CARTER MEDICINE CO., Den York

DE LAMAR MILL DUST PROBLEM.

Statement Made that Wet Crushing Will Overcome It.

CORRESPONDENCE INVITED.

Electric Power Trouble at West Mountain-Good Tesora Ore-Brown Stone for "News" Building.

The mortality among the workmen at the De Lamar mill, at De Lamar, Nevada, is a matter that has attracted widespread attention among mining men, and has lately given rise to much discussion. Results have demonstrated that it is almost, if not absolutely, certain death for a man to work in that mill any considerable length of time, and the De Lamar mill has already

claimed over fifty victims.

So serious is the problem presented that the sympathies of parties not directly interested have been awakened. and a suggestion is now made which seems worthy of investigation. The claim is made that the De Lamar ores can be just as successfully handled by wet crushing as by the dry process, and that this method is now employed with entire success on the same character of

ores in South Africa and elsewhere.

If this is correct, such a change in methods would at least minimize the evil, if indeed it did not altogether overcome it. The "News" would be pleased to receive data on this very important subtest.

THE WEST MOUNTAIN.

Electric Power Greatly Retards Work at the Property This Week.

John Heimrich came in from Bingham last night and reports a kind of a mix-up at the West Mountain Placer, caused by trouble with the electric power. The subtle fluid has been playng all sorts of pranks with the agement's plans. Sometimes the nien have had nothing to do for hours but walt for the power to return and it was found necessary to discharge the force yesterday atternoon. Mr. Heimrich feels that if steam is not quite as up to date it is more reliable than the West Moun tain's power during the present week The placer is said to be looking well

however. Sluicing has been going on at No. 1 incline and when the power trouble is adjusted something may be expected to drop.

WILL USE BROWN STONE. Contract Made With Brownstone

Company for Nearly 1000 Tons. The contract for the stone needed the new "News" building was yester day, let to the Mt. Nebo Brownston company. The company will furnish between \$00 and 1,00 tons of stone which will be used in the columns and trimmings of the building. It is not fully decided, but is said to be more than probable that red pressed brick will be used on the front walls of the building. Mr. Kletting the architect, is said to favor a veneer of brown stone and should this be decided on later, it will mean an order of from 8,000 to 10,-000 tons more from the Brownstone

company. MONTANA MINES.

Mr. Cowans Reports a Big Strike Near the Pony District.

John F. Cowans returned vesterday from the Pony district in Montana, where Salt Lake capital is interested in the development of the Old Jee proper which gives much promise for the ure. The ore is being subjected to a number of experimental tests in order to fy by determine the kind of concento fully determine the kind of concentrating plant that is needed, Mr. Cowans brought down some samples of ore on which R. H. Officer, the assayer, is making a run today. The ore of the district is very similar in character. Near the surface free gold appears, but at a depth of 50 to 60 feet and sometimes less, the iron pyrite appears and holds the gold values. The ore concentrates eplendidly. In a recent test at Denver the Cammet table concentrated ore worth \$11\$ a ton to a product that ore worth \$11 a ton to a product that contained only 4 per cent silica and ran

nearly \$80 a ton in value.

Mr. Cowans reports a big strike in the Water Lode mine near the town of Red Bluff, about fifteen miles from Pony It is said that seventeen inches of ore has been uncovered which averages over \$1,000 a ton in value. The ore is similar to that found in the Pony dis-trict.

IN TINTIC DISTRICT.

Some Fine Samples of Iron Quartz-Pay Checks from Some Companies.

Eureka, April 12.-Some very nice Eureka, April 12—Some very nice samples of Iron quartz were brought in from the Grand View claims in East Tintic today by George T. Bridges. The rock which was taken from a fifty foot winze on the tunnel level, is said to carry values in silver, copper and fron. The owners of this property are doing a considerable amount of sys-tematic development work, which will no doubt demonstrate the actual worth of the ground. The employes of the Eureka Hill, Gemini, May Day, Centen-nial Eureka and Eagle and Blue Bell mines received their regular monthly checks this week and as a result the camp has been extremely lively the past few days. The Bullion Beck will follow suit on the 15th inst.

MINING MAN HURT. Thomas Neshit of the Grand Central Hit on the Head.

Special Correspondence, Mammoth, April 12.—A rock falling down the main shaft of the Grand Cen-tral mine struck Thomas Nesbit, the station tender at the 800 foot level, on the head, but the missile hit in such a way as to glance off without inflicting a serious wound. Mr. Nesbit was, however, unconscious for several minutes after being hit by the rock, but at this writing is recovered, the only evidence happened to fall down the shaft is not known and Mr. Nesbit considers himelf exceedingly lucky to have escaped serious injury.

SUNSHINE WATER CO.

Salt Lake Men Have Bought Its Entire Holdings.

The holdings of the Sunshine Water company in Camp Floyd district has changed hands. Local men, of whom J. G. Jacobs is said to be the prime

nover, are said to have bought out the company. The price is not stated, though it is believed to run close to \$50,000. The stock of the company consists of 500 shares of the par value of \$100, a share in addition to bonds amounting to \$25,000. The transfer was made by Messrs. Mills and Bianchard of Boston, who hold the control of the Overland Mining company. Mr. Jacobs is president of the new company; Sam-uel Park, treasurer; Frank Higging-botham, secretary, who, with J. A. Cun-ningham and E. B. Critchlow comprise the board of directors.

The Mammoth of Tintic had five cars

of crude ore on the market today with one car of concentrates.

MAMMOTH LOOKS WELL. Ed Sheets Returns from Camp-May

Day Ore on the 100 Level. Ed Sheets, the well known stock broker, returned to the city today after visiting the Mammoth, Lower Mammoth and May Day mines at Tintic, Mr. Sheets reports the Mammoth to be looking weil. The drift from the 1900 is still going forward and great things are looked for when the gold chute running down from the 1900 is intercepted. On the 800 glso the mine looks very well at the point where the ore ery well at the point where the ore bute sunning through a corner of one of the Grand Central claims, was en-

Of the May Day Mr. Sheets says a magnificent showing appears on the fifty-feet level. The chute has been caught on the 100 level also, but the ore does not look so good, for the reason massibly that it has not yet been on, possibly, that it has not yet been The Lower Mammoth shows some ex-

cellent ore carrying native silver on the 600 level. Two men are employed in the winze where the ore is said to look well but very patchy.

THE CYANIDE PROCESS. A Transvaal Metallurgist Writes the Good Effects of Plenty of Oxygen.

The following correspondence to the Engineering and Mining Journal from he pen of Mr. W. Jones, may have some local interest, dealing as it does with the use of oxygen in the cyanide pro-cess. Mr. Jones says: The use of air or an oxidized agent in dissolving gold in cyanide of potassium is not at all new, statements as to the need of all being about as old as those in relation to cyanide dissolving gold. When I went to South Africa as metallurgist for the Rand Central Ore Reduction company, found that it was the practice in treat. ing slimes to pump air into the solution vats, and without this air the gold could not be dissolved satisfactorily while with it we had no trouble in dis-solving practically all the gold. The use of the air or oxidizing agent was fully demonstrated by experiments carried ut under the direction of Mr. Charles Butters, the managing director of the

In this experimental work it was shown that with slimes which had been stored for some time and contained organic marter which had under-gone partial decomposition, or other ox ibizable substances such as sulphur, arsenic, etc., it was only possible to dis-solve a small percentage of the gold they contained; while after supplying oxyges, eather from air or permangan-ate of potash, the cyanide dissolved all the gold very rapidly. This led to the practice of forcing air to the bottom of the vats and allow it to bubble up through the solution; a patent being granted for this by the Transvaal gov-

This method of introducing the alrwas afterwards modified, the slimes being pumped from the bottom of the vat and thrown in at the top, while at the same time air was drawn into the suc-tion pipes. This method proved to be

less expensive and was also patented.

The theory of all this is that it is necessary to have expen present to inite with the pothsslum so as to allow the cyanogen to combine with the gold and, of course, the more oxidizable matter there is present, the more oxy-gen will be needed, before the cyano-gen can act on the gold. There can be no gold dissolved unless the cyanigen is in a free state to combine with it. If it were possible for gold to decompose cyanide of potassium would at once de-compose water to form potassium hydrate and hydrogen. This hydrogen must then combine with the cyanogen to form hydro-cyanic acld, and this would have no action on the gold, while if oxygen is present they form water

GIGANTIC MINING SCHEME. King Solomon Mining Co. Has Been

Capitalized for \$30,000,000. A dispatch from Spokane, Wash., quotes the Chronicle as saying: "The formation of the biggest mining company operating in the northwest and one of the most gigantic mining The King Solomon Mining com-headed by James R. Townsend of Lima, Ohio, has been capitalized for \$30,000,000 and has secured hundreds of cialms for two and a half miles alon Lake Kooteney near Alnsworth, B. C.

MINING IN KOREA.

Americans Mining There on a Concssion Covering 1,000 Square Miles.

A New York dispatch to the News today quotes J. Sloat Fassett, who has just returned from Korea, where he is iterested in gold mining, as saying: "Korea seems a good way from here, and it is, but we can ship a ton of freight from New York to our mines oar the Yalu river as cheaply as the

of Idaho and just about as quickly, too We have been interested in mining for We have been interested in mining for five years now on a concession covering 1,000 square miles. Our lease has 25 years to run. We have the right to mine any mineral but we have confined our attention to gold alone. All of our machinery is of American manufacture, as this country makes the best mining machinery in the world. "Korea is picturesque, beautiful, fertile, with an excellent climate and an industrious and agreeable people. At our mines we employ 75 white men and 2,000 coultes. Our venture has been and is an interesting experiment. We are

is an interesting experiment. We are the pioneers there, and we had to over come all the obstacles in a new and in most respects a wild country. There are many gold fields in Korea, as the country possesses a continuation of the gold bearing outcrops of Siberla and Man-churla, both of which are bound to be great gold producers. The Koreans have been mining with crude methods for many centuries and they are still at

Corea, like all the East, by which indefinite term may be embraced most of the Asiatic seaboard, is awakening to new industrial and commercial life. There is an immense opening for enter-prise and capital, which will undoubted be supplied as soon as It is und ood that the United States gover ment will protect its citizens in all le gilimate foreign enterprises. The ori-entals are kindly disposed toware Americans for many reasons, but chief ly because they recognize that Ameri-cans are not seeking political empire, and they feel that from them they can receive the most desirable assistance in industrial and commercial improve

ment.

"The consuming capacity of these great populations in the Orient is not understood fully. Neither is their ability to pay. We Americans take their breath away by our rapid methods, but Americans in the Orient are contract keepers, and this is recognized by the Asiatics. Asiatics. Civilization has swept around the globe, moving westward till it has again reached its ancient seats, and it is now taking hold of opportunities in the new Old East, with all the increased wisdom and experience of all its cen-"The enterprises which are now startis hardly a poor man's country. The opportunity is favorable for associated capital in large amounts skilfully directed, but not for individuals."

Profits of Mining.

Without doubt a great many people in Utah, as elsewhere, have lost money through investments in stock of fake mining companies. It seems that wherever there is renewed activity in the mining of the precious metals the class of operators who mine "suckers" are much in evidence. The latter class clean up big profits from their victims, who lose their money but often receive some useful experience in return. Very often their courage is buoyed up with fictitious statements from the mine where immense bodies of ore are blocked out but not shipped for many plausible reasens. It is impossible to eliminate the unscrupulous element from mining, but all mining properties are not run to "work" the public. Many of them are conducted in a legitimate manner and offer excellent returns to the investor as will be sen from the fact that the dividends naid and declared by hat the dividends paid and declared by Utah mining companies this year, t date, amount to the magnificent total of \$859,900. This sum does not include the returns from the Highland Boy, which, according to the last official report, is making a profit of \$60,000 a month. Neither does it include the revenue from Jesse Knight's mines. Capt. De Lamar's properties or the Jemini mine at Eureka. The amounts paid this year are as follows:
Daly-West, \$187,500; Mammoth, \$80,000; Silver King, \$300,000; Mercur, \$75,000; Centennial Eureka, \$190,000; Ontario, \$90,000; Swansea, \$20,000; Dixle,
\$5,000; Grand Gulch, \$2,400.

MINING NOTES.

The Uncle Sam of Tintic marketed five cars of ore today.

The Ceptennial-Eureka bad eight cars of ore on the market today.

Work has been resumed in the Dal-ton mine with fourteen men. The Conklin sampler reported twelve care of ore from Tintic today.

A car of ore was on today's mar-ket from the Lead mine at Bingham, Two cars of ore were marketed today from the Horn Silver of Frisco.

The South Swansea of Tintic had three cars of ore on the market today. A car of copper ore was on the market today from the Buckeye of Tintic.

Three cars of ore were marketed to-day from the Silver Shield of Bingham. C. B. Ford, of the Highland Boy office has returned from Boston after a stay of several weeks on business. Work has been resumed on the Gib-

bonsville placers at Gibbonsville, Idaho A short run is expected this season. A car of ore was on the market today from the Glasgow and Western Ex-pioration company Nevada mines.

Rumors are current of a change in the lower tunnel at the Valeo of Park City, but nothing definite can be learned. John Meeter is up from Gold Mountain, where preparations are being made to build a mill at the Annie

Laurle this year. The deal for the Snyder Improvement company's property is now being considered by the parties concerned,

but no decision has yet been reached. The Taylor-Brunton sampler reported sixteen cars of ore from Tintic, one from Nevada, four from Bingham and

two from Frisco today. De La Mar Lode: The Fawn mine at De La Mar has just been bonded for \$1,000. The property has a splendid surface showing. The last car of ore from the Tesora

carried 10.8 per cent copper, 20.35 ounces silver and \$2.80 in gold per ton. Work has ceased on the 300 level and sinking ias been started. Halley Times: Frank E. Wilson of Salt Lake has sold to John McGarvey of Blaine county, Ida., for \$1. placer claims numbered 1, 2, 3, 4, 5, 6, 7 and 8,

on Jones' bar, South Boise river. Ores and Metals: P. J. Donohue of Salt Lake and H. C. Basorn of Montana have purchased the Silverigoa mine, Fuerte, in the State of Sinaloa, Mex., for \$50,000 in gold. The records show this mine to have been discovered in 1670, and that during the 125 years that it was worked, it produced \$2.000,000... 000. The mine has been idle for nearly 100 ears. Twenty-five thousand ill be expended in a pumping plant for

the property. The Best Remedy for Rheumatism.

QUICK RELIEF FROM PAIN. All who use Chamberlain's Pain Balm for rhedmatism are delighted with the quick relief from pain which it affords, When speaking of this Mr. D. N. Sinks, of Troy, Ohio, says: "Some time ago I had a severe attack of rheumatism in my arm and shoulder. I tried numerous remedies but got no relief until I was recommended by Messrs. Geo. F. Parsons & Co., druggists of this place to try Chamberlain's Pain Balm. They recommended it so highly that I bought a bottle. I was soon relieved of all pain. I have since recommended it. a bottle. I was soon relieved of all pain. I have since recommended this liniment to many of my friends, who agree with me that it is the best remedy muscular rheumatism in the mar-

THE WANT COLUMNS of the Semi-Weekly News are read by from 75,000 to 100,000 people twice a week.

Beecham's Pills for stomach and fiver

Most women with female weakness suffer dreadfully from piles in addition to their other pains. They may be cured by using TABLER'S BUCKEYE PILE OINTMENT. Price, 50 cents in bottles; tubes, 75c. Z. C. M. I. Drug Dont

Elegant Easter goods at Kolitz.

An ounce of prevention is worth pound of cure, and a bottle of BAL-LARD'S HOREHOUND SYRUP used time is worth a staff of physicians with a drug store or two included Price, 50 cents. Z. C. M. I. Drug Dept

THE MEALS ARE ALWAYS GOOD.

The train is crowded with agreeable surprises, but it is in the dining car that one is most impressed with the Burlington's superiority. Now, with-out being too utterly dainty, I am ex-coedingly particular about my meals, and about the way they are served. For breakfast all I want is eggs, rolls, For breaking all I want is eggs, rolls, and coffee. In a Burlington dining car I am able to get just what I want, just what I would have at my own table, and for the small sum of fifty cents. The exquisite neatness of the napery makes a good meal taste all the better."

—Interview with a Denver merchant.

Twa trains a day from Denver to the Two trains a day from Denver to the tast—the Chicago Special at 8:00 a. m.; the Vestibuled Flyer at 10:00 p. m.— Omaha, Chicago, Kansas City, St. Louis. Through sieepers daily, Ogden to Chicago via Denver and the Burling-tor Poute.
