a brief business trip. He reports everything running along in a very satisfactory manner and that it will only be a short time until the company will be making a showing in the way of production. A car of high grade ore is due at the sampler today. The mill now under construction is under cover and the setting of the machinery was begun this morning.

The camp is in a very prosperous condition at the present time and Mr. Short expects to see some important developments result from this year's work.

JOHNSON IN TROUBLE.

Lund Estate Sues for an Interest in Snowflake Mine.

Advises received from Pioche have been received to the effect that the estate of the late Robert C. Lund has brought suit against John M. Johnson, who was lately decreed the owner of a one-third interest in the Snowflake mine at Pay, Nev., the plaintiff suing for one-half interest or a sixth interest in the mine. In the complaint it is alleged that Lund, during his lifetime, had such business transactions with Johnson that entitled him to the interest stated.

SWANSEA EXTENSION.

Headquarters of Company Will Soon Be Moved to Provo.

The annual meeting of the shareholders of the Swansea Extension Mining company has been called for March 4. In addition to the election of officers for the ensuing year several amendments to the company's constitution of the company will be proposed, namely to make the headquarters of the company at Provo; to increase the capital stock from \$50,000 to \$100,000 and to divide the same into 1,000,000 shares, said increase to be known as treasury stock, to be disposed of to purchase additional property. It is understood that the new headquarters of the company of the stock of this company, possibly for the Tintic Smelting company.

CONCENTRATES.

John McChrystal departed for New York this afternoon on mining business.

Manager Walter C. Orem of the Utah Apex company went to Bingham this morning on an inspection trip.

Former Secy. L. A. Amesen of the Tanque Consolidated Mining Company.

John McChrystal departed for New York this afternoon on mining business.

A San Francisco dispatch says: An official statement from the Selby Smelting works shows that a recent shipment of 47 tons of ore from the Hayes Quartzite mine of the Selby Smelting mine at Goldfield netted the shippers \$574,000.

Builds up waste tissue, promotes appetite, improves digestion, induces rest, cures indigestion, constipation, and health.

LOCAL MARKETS.

There are oranges galore this week in the local markets, so that prices ought to be falling shortly. The fruit is from Riverside and Redlands, and is now at its very best. Local shipments of bananas are also on the market. Texas lettuce and cucumbers are being received, with green onions, Italian garlic, fresh haitbut and herring, a wide variety of Maryland and southern California vegetables. The prices obtaining today are as follows:

RETAIL.

Timothy, per cwt.	1.85
Alfalfa, per cwt.	1.75
Corn, per cwt.	1.40
Wheat, per cwt.	1.40
Oats, per cwt.	1.25
Barley, round, per cwt.	1.45
Family flour, per cwt.	1.35
Flour, straight grade, per cwt.	1.35
Flour, high patent, per cwt.	2.15
Bran and shorts	1.00
Straw and chaff	1.20
Corn meal, per cwt.	1.20

MEATS AND POULTRY.

SPRING DAYS

Make us think of homes and home building.

These thoughts call to mind

FOREST DALE.

We do not suppose ALL of our lots will be sold until early summer is here. But those who buy now have a choice of location that those who select lots later will not have. This is an advantage worth while. You can make soil but not location. So it is to your interest to buy NOW.

The prices have not been advanced, and if you are the right people and will make good neighbors you can pay all cash or buy on installments with deferred payments at 6 per cent interest. No trouble to show the property or to tell you about its advantages.
