the blood coming in contact with the skin and producing redness, inflammation and almost intolerable itching. An inactive state of the system and sluggish condition of the eliminative members leaves the waste and refuse matter of the body to collect and sour instead of passing them off through nature's channels of bodily waste. The blood in its efforts to purge the system of all foreign matter absorbs this acid and throws it off through the pores and glands of the skin. The acrid humor seems to coze out and set the skin on fire, the straw colored, sticky fluid drying and forming crusts, and the itching is intense. When these pustules are scratched off the skin is left raw and feverish and often a solid sore is formed and kept up by the constant escape of acids from the blood. Local applications of salves, powders, lotions etc. are desirable and should be used because they allay the itching and give the sufferer temporary comfort, but are in no sense curative, because they cannot reach the seat of the trouble, which is in the blood.

LAWSON FOUGHT TO FINISH.

He Finally Won But Others Were Only Inches Behind in Exhausting

It was everybody's turn to be game at he saucer track last night and any one f three events would have been sufficient make the meet remarkably good. As it was it is one of the great number that palify as the best meet ever held. In he leading profesional event the experation of th public did not meet the goods elivered by the riders. That there would or theing was anticipated, but no one ooked for it to go to the extent it did, of putting almost every rider on the track his utmost limit.

The contest was one to be long remem-

ered. Every rider had planned his race, and except Lawson rode it out beautifully. In the case of the speedy liver it was early shown that the combinations up the line shead of him were pulling the leaders away too fast, and he had to come out from behind his leaders and battle alone to as all in finish, inches only in the lead. McFarland to cover the distance lost by the slower pace of Pye and Burris kicked himself all in in two laps to free Lawson near the forward hunch. Like the other two riders he dropped out after doing his best.

The race was run right from the pistol. Lawson and McFarland at scratch fell in with McFarland in the lead, and tacked onto Pye, who soon went all in with only a slight gain on a number of combinations among the lo men of the forward bunch, who were pulling Clark for a final battle with liver. Downing and Fogler rode free, and seem to be out for loot on any preserves they could break into.

TWO BOLD PIRATES. ind except Lawson rode it out beautiful-

. TWO BOLD PIRATES.

Shunning the pace, they fell onto the rear wheels of the various combinations in the hope of being pulled to a chance for victory, but last night the speed was too great and they fell by the wayside. The rear bunch changed pace each lap, till liver saw he had to take a chance at it to have any hope of getting up, and he began a skiles of alternating currents with McFarland. In the front bunch, which kept nearly half a lap ahead, the plan of iding each pacemaker all in was followed, and consequently from both bunches there as thered in the rear a string of camp rediowers who had surrendered early.

LAWSON HAS TO WORK.

About five lars from home McFarland and Lawson realized that they could not both ride to the finish, and McFarland leosened the full limit of his mighty sprint, and fell out exhausted. Iver was then gliding into the bunch, and past the exhausted men in its rear, the only survivor from the back men. Up near the front the gong lap brought Clark out to challenge him but Clark was not feeling his oats just then and two fresher men haped for the chance. They were Williams and Palmer, and as Clark was passed near the stretch he challenged liver for a ride in which the brilliant sprint of the mighty champion did not make any more conspicuous than the lesser lights who fought him down the stretch. At the tape Lawson was ahead, and that was all that could be said for him. Palmer was only inches behind, and Williams was se close up it was hard to pick a man for second. The time was 2:1 and was over six seconds under the world's record, previously held by Samuelson.

HUME GETS BUSY

Hume usually is a weather gage to what Lawson will do. Last night broke a record early in the evening, and loosened a sprint in the handicap that is unlike any other man's sprint except Lawson's, and consequently he pulled down first place. It was to qualify in his heat that he broke a world's record, doing the dis-tance in 1:55 2-5.

WEST TAKES HIS.

The crowd cheered when Hume was passed by West in the five-mile event, but they did not notice West ride under Hume's protection all the way around, without any effort on Hume's part to drive him from cover to an occasional pacemaking, lap, and a final sprint in which Hume passed the word to West that it was time for the pair to "skiddoo" from the bunch. Of course the race was not fixed at the finish, as Hume honestly rode all in and then fought it out with West with the advantage in West's favor. The five-mile motor lap ended the evening nicely by being the best behaved motor race ever seen. Three of the four machines knosened up in their best form. chines icosened up in their best form and there was an actual race between
