#### SECTOR EVENING NEWS: MONDAY, FEBRUARY 29, 1904.

The Ex-Lobster Chief Will Have Charge of Salt Lake Ball Team.

# THE MACNATES WANT MONEY.

#### At a Meeting Held Saturday Evening, Change Was Made in Directorship -Teams Hot After Hausen.

"Father" Frank Gimlin, the ex-Lobster chief, is "IT."

There was extreme joy in the hearts of local ball fans Saturday night when the news was spread abroad that Frank Gimlin had been chosen manager of the Salt Lake ball team. In the past Gimlin has done much to cause grief among the local fans, but if he will do as much for us as he has done against us, all will be forgotten, and he can have about anything the fans here could give him.

Another bit of good news is that the centlemen who are to handle baseball af-fairs in this neck o' the woods during the fairs in this need of the woods during the coming season, have awakened to the fact that it is about time to be doing things, and they have begun to do them. Nothing more, need be said about Gim-jin. Everybody here knows him, and they

know he has a happy faculty for securing a strangle hold on pennants. The directors held an interesting meet-

The directors held an interesting meet-ing on Saturday evening, and among other important transactions, a change was made in the directorship of the club. Charence McCornick and D. H. Perry re-signed, and J. C. Leary and John S. Critchlow took their places. The resign-ing directors have disposed of all their stock in the association and now have nothing to do with it. The club is now composed of the following named gentle-men: Samuel Newhouse, president; John S. Critchlow, vice president; J. C. Leary, C. H. Griffin, and Rodney Badger, direc-tors.

This is a pretty good line up, eh?

This is a pretty good line up, eh? The only feature about the local situa-tion that does not look as good as it impict, is the financial part of it; the most important feature. The directors now have, they say, many good players on the string, but they lack the necessary coin to corral them. President Newhouse fur-nished \$2,600 to seeure the franchise, and an additional \$1,000 was raised and depos-ided as a forfelt. Now they need more money with which to put the club on a theroughly sound business basis. It is ex-pected that more money will be raised by the sale of stock to loyal fans. The league is now in pretty good shape.

the sale of slock to loyal rans. The league is now in pretty good shape. It is composed of Salt Lake, Bolse, Butte and Spokane, and each team has \$1.000 on deposit. Good rates have been obtained from the railroads, the jumps are not so long, and there will be keen rivalry be-tween the four teams for the champion-ship.

The season will probably open in Salt Lake and Spokane on April 26, and this town will then be given a month's games. Bolse will come here and Butte to Spokane for the first game. The local magnates are anxious to get the team made up before the first of April and have all the men on hand for practise. In this respect Salt Lake is far behind the other teams. Butte and Spokane have just about made up their teams. Boise has a few players, but Salt Lake will have to get a move on her. Salt Lake lays claim to Gimlin, "Slats" Davis, Buck Weaver, and will make a fight for Hausen.

has been put out of the way in order that Taylor's stock may not be unduly depreci-ated. Doubtless the officials who disquali-fied McFarland believed that he had bumped Taylor, but it is unfortunate that no one else scemed to see the jostiing complained of.

no one else sceined to ses the jostling complained of. As a matter of fact, in the five mile race in which Taylor was beaten, the two American riders, Lawson and McFarland, moved up on the very outside of the track whilst Taylor was hugging the inside, and so far as onlookers could see did not in-terfere with him in any way. But, of course, the officials must have seen some-thing or they would never have taken the steps they did. It is interesting to note, however, in this connection, that Taylor is one of the most jumpy riders on the track. When he sprints he jumps his machine all over the path, and it is pure luck and caution on the part of those who ride against him that accidents have not happened. Of course he does not do it intentionally, but people have often shuddered at the way his wheel shoots first this way and then that when he makes for the winning line. Taiking of McFarland's disqualification reminds us that the major is fast josing

Taiking of McFarland's disqualification reminds us that the major is fast iosing his laurels. The two Americans, Lawson and McFarland, have beaten him consist-ently. They promised that they would when Taylor's coming was announced, and they have certainly kept their word. They have taken it in turn beating the major, and over all distances have achieved victories. So far-we are writing on Wednesday afternoon-the darkey has not won a single big race in which either of the Americans has taken part. Perhaps now that McFarland is out of the way he may be able to secure an odd wim, Certainly if he does not, the Tele-graph can hardly continue to boom him as the world's champion. In fact, up to now, Taylor has been completely ecilipsed by the two Yankees, who have been win-ming everything before them. Night after night they have scooped the program whilst the major's friends have looked sadly on. sadly

sadly on. Is Major Taylor only a brilliant rider-when he has not to race recognized cham-plons? This is the question many are asking themselves. On his last visit to Australia he won as he liked, but he had only local men against him. This visit he has not won once.

Australia he won as he liked, out he had only local men against him. This visit he has not won once. Everyone has been amused during the week at the cycling reports in the Tele-graph. We have hitherto believed that the one-eyed barracker remained in the skilling stand; but he seems to have drifted along to the press table. Al-though Lawson and McFarland have been eiectrifying the spectators by their mag-nificent pace, stamina and judgment, the Telegraph has never allowed its eye to wander from its dusky champion. Its notice has probably been directed to the fact that Lawson and McFarland have won the races, for it records their suc-cess; but it is quite oblivious of the fact that these two men must have been riding fuster than the colored gentleman who has refused thousands to ride on a Sun-day.

day, Every time he has been beaten—which is every time he has met the American combination—the Telegraph has put up

combination- the Telegraph has put up excuses. At first it was want of form; but that has been dropped now. Latterly it has been the fact that the major took up the inside position and could not get through. The Telegraph seems to forget that his speedy rivals do not expect those in front to open out and let them through, but go right around on the outside when they sprint, and win through sheer pluck and merit.

they sprint, and win through sheer pluck and merit. As a matter of fact the Yankees have been breaking the major's heart. If the colored rider had a fairly easy race until the last fifty yards he might unwind his wonderful sprint-for he can sprint for a short distance. But McFarland and Law-son have made the pace terrific for the whole of the last lap in every race, and the major has not had a kick left at the winning post. Besides that they ride with the ir heads as well as their feet, and their generalship has been too much for the £2,000 gentleman. But the Telegraph has not seen this. It still writes Taylor up as a black god on wheels, before which Australia should bow down and worship. The public, how-ever, is beginning to appreciate the fact that the two Yankees are cycling stars of the first magnitude that can possibly outshine the major's sparkle.

### Rifle Club Shoot.

Nine rifle experts took part in yesterday afternoon's contest at the range and some pretty high scores were made. Three men reached the eighty-eight mark, while four ran up scores over fighty. The results follow: Johnson ..... 75 ... 82 84 82 74 88-80 5-6 The results follow: Johnson .....75 ... \$2 \$4 \$2 74 \$3-\$0 5-6Van Arnam ... \$5 \$6 72 79 78 \$5 79-77 1-7Parker ......\$9 69 56 ... ... ... <math>-64 2-3 Letchfield ... \$7 ... 79 79 85 81 71-77Hirschvogel ... 73 82 81 70 ... -79 1-3Breckon .....74 \$2 71 74 84 70 61-73 4-7Weatherson .... 76 63 78 88 ... -764Harnes ......70 77 ... 84 78-774Veager ......70 ... 79 ... 75-77

never follow the same system, twice, What may be good at one time may not be beneficial at another time. No matter how long you train, there is always a row things to learn. My likit training now will harden me up for the routhe work which is to fol-low when I go into active training for the winner of the Munroe-Sharkey bout. I intend to train just as hard, but in regard to the routher work which is to fol-sary to make any sacrifices. To instance, I don't think it is neces-sary to cut out water when you are thirsting for it. I have tortured myself at times by not drinking when I am sure though have done me good. Water nat-urally makes one heavier, but continuous training will offset what little effect the water will have. In regard to dieting I have found out by experience that it is not necessary to the off off off weets and the loss of them naturally does not cause me any werty. I remember that while training for my

them naturally does not cause me any worry. I remember that while training for my fight with Sharkey, which took place at Coney Island. I never worked so hard for a battle in all my life; still, when I met the sailor I was far from right. If I had been myself there would have been no chance for him to go twenty-five rounds. At times I was so thirsty I was compelled to drink water during the night unknown to my trainers. I think a man can tell how he feels better than his trainers, and therefore should do what he believes is better for himself. At the same time, it is advisable to be cautious. Don't eat what does not agree with you. And do with as little water as possible.

## MAGNATES GET BUSY.

American Leaguers Meet to Formulate And Adopt Schedule for Season.

And Adopt Schedule for Season. New York, Feb. 28.—Among the persons most interested in the major baseball leagues this promises to be a very busy week. President Ban Johnson of the American league arrived here tonight, and tomorrow he will convente the annual schedule meeting of the organization. The annual schedule meeting of the National league will begin here twenty-four hours later, and from present indications there is little doubt that both organizations will adopt non-conflicting schedules or play-ing dates for the coming season. After the conference today It was An-nounced that a new committee on sched-ule, consisting of Frank J. Farrell of this city. C. A. Comiskey of Chicago and C. W. Somers of Cleveland, had been ap-pointed. The same men were named to act as a committee on rules.

## **BIG FIGHT TONIGHT.**

#### 'Young Corbett" and Dave Sullivan to Battle at San Francisco.

An important puglistic contest is on the boards at San Francisco tonight, when "Young Corbett" and Dave Sullivan will exchange wallops in a twenty round bat-tic. There is a great deal of local interest in the bout, and it is at a fever heat in "Frisco, despite the fact that the Denver fighter is a pronounced favorite, the odds being threa to one eing three to one. The context is an important one to both oxers. If Co-bett does not win he will use a \$2,500 forfeit to Jimmy Britt, and have Sullivan will claim the feather-

# MUNROE BESTS SHARKEY.

weight title.

He Will Now Have Another Chance at Jeffries' Title-Will He Get It?

Philadelphia, Feb. 27.-Jack Munroe out Finadelphia, Feb. 21.-Jack Munroe out-fought Tom Sharkey in their six-round bout at the Second Regiment armory in this city tonight. Munroe stepped from the ring without a mark, while both of Sharkey's eyes were badly swollen from the vicious right and left swings of the Butte miner. In only one round, the first the vicious right and left swings of the Butte miner. In only one round, the first, did Sharkey have any advantage over Munroe. After this battle was almost wholly in Munroe's favor. When Munroe began to find the sailor's stomach Sharkey became wild, and near-ly all of his leads went around Munroe's neck. In the fifth round Munroe had his antagonist in trouble, and again in the sixth round Sharkey was in great dis-tress. The blows which Munroe landed on Sharkey's stomach went straight from the shoulder and were hard enough to have knocked out almost any fighter. The general opinion seems to be that Jeffries will now be called upon to defend the

According to Walter Wilmot, Reilly is decidedly wrong in claiming Jim Shaffer. The Butte manager declares that "Sunny Jim" belongs to him; that he has been on the reserve list for some time. Wilmot also states that "Piggy" Ward has not been released, and that he will be seen at his old position this season.

Seattie, Feb. 28.—Perry Queenan blew into town yesterday from Vancouver. He did not remain very long, and, in fact, is now on his way to Astoria, where he is due to fight Fred Muller on March 1. These lads have met before, the bout re-sulting in a draw. Muller is much larger than Perry, but the local lad, who was never in better shape in his life than he is at the present time, is dead sure that he can dispose of this "Pride of Oregon."

A telegram received today from Johnny Hertz manager for Jack O'Keefe, states that they will arrive here Wednesday or Thursday, all ready for the bout Friday night between Clifford and O'Keefe. Hertz says his man is down to weight and is in fine shape and fully expects to pull down the big end of the purse. Clifford is still working hard at Thompson's and believes he will dispose of the Chicago boy.

A dispatch from Philadelphia says: When a party of sporting men came out of a hotel in the central part of the city last night a scene was enacted which as-tonished those who happened to be in the vicinity. No sconer had the men passed through the door than one of them, the youngest in the party, attracted attention by exclaiming: "Great anakes! What's those things?

through the door than one of them, the youngest in the party, attracted attention by exclaiming: "Great snakes! What's those things? Feathers? Before a reply could be given the youngster was down on his hands and knees trying to scrape something off the sidewalk. His attempt was unsuccessful and when he rose to his feet he found the older men in the party and numerous bystanders laughing at his predicament. "That's snow, Eddie." said "Dob" Deady, when he stopped laughing. "Snow?" repeated the almost incredu-ious youngster. "Yes, snow," replied Deady. "Hayen't you ever seen it before?" "Never." was the reply. "Well, what do you think of that? Ed-die Hanlon knocked out in the first round of his bout with a snowstorm," spoke up another member o the party. The name was recognized by the bystanders and be-fore the youth who had never before seen real snow could pull himself together he was surrounded by a crowd of me who were eager to get a good look at the "boy wonder" of California. "This is the first time I've ever been out in a snowstorm," said Hanlon, "and it feels kind of queer, Maybe I woultn't like to send a box of it to my home in San Francisco as a souvenir."

The Abbott, the famous trotter that died a few days ago, was noted for a great many things. Among them were: At 7 years of age he was the champion trotter o fthe world, with a record of 2:034, made at Terre Haute, Ind., Sept. 25, 1990. In 1899 he raced through the Grand Cir-cuit in the free-for-all class and was not

beater trial at Lexington, Ky., he trotted

a mile In a trial at Lexington, Ky., he dotted a mile to wagon in 2:032. In six years he started thirty-four times, twenty-three of which he won. He started in 1991 in two match races against Cresceus and was beaten in both. The first race was at Brighton Beach, \$12,000 being the stake. The second was at Readville, Miss., and \$20,000 was the prize.

rize, He could trot quarters better than 30 econds, and a half in a minute. His gait was as nearly perfect as possi-

OLD FASHIONED HOME.

Water Bubbles from a Spring on World's Fair Grounds. St. Louis .- A spring of living water,

gushing clear and cold from the hillside at the northeast corner of the palace of agriculture at the world's fair grounds at St. Louis is one of the features provided by nature that will delight thousands of weary and thirsty visitors during the exposition.

This beautiful spring began sending forth its refreshing stream before the Louisiana purchase was made a hundred years ago and no matter how dry the summer there has never been any diminution of its flow.

When the landscape architect with big steam shovels, steam scrapers, with armies of men and hundreds of mules at his command began altering that part of the earth's surface embraced in the exposition grounds, cut-ting down a hill here, filling in a val-ley there, Mr. Frederick W. Taylor,

#### not molested. A weeping willow tree that must have growing for more than 50 years

spreads out its green branches over the spring and creates a delightful shade. The water as it bubbles from the ground flows down a steep hillside through a miniature ravine in which dainty ferns and pretty mosses luxuriate.

# UTAH AND RUSSIA.

If Latter Displays at World's Fair, Former's Educational Exhibit Will Go.

An informal meeting of the Louisiana Purchase Exposition committee for Utah was held Saturday afternoon. No business was transacted, there not being a quorum present. The matter of space for an educational exhibit was discussed, and whether or not Utah secures the space all depends on Russia's decision in regard to withdrawing her application for space for an exhibit. Director General Whitaker stated that he noticed in the papers that Russia still intended to make an

exhibit. That being the case, there will

making an educational exhibit at the

#### BOOST FOR AMERICANS.

How Iver Lawson and Floyd McFarland

Trimmed Major Taylor.'

Trimmed Major Taylor. Judging from the reports from Aus-trala, the promoters of the bicycle game have been trying to give lver Lawson and Floyd McFarland the worst of it, and have done all they could to boost Major Taylor, the colored rider, at the expense of the American speed merchants. Even the papers have j inel with the promoters in an effort to belittle the ability of Law-son and McFarland, but there is one writ-er who takes the Americans' part. The writer has the following to say, in the Catholic Press of Sydney, N. S. W.: A gentleman signing himself "British Sportsman" writes to the Herald with re-gard to the suspension by the committee of Cyclist McFarland, the brilliant Amer-ican rider, whose victories have been so popular during the cycling carnival. He says in effect that the only crime McFar-land is guilty of is downing the £2,000 sprinter (Major Taylor) and that thous-ands believe that McFarland has been dis-dualide so that Maojr Taylor may have a better chance of regaining his lost laur-ela service takes the Americans' part. The writer has the following to say, in the Catholic Press of Sydney, N, S, W.: A gentleman signing himself "British Sportsman" writes to the Herald with re-gard to the suspension by the committee of Cyclist McFarland, the brilliant Amer-ican rider, whose victories have been so popular during the cycling carrival. He says in effect that the only erime McFar-land is guilty of is downing the £2,000 sprinter (Major Taylor) and that thous-ads believe that McFarland has here distances. With me train-ing is the whole thing. I know that if I enter the ring in good condition I have nothing to fear. It is simply a question of time when I will put man out. While many boxers have an idea about training they either overdo it or don't do enough. The most important feature of training to a battle is to know when you have got enough. There are many things to be taken into constiteration. As for my own training schedule, I fit it to suit myself, and, strange to say, I

# AN INDESCRIBABLE TORTURE

Because Rheumatism sometimes comes on suddenly it doesn't prove that it is a chance disease or one due to accidental causes. It takes time for it to develop, and is at work in the system long before any symptoms are felt. The blood is the first point of attack, and the poisonous acids that cause the aches and pains are then distrib-uted through the circulation to different parts of the system, and settle in joints, muscles and nerves; and when the system is in this condition it needs only some exciting cause like exposure to night air, damp, chilly weather, or the cold, bleak winds of winter, to arouse the slumbering poisons and bring on Rheumatism. The severity of the attack depends upon the amount of acid in the blood and the

quantity of acrid matter in the joints and muscles. Some peo-ple are almost helpless from the first, while others have occasional spells or are uncomfortable, restless, nervous and half sick all the time from the nagging aches and pains. Rheumatism is a disagreeable companion even in its mildest form. It grows worse as we grow older, and frequently stiffens the joints, draws the muscles out of shape and breaks down the nervous system. A disease that originates in the blood, as Rheumatism does, cannot be cured with ex-

ternal remedies like liniments and plasters ; such things scatter the pains or drive them to some other part of the body, but do not touch the disease or improve the condition of the blood. The thin acid

blood must be restored to its normal purity and strength, so that all poisonous substances may be carried out of the system, and no medicine accomplishes this in so short a time as S.S.S., which not only neutralizes the acids and counteracts the poisons, but builds

up the general health at the same time. Write for our special book on Rheumatism, and should you desire any special information or advice, our physicians will furnish it without charge. THE SWIFT SPECIFIC CO., ATLANTA, GA.

JEFFRIES' TRAINING METHODS

Depends Entirely on Condition-Works Differently for Each Fight. (By James J. Jeffries.)

I have been asked why I am able to withstand the heavy blows of my oppo-nents in battle. There is only one answer to this question and that is good condi-tion. I have never entered the ring un-less I have been in the best possible con-dition and prepared to cope with the most trying circumstances.

We collect bad debts. Merchants' Protective Assn., top floor Commercial block. Scientific collectors of bad debts Francis G. Luke, General Manager, Some people don't like us."

#### Knights of the Ticker Have a Social And Speed Contest.

The telegraphers of Salt Lake City held a very enjoyable smoker yesterday afternoon and evening in Knights of Columbus hall and decided to organize for merely social purposes. There was plenty of music and witty speeches to amuse those present in the afternoon, and in the evening a speed contest was held. L. H. Cook won the first prize by dispatching 202 words in five minutes. R. Cogan was second with 198 words, and E. D. Kinney of Pocatello won third with 190 words. The first prize for receiving was won by C. E. Stimson, who made a remark. able record by receiving, recording and arranging for delivery five messages of 10 words each in three minutes. A committee of five on permanent or-

ganization was appointed to draw up a constitution and by-laws. J. W. Booth was elected president, and R. Cogan, secretary and treasurer. The following telegram of congratulations was re-ceived while the smoker was in progress:

"San Francisco, Feb. 29. "R. A. Moore, Commercial Telegraph. ers' Meeting, K Hall, Salt Lake: Meeting, Knights of Columbus "San Francisco local No. 34, C. T. U. A., in regular session assembled, sends regrets for their inability to attend smoker and offers fraternal greetings to the telegraphers of Salt Lake, A. T. BAUM,

"Chairman of Committee."

STATION FOR SALT LAKE.

County Horticultural Society Appoints Committee to Investigate.

The Salt Lake County Horticultural soclety, at its meeting late Saturday afternoon, took up the matter of a local experiment station by adopting a resolution directing the president, vice president and program committee to investigate the advisability of establishing such a station in this county. The meeting was attended by Prof.

The meeting was attended by Prof. Hutt of the Asricultural college, Logan, who delivered a very interesting ad-dress, congratulating the society on its efforts for an experiment station and pointing out the benefits to be derived from such a station. Prof. Hutt also spoke on the necessity of pruning in the care of orchard trees in order that they mighth yield in abundance. He said it was quite essential that the said it was quite essential that the surface of orchard ground be kept well cultivated, in order that the sub-soil retain plenty of moisture, which other-wise would run off or be lost by evapo-ration. He spoke about blight, and laid stress upon the necessity of bud-ding from bearing trees. A pedigree of a tree, he said, did not amount to much if its bearing properties had not been fully demonstrated.

A resolution of respect was offered for the late vice president of the society, C. E. Allen, who died about two weeks
