

G.L.D.S. HOSPITAL MUCH IMPROVED

Added Facilities in Nearly Every
Department Are Almost
Completed.

HAS ITS OWN LIGHT PLANT

Installation is Thoroughly Equipped
Both in Its Maintenance Divisions
And in the Surgical Rooms.

With the removal of the old electric switchboard to the new engine room and the tearing out of all the steam pipes and the hot water boilers in the old boiler room, the \$100,000 worth of improvements made at the G. L. D. S. hospital this year will be practically finished. This work is now being done by Engineer Frank Silver and associates, and marks a great improvement in the hospital equipment. It was rendered necessary in the interest of economy through the growth of the institution. A typhoid ward was needed, and one has been built which is second to none. It occupies the new building on the north side of the block, just east of the nurses' quarters, and is entered from Ninth avenue. It takes the whole upper floor of the building which is about 3,500 feet, and has a capacity for 20 patients comfortably. Everything is finished in immaculate white, even to the tiled floor. The metal doors of the bath room, kitchen, toilet, and rooms for female patients are all finished in white enamel. A well lighted and spicily clean kitchen is also a part of the equipment, and the spacious screened porch or room on the east side, which is about 12x36 feet, is said to be an ideal place for the patients. Every provision has been made for the cold water baths which are played so important a part in the cure of typhoid fever. Some of the patients take as many as 40 cold water baths during the progress of the disease, sometimes being compelled to sit in the water for 15 minutes, the effect of which is said to be magical.

OTHER IMPROVEMENTS.
The new engine, boiler room, and machine shop, occupies the basement of the typhoid ward building, the steam pipes, electric wires and water pipes being conveyed to the main building through a concrete tunnel. All the electric wires are encased, and the steam supply for all the buildings is now controlled from the boiler room by direct connections. Three new tube boilers of 100 horse power have been installed, with three mechanical stokers of the underfeed type, with an automatic engine to regulate them. The coal bins are also arranged so that the coal may be dumped from the street, with the least possible trouble. Two new hot water tanks, have also been installed, one of which heats 500 gallons a minute to 150 degrees and the other heats 150 gallons to the same temperature per minute. The old boilers will be kept on hand, as well as some of the old machinery, as it is probable that it will be needed in the near future. It will not be long before extensive additions will be made to the premises. The nurses' home is altogether inadequate, and the erection of another building is contemplated on the northeast corner of the block. The proposition of enlarging the main building is also being discussed, and though nothing positive has been decided it is probable that the new wing will be built on the east side of the present building.

ITS OWN LIGHT PLANT.
The new engine room contains a 35 K. W. generator, direct current, three phase system. In a few days, by Sept.

5, at the latest, the new plant will be in operation and the hospital for the first time will be lighted by its own plant. A fine workshop about 15x15 feet has also been built, and the men have the use of steel lockers for their clothing as well as a pipe bathroom. In the hospital proper a few improvements are being made in the operating rooms. Two sets of the latest sterilizers have just been received for installation in the general and east operating rooms. A similar set has already been set up in the west operating room. In these sterilizers the vessels for instruments and utensils are raised and the lids are opened merely by a pressure of the foot, so that it is unnecessary for the doctors to touch anything with their hands when an operation is in progress.

TO MOVE BISHOP'S OFFICE.
New Quarters Almost Ready and Change Will Soon Be Made.

Although the front offices of the new bishop's building will not be finished for two or three weeks owing to delays in getting ready, the office of the presiding bishop will shortly be transferred from its present place in the E. Y. memorial building to the four large rooms in the new building, immediately east of the main office. The rooms on the south side, which will ultimately be used for the stenographers and for filing purposes, are practically ready for occupancy now, the only thing needed being another coat of varnish on the maple floors. The rooms on the north side are also being completed, and as soon as they are done the move will be made.

DISCUSS CLUB FURNISHINGS.

The matter of furnishing the new Commercial club building, now in course of erection was considered at a meeting of the furnishing committee, held at 12:30 today. The committee is composed of the following members of the club: Joseph E. Cairns, chairman; A. J. Davis, W. Mont Perry, Samuel Newhouse, Samuel Weitz, B. O. McJannet and H. L. A. Culmer. The furnishing of the new building will be on an elaborate scale there is no doubt.

Accidents will happen, but the best-regulated families keep Dr. Thomas' Electric Oil for such emergencies. It subdues the pain and heals the hurts.

BIG SUCCESS ASSURED.

Ogden's Four-State Fair Bids Fair to Set a Record.

D. F. Collett, secretary of the Manufacturers' association, returned from Ogden last evening in company with O. H. Hewlett and other Salt Lake manufacturers, after making arrangements for about a dozen exhibits at the Four-State fair to be held at that city this month. He gives a good report of their reception by the fair committee, which has done everything possible to give the Salt Lake exhibitors a square deal. Indications are that the fair will be largely attended. The livestock exhibit will be one of the most interesting features of the fair, about the only attraction ranking before it is the racing, which will be a big feature. In order to accommodate the horses, Ogden owners have agreed to keep their horses in home stables at night.

WHY DRUGGISTS RECOMMEND CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY.
Mr. Frank C. Marshall, a prominent druggist of Portsmouth, Va., says: "For the past six years I have sold and recommended Chamberlain's Colic, Cholera and Diarrhoea Remedy. It is a great remedy and one of the best patent medicines on the market. I handle some others for the same purpose that pay me a larger profit, but this remedy is so sure to effect a cure, and my customers so certain to appreciate my recommending it to him, that I give it the preference." For sale by all druggists.

CANADIAN TRIP ONE OF PROFIT

Prest. F. M. Lyman and Elder
O. F. Whitney Return
From the North.

WHOLESOME RIVALRY FOUND

Saints in Neighboring Communities
Strive to Outstrip Each Other
In Progress.

President Francis M. Lyman and Elder Orson F. Whitney, of the council of twelve, have returned from a three-weeks' trip to Canada and the Big Horn country, in Wyoming. They left Salt Lake Aug. 11, the day of the G. A. R. parade, which they witnessed in the morning, and during their absence attended conferences at Magrath, Cardston and Cowley.

The trip was greatly enjoyed, the weather and everything else conspiring to make it the most pleasant Canadian trip ever made by Bishop Whitney. To President Lyman the trip was almost like going home as he has been closely associated with the settlement in Canada from the beginning. "The first conference attended was at Magrath, Taylor stake, Aug. 14 and 15," said Bishop Whitney, "where we found that owing to the high price of cattle and wheat, the growing of beets for the Knigh factory has fallen into desuetude, and the company has not sufficient beets for a profitable run. It is therefore importing raw sugar from Germany for the purpose of refining it. As the Canadian government had helped the factory with a bonus, President Lyman advised the people to stand behind the sugar company and set aside some of their land every year for beets. Some of the prominent men of the community intimated their intention of doing so next year."

WHOLESOME RIVALRY

"At the conference at Magrath there was an attendance of 640 at the Sunday meetings. A feature of the musical exercises, was the singing of Miss Martha Clark, of Stirling, a daughter of Arvid Clark. The meeting of the young people of the stake on Sunday evening was also well attended. On Monday, the day following the conference we went to Cardston, between which town and Magrath there is a wholesome rivalry, and were there shown through the sugar factory. Mr. Ellison, formerly of Lovell county, is manager. We also inspected the foundation of the Taylor academy, a new Church school which is being erected at that place at a cost of \$45,000. The people here have also built a modern opera house, and while there we had the privilege of attending the excellent production of Ouida's "Moths" by the Gene Russell company, in which Gene Alford, daughter of the late John Alford of Salt Lake City, took the leading part. The play was held at 9:30 to allow us to get through a meeting and accept the invitation to attend."

"B. S. Young, a former Salt Lake resident here. He is in the real estate business and is doing very well."

AT CARDSTON.

"We then went to Cardston, where President E. J. Wood, of Alberta stake and others had arranged a trip to Kootenay lake, 45 miles southwest of Cardston. It is in the mountains which divide Alberta from Montana. On the way we stopped at the big Cochran ranch, which is owned by the church. The trip also included a run in a launch to the head of the lake on the Montana side. A visit was made to Waterton, the splendid pleasure summer resort of Will O. Lee, formerly of Hountful, where we had trout for dinner. On this trip I saw my first glacier. Among those making this trip were Thomas Duce, formerly of Ogden, now first counselor to President E. J. Wood, also Bishop D. C. Harris, who lived formerly in Mexico, and Mayor Brown of Cardston.

"Aug. 21 and 22 we held conference at Cardston, and the house was filled to overflowing on Sunday, about 300 people standing on the outside unable to gain admission. Zina Y. Card was one of the speakers at the conference, and she afterwards left Seattle. Prof. Miller, of the Character Builder, also lectured on Saturday night, and Sunday evening was set aside for the meeting of the young folks, a good attendance being present.

"Here a telegram reached me from Moses Thatcher, Jr., inviting me to speak at the funeral of the late Moses Thatcher, but much to my regret I was compelled to remain and fill important engagements. Both President Lyman and myself united in sending a telegram of condolence, however. Two wards were reorganized here. Charles Cole was ordained bishop of Clarendon ward and George Wilford Pack, son of the late Ward Pack of Kansas, was made bishop of Starline ward.

THE HOMEWARD TRIP.

"We then started towards home, calling at Cowley, in the Big Horn country en route. We were prevented from going directly to Billings by a burning tunnel. It was reached by a circuitous route which delayed us several hours. Conference was held at Cowley Aug. 24 and 25, and the attendance was over

600 at the meeting Sunday afternoon. While here the Otto ward was reorganized with Neils E. Winters, bishop. Two patriots were ordained, namely, Gustave Anderson and John Egre, the latter being formerly of Parowan. In spite of many difficulties the people are making headway in that country. They have just completed a fine modern school building. We also went to Byron, the home of President Byron Sessions. On the way we passed an oil well, which is producing, but in what quantity I was not informed. We also went to Lovell where a burning meeting was held, after which we headed to wards home.

"In the three years that have elapsed since my last visit I noticed much substantial improvement in all the northern settlements. Evidence of material prosperity is to be seen on every hand, and we found the evidence of spiritual growth and integrity just as pronounced, all of which made the visit a memorable one.

BANK CLERKS TO STUDY.

University Professors Will Instruct Them in Commercial Law.

The bank clerks held the first of their meetings of this season last evening at the Commercial club with 35 present, and President Kelly in the chair. The following papers were then read: "What the Seattle Convention Accomplished," by F. M. Mickelson of the Utah Savings & Trust company; "A Few Ideas I Have of Which We Can Make Practical Use," by L. A. Van Vochile of Walker, Brothers' bank; "Benefits of Personal Contact With Leading Spirits of the American Institute of Banking," by William McEwan of the Zion's Savings Bank & Trust company.

The members of the association propose to take up a general study of po-

COLIC QUICKLY CURED.

Colic is one of the most severe and painful diseases. It is quite common. Almost everyone has an occasional attack. Fortunately there is a remedy that always affords quick relief and that has never been known to fail in any case. It is called Chamberlain's Colic, Cholera and Diarrhoea Remedy. Mr. Tod Robinson, a prominent merchant of Point Blank, Texas, says: "I have had several attacks of colic and in every instance one dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy relieved me, and I never had to take more than two doses to effect a cure." For sale by all druggists.
