

## LOCAL AND OTHER MATTERS.

**THEATRICAL.**—A rich treat was enjoyed, last night; the house was well filled, the play was a good one and was performed in most excellent style. The "role" of Miss Sallie Hinkley was an admirable and exquisite rendition of the character. We do not think she has appeared to greater advantage in any role as yet played here. As "Salem Scoundrel" Mr. Thompson was all that could be desired. He seemed the very essence of a scheming, inventing, good-hearted Yankee. With regard to the "Jacob McClellan" character, there can be but one opinion; it was a superb piece of acting, an impersonation of this character would be difficult to equal, not to say excel. "McClellan" received full justice from Mr. Thompson. He looked and acted the part admirably. Miss A. Adams in the "role" of "Miss Sunnyside" was even more than usually good. She appeared the beau-tiful, unaffected, peevish yet good hearted, Miss Adams. Messrs. Harris, Graham, Mackintosh, Mrs. Bowring, Miss Lawson and all who took part in the performance are deserving of commendation for the creditable manner in which they rendered their parts.

On Wednesday night the great sensational drama, "The Great Wrong" will be presented. It is said to be a fine play and is by Augustus, author of "Under the Gaslight."

**NEWS FROM ST. GEORGE.**—The following was received, last evening, too late for publication in yesterday's News:

**St. George, Jan. 9th.**

They are really what their name indicates. SUPERIOR to any other stove in the market, and for Economy, Durability, Convenience & Dispatch Are Unequaled!

**KANSAS, ALASKA**

**IMPROVED AMERICAN**

**For Coal.**

Which for Neatness of Design, Thoroughness of Construction, Capacity of Oven, Economy in the Use of Fuel and Uniformity of Operation, place them as the best Stoves in the market.

They have been constructed specially for the use of our Western Bituminous Coal (for which all stoves of Eastern manufacture are so ill adapted). Enlarged Flues insure a perfect draft; the plates that line the fire chamber are unusually heavy, and combine certain peculiarities in their construction, which give these Stoves superiority over all others in the consumption of its smoke, thus saving a large percentage of fuel.
