TERMS IN ADVANCE.

GEORGE Q. CANNON,
BRIGHAM YOUNG,
Editors and Publishers.

Local and Other Matters.

FROM WEDNESDAY'S DAILY, DEC. 5.

Woman's Exponent.—We have before us the December 1st number of this worthy journal. It is full of excellent reading matter, not only suited to the tender sex, but it can be profitably perused by persons of the other gender.

A Sudden Attack.—We regret to learn that Elder John T. Lisonbee, of Monroe, Sevier County, who has just returned from a mission to the southern States, is at Springville, prostrated with sickness, having been suddenly attacked with illness at 11 o'clock on Friday last.

Another Newspaper.—The publication of another newspaper is announced to begin with the first day of the approaching year. It will be known as "The Salt Lake Daily Independent." Mr. John W. Pike is announced for managing editor.

Concert.—The concert by the Union Glee Club last evening in the Twelfth Ward, was well attended, and given in an able and pleasing manner, the audience manifesting its satisfaction by repeated applause and by encoring most if not all the pieces.

Notice.—At a recent meeting of the Central Committee of the Y. M. M. I. Associations, it was resolved to invite, at its future meetings, the attendance of all the members of the Associations and the young men generally of the city and vicinity. Also, to conduct a course of free lectures, on suitable subjects, for their entertainment and benefit.

JUNIUS F. WELLS, President.
BENJAMIN F. CUMMINGS, JR., Secretary.

Too Much.—Last night a man who had undertaken to carry an immoderate load of liquor, was unable to balance himself. He leaned against the window of the Co-operative drug store and one of the large panes let him inside.

This morning he was fined \$5 for being intoxicated, and the same amount was levied against him to pay for the broken window. He handed over the cash.

North.—A gentleman is expected at Ogden from Chicago, to inaugurate a slaughtering of animals and a shipping of dressed beef to the last named point.

The bridge over the Weber at Riverdale being out of repair, a man, wagon and team were suddenly let down into the stream on Monday night. He got his horses out, but had to leave his wagon until he obtained assistance. So we learn from the Junction.

Sudden Death.—Yesterday Jefferson Walker, on his way to this City from the Rush Lake Smelters, while on the Utah Western train, was seized with a violent fit of coughing and suddenly expired. Deceased had been suffering for about a year from consumption of the lungs; he was aged about 33 years, and was formerly of Ohio, but more lately of Pioche.

Yesterday Coroner Taylor and a jury held an inquest over the remains; the verdict being that death ensued by the bursting of a blood vessel, caused by violent coughing.

Mutual Improvement.—E. A. Wilson, of Spanish Fork, furnishes the following:

On the evening of the 29th of November, it being the first anniversary of their conjoint meetings,

the Y. M. M. I. and Y. L. R. Associations of Spanish Fork, held a re-union of their Societies in the Meeting-house of that city, which was conducted according to the following programme:

At 6 o'clock p. m. an assemblage of nearly four hundred young people was called to order by Bro. J. H. Brimhall, president of the Y. M. M. I. A., when the exercises began with singing, prayer by Z. Coltrin, Jr., and singing; opening address by J. H. Brimhall; dialogue by Sisters M. J. Morrison; C. Evans and E. P. Little, entitled "Woman's Blindness;" duet by Misses E. Isaac and E. Llewellyn, entitled "Dreamy Eyes;" reading of the *Youth's Advocate* by the editor, N. Smith; declamations, recitations, etc., were then rendered by the members, after which the closing address was given by Sister Morrison, President of the Y. L. R. Association, in which she spoke of the propriety of changing the above name to the Young Ladies' Mutual Improvement Association, which, upon motion, was done; the exercises closed with singing, and benediction by Bro. John A. Lewis.

Pepper and Whips.—The other day William A. Rooks addressed a note to a young lady employed in the millinery establishment of Mrs. Colebrook, soliciting an interview. His request was granted, and in the meantime four other young ladies, fired with intense indignation and resentment at certain alleged improper acts on the part of Mr. Rooks, concocted a plot to horsewhip the object of their wrath. The young lady who agreed to meet him, being a party to the plot, walked last night, about eight o'clock, with Rooks from St. Mark's School-house to the front of the Catholic Church, where the fair ambuscaders were secreted and in waiting. They rushed upon him like a miniature whirlwind, or an avalanche on a small scale, and while one threw a cord around him, to pinion his arms, another dusted some cayenne pepper into one of his eyes, and the remainder belabored him with blacksnake whips. The doughty Rooks then stood at bay, flourishing a pocket pistol in the direction of his fair assailants. Soon, however, the old adage of discretion being "the better part of valor," flashed across his heated brain, and he retreated in disorder, thoroughly demoralized, pursued by the persistent enemy. He took refuge in a newspaper office, but his fair pursuers besieged him in his retreat, opening upon him a furious fusillade from that most penetrating and terrible weapon of woman—the tongue. Finally the batteries of the assaulting party slackened fire, both sides of the combat retired, and the roar of battle subsided.

If the allegations against Rooks be true, he will have but small if any sympathy.

City Council.—The Council met last evening, Mayor Little presiding.

Thomas W. Jennings and nine other residents and property owners in the 18th Ward, petitioned for the opening to the public of Fruit Street, between Walnut and First East Street. Prayer of the petitioners granted.

Malcolm MacDuff, by remonstrance, protested against the opening of a street upon the margin of the Hot Spring Lake, as ordered by recent action of the City Council, and alleged that Solomon Brothers in their petition had misrepresented him and his acts; that he had not attempted to interfere with parties boating, fishing, or hunting on the Hot Spring Lake, but had forbidden parties trespassing upon his lands contiguous thereto, breaking down his fences and burning the material thereof. Referred to the committee on public grounds.

Samuel Petersen and forty-three others, residents and tax payers of the 2nd Ward, petitioned for the appropriation of their taxes for the present year for the repair of Eighth South Street, between Third and Fourth East Streets; also for the repair of several street crossings in said ward. Referred to the committee on streets and alleys.

Dr. S. B. Young, as quarantine physician, in a communication

urged the necessity of establishing a board of health for this city, through whose agency the spread of contagious diseases, such as scarlet fever, diphtheria, amongst children might be prevented; also suggesting the establishing of a city hospital and infirmary and a house of correction. Referred to the committee on quarantine.

The following bills for the month of November were allowed and the amounts thereof appropriated: City Marshal's expense bills, \$157.43; chief engineer fire department, \$178.70; Wm. Hyde, boarding city prisoners, 1,457 meals 15 cents each, \$218.55; gas bill, street lamps, \$1,110; gas to public offices, \$48.60; Dr. S. B. Young care of three insane patients, \$75 68; police bill \$960; W. G. Goforth, janitor City Hall, \$30; W. E. Hyde guarding water tanks and lighting oil street lamps, \$60; Wm. R. Adkins work on Union Square, \$47; collecting dog tax, \$54; David James tinning City Hall roof, \$98.10; Henry Dinwoodey shingles for City Hall roof, \$14 45.

Five hundred and sixty dollars was appropriated to pay interest on borrowed money, and \$1,000 to road and street improvement to be drawn upon the order of the supervisor of streets.

Council adjourned till next Tuesday evening at 6.30 o'clock.

Appleton's American Cyclopædia.—Next to the "Encyclopædia Britannica," this is probably the best, because the most complete and comprehensive work of the kind in the English language. Besides being behind none other in general respects, it has a special advantage of being the latest work in that line extant, and therefore incorporates material of the most recent dates.

The usefulness of the work is apparent, as it embraces all of the more practical departments of human knowledge, and therefore an authoritative book of reference it is necessarily invaluable. The greatest care having been bestowed in making the compilations, and the materials having been put in form by the best and most educated and reliable minds, it is a fountain of information to all classes of the people.

The work is of itself a complete law library, in which the legal subjects are treated by such men as Theophilus Parsons, LL.D., one of the ablest writers in that line in the world. The pens of Hon. Thomas McIntyre Cooley, Bernard Roelker and others have also been wielded for the American Cyclopædia. The accumulated medical and surgical knowledge of ages has been culled, condensed and arranged so as to be easy of reference. The contributors in this department are men ranking highest in the profession, and whose names are a guarantee of the soundness of the propositions advanced. The department devoted to religion is also most complete, the data and articles in relation to each denomination being the productions of the most able and prominent men in each. The army and navy are treated with equal ability. The department which will abound in usefulness more especially to the major portion of the people of Utah, is that which treats upon agriculture, Farmers, and especially agricultural clubs or societies, would find the Cyclopædia a most valuable aid in the pursuit of knowledge in relation to the farm and farm work. In fact, as stated at the outset, no department of utility and advancement has been omitted. To editors, authors and all other persons engaged in literary pursuits it is an excellent help and companion. Musicians will find much in it of use to them, it having more genuine information on musical subjects than most special works; the banker and money broker, persons interested in mines and metallurgy, the student of geography, and of the lives and deeds of all great men of history as well as living ones, can find in the Cyclopædia the information they seek, in a form most easy to reach, precluding the necessity of poring over numberless volumes. The connoisseur in wines, the sporting man, those interested in life insurance, steam and steam locomotion, and

navigation, the student of natural history and science, of ethnology and art, can all receive invaluable aid from this work. Education is made a special feature; and it is a commercial dictionary. Mechanism and all the industrial arts are made a chief consideration, and it should certainly be in the library of every civil engineer.

The Cyclopædia is complete in sixteen volumes, bound in every style, and can be obtained by subscribers one volume a month, or one in two months, according as may be desired. Mr. R. M. Powers is the general agent for Utah, and he purposes soon making a canvassing tour of the Territory.

Besides the enlarged Cyclopædia described above, Messrs. Appleton & Co., have issued a condensed edition, complete in four vols. It contains all the titles of the larger work, besides several hundred new ones, all of the maps and eight additional ones. The condensed work is sufficient for all practical purposes, having the information of the extended one, only in a more compendious form. However, either of the editions is admirably adapted for the private library or for mutual improvement and other societies. Of course the condensed work is much easier of attainment than the other, being less than half the price. Mr. Powers is agent for both editions.

Dr. Pierce's Golden Medical Discovery is not a "cure-all," but it does cure biliousness, or liver complaint, and all forms of blood and skin diseases, excepting cancer, which it will not cure. Pierce's Memorandum Books given away at all drug stores. w

of any Value.

If the testimony of eminent chemists, and sagacious medical men, is of any value, Dr. Price's Cream Baking Powder is the most perfect made. These men of standing, in their professions, not only recommend its use, but endorse it, by using it in their own families. 1

"THE CONFLICT OF AGES."

Men differ on nearly every issue. There have always been opposite parties in politics and religion, though the measures fought over one day may be universally adopted at another, and those sacrificed regarded as heroes and martyrs. Medicine has also been subject to revolutionary disturbances. When Drs. Harvey and Jenner announced their discoveries, they were held in contempt and ridicule by an incredulous and ignorant public, yet to-day they are received and honored by all as benefactors. When Dr. Pierce announced his *Discovery* many seemed to doubt, and were skeptical concerning all medicines and doctors, but proof of merit has dispelled all doubt, and to-day, the Golden Medical discovery is the standard remedy in curing the most obstinate diseases of the liver and blood, having almost entirely superseded the old-time sarsaparilla by reason of its superior merits. Norwich, Chenango Co., N. Y., November 3rd, 1876.

R. V. Pierce, M.D.

I was afflicted with a scrofulous affection on one of my legs. It was very troublesome for over two years, so much so that I could not wear a boot, and I had to keep my leg bandaged. It resulted in a raw sore. I got so bad that it became a general talk that I would have to undergo amputation of the limb. One physician told me he never saw such a sore cured. I commenced taking your Golden Medical Discovery together with your Pellets as directed on the bottles, and when I had consumed six bottles of Discovery, my leg was entirely well, and has remained so ever since—a period of over two years—and I would not swap it for fifty wooden legs.

Yours truly,
JOHN SHATTUCK.
