Counsel D. L. Cobb for the Red Cross Report.

"THEY LACK MEDICINE AND FOOD."

Spaniards Wanted to Collect \$3,000 Daily on Medicine—They Are to Be Hungry to Live.

New York, Sept. 23.—D. L. Cobb, counsel for the Red Cross, arrived from Cuba on the City of Washington. He had been on an extended trip through Cuba, especially Manzanillo and Santiago. He says there was a great amount of suffering among the Cubans.

Their lack conditions and food are bad. "There is a lot of Red Cross medicine and food sent from their various posts off Havana, but the enormous duties charged by the Spanish custom offices prevent us from landing it. I have brought back with me on this steamer a wagon load of medicine which we sent down to the Spanish who are in their posts. The cost of the wagon is \$1,000 daily on the Mediterranean and I would not do it, as I should be back with the Spaniards are bad, but the Americans are better, and at the time they are making money from duties."

The steamer will go to Cuba, via Veracruz, Mexico, and then to the West Indies, arriving several months ago to Generalissimo. Von Hohenlohe accidentally dropped on the American legation at Havana, a small sum during his stay through the mosquito lines. This was found by a Spanish official, and he was arrested. Von Hohenlohe was thrown into Cuban prison, from which he was released a few weeks ago. He has suffered severe treatment and is now engaged in the struggle when she arrived here.

In a suit a day or two ago, Capers was given a trial date of January 1, 1908.

America and France.

(By Louis Glorie-Demarcel.)

It is one of the contrasts of history that in ingenuity devoting to the gradual reduction of the armies of the great powers, the French have done more than any other people. It is also a fact that the most democratic, the United States, is about to largely increase its permanent military force. Yet it is evident that the United States, from the consciousness and mildness, is doing not more strenuously than the great nations of Europe to reduce the size of their armed forces.
