ARMOR PLATE

FACTORY TALK.

cusses Its Feasibility.

EXPERT ON THE SUBJECT.

Suggests That a Government Plant, if

vate Concern.

armor will be cared for in the legisla-

tion of this session of Congress. The

compelied to pay for the Krupp armor,

as it is definitely stated that \$5% per ton is the least agare at which it can

be obtained. On the other hand, there is a domand for a government armor

plate factory. This is, of course, re-sisted by the great steel concerns

which desire to furnish the government with armor and also by many others

on the ground that they believe it may be inexpedient for the government to

engage in the business of manufactur-ing armor. A high officer of the navy

the same degree of earnestness as

manufactures.

receiving high salaries to perfect steel

BARRED FROM PATENTS.

Under the law now existing army and navy officers are barred from the benefits derived from inventions and patents which they may perfect, and this in time would take away some in-centives to investme upon what point

centive to improve upon what now seems to be the very best in all relat-

ing to armor and ordinance. "Take for instance, the Washington gun fac

tory," said this officer. "There has not been a single improvement in seven

years in the manufacture of guns in that factory, and the officers in charge

have not made any inventions or im-provements. More than this, officers are changed from time to time and do not continue in the manufacturing

'It is a part of their profession to

know about armor and ordnance, but they cannot be expected to have the

the treatment of lupus. Though the point shows only a barely visible viola glow, it emits a powerful non-lumin ous radiation. This may be photographed, and has all the properties of ordinary ultra-violet rays, with bo resemblance to Roenigen rays.

From Greenwich records since 180 an English meteorologist finds that when the first three months of the year are wet there is a tendency for he summer to be cool. The first quart or of this year having been wet, he is ble to say that if next summer is hot or if it has more than sixteen hot days, it will be the first occurrence of such a sequence in sixty years.

A speciment of edible earth lately brought from Fiji-a soft, pale pink, clayey substance-proves to be an alumnum substance proves to be alumnum aluminum silicate, probably kaolin with about 7.6 per cent of iron exid as a mechanical impurity.

An important work upon which Mr J. E. Stead, a British chemist, has been engaged for a number of years, is the nderoscopic study of metals. Exper-ence has made it easy to cut, grind polish and etch ordinary metals and a loys, and specimens can now ared for the microscope in a few min ices. The results shown have bet largely unexpected. In a recent demon stration, pig iron was shown to have constituents gathered into separa centers, the carbides being in isolate silvery crystals, while the phosphoria and sulphur compounds were each distinctly separated. A brilliantly polish ece of white pig iron, containing car on, sulphur and phosphorus, was the ated until it became purple great difficulty seems to be in the high he microscope, the constituents were ound to have diverse colors, the Iro price which the United States will be ing a fine sky blue, the carbides an orange color, the phosphides a pale-brown-yellow, and the sulphides a slaty blue. This method of identifying phophiles is a new discovery which will be of great value to iron manufacturers a of a real value to from manufacturers as a simple means of telling whether iron contains phosphorus. The microscope shows that alloys, instead of being homogeneous as has been thought, are built up of various crystals, and is likely to prove of practical service to metal-workers in many ways.

suggested to me the other day, in dis-cussing this subject, that in case the The use of ozone for purifying lin-seed, olive, palm, colza and other oils, seems to have proven very satisfactory. Air is dried in a chamber containing burntalime, passed through the ozorizers, and then compressed in an iron reservair. This ozonized air is used for ectifying the oils, a ton of linseed of quiring 310 to 315 cubic meters of the r. This quantity of ozonized air is dimated by Dr. Lew Kowstsch to cost francs, and the total cost of treating e tons of oil daily does not exceed ? officers would be inclined to perform their duties and perform them well, francs per ton. Ozonizing the oil is said to give less waste, quicker refinement and a handsomer product.

Flowering plants are not certainly known to reach a greater height than 17,000 feet in the Alps. At least half a dozen species-including a sacifrage, a mallow, a valerian and several compos-ite-have been brought by Sir Martin Convoy from heights of 18,000 to 18,500 feet in the Bolivian mountains.

The most complete collection of works on costume, over 10,000 volumes, has been given the Prussian State, by Baron von Lipperheide.

Electrification is likely to become at important condition in the classifica-tion of climates, with warmth and cold rison Sparri ofsture and dryness. This is the lew of Dr. Schliep of Baden-Baden ho finds that the atmosphere is usully positively electrified, but that there a few days in every month when negative electrification can be observed. morning, Judge E. V. Higgins presid-ing. There were present besides the local memb 5 s of the bar, Attorneys D. D. Houtz, V. K. Reid, F. S. Richards, J. M. Cannon, S. A. King, S. R. Thur-man and a large number of witnesses for the various parties concerned. The case called was the Deseret fr-tigation company and Learnington Ir-

the "Change of Life" by Lydia E. Pinkham's Vegetable Compound.

" DEAR MRS. PINEHAM :-- When I first wrote to you I was in a very bad condition. I was passing through the change of life, and the doctors said I had bladder and liver trouble. I had suffered for nine years. Doctors felled to do me any good. Since I have taken Lydia E. Pinkham's Vegetable Compound, my health has improved very much. I will gladly recommend your medicine to others and am sure that it fruit bloom will prove as great a blessing to them as it has to me."-MRS. GEO. H. JUNE,

901 DeKalb Ave., Brooklyn, N. Y.

Relief Came Promptly

"DEAN MRS. PINKHAM :-- I had been under treatment with the doctors for four years, and seemed to get no better, I thought I would try your medicine. My trouble was change of life, and I must say that I never had anything help me so much as Lydia E. Pinkham's Vegetable Compound, Relief came almost immediately. I have better health now than I ever had. I feel like a new woman, perfectly strong. I give Lydia E. Pinkham's Compound all the credit, and would not do without her medicine for anything. I have, recommended it to several of my friends. There is no need of women suffering so much for Mrs. Pinkham's remedies are a sure cure." - MAHALA BUTLER, Bridgewater, Ill.

Another Woman Helped

"DEAR MRS. PINKHAM :--- I took Lydia E. Pinkham's Vegetable Compound during change of life and derived great benefit from its use."-MARY E. JAMES, 136 Coydon St., Bradford, Pa.

guilty to the charge of disturbing the peace last Sunday evening. They were arraigned before Justice Wm. H. Smith this morning. A fine of \$7.75 was im-posed on each of the offenders. A dance for the benefit of the Sco-field euferers will be given next Fal-

field sufferers will be given next Friday evening.

A Woman's Awful Peril.

"There is only one chance to save your life and that is through an operation" were the startling words heard by Mrs. I. B. Hunt, of Lime Ridge, Wis. sars, i. b. Hunt, of Linie Andge, Wis, from her doctor after he had vainly tried to cure her of a frightful case of stomach trouble and yellow jaundice. Gail stones had formed and she con-stantly grew worse. Then she began to use Electric Bitters which wholly cured her. It's a wonderful Stomach. Liver and Kidney remody, Cures Dyspersia, Loss of Appetite. Try it, Onl persia, Loss of Appetite. Try it. Only 50 cents. Guaranteed, For sale by Z. C. M. I. Drug Dept.

rigation company vs Samuel McIntyre et al. Mr. Thurman representing the plaintiffs, briefly outlined the claims of his clients and stated the facts which they expected to substantiate by the evidence. He then called L. R. Cropper for the first witness, who stated that he resided at Deseret and had done so for the past twenty-five years; that great many acres of land had been brought under cultivation recently, but that less water was required now than formerly to irrigate the land because the land being porous absorbed large quantities until it had been thoroughly saturated, after which very little was

F. M. Lyman Jr. was the next witness called; he stated that he was an engineer and had made some measure ments for the people of Deseret at the mouth of their canal; the volume water in and carrying capacity of their canal was then testified to. He had also measured the Wellington canal and gave the dimensions of the same.

John Sytler was then called and testified that he resided at Oasis and that the acreage of land was increased some, but that the quantity of water which reached their canal was less; also, that the reduction of water was not due to natural causes, such as dry seasons. Much documentary evidence was introduced during the day for the purpose of linking together the chain

of title. (mmmmmmm) OUR NEICHBORS.

FRANKLIN, IDAHO.

A Correction Regarding the Demise Miss Corbin.

Special Correspondence.

Franklin, Idaho, May 15 .- The "News" correspondent regrets to learn that his article regarding the death of Mrs. Corbin wounded the feelings of her husband. Mr. Corbin says it is not correct that his wife said if they had to move again they would have to move her dead body. The "News" corres-pondent disclaims any intention of writing anything that would hurt Mr. Corbin's feelings, and willingly apologizes for any statement that did him any injustice, as Mr. Corbin, as far as the correspondent knows, is an indus-trious and honest man.

It should have been mentioned in the previous letter, that Mrs. Corbin was given to spells of mental aberration and was not responsible when she com-

mitted the act that led to her death. ----

Beware of a Cough.

A cough is not a disease but a symp-tom. Consumption and bronchilis, which are the most dangerous and fatal diseases, have for their first indication a persistent cough, and if properly treated as soon as this cough appears are easily cured. Chamberlain's Cough Remedy has proven wonderfully suc cessful, and gained its wide reputatio and extensive sale by its success in curing the diseases which cause cough If it is not beneficial it will not

bronze. The pipe is remarkably flexi-ble, and its one disadvantage of tending to untwist through rough usage is overcome by making it double, with op-posite windings. It is intended for mining purposes instead of rubber hose. It is made up to 8 inches in diameter, and to withstand pressure up States cannot use, but which would em-ploy the experts, the skilled labor and rdinary workmen that are necessary or the manufacture of our armor to 200 atmospheres. FOR THE SENATE TO DECIDE.

The whole armor plate question is now before the Senate. The House of Representatives is controlled by rules which provide for "points of order." As a cloud observatory the station on Ben Nevis, the highest point in the British Isles, is unique. For thirteen British Isles, is unique. For thirteen years foggy and fair weather records have been kept, and these show that in continuous clear weather it practiand these "points" are often utilized to the detriment of the majority and of cally never rains, while in continuous tentimes to prevent meritorious legisla-tion. It was by the invocation of this for the rainfall averages an inch a day, point of order that the House could not vote upon the proposition for an armor plate factory, and it could not sustain the committee on naval affairs in a provision for supplying armor plate at maximum preces, \$545 per ton, for the subject of a supplying factor the sec This station in the clouds has an altitude of 4,407 feet.

A new system of gun-firing, consisting in enlarging the chamber at the breech and filling it with water beween the charge and the projectile, is laimed to give enormously high muzzle velocities, with less fouling and orrosion.

A Sprained Ank c Quickly Cured.

"At one time I suffered from a severe sprain of the ankle," says Geo. E. Cary, editor of the Guide, Washington, Va. After using several well recommended nedicines without success, I tried Chamberiain's Pain Balm, and am pleased to say that relief came as soon as I began its use and a complete cure speedily followed. This remedy has also been used in my family for frost bitten feet with the best results. I cheerfully recommend its use to all who may need a first class liniment."
