

MINING, BUSINESS AND STOCKS

MEND A STRIKE
EXCITES PIOCHE

Find Made on Seven Hundred
Level Has Appearance of
Being Big One.

IS IN HIGHLAND DISTRICT.

Visitors Frequent Camp—Late Develop-
ments in Prince Con and
Other Mines.

Pioche, Nev., Nov. 1.—Tremendous excitement exists here over the latest great strike in the Mendha property located in the Highland district. The ore body that drifts off to the south of the 700 level so far exposes by actual measurement 20,240 tons of ore, worth net \$500,000, according to the daily returns of shipments, and this is only a drop in the bucket of the magnitude of the bodies that are in sight in following the main fissure and the drifts to the north.

Nothing like this has ever been discovered in this part of Nevada, and is attracting attention throughout the country; parties are calling every day to see for themselves the wonders of the Mendha.

Foreman Pat. Martin finds difficulty in keeping the ore hoist running on account of the men and women who wish to be shown into the mine. Wm. Lloyd, Jr., Cooke, A. Hodges and other interested people are working double time to the visitors. Other properties in the Pioche district have advanced in value many times within the last few months, notably the Prince Consolidated, in which some of the most valuable bodies have been developed.

It is confidently expected here that the Pioche district will soon be the scene of mill and smelter construction.

ON MINING EXCHANGE.

Brisk Trading Today With Iron Blossom a Leader.

Brisk trading and stronger prices for stocks characterized the trading on the floor of the Salt Lake Stock and Mining exchange today with Iron Blossom again a leader. The stock closing strong on a sale at \$2.42, the advance having been made from \$2.20, Silver Consolidated went up to \$1.35; while Columbia Consolidated was bought from \$1.30 up to \$1.37. Mason Valley was in good demand and 500 shares came out at \$2.45.

Ohio Copper was called for, but a bid of \$1.40 failed to loosen the stock, offering being made at \$1.50. Western Nevada Copper brought 32 cents. The closing quotations and sales were:

MOUNTAIN MAID
TUNNEL IN ORE

Officials of Bingham Central
Standard Greatly Encour-
aged Over New Find.

WHAT MR. JACKLING SAYS

Best Showing Property Has Ever Had

Identical With Bingham

New Haven.

D. C. Jackling, who visited the property of the Bingham Central Saturday, confirms the report of a strike having been made in the Mountain Maid tunnel.

"We have more than a full face of ore," said Mr. Jackling today, "but I do not want to be understood as saying that it is all of a high grade. Taking the whole mass as it comes there might be a profit of \$7 a ton in it; on the other hand, a portion of the vein carries values that run pretty well up in gold, silver, lead and copper. I look upon the development as being a very encouraging prospect and is by far the best showing that has ever been made in the Bingham Central Standard mine. A feature in connection with it is the splendid gold values and the fact that the ore has been found in a portion of the property where it was expected."

The ore is identical to some that has been taken from the Bingham New Haven mine and is probably a continuation of the same shoot. A picked sample from the Bingham Central Standard strike assayed one ounce in gold, 40 ounces in silver, three per cent copper and 60 per cent lead.

BAN HAS BEEN REMOVED.

It will be good news to ore producers to learn that the ore purchasing department of the American Smelting & Refining company is prepared to receive all classes of ores again. General Manager Whitley stated today that the objection at the Garfield plant has been overcome and that the ban on ores coming from without the state has been removed.

NEW YORK BONANZA.

Work of Shifting Shaft to 1,000-Foot Level Has Begun.

Park City, Nov. 1.—New York Mining company has started to sink its shaft to the 1,000 foot level. Had this been done long ago this property would have been one of the greatest mines in the camp.

A mining property in the camp that very little is said about is the Iowa Copper in Cottonwood canyon. A. Spooner of Salt Lake is manager and Joseph Bennie has charge of the mine. The property is prepared to be ground and have good indications in the long drift. They expect to cut the body of ore shown on the surface. The stock is controlled by Iowa capitalists. This property joins the Copper Apex for control of which "Uncle Jesse" Knight is dickering.

Another mine that is attracting attention is the Keystone in Thackeray canyon. It has a good shipment of ore on the dump. This property has the best indications of any property in this district. It is rumored that the management intends to install new machinery. The property is controlled by the Bambergers.

The Wabash Mining company will have its new boilers and other machinery installed and start pumping the water from the long drift. The pump has been placed above the 600-foot level. The first shipment of ore netted the company a good sum. If ever a company deserves a mine it is the Wabash, for it has spent a large amount of money for development.

Just as the company was about to start sinking a shaft and drive the miners out. They are not discouraged, as the large flow of water indicates large bodies of ore. About thirty men are now employed.

MINING CO. INCORPORATES.

Special Correspondence.
Provo, Nov. 2.—The Camp Bird Mining company, which owns 15 claims in American Fork canyon, has filed articles of incorporation with the state. The following are the directors and officers: Alonzo Billings, president; James G. Jones, vice president; Robert Anderson, secretary and treasurer; J. H. Jones, Joseph Bullock, Wilford Giles.

RELATIVE TO TOWNSITES.

Interior Department Will Soon Inaugurate New Regulations.

Dave Barnett Chief Forester of the Austin Nevada reserve, returned from Washington recently, says the Rev. He states that the Interior department will soon inaugurate a new regulation in the matter of townsites in the state of Nevada. The rule followed in most cases during the past five years as looked upon by the government is very irregular with many features that they do not hesitate to call fraudulent.

Different courses of procedure will apply to lands within forest reserves. All new townsites to be worth anything to the founders must have the O. K. brand of Uncle Sam.

NEVADA BULLION TAX.

Bulk of It Comes from Mines of Nye and Esmeralda Counties.

The report of State Bullion Tax Collector Haley to Governor Dickerson for the first six months of the year, says the Esmeralda and Nye counties have paid the bulk of the bullion tax, in fact, practically all of it, and the governor has directed the attorney general to look into the matter and see that this tax is collected.

The state collector of taxes declares

John A. Kirby. Rufus K. Cobb.

that in several counties the bullion tax has been ignored by the assessors, and that in others, notably in Lincoln, the mining companies, while showing no net profit in their sworn reports, have paid dividends to their shareholders. The gross production of the mines of Esmeralda county during the first quarter was low, on account of the fact that the mines of goldfield were all closed down for a period of two months on account of labor troubles, now happily settled for good. The production for the half year exceeds \$2,000,000, or at about the same rate as the first half is credited for 1907 by the United States mint experts.

PIOCHE DEMIJOHN.

Strike Rumor Afloat, But It Still Lacks Confirmation.

Rumors of a late strike in the Pioche-DemiJohn property at Pioche, Nev., have been afloat today. When asked regarding the matter, Manager Owen A. Bailey said that no such report had reached him officially from the mine. However, he declared that he was not in the least surprised at there was some truth to the story, as such a thing has been expected by the management.

A 200-foot shaft has recently been completed to tap an immense fissure vein on the property. This vein carries high values in silver, lead and gold. During the latter part of the sinking of the shaft, rich stringers of ore broke into the workings, indicating that the mine was rich. The shaft will provide vast stopping ground, and the vein once encountered, the mine will be a large shipper. Verification of the report that the vein has been encountered is expected by Superintendent Bailey.

U. S. SMELTING.

What President Sharp Had to Say Upon His Return to Boston.

The Boston News Bureau quotes President William G. Sharp of the United States Smelting, Refining and Mining company as saying soon after his return east as follows:

"In Utah we are just starting in to mine from our Bingham lead claims. In Utah we have a practically perfect mine. Our lead smelter is running four, and sometimes five, furnaces out of our battery of six, and producing 60 to 70 tons of lead per day. This property is prepared to be ground and have good indications in the long drift. They expect to cut the body of ore shown on the surface. The stock is controlled by Iowa capitalists. This property joins the Copper Apex for control of which "Uncle Jesse" Knight is dickering.

Another mine that is attracting attention is the Keystone in Thackeray canyon. It has a good shipment of ore on the dump. This property has the best indications of any property in this district. It is rumored that the management intends to install new machinery. The property is controlled by the Bambergers.

The Wabash Mining company will have its new boilers and other machinery installed and start pumping the water from the long drift. The pump has been placed above the 600-foot level. The first shipment of ore netted the company a good sum. If ever a company deserves a mine it is the Wabash, for it has spent a large amount of money for development.

Just as the company was about to start sinking a shaft and drive the miners out. They are not discouraged, as the large flow of water indicates large bodies of ore. About thirty men are now employed.

THE SCOTT MINES.

Holding Company for Utah and Nevada Properties.

The Scott Mines company has been organized as the holding company for all of the mines in Utah and Nevada. The company is owned by the Scott family, and which includes the Boston Pioche, Rawhide Northern Consolidated, at Rawhide; the McFadden mine at Bristol, Nev.; the Baby mine at Pioche and the Wild Bill mine in Beaver county, Utah.

The Boston-Pioche is a shipping property. It has a double-compartment shaft which will come out 750 feet and has developed large bodies of high-grade ore. Work there is being centered largely in the famous Yuba East mine. The Baby mine in Pioche is being developed, and it has a fine showing. The McFadden mine at Bristol has a showing that is characteristic of that well-known district.

The Wild Bill property in Beaver county it is one of the old-time producers of the North Star district.

CONCENTRATES.

Henry Kratz, the mining engineer has returned from a professional trip to the Ray Consolidated property at Ray, Arizona.

James A. Pollock, president of the Salt Lake Stock & Mining exchange, is expected to arrive from the east on an early train.

J. M. Mowbray, a mining engineer from South Africa, is in the city and will spend several days in looking over Utah mining camps.

John Dern has returned from a trip to Nevada where he went on mining business. He expects to visit the Utah Treasure Hill mine at Park City in a few days.

The Opek Consolidated mines company, which worked the first of the present week. At this time the company is sinking the main shaft as fast as three shifts can do the work. The shaft is being sunk to a depth of 1,325 feet several months ago and considered
