

Shield Meeting-The Smelter

Consolidation.

ore. One of these veins has been tapped

by a 300-foot tunnel, from which point

of probably 250 feet. A streak of ore

closed in this vein, which gives assays

above \$40 per ton. The ore is said to

be improving with depth and the outlook is considered very good for a pro-fitable run next season. Meantime the

mill has been closed down through a serious accident. The cable broke and

wrecked the cars with some other things which will delay operations a

month or more. Through this disas-ter more than half the force has been

laid off and only about 10 men are em-ployed there pending the repairs.

THE SMELTER CONSOLIDATION.

Rogers and Lewisohn Said to be in

a Position to Act Independently.

Smelting company, which was recent-ly secured in New Jersey, the Engineer-

ing and Mining Journal says: If the present feeling continues, it is

that Messrs, Rogers and Lewisohn, with

in a position to act independently, and

it is well to recognize the possible ef-fect of such action on the industry.

other disaffected stockholders, are now

DESERET EVENING NEWS: MONDAY, FEBRUARY 25, 1901.

passed, as the company is desirous of securing greater depth. Superintendent A. P. Mayberry of the United States property, who came in from the mine last evening, reports the Shield looking about as usual. He says he has seen it in a worse physic cal condition since the company started to pay dividends. About 35 tons of ore was said to be on the dump on Satur-

Park City Items.

The Park Record states that the Thayno's canyon properties continue to hold considerable interest among the speculators. California stock seems to he growing in favor and Comstock 18 being watched anxlously. Although the Guincy has shipped ore before, this is the first week that it uppears on the regular shipping list, her credit for the week being over a half million pounds,

J. J. Daly was up from the city Wed-nesday for a few hours. He stated that the year's vacation he promised him-self was up, and he was ready to take off his coat and go to work. He would not state in Just what direction he would operate, but the general belief is that he will be found doing import-ant and extensive work on his Bonanza James A. George returned to town flat property before long. Some fear was expressed that with the completion of the Silver King nerial tram a serious setback would be given the business in general, owing to the taking off of teams. But there need be no fear of such a result. The new properties that have developed since the beginning of construction work on the aerial tram have more than made he difference that would result the new mode of transportation of King ores and business, and today there are more teams going on than at any time in the history of Park Park Just now the roads are in had One big dealer in the city is issuing cards to the trade quoting high patent at \$1.40 and other grades at proportionate prices. City. condition, owing to the recent thaw, which renders them bad for either which renders them bad for either sleds or wagons, but they would all be employed, just the same, if the roads were good; the only difference would be the handling of a greater connage. from 2 to 5 feet wide has been disand \$12 per ton, while lucern ranges be-tween \$9 and \$10 per ton. And this business will steadily crease, and when spring opens and the many new properties now in contem. plated working are under way, there will be demand for many more teams than the operation of the new train will dispense with.

ORE SHIPMENTS.

Following are the shipments of ore from the Mackintosh sampler for the past week: Pounds

John Rooklidge will arrive tomorrow morning with the clean up, consisting of 3 bars of gold builton, which are said to insure a nice profit over expenses. On his way to town Mr. Rook-lidge was expected to visit the Century mill in Park valley, which is giving such a good account of itself. Deep Creek country is said to be looking up.

May Day is Improving.

Surveyor W. H. Horne has just re-turned from an inspection of the May Day, at Tintic, with which he expresses himself well pleased. The condition of the mine is much improved since his proposed consolidation of the Guggen-heim plants with those of the American last visit, through the recent discovery of good ore in the south drift on the 100 level. The management has there fol-lowed a streak of ore from one to three lowed a streak of ore from one to three or four feet wide for about fifty feet, and as it is within one hundred feet of the ore body on which the Yankes Consolidated people were stoping Mr. Horne looks for an improvement in May Day from now on. The ore is said to give good values in silver and lead. probable that the result will be a long, and serious contest. It is understood

JUDGE TIMMONY'S COURT.

Levi Notner, John Locas, Adam Blotes, Henry Rose and James Thompson constituted the Sunday drunk aggregation, and each were fined \$5, or five days at hard labor.

five days at hard labor. Steve Clancy and John Welch were ac-cused of assautiling one Charles Man-ning, a bartender at the Clipper saloon. Welch, the left side of whose face looks like it had been hit by a freight train, said: "Your honor, I'm as innocent as that there table." The court looked at the table but said nothing. Clancy said he could not remember anything about it. Then Mr. Manning was placed upon the stand and he was requested about it. Then Mr. Manning was placed upon the stand and he was requested to refresh the memory of the two gen-tlemen. He told how on Thursday night the men entered the saloon and called for the drinks and when he po-litely asked them for the price of the beer, they assaulted him, inflicting a se-

tivation of hops he said: "In Oregon, Washington and Califor-nia over 165,000 bales of 200 pounds each were raised last year and the crop grown in those States is shipped to all parts of this country and to Enrope. Outside of these three States hops are grown, to any extent, only in New York and the crop there is about half the size of ours, yet notwithstanding that there is so few hops grown the price paid for them by the brewers is not so high as to make an immense profit for us. The hop vines are similar to grape vines, they must be trimmed each year They are planted in rows about eight feet apart and the vine grows on a string dropped from a wire strung from poles from twenty to thirty feet high. We have to employ Chinese labor to help in the picking of the hops, and even then it is very expensive. The hop erop on the Western coast is assuming larger proportions each year.
