FURTHER TESTS ON THE DAISY ORE

a 250-Share Block Brought That A 600-Pound Lot is Being Sent to Butter's Laboratory.

THE GOLD NOTE COMING UP.

Furnishes Rich Silver Samples-Grand Central Dividend-Items from La Sals.

Within the next day or two a sample of 600 pounds of ore from the Daisy, of West Die, will reach the Butter's Laboratory where exhaustive tests will be made to determine the best method of saving the values which run around \$3.20 per ton. Five hundred pounds of this lot was taken from the 300 level the remainder being taley ore from the 400 level. The tests are being made under the direction of Mr. J. G. Jacobs into whose hands has been delegated the task of unravelling the tangled af-fairs of several of the West Dip companies preparatory to effecting a con-solidation. The properties that are beconsidered in the proposed consoli-on are the South Daisy, Dalsy, La ale, Helvetia and Kismet mines, he debts remain to be disposed of bethe proposed consolidation will be ted, but if these debts of the vari-companies can be wiped off Mr. Jacobs says the rest will be plain sail-ing. The above sampling of the Daisy indicates that that property will re-ceive proper consideration when the matter shall be finally considered.

VERY RICH SILVER ORE. Continues to be Extracted from the

Gold Note of Ophir. Dr. Woodruff was the recipient today Dr. Woodruff was the recipient today of some splendid samples of silver ore from the Gold Note property at Ophiron which Mr. Airls and others have secured a bond, W. C. Rose, who came in with the samples, reports work progressing satisfactorily. Some large bodies of silver ore have been found and the lower tunnel is now nearly un-der the old workings. The ore is from the old Note property at Ophir some of it showing bromides and chlorides running several thousand ounces

GRAND CENTRAL DIVIDEND. Speculations are Being Indulged In as the Amount.

There is now no doubt among the brokers that the Grand Central will pay a dividend next month. The statement that such would be the case is credited to one of the directors who seems to know the feeling of the board. The only question now is the amount that will be Some look for a big dividend before the regular one, but it is probable that the directors will limit the amount to what they feel can be pald regularly each month. Mr. Holbrook has stated that the directors want to pay dividends regularly when they were resumed and while no one can foretell what will be the action of the directors on Nov. 9th, it is possible that the board may consider the payment of \$25,000 per month sufficient until the law suit is off its hands.

JOE BOWERS SHAFT.

J. A. Brown Will Visit the Property Tonight With a Special Object.

A force of men is still engaged at Joe Bowers," said Secretary Lynn ay. "Some good ore is being extracted and for the past two months the property has paid its way." It was expected that J. A. Brown would go down to the mine tonight in company with a well known expert, for the pur-pose of deciding whether the old shaft be put down deeper or a new one be started

MIDAS OWNERS MEET. Estimates for a Mill to be Presented This Afternoon.

A meeting was held in Mr. James Chipman's office yesterday afternoon for the purpose of considering the question of building a mill at the Midas group, in Deep Creek. There were present James Chipman, John Dern and J. F. Siebert of Salt Lake and Mr. Grant of American Fork. Nothing was done however and the meeting addone, however, and the meeting ad-ed until this afternoon when it is ted that Mr. Dern will furnish eses for the construction of a 30 ton ling plant. It has not been fully d what kind of a mill will best rve the purpose. Mr. J. F. Siebert has lately returned om the mine which he examined for

Eastern parties. It was, however, too small for them owing to a break that occurs at a certain depth. It is understood that Mr. Siebert is negotiating for the purchase of Messrs. Chipman

BINGHAM RAILROAD. Rio Grande May Not Build Branch to U. S. Mines.

A decision was expected this after-noon from the headquarters of the Rio Grande Western Rallway company at Denver regarding the construction of the three miles of railroad from the present terminus of the Bingham rail-road to the Bingham Copper and Gold and United States companies' mines. The grade is quite steep, and it will be necessary, doubtless, to use Shay engines, which would make a separate the Rio Grande will allow local les to build and operate the arties to build and operate the

THE GUGGENHEIMS.

A Splendid Record Made by the

Wealthy Smelter People. No single firm of operators since the conanza days of the Comstock in Ne-ada, when Flood, O'Brien and Mackey attoushed Christendom by the rapid dication of millions, has accumusuch vast wealth from the mining ustry as the Guggenheims, says the over Post. Moreover, in all the its they have been engaged in minand smelting, not a single revolt has y of employes, nor a grievance that the utmost harmony has pre-throughout the widely extended dof their enormous operations. There is been no semblance of quixotism what they did. They paid fair wages, red for their people, eschewed impoper alliances and entanglements, and

in peace and prosperity. When the American Smelting and Refining trust was organized they refused to join it. They were too strong to be forced in or to be crushed, hence no attempt was made to batter them into compliance. Financially the Guggenheims were equal to the situation, powerful enough to command, and to resist any effort to coerce. Hence there has been on friedlen. Now it is said they have fixed a price upon their smelting properties, which the trust has accepted, and as 800h as the preliminaries can be persoon as the preliminaries can be per-fected they will pass out of the field. If the report is well founded, and it seems to be, the trust will soon be in supreme control of all the smelting business of the mining States, including a large part of Old Mexico. There will be general regret over the transfer, for it was the only link between the peo-ple and an absolute monopoly. What will come of it remains to be seen, but we can't avoid a feeling of apprehension that it will not be altogether good for western mining industry in the

Arrives from Frisco. Joseph Dunn, who has charge of the store at Horn Silver mine at Frisco, is up for a few days and reports a lively interest in mining affairs throughout the district. The amount of busi-ness done in his store this year does not show, however, a material increase in trade. At the present time a great deal of development work is being done, though with what success Mr. Dunn is not able to say. The late rains have been very acceptable in the district during the past month. They are late but not the less welcome.

Grand Valley Items.

Alex Caldwell has gone on a business trip to Sait Lake and Mercur. He will be back in a short time with parties who are considering the putting in of a plant for handling the Wilson mesa

Wm. H. Muller, who has opened up some fine mining ground in Beaver ba-sin, left last week for Chicago, where he will confer with parties interested with him regarding further develop-ment of the property,

R. J. Thomson came down today from Miners' Basin and informs us that after running the stamp mill a short time the water pipes burst. This will require time to send for pipe better adapted for the purpose before they can proceed with the work, everything else is in readiness to start, and it will be but a few burst. a few hours' work to put in the pipe when it arrives.

Mr. Frank Stang returned from Mill creek the first of the week, having made a thorough inspection of the Hayes group of mining claims in which he is interested, and has taken out sev-eral hundred pounds of samples to Denver to have tests made for the proper method of reducing the ore, artis ore carries gold, nickel, copper and tobalt, and will require a special method of treatment. As soon as that can be decided arrangements for a plant will be perfected. Mr. Hayes and son Harry left Tuesday for a visit to their home in Mancos, Colorado,—Moab Times.

Ore Locator at Work.

W. S. Croft, the ore locator, has been here for several days, says the Silver Plume (Colo.) correspondent of the Denver Post. His method of locating cre bodles is by an instrument charged with certain chemicals. About one year ago he visited Silver Plume and gave a public test in the Mendota mine. Peo-ple who witnessed this test claim that streaks have been found where year ago he claimed some ore bodies existed. He visited several mines on his recent trip and gave some encouraging reports on his return.

Idaho Group Sold.

Horace W. and Charles M. Soule, of Horace W. and Charles M. Soule, of Neihart, have Just made a cleanup in mining in Lemhi county, Ida., the profits of which go into five figures, says the Neihart Herald. They have sold the Gold Stone group, situated on Pratt creek to a syndicate represented by H. P. Giles, of Great Falls, Jack Turnblade, of Giltedge, and others. This group of claims carries high-grade free milling gold ore, and has on it a tengroup of claims carries high-grade free milling gold ore, and has on it a tenstamp mill. The shaft is sunk 250 feet deep. From the 120 foot level is run 1, 200 feet and the 230 foot is in 700 feet. A crosscut tunnel is being run to tap the vein 500 feet deep. The ore is persistent and the property is paying a good income. It is one of the best developed mines in Lemhi county, and might have been hald by Soule Broth. might have been held by Soule Brothers to considerable profit.

United States Finances.

To date the directors of the United States Mining company have called for four instalments of 10 per cent each from subscribers for the \$800,000 bonds, says the Boston News Bureau. Of the \$320,000 thus obtained the company has in its treasury between \$75,000 and \$100,000 which it is believed will be sufficient to pay running expenses and ficient to pay running expenses and development work until the company's smelter is in operation (if there is no unnecessary delay in the building of the smelter) and the property is placed on a self sustaining basis. It required abou \$200,000 to pay the company's debts Expenses have now been reduced to the minimum. The remaining 80 per cent still due on the \$800,000 bonds will pay for the erection of the proposed

MINING NOTES.

A new strike is reported on the lower levels of the Swansea of Tintic. A car of ore was on the market today from the Showers Con. of Tintic. The Ophir Hill reached the market today with another 10-car lot of con-

Two cars of allver-lead ore reached the sampler today from the Yankee Con. of Tintle.

entrates.

The Taylor-Brunton sampler reported 10 cars of concentrates from Stockton and 3 cars of ore from Tintle today. Willard Snyder has paid the first pay-ment of \$5,000 on the King and Old in-terest in the Dixie group at St. George. Two cars of ore from the American Mining company of Idaho are being handled on this market through the

bank of Weiser. Manager P. T. Farnsworth of the Bullion-Beck reports no special change either on the 500 level or in the new shaft on the Muldoon claim.

Present indications are that the Con. Mercur mill will handle close to 1,000 tons of ore as a daily average during the present month.

Messrs Bothwell and McConaughy are expected back from the Sacramente tonight. They have been showing Mr. G. S. Hanna of Bloomington, Ill., through the famous gold camp. Manager T. R. Jones of the American

Smelting company came in from the East yesterday afternoon, and says that process for handling zinc ores will sure-y be a part of the new \$1,000,000 smel-The breast of the main tunnel of the New Sensation group in Big Cotton-wood is said to show samples carrying

and we are informed that three tons recently assorted from the discovery averaged \$12,000 per ton in gold. This speaks well for the future of the com-

Baker City Democrat: Harry S. Mc-Callum, manager of the Maramoth Gold Mining company, telephoned "esterday to the Democrat from the Mammoth mine, contiguous to the Cracker Creek district, that one of the greatest ore finds in the eastern Oregon gold fields had been made, and from what he says, nothing like it was ever before known in Oregon or in the northwest. The chute of ore is tweive feet wide at the crosscut and continues that wide as far as developments show, and is continuous 180 feet to the surface and 170 feet in length. Mr. McCallum is now taking out one that will so anywhere taking out ore that will go anywhere from \$10,000 to \$50,000 to the ton, and he safely estimates that from the tunnel level to the surface there is \$750,000.

WAS FEVERISHLY ACTIVE.

Assertions of Vanderbilt Control Made Southern Pacific the Feature.

It Was a Railroad Market, Many Stocks Being Affected by Various Mumors.

New York, Oct. 26 .- The stock market opened feverishly active and very irregular. The assertions of Vanderbilt control in Southern Pacific made that stock the feature and the 10,000 shares which changed hands at the opening were quoted at 37% and 37%, compared with 37% last night. The Chicago & Alton stocks and the Kansas City Southern stocks were affected by reports of consolidation. Alton opened Wide on a sale of 3,500 shares at 34 to 34%, compared with 33% last night, Kansas City Southern preferred was up 14. Some of the coalers showed acute depression on realizing incident to the stock settlement. Large amounts of Brooklyn Transit were unloaded on a rise of 1% and the price receded to about yesterday's close. Sugar and Pacific Mail were dropped a point and these incidents caused the general marset to run off. Some resistance was net in the Pacifics. Business in Southern Pacific was only moderate after the chormous opening business and the rice was about steady. The Chicago 14 for common and preferred. A lively selling movement developed in the second hour which had its inception in the steel stocks. Their weakness soon diffused a heavy tone to the Pacifics, coalers, Tobacco and tractions. Losses veraged about a point in these properes but some issues lost almost two points, Great activity marked the movement. Lake Eric and Western preferred broke 4½. A sharp rise to-ward midday in some of the specialties checked the re-action but the market was feverish. Lake Shore was bid up

three points over yesterday's close with-out obtaining any stock. The ralley in prices did not meet as much pressure to realize as on earlier movements. The fall in the call money rate to two per cent encouraged the bulls to bid up prices and shorts were driven to cover. Missouri Pacific got three points over the low level, and the rally reached a point or over in other stocks. The closing was quite active and firm at the advance with prices generally above last night's level Bonds were quiet and irregular,
