ASTHMA Quickly and Permanently **CURED**

Dr. Stinson's Asthma Remedy is unequaled as a positive Alterative and Cure for Asthma and Dyspepsia, and all their attendant evils. It does not merely afford temporary relief, but is a permanent cure. Mrs. B. F. Lee, of Belmore, O., says of her: "I am surprised at the speedy effects of your remedy. *It is the first medicine in six years that has loosened my cough and made expectoration easy. I now sleep all night without coughing.*" If your druggist does not keep it, send for treatise and testimonials to

AYER'S CHERRY PECTORAL,

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma and Consumption.

The few competitors which have won the confidence of mankind and become household words, among so many pretenders, must have extraordinary virtues. Perhaps no medicine ever secured so wide a reputation, or maintained it so long, as AYER'S CHERRY PECTORAL. It has been known to the public about forty years, by a long continued series of marvelous cures, that have won for it a confidence in its virtues, never equaled by any other medicine. It still makes the most effectual cures of Coughs, Colds, Consumption, that can be made by medical skill. Indeed, the Cherry Pectoral has really robbed these dangerous diseases of their terrors, and, to a great extent, and given a feeling of immunity from their painful attack, that is well founded, if the remedy be kept in season. Every family should have it in their closet for the ready and prompt relief of its members. Throat disease, suffering, and even life is saved by this timely defence. The prudent should not neglect it, and the wise will not. Keep it by you for the prevention it affords by its early use in sudden attacks.

AMERICAN.

Railway and Navigation Company.

CHICAGO, 11.—President Villiard, of the Oregon Railway and Navigation Company, has just issued his annual report to the stockholders. It is shown in his report the company has during the past year constructed 250 miles of standard gauge road and before January 1st next Mr. Villard expects that fully 800 miles of new road will be completed and in active operation. There has been constructed 1,464 feet of Howe truss and 11,208 feet of trestle and the large bridge over Snake River, two miles below Texas Ferry, presenting an aggregate length of 1,415 feet, and is now in process of construction. All questions of right of way have been settled at comparatively small cost to the company and with scarcely any litigation. Right of way across the Umatilla Indian Reservation, on the Baker City line, was amicably settled at a council, by an agreement on the part of the company to pay the Indians $2.50 per acre for all wild lands and $2.75 per acre for all cultivated land, necessary for the roadway and depot grounds, located within the reservation, the whole cost of which will be about $43,000. When all deliveries shall have been made under existing contracts, the railroad equipment of the company will consist of 51 locomotives, 18 passenger cars, four Pullman sleeping cars, two baggage cars, two combined baggage, mail and express cars, 600 covered freight cars, 500 flat cars, 100 stock cars, 40 hand cars. There was expended during the year for railroad construction $4,247,465.13; for other construction, $2,443,548; for railroad equipment, $29,656,830; for other equipments, $11,668,974. The various lines operated by this company represent a total of 1,591 miles. Total receipts from all sources during the year were $9,509,920; total disemhursements, $8,014,360; traffic gross earnings, $3,730,245; operating expenses, including taxes, $2,063,383, showing a net earning of $1,666,861 for 1879-80. Corresponding results were: gross earnings, $2,989,725; operating expenses, $1,332,411; net earnings, $1,657,230. Against 147,817 passengers and 379,840 tons of freight carried in 1879-80 there were carried in 1880-81, 167,78 passengers and 622,025 tons of freight, showing an increase of 19,970 passengers and 243,181 tons of freight. The report enlarges somewhat on the consolidation recently effected with the Northern Pacific Railroad and the transfer of the contracting power over both corporations to a third corporation. The Oregon and Transcontinental Railroad having an authorized capital of $50,000,000. Mr. Villard expresses the conviction that the large properties interest of this company in the other companies is the best guarantee to the latter that its power will be exercised to promote their legitimate development to the fullest extent, or in other words, that the new company can only promote its own interest as a great holder of Oregon railroad and navigation and Northern Pacific stocks by taking the best care of every other stockholder in both companies.

Buying Another Chicago.

At Crown Point, Lake County, Indiana, to-day one of the largest real estate transfers ever made in this section of country was recorded. Mrs. Caroline Forsyth and her husband, Jacob Forsyth, signed a warrantee deed to an 8,000 acre tract of land owned by them, located at Sheffield, Lake County, and bordering on the Illinois line at the foot of Lake Michigan, and about fourteen miles from Chicago. This is where the new city of East Chicago is to be located, and is also the terminal point of the Belt Line Railroad. Forsyth receives $1,000,000,000 for his property, and $333,333 was paid to-day. The rest comes due in one, two, three, four and five years, in equal annual instalments. He made his deed to Wm. Green, of New Jersey, who immediately gave a warrantee deed to the East Chicago Improvement Company, consideration $3,000,000. This company has recently formed a coalition with the Belt Line Company. The capital stock of the combined company is $12,000,000, and is already placed, mostly abroad. Alexander & Green, of New York, are the financial agents of the enterprise. The intention is to found a great city on this site, which is admirably adapted to the purpose.

Patti.

NEW YORK, 11.—Patti, speaking of her reception says: I must admit I was disappointed when I saw the house not filled. I imagined I was going to have a great house, in which there would not be a single seat unoccupied, but I noticed that there was a great many empty benches. Another thing that struck me as odd, was the appearance of the audience. I am accustomed in Europe to see audiences in full evening dress, but when I came out last night it seemed as if everybody was in evening costumes. I have heard a great deal about high prices, since I came here, and I must say I feel very badly to think there are people who think I am charging an extortionate price for my concerts. Perhaps $10 may seem a large amount to pay for a seat, but is it really too high, when you consider what is charged for such an entertainment at the capitals of Europe? In Milan, for instance, I get $3,000 a night, where I have no risk, where I provide no company, where I simply go to sing. In Vienna and Paris I get the same compensation, and in London I receive $2,000 a night for the entire season. I intend to sing in London, simply because it is for Mr. Guy, under whose management I have sung for 20 years in opera in London.

A Banter.

E. S. Stokes authorizes the *Turf, Field and Farm* to say for him: I will match Mr. Mackay's California bred Sweetheart against Mr. Raymond's Kentucky bred Phil Thompson, mile heats, three in five, for $10,000 a side, the race to be trotted at the same time in July at Chicago or New York, that track to be chosen which will offer the best terms as to gate money. The expenses of bringing Sweetheart from San Francisco will be considerable, and therefore I will put up a forfeit of $8,000 against $5,000, and an additional $5,000 five days before the one fixed upon for the race; or if Raymond will trot in California, I will put up a forfeit of $5,000 against his $3,000. I will either give or take $2,000 for expenses.

Grant.

The *Tribune's* Washington special this morning says: Grant's overshadowing influence in the new administration is generally regarded here as the first gun in the warfare which Blaine and the anti-stalwarts intend opening on the President. Your correspondent has been Grant with reference to these several allegations, and as a matter of public interest, not less than of justice to himself and the President, it may be said he denounces them as false and malicious. He says he has not sought in any way to influence the President in the manner imputed to him.

MacVeagh.

Attorney General MacVeagh came on from Philadelphia last night to see the President, and returned as soon as the interview, which was a protracted one, was over. The talk is that the foresight of the President in insisting that MacVeagh shall not retire from the Cabinet until there was a finality of these prosecutions, has been abundantly vindicated.

Trades Unions.

There is a conference of trades unions held here to-night for the purpose of taking steps to issue an address to the Trades Union of England, France, Germany and the United States, calling attention to the condition of the laborers in Ireland. A mass meeting to further the project, will be called soon.

Gen. Dumont's Report.

WASHINGTON, 11.—Gen. Dumont, Supervising Inspector General of steamboats, in his annual report, recommends that the Board of Supervising Inspectors be abolished, instead of which the Secretary of the Treasury will be empowered to convene a mixed committee, composed of supervising, local and assistant inspectors, to examine and report to him upon the efficiency of anything to be used upon steamships which requires his approval. General Dumont suggests the advisability of appointing supervising, local and assistant inspectors by the Secretary of the Treasury, and nomination in each case of an immediate superior officer of each grade, thereby properly holding each superior officer responsible for general finish and efficiency of his immediate subordinates; also giving a superior officer power to suspend any subordinate pending investigation of charges by the Secretary of the Treasury, for incompetency, neglect of duty or misbehavior of a subordinate. As upon the faithful performance of the duty by officers of this service, depend the lives of millions of people and the safety of an incalculable amount of property, the necessities of dealing promptly and summarily with any to whomever suspicion attaches of neglect of duty, must be conceded. A file of the office records one experience, when 15 valuable human lives were the penalty paid for continuing the duties of one negligent officer, pending examination of the charges of remissness of duty, in a case where lives were previously lost.

Gen. Barnes' Report.

Surgeon General Barnes says the medical department of the United States Army for the fiscal year ending June, 1883, will need $250,000. The increased appropriation is necessary partly because the department furnished medical and hospital supplies for the use of several thousand Indians, prisoners of war. Death from all causes among white troops, 197, or nine per 1,00 of mean strength. Deaths of colored soldiers from all causes 48, or 20 per cent. of 1,000. The Surgeon-General renews his recommendation for a fireproof building, for a medical museum and library at an estimated cost of $250,000.

Railroad Report.

The report on the railroad problem by Jos. Nimms, Jr., Chief of the Bureau of Statistics, embraces a large territory of subjects, including freights, charges, etc. He says reduction in cost of transportation on the railroads of the country generally is very clearly indicated by a table embracing data with respect to 13 leading railroads. It appears the number of tons of freight carried on 13 roads increased from 45,557,002 tons during 1873 to 78,150,913 tons during 1880, an increase of 71 per cent. The receipts from freight, however, increased from $112,004,648 in 1873, to $143,388,178 in 1880, an increase of only about 28 per cent. This small rate of increase in receipts in proportion to the increase of traffic, was due to the fact that the average rate per ton charged on these 13 railroads fell from $1.77 per ton per mile in 1873, to $1.07 per ton per mile in 1880, a decrease of 39 per cent. A commission of experts is recommended for an investigation of the subject of railroad transportation.

That Election Fight.

MERIDEN, Mass., 11.—The correct story of the shooting at the polls is, that while the State election was progressing at Marion, in this county, Joseph Barrett, an aged white, having just voted, was insulted by a negro at the polls. Barrett raised his arm to resent it with a blow; some say he drew a stick on the negro, but before he could strike Frank Johnson shot him in the neck, severing the jugular vein and killing him instantly. Geo. Johnson, (colored), formerly a slave of Barrett, ran up to defend his old master, and was shot by a negro, and he died to-day. General shooting among the negroes commenced, the whites being all unarmed. Jeff Segars, a white, was killed by a negro named Sam Gillespie. Vance Segars was wounded and is expected to die. Alex. Harveys, democratic candidate for county assessor, while 50 yards from the scene, was rushed upon by the negroes and killed, being shot through the head. He was shot in the face by Frank Johnson after he was dead. James Hodges, white, was wounded in the hand. The negroes doing the shooting were Gillespie, Frank Johnson, Allen Brown and Martin Malone. They were from another precinct. Will Vine, white republican, is said to have given the order to the negroes to begin firing. As soon as the news reached Meriden, six miles distant, great excitement was manifested. The sheriff's experience with them has been detailed already. Several rioters have been captured and jailed. A circus is in town today, and the streets are crowded with peaceable negroes. The fusionists' doctrine for the negroes to carry pistols at the polls was the cause of this disturbance. Vance's house was the headquarters of the white republicans.

The resignation of Governor Fremont, of Arizona, was to take effect on the 31st of October.

"I too have cought the fever," said Mr. Harvey B. F. Keller, recorder of deeds, Ottwa, Kansas, "and have long been convinced of the merits of St. Jacobs Oil. The principal use to which the Oil has been devoted in my family has been for rheumatism, which disease it subdues with wounderful quickness."

Important to Grocers, Packers, Hucksters, and the General Public.

THE KING FORTUNE-MAKER

OZONE

A New Process for Preserving all Perishable Articles, Animal and Vegetable, from Fermentation and Putrefaction, Retaining their Odor and Flavor.

"OZONE—Purified air, active state of Oxygen."—*Webster.*

This Preservative is not a liquid, pickle, or any of the old and exploded processes, but is simply and purely OZONE, as produced and applied by an entirely new process. Ozone is the antiseptic principle of every substance, and possesses the power to preserve animal and vegetable structures from decay.

There is nothing on the face of the earth liable to decay or spoil which Ozone, the new Preservative, will not preserve for all time in a perfectly fresh and palatable condition.

The value of Ozone as a natural preserver has been known to our ablest chemists for years, but, until now, no means of producing it in a practical, inexpensive, and simple manner have been discovered.

Microscopic observations prove that decay is due to septic matter or minute germs, that develop and feed upon animal and vegetable structures. Ozone, applied by the Prentiss method, seizes and destroys these germs at once, and thus preserves. At our offices in Cincinnati can be seen almost every article that can be bought of, preserved by this process, and every visitor is welcome to come in, taste, smell, take away with him, and test in every way the merits of Ozone as a preservative. We will also preserve, free of charge, any article that is brought or sent prepaid to us, and return it to the sender for him to keep and test.

FRESH MEATS, such as beef, mutton, veal, pork, poultry, game, fish, &c., preserved by this method, can be shipped to Europe, subjected to atmospheric changes and return to this country in a perfect state of preservation.

EGGS can be treated at a cost of less than one dollar a thousand dozen, and be kept in an ordinary room six months or more; thoroughly preserved; the yolk held in its normal condition, and the eggs as fresh and perfect as on the day they were treated, and will sell as strictly "A choice." The advantage in preserving eggs is readily seen: there are seasons when they can be bought for 8 or 10 cents a dozen, and by holding them, can be sold for an advance of from one hundred to three hundred per cent. One man, with this method, can preserve 5,000 dozen a day.

FRUITS may be permitted to ripen in their native climate, and can be transported to any part of the world.

The juice expressed from fruits can be held for an indefinite period without fermentation—hence the great value of this process for producing a temperance beverage. Cider can be held perfectly sweet for any length of time.

VEGETABLES can be kept for an indefinite period in their natural condition, retaining their odor and flavor, treated in their original packages, at a small expense. All grains, flour, meal, etc., are held in their normal condition.

BUTTER, after being treated by this process, will not become rancid.

Dead human bodies, treated before decomposition sets in, can be held in a natural condition for weeks, without puncturing the skin or mutilating the body in any way. Hence the great value of Ozone to undertakers.

There is no change in the slightest particular in the appearance of any article thus preserved, and no trace of any foreign or unnatural odor or taste.

The process is so simple that a child can operate it as well and as successfully as a man. There is no expensive apparatus or machinery required.

A room filled with different articles, such as eggs, meat, fish, etc., can be treated at one time, without additional trouble or expense.

☞ *In fact, there is nothing that Ozone will not preserve.* Think of every thing you can that is liable to sour, decay, or spoil, and then remember that we guarantee that Ozone will preserve it, if in exactly the condition you want it for any length of time. If you will remember this, it will save a great many questions as to whether Ozone will preserve this or that article—*it will preserve any thing and every thing.* ☜

There is not a township in the United States in which a live man can not make any amount of money, from $1,000 to 10,000 a year, that he pleases. We desire to get a live man interested in each county in the United States, in whose hands we can place this Preservative, and through him secure the business which every county ought to produce.

A FORTUNE

Awaits Any Man who Secures Control of OZONE in any Township or County.

A. C. Bowen, Marion, Ohio, has cleared $1,000 in two months. $2 for a test package was his first investment.

Woods Brothers, Lebanon, Warren County, Ohio, made $8,000 on eggs purchased in August and sold November 1st. $3 for a test package was their first investment.

P. K. Raymond, Morristown, Belmont County, Ohio, is clearing $2,000 a month in handling and selling Ozone. $2 for a test package was his first investment.

D. P. Webber, Charlotte, Eaton County, Mich., has cleared $1,000 a month since August. $2 for a test package was his first investment.

J. B. Gaylord, 80 La Salle Street, Chicago, is preserving eggs, fruit, etc., for the commission men of Chicago, charging 1½ cts. per dozen for eggs, and other articles in proportion. He is preserving 5,000 dozen eggs per day, and on his business is making $9,000 a month clear. $3 for a test package was his first investment.

The Cincinnati Feed Co., 416 West Seventh Street, is making $5,000 a month in handling bromost oats, preserving and shipping it as feed to all parts of the country. Malt unpreserved sours in 24 hours. Preserved by Ozone it keeps perfectly sweet for months.

These are instances which we have asked the privilege of publishing. There are scores of others. Write to any of the above parties and get the evidence direct.

Now, to prove the absolute truth of every thing we have said in this paper, *we propose to place in your hands the means of proving for yourself that we have not claimed half enough.* To any person who doubts any of these statements, and who is interested sufficiently to make the trip, we will pay all traveling and hotel expenses for a visit to this city, if we fail to prove any statement that we have made.

How to Secure a Fortune With Ozone.

A test package of Ozone, containing a sufficient quantity to preserve one thousand dozen eggs, or other articles in proportion, will be sent to any applicant on receipt of $2. This package will enable the applicant to pursue any line of tests and experiments he desires, and thus satisfy himself as to the extraordinary merits of Ozone as a Preservative. After having thus satisfied himself, and had time to look the field over to determine what he wishes to do in the future—whether to sell the article to others, or to combine it to his own use, or any other line of policy which is best suited to him and to his township or county—we will enter into an arrangement with him that will make a fortune for him and give us applicant who orders a less quantity, and desires to control the business in his locality. *The man who secures control of Ozone for any special territory, will enjoy a monopoly which will surely enrich him.*

Don't let a day pass until you have ordered a Test Package, and if you desire to secure an exclusive privilege we assure you that delay may deprive you of it, for the applications come in to us by scores every mail—many by telegraph. "First come first served" is our rule.

If you do not care to send money in advance for the test package we will send it C. O. D., but this will put you to the expense of charges for express or money. Our correspondence is very large; we have all we can do to attend to the shipping of orders and giving attention to our working agents. Therefore, we can not give any attention to letters which do not order Ozone. If you think of any article that you are doubtful about Ozone preserving, remember we guarantee that it will preserve it, no matter what it is.

REFERENCES:

We desire to call your attention to a class of references which no enterprise or firm based on anything but the soundest business success and highest commercial merit could secure. We refer, by permission, as to our integrity and to the value of the Prentiss Preservative, to the following gentlemen: Edward L. Roper, Member Board of Public Works; R. O. Taleby, City Comptroller; Amor Smith, Jr., Collector Internal Revenue; Wilstach & Worthington, Attorneys; Martin H. Harrell and B. F. Hopkins, County Commissioners; W. S. Capeller, County Auditor; all of Cincinnati, Hamilton County, Ohio. Those gentlemen are each familiar with the merits of our Preservative, and know from actual observation that we have without question.

The Most Valuable Article in the World.

The $2 you invest in a test package will surely lead you to secure a township or county and then your way is absolutely clear to make from $5,000 to $10,000 a year.

☞ Give your full address in every letter, and send your letter to
