ANNUAL CONFERENCE.

To the Officers and Members of the Church of Jesus Christ of Latter-day

As the Sixth of April, the day appointed for holding our Annual Conference, falls on Sunday, we deem it proper to commence the Conference meetings on Friday, April 4th, 1884, at 10 o'clock a.m. at the Large Tabernacle in this city.

Trusting this arrangement will suit the convenience of the officers and Saints generally, and that there will be a punctual attendance at all the meetings, to which you are hereby invited, We remain your Brethren,

JOHN TAYLOR,

GEORGE Q. CANNON, JOSEPH F. SMITH,

First Presidency of the Church Jesus Christ of Latter-day Saints. SALT LAKE CITY, March 12, 1884.

THE FISH AND GAME LAW.

In another column we print the new the NEWS

I have just received the new law on tion, wherein its proviso gives a sports-man, an excursionist, or any one who wishes and is able to rusticate in the mountains in July and August and camp there, liberty to kill deer, elk, etc. The poor man who lives there all summer or perhaps the year round in a house, cannot lawfully kill one if he and his family are suffering for the want of some meat. As we have no lawyers here and we

and are now ready to predict that both soil and climate in this Territory are inimical to the production of sugar in paying quantities, that the success which has attended experiments in that line is received with much doubting; intering is received with much doubting; consequently more than an ordinary degree of demonstration and certainty is required before credence will be yielded and the assistance necessary for the firm establishment of the industry will be given. I do not write this to interint a discontine on the subject

enter into a dissertation on the subject, but to express my entire confidence in of fish in large streams of water, men-tioned in the preceding section, must be made in the form of a box, open at each end, not less than four feet wide and three feet high, and of plank not less than two inches thick, and it must be fastened in the water at the top of the dam and the lower end must extend to and be fastened in the pool below the dam at any angle not exceeding thirty-five degrees. Inside this box, fastened at the bottom and at one end to the side of the box, there must be pieces of plank four feet apart, placed transverthe practicability and profit of the en-terprise. My experiments have taught me that the elements here are suf-ficiently favorable to render the in-dustry not only perfectly safe and re-liable, but one of the most profitable in the Territory. It perhaps would be the Territory. It perhaps would be a sufficient benefit to the Territory to

Ibble, but one of the most profitable in the Territory. It perhaps would be a sufficient benefit to the Territory to furnish employment for a thousand men at home, and to save for circulation a million dollars a year which is now paid out for sugar, though there were no profit besides these in the manufacture, but not only can these desirable objects be accomplished, but in addition thereto, from 20 to25 percent. of this large amount can be made as clear profit when the enterprise is firmly established.
I am told that some of you are paying a bushel of wheat for four pounds of sugar. You raise probably twenty bushels of wheat on an acre, thus an average acre of wheat after all expenses of harvesting, threshing and marketing are paid, represents 80 pounds of sugar, now, I have actually, with quite crude and imperfect machinery, produced from one acre of cane 700 pounds of sugar, thus making 1,400 pounds of sugar to the acre of cane. Each ton of good cane (stripped and topped before weighing) can be made to produce 100 pounds of sugar, and thorough, so that the results can be depended upon implicitly, and although to the casual and uninterested reader there may not appear much in my report of them, you farmery who get only one crop in a whole pends upon a correct understanding of the matters set forth in that paper, for it is certainly as important to know what you can do. The points set forth in that paper have cost much time and money to ascertain, and there is now no reason why anybody, with that report before them, should lose other them, should lose other them the should lose other them them the them that paper have cost much time and money to ascertain, and there is now no reason why anybody.

no reason why anybody, with that report before them, should lose either time or money on those items, and I think it contains all the points necessary to be understood in raising the

crop. Any person looking at the al-most total absence of economy in the present rash policy of the people of the Territory, can readily foresee that

for us, while we have large numbers of idle or only partly employed men at home. Our imports are vastly in ex-cess of our exports, and our home manufactures are but a trifle compared With our consumption. Lam through lack of means tempor arily unable to continue my efforts in establishing the industry, but I shall be

pleased to answer any questions and give any information or assistance in my power to any persons or parties who may desire such, and so great is noy confidence in the industry great is soon as I can recuperate I shall pro-secute my labors until I see at least one factory turning out ten thousand ations to repel an attack. On the way to the jall the mob secured a long and heavy scantiling which they used as a battering ram. They began operations on the north side of the door, and knocked a hole long enough to admit a man's body, through which the mob crowded thick and fast, and about fifty mounted the stairs. Here they were met by a detail of police and the sheriff, and forced back into the iall office. By this time the mob the sheriff, and forced back into the jail office. By this time the mob outside had procured a llong heavy board and placing it in the iron railing in front of the jail pushed it through a window into the second story. With this they broke out the entire sash and inside shutters and scrambled into the apartment of jailor Brady. This en-couraged the crowd who made a rush for the south door leading to the street from the secondstory, which is here level with the pavement. This soon gave way and the mob went through in great numbers. The sheriff's force consisted of 13 men. When the mob entered these winhdrew within the jail proper, leaving between them and the mob the heavy grated iron doors which sepa-rated the reception room from the cell room.

room. The reception room was jammed and the mob kept calling, "Give us Berner. Give us Johnson," and on through the list of murderers there. A tall muscu-lar negro began to give orders and the mob quickly obeyed. Space was cleared and the plank used as a battering ram was brought to bear against the iron door. Behind the door stood Sheriff Hawkins and his men with drawn revolvers. The Sheriff said calmly that it meant death to enter that door. The crowd wavered a moother side of the box. Whenever the stream is small the county court of the county in which the dam is, or is to be constructed, may permit the box to be of less dimensions. Sec. 10. That any person, corpora-tion, or association, who has taken or may hereafter take out the waters of any stream or lake in the Territory that contains fish, shall be required to place across the head of such canal or ditch a grating of horizontal bars not more than one inch apart, sufficiently secured on the sides, to prevent fish from es-caping into said canal or ditch. Fail-ing to comply with the provisions of this section is a misdemeanor. Sec. 11. The provisions of this act shall not apply to Indians who kill deer for their skins. Sec. 12. All former laws for the prothat door. The crowd wavered a mo-ment and hesitated, then the colored ment and hesitated, then the colored leader gave the word, "Swing the plank." He was instantly obeyed and the gate trembled with the whack and a mighty shout went up. The third shock loosed its bolts and it flew open. Sheriff Haw--kins had instructed his mcn not to fire as he did not wish to shed blood. He attempted to address the mob, but they flew by him up the winding iron stairway to the cell room. They sought Bernet but soon discovered he was Sec. 12. All former laws for the pro-tection of fish and game are hereby re-JAMES SHARP. Speaker of the House of stairway to the cell room. They sought Berner, but soon discovered he was moved. Then they went to Johnson's cell, one of the murderers of the Tay-lor family of Avondale. A powerfut plank was brought up to batter down the door of his cell, but the small space prevented its use with effect, besides the deputy sheriffs caught hold of the plank and prevented its being used. Meantime Chief of Police Reilly, hearing the men were in tail entered through POISONING CASE OF GREAT ATRO-OGDEN CITY, U. T., March 28th, 1884.

Meantime Chief of Police Reilly, hearing the men were in jail entered through the court house and through the tunnel from it to the interior of the jail With this combined force the men were put off the corridors about the cells and the mob seemed to be repulsed. Not a shot was fired up to this time by the forces within the jail. The stairway was again in posses-sion of the sheriff's forces, and a struggle began for the iron gate. The colored ring-leader was seized by Lieut. Dunne, struck on the head and dragged inside. Then the gate was closed. Several others were being ar-rested about the same time. The bat-tering ram, which was broken in two, served as a brace for the gate The mob seemed repulsed and the story A sad and lamentable death, the re-sult of poison, occurred in this city yesterday. It must be observed that the diabolical deed which caused the death of the victim is not of very recent date, neither wus it done in Og-den. 1 Charles Drinaey is about a quarter-bred Shoshone Indian. He is about 37 years of age; he is an intelligent, well informed man. His residence is at Pocatello, Idaho, where he keeps a restaurant and boarding house. Last fall a scoundrel named William John-son, alias "Six-shooter Johnson," went to Drainey's house. After being there a short time he deposited a small sum of money with Drainey, with the intention of adding to it and becoming a partner in the business. In the meantime he worked as cook in the kitchen, and also helped to serve at the table. cent date, neither wus it done in Ogserved as a brace for the gate The mob seemed repulsed and the story went out spreading through the out-side crowd only to inflame them to Son, alias "Six-shooter Johnson," went to Drainey's house. After being there a short time he deposited a small sum of money with Drainey, with the intention of adding to it and becoming a partner in the business. In the meantime he worked as cook in the kitchen, and also helped to serve at the skitchen, and also helped to serve at the busines. On the 8th of January last Mr. Drainey was invited by a gentleman in Pocatello to go with him on a day's hunt. They took train in the morning and went some distance along the Ore-
