BY TELEGRAPH

PER WESTERN UNION TELEGRAPH LINE

AMERICAN.

Wired from Washington.

WASHINGTON, 18.—The State Department officials positively deny that the President has made any request for papers in regard to the condition of our naturalized citizens in Austria and Germany, or that there is any truth whatever in the Washington special to the New York papers to-day.

Agent Armstrong, of the Crow Agency in Montana, has telegraphed the Interior Department that the Indians on Tongue River are properly supplied with rations and are in no danger of starvation. It is said at the Department that a number of Indians left the Pine Ridge Agency some time ago despite the protests of their agent, and went into the Tongue River country. The agent at the Tongue River Agency, under instruction from the Department, refused to issue rations to them. It is presumed that their condition has given rise to the report of suffering among the Tongue River Indians. If the truant Indians are in distress they must return to Pine Ridge Agency, where their rations are issued.

Governor Edmund C. Ross of New Mexico, in his annual report, dwells upon the fact that immigration into the Territory is restricted by the fear as to the validity of the land titles there. He recites how the Spanish and Mexican grants have been made to cover grants vastly larger than was originally intended, and that great quantities of land have been fraudulently entered through forgery and perjury. He recommends Congress to appoint a commission to quiet the titles. The Indian troubles of the Territory are treated at length.

The Chief of the Secret Service Division in his annual report to the Solicitor of the Treasury shows that during the fiscal year 444 arrests were made by operatives of the service, assisted by local officers, a large majority of which were for passing, dealing in, or manufacturing counterfeit money. The amount of counterfeit money captured during the year was $365,580, mainly in flash notes. A large amount of plates, dies, moulds and counterfeiting material was seized and destroyed. The Chief of the Division expresses the opinion that there are now in the hands of counterfeiters about $100,000 in bad money of the following character: $20 silver certificates; $10 United States notes; $10 notes on the Third National Bank of Cincinnati, and $5 U. S. notes. The report says that counterfeiting coin is on the increase, which in the case of the five-cent nickel is due to the disparity between its face and intrinsic value. It also speaks of the good results of the law for the punishment of persons who counterfeit foreign money and securities. The report also says that while the counterfeiters of paper money have been unusually active during the past year, they have been generally successful in their efforts to float the results of their work. Recommendation is made for legislation prohibiting the making of dies or moulds for making *fac similes* for business purposes of United States coins, and another for legislation to extend the powers of the service so as to include authority to act in all cases of frauds against the government.

Commodore J. G. Walker, Chief of the Bureau of Navigation, in his annual report to the Secretary of the Navy, submits estimates for $130,000 for the support of the bureau during the next fiscal year. It is proposed that the *Ranger* shall be employed in sounding in the Pacific Ocean off the coast of Lower California and Mexico and in examining the North Pacific Ocean for rocks and shoals which have been reported in the track of vessels. The old surveys of the coast of the Spanish main are known to contain many errors, and it is proposed that the *Thetis* shall be used to make the surveys necessary to correct them. Upon the completion of this duty, the report continues, the *Thetis* should be sent to the South Pacific to examine many dangers to navigation reported to exist in that section, the existence of which has in many cases not been proved. Commodore Walker strongly recommends an increase in the clerical force engaged in classifying and copying the naval records of the war for publication. He submits as appendices reports of the heads of several divisions of his bureau and calls attention to their recommendation.

The Cattle Growers' Convention.

CHICAGO, 18.—The second day's session of the National Cattle Growers' Association of America opened with President Henry C. Alvord in the chair. Thos. Sturgis of Cheyenne, Wyoming, read a paper on "Live Stock Diseases," treated from the commercial standpoint. The paper recommended, first, a somewhat larger appropriation for seaboard quarantine, so that the bureau might retain men of character and ability; second, the suppression of foreign disease, increased power to the Bureau of Animal Industry and the passage of sanitary laws modeled on those of Nebraska; third, to sustain and rigidly enforce the local quarantine for protection against domestic diseases. The paper was warmly applauded.

The chairman of the committee on resolutions then made a report. The resolutions provided for the following: A finance committee of five to collect subscriptions and raise funds to prosecute and to secure legislation, this committee to act under the Executive Committee of the National Cattle Growers' Association. The committee to gather and give to the newspaper press, authentic information regarding contagious diseases, so as to remove popular misconceptions. The committee to urge upon Congress the necessity of perfecting the existing laws and to make provisions for a national oversight of cattle diseases by the Commissioner of Agriculture.

The resolutions asked for an appropriation of not less than $1,500,000 from Congress to pay for diseased cattle slaughtered, and also to provide for the payment of experts to settle the value of cattle on the basis of their health, before infection. The resolutions were adopted.

At the afternoon session, President H. E. Alvord read a paper entitled, "Dairy Interests of America." He represented that the farmer and the dairyman in putting upon the market a genuine article could not compete with parties who adulterated their products, and appealed to legislative assemblies to either suppress the manufacture of the bogus articles, or to cause them to be so labeled that the public could distinguish the genuine from the adulterated.

L. S. Coffin, of Iowa, presented a resolution calling upon the State and National legislative bodies to regulate the sale of adulterated butter if the traffic in it be permitted to go on. The resolution was carried unanimously.

The report of the committee on resolutions was received, and resolutions calling upon the Government to aid in stamping out disease and to suppress or regulate the traffic in adulterated dairy products and in relation to better cars in which to transport cattle and better means of branding cattle, were adopted, after which the convention adjourned *sine die*.

Turbulent French Canadians.

MONTREAL, 18.—The former comrades of Riel in the school he attended here have resolved to wear mourning for a month in respect to his memory. *Le Monde* this evening issued a bulletin, which stated that Madame Riel in a dispatch had expressed her willingness to have her son interred by the the side of the graves of the patriots of 1837. It is proposed to invite Madame Riel and her family to take up their residence in this city and to establish a fund for their support.

A deputation of the members of the Club Cartier has waited on Senator Lacaste and requested him to accept the leadership of the conservative wing of the French National party which is to be built up on the Riel question. Mr. Lacaste has asked a few days' time to consider the matter. He also intimated that he would first require to hear the explanations of the French Canadians.

The students, together with some quarrymen and others, numbering about 800, paraded the streets to-night. The quarrymen carried ax-handles, clubs and thigh bones. They shoved the people from the sidewalks, frightened horses and committed other aggressive acts. It was thought at one time they would attack the Salvation Army Hall. They have threatened to attack *La Minerve* office to-morrow night. About 250 of the Sixth Fusileers had assembled at Dominion Square to meet the French Canadians if they attempted to carry out their purpose of burning Colonel Stevenson in effigy on the Square. It is stated that to-night's demonstration was the result of information which the students of Victoria University had received during the day that the students of the McGill (English) University intended to burn Riel in effigy on the Champs de Mars to-night.

To Receive Parnell.

LINCOLN, Neb. 18.—A circular to the National Land League was issued by President Egan of the League, designating the following persons to act as a committee with the President of the Municipal Council in New York, to suitably receive Parnell and his colleagues on their arrival and escort them to the National Convention at Chicago: The several members of the National Executive Committee of the League, Rev. Charles O'Reilly, Patrick A. Collins, J. Mooney, Alexander Sullivan, Rev. T. J. Conaty, John Boyle O'Reilly, General M. Kerwin, Patrick Ford and John F. Finerty.

Veterinaries.

CHICAGO, 18.—The State Veterinary Association, at their convention this morning, heard a report by Dr. Hopkins, which was to be presented to the Cattle Convention, recommending more stringent laws in connection with cattle quarantine. The present officers were elected to serve during the ensuing term. They are: Dr. Kindekoper, President; Dr. Garth, of Lincoln, Nebraska, Secretary and Treasurer. Dr. Hopkins said the convention of Veterinaries had been an experiment. They had received encouragement and considered that their efforts had been successful. The convention adjourned *sine die*.

Celebrating.

SAN DIEGO, Cal., 18.—The city is crowded with visitors who have come to take part in the celebration to-day of the completion of the Southern California Railroad, which gives the Atchison, Topeka & Santa Fe system a through transcontinental road to the Pacific Coast with a terminus at this point. The greatest enthusiasm prevails among all classes of citizens. The day is observed as a public holiday, all business being suspended. The festivities will be continued three days. The floral and fruit exhibits are acknowledged to be the finest ever displayed on the Pacific Coast.

H. B. Claflin's Will.

NEW YORK, 18.—The will of the late H. B. Claflin makes his widow and two sons executors. The widow is given the Brooklyn residence; his son John is given absolute control of the amount invested in the firm for five years, after which it is to be equally divided between the surviving heirs. All his other property is to be divided at once. He leaves a letter, not mandatory, to his executors, expressing his desires as to public benefactions.

McCullough's Brain.

PHILADELPHIA, 18.—The examination of the brain of John McCullough was made to-day by Drs. Hugo, Engel, Chas. K. Mills and A. E. Rousel, in the presence of a number of leading Philadelphia scientists. It resulted in confirming the diagnosis made by Dr. Engel after the actor's return from Bloomingdale Asylum, and showed that there was a disease of the blood vessels of the brain, but to blood poisoning. It further showed that the bisilar artery and the middle cerebral arteries were the ones mainly affected: that the *Pia Mater* was opaque over a large part of the convexity of the brain, and was adherent, especially in the frontal parietal region. Neither tumor or abscess were discovered. The morbid conditions were found to explain the symptoms evinced during life.

A South Carolina Tragedy.

CHARLESTON, S. C., 18.—A terrible tragedy was enacted in Edgefield County to day. A white man named Robert Jones occupied some land rented from his relatives, Charles and Edward Pressly. They notified him that as he could no longer pay the rent, he must vacate to day. Jones went to the field where Edward Pressly, aged 80, and sons, Charles and Edward, Jr., were plowing and shot Charles dead. Edward started in pursuit and Jones stabbed him mortally with a knife. Jones then reloaded his gun and killed the father, old Mr. Pressly, who is a grandfather of Jones's wife. Jones then came to the court-house, entered the jail and surrendered, remarking that he had killed three of the best men in the county. This account is from the *News and Courier* correspondent, who visited the scene. Another account is that the Presslys went to the field where Jones was working, and that Jones killed them in self-defense.

Reformed Hebrews.

PITTSBURG, 18.—At the session of the National Rabbinical Convention of the Reformed Hebrew Church to-day, the subject of Sabbath observance was discussed at some length and a resolution was adopted declaring that there is nothing in the spirit of Judaism or its laws to prevent the introduction of Sunday services in localities where the necessity for such services appears or is felt. In the preamble to the resolution the importance of maintaining the historical Sabbath as a bond with the past and as a symbol of the unity of Judaism the world over, is recognized. After recommending the formation of societies for the propagation of Reformed Jewish doctrines among the poorer classes, the convention adjourned to meet in Cincinnati the first Monday in May, 1886.

Indian Trouble.

DENVER, 18.—Colorow, with 14 lodges of 500 ponies, camped on the Yampa River, 25 miles above Cross mountain, and burned the cattle ranges along the trail, leaving 75,000 cattle without feed. The Indians are slaughtering thousands of elk, deer and antelope for their hides, leaving the carcasses to rot. The settlers are wild over the destruction of the game and the ranges, and have assembled and will order Colorow to leave, and in case of his refusal a general extermination is expected. The Indians are well supplied with rifles and ammunition.

FOREIGN.

WARM WORK IN THE BALKANS.

Roumelian Reinforcements—Prince Alexander Wounded.

LONDON, 18.—The *Daily News* has a dispatch from Sofia confirming the report of the Bulgarian victory. The Servians lost 10 guns and 856 horses, and it is estimated that 3,000 Servians were killed or wounded. The Bulgarians on Tuesday captured 200 Servian cavalry. The Bulgarians have again repulsed the attacks on Dragoman.

The *Daily Telegraph* says: It is almost certain that Greece will go to war. A captain of the Greek navy has started for London to purchase men-of-war.

A dispatch from Sofia says: Troops are arriving here from Roumelia; 25,000 Servians were engaged yesterday near Slivitzna, while there were only 15,000 Bulgarians in the engagement.

There was desperate fighting at Slivitzna to-day. The Bulgarians forced the Servian right wing back at the point of the bayonet for several kilometres with great loss. It is reported that the Servians fired upon the Red Cross ambulances.

A militia force from Widdin has made a successful inroad into Servia, capturing 1,500 prisoners. The Servians retreated in disorder from Bulchino, Smolitcha and Tsdeu.

The following Servian account is from Tsaribrod: The Servians found the Bulgarians in unexpected strength at Slivitzni. The Servians after continuous fighting for eighteen hours are slowly pressing Prince Alexander forward Sofia. The Roumanians are disputing every inch. Thirty thousand Servians were engaged in yesterday's fighting at Slivitzni.

A dispatch from Belgrade says Queen Natalie has received a telegram from Zaitchar announcing the fall of Widdin. The same dispatch says a portion of the Morovia division, after a severe fight, captured Radomir. Four hundred prisoners have arrived at Belgrade from the front.

The *Times* says it is reported that Turkey and Servia have agreed to arrange the conditions of peace after the capture of Sofia. Turkey prefers a strong Servia to a strong Bulgaria, but also desires to save Prince Alexander's position as much as possible. Servia likewise does not wish to personally humiliate Prince Alexander.

The dispatch from Tsaribrod to the *Standard* says a decisive attack was delayed until all the Servian columns had been concentrated. A heavy cannonading was kept up throughout the day and several sham attacks were made.

A private telegram received at Belgrade states that all the troops, comprising the Widdin garrison, have been made prisoners.

Belgrade, 18.—Further details of the capture of Bresnik, state that the Servians carried eight lines of the entrenchments and captured 101 prisoners with a number of rifles. The Bulgarian commander at Bresnik fled, leaving his military papers behind him. The Bulgarian Volunteers with their leader also fled.

Sofia, 18.—A telegram states that the Bulgarian troops recaptured Bresnik and dispersed the Servians. No fear is entertained at present for the safety of Sofia.

Vienna, 18.—The *New Freie Presse* has a report that Prince Alexander has been wounded.

BANNOCK STAKE CONFERENCE.

REXBURG, Bingham County, Idaho, November 16, 1885.

Editor Deseret News:

Our quarterly Conference of this, the Bannock Stake, convened as per appointment on Saturday and Sunday, the 14th and 15th inst.

There were present on the stand: Wm. F. Rigby and Francis M. Gunnell, of the Stake Presidency, and Bishops of the various Wards; also Francis Gunnell, the Bishop's Agent of Cache Valley Stake, and others.

The reports, as given by the representatives of the various Wards, were very favorable; good health and a spirit of unity seems to prevail throughout the Stake.

The Y. M. I. A. and Sunday Schools were also represented by their respective superintendents as being in a flourishing condition.

It was reported that there were some 55,000 bushels of grain raised here this season, besides a very fair yield of vegetables.

The general and Stake Authorities were all unanimously sustained and all other business, necessary to be transacted on similar occasions was attended to.

The Conference was addressed by the Stake Presidency, Bishop Gunnell, and others, principally upon co-operation, tithing, defense fund, organization, the benefits of the various quorums with instructions to keep them in active condition. The support and protection of the poor, and other general instructions best adapted to the community.

Among the other speakers was Elder Wm. J. Pratt who arrived just as Saturday morning's meeting was being dismissed from Boise Penitentiary, where he had been imprisoned for nearly six months on the charge of unlawful cohabitation with his wives. He relates some of his experience while there, and manifested a still greater love for the cause of truth than formerly, as in the case with all true Latter-day Saints.

A Priesthood meeting was held Saturday evening, when Bishop Gunnell related his experience in Tithing matters and gave general counsel thereon, which, without doubt will produce good effects.

The Y. M. and Y. L. M. I. A. held their conference on Saturday the 14th, which consisted of three meetings, one of which was devoted to reports, the others to scientific and religious lectures, declamations, songs, etc.

The weather was clear and pleasant throughout the entire conference, and a heavenly spirit seemed to pervade all in attendance.

THOMAS E. BASSETT, Stake Clerk.

CORRESPONDENCE.

SUMMIT COUNTY MATTERS.

Improvements Made and Necessary.

ROCKPORT, Nov. 14, 1885.

Editor Deseret News:

Your correspondent left Coalville for a trip through Summit County on Monday, Nov. 9th, traveling up the Weber, and was surprised to see so

LITTLE PROGRESS

made in most of the settlements. There was not that evidence of thrift that is apparent in places more remote from business centres and the best markets the country affords. This portion of the Territory is noted for the severity and great length of its winters, yet the majority of the people who have to depend measurably upon their stock for ready cash and to obtain the necessities of life, have failed to provide suitable shelter for their animals and barns for the storing of their hay. Yet they are surrounded with the best of timber and they are manufacturing an excellent quality of lumber. With these advantages they are

AWAY BEHIND

many parts of the country where the people are less blessed with natural facilities. One gentleman remarked that it looked as though the people of this region were just stopping here temporarily, and did not intend to make permanent homes. Some of the people claim that their crops have been taken by the frost, but admitting all this, is it a sufficient excuse for the continued use of the old log huts as places of abode and the half-tumbled-down sheds for the shelter of their animals, when by thrift good, substantial sheds could be erected and cheap yet neat and commodious houses, hay barns, etc., built and thus their own comfort and that of their animals enhanced and sufficient waste avoided in a few years to cover the amount expended for these much needed improvements.

ANOTHER BAD POLICY

has been followed by the great majority of the people—the selling of their calves, and in average winters leaving their surplus hay to rot or be destroyed by the elements, instead of holding on to the young stock and feeding the old ones. A change in this policy would be a great benefit to the finances of the people and materially add to their prosperity, and would soon place the majority of the people in a position to improve their homes and surroundings, adding beauty and attractions where now appear neglect and slothfulness.

This is a good stock country, but could be made more profitable to the inhabitants by the erection of good and commodious quarters for their animals in the winter. Many of the residents realize the situation and are making commendable efforts to improve and beautify their homes and surroundings, and it is to be hoped that more will follow their example, until thrift will be apparent on all sides and the social and financial condition be improved.

THE TOWN OF PEOA

has lately grown in population and much new land has been brought under cultivation on the bench to the east, which produces some of the best wheat to be found in the Territory. The town, however, needs improving. A suitable schoolhouse would be a blessing to the rising generation and a meeting house for public worship is also much needed.

KAMAS

is lacking in enterprise except in the mercantile line. It is supplied with four stores to do the business that one well-conducted store could and should do. There is an absence of good and substantial barns. Though it has some thorough and energetic citizens, there is an apparent lack of that unity which is necessary to build up a solid community and progressive town.

ROCKPORT,

for good residences and apparent thrift, is ahead of its neighbors, while Wanship seems to be going backward. Still all of these places have been blessed this season with excellent crops and have a market for their surplus grain.

More anon. TRAVELER.

PACIFIC COAST NOTES.

CULLED FROM WESTERN EXCHANGES.

The late Wm. Sharon left $50,000 to charity and $50,000 to the Golden Gate Park.

A fire, which is believed to be incendiary, destroyed the Pioneer mill at Globe, Arizona. Loss, about $85,000

Over eighty men were discharged from the navy yard at Vallejo, Cal., last week. Lack of work and shortness of funds are the reasons.

Eleven Indians have been dispossessed from their homes on the San Fernando, Cal., ranch by the Sheriff, on a suit brought by Ex-Senator Maclay.

Seven shanties in Chinatown, Fresno, Cal., were destroyed by fire on the 14th. Loss, about $3,000, on buildings and contents. The fire originated in a laundry, and is supposed to have been occasioned by a lamp.

The Sacramento Supervisors have voted to offer a reward of $1,000 for the best remedy to exterminate the cottony cushion scale. It must be invented within one year, and with the right to be used free in this county.

It is reported that the Atlantic and Pacific Railroad has agreed with the Dominguez heirs at San Pedro to buy Rattlesnake Island for $50,000. If so the island will give the road a feasible salt water terminus. It has heretofore been held at $500,000.

A young man named Harry Hampshire, who had walked from Shasta County to Batavia, attempted to jump on a freight train near the latter place, on the 13th, but fell under the cars and both feet were crushed. The limbs were amputated here.

George Kohler's house and barn on the Washington road, a few miles above Nevada City, Cal., were burned on the 14th with all the contents, the owners being absent at the time. The fire is supposed to have been incendiary. The loss is between $400 and $500, not insured.

The counsel for Miss Hill, in her suit against the late William Sharon, purpose to go into the Probate Court with the case, and ask to have an administrator appointed, to take charge of and ascertain the amount of common property. Judge Tyler insists that the decree rendered by Judge Sullivan is final, and that Sarah Althea has the best of the controversy.

Virtue in the Family.

There are all sorts and degrees of virtue, and sometimes we are told that virtue is its own reward. Mr. A. F. Evans of Burr's Ferry, La., says, in writing about Brown's Iron Bitters: "I have been the recipient of its virtue in my family to a considerable extent." This great iron tonic has superior advantages as a reliable family medicine. Its power has been thoroughly tried, and its virtues abundantly proved. Nearly a million bottles a year are sold by the druggists of this country.

Ayer's Cherry Pectoral

Possesses the greatest possible power to heal and control affections of the throat and lungs, with absolute safety for children or adults. The experience of years has proven it to be of inestimable value as a household medicine, and for professional use. Thousands of physicians and families testify to its great worth. Jas. E. Molfug, Hilliard, Ohio, writes: "I have used Ayer's Cherry Pectoral in my family for twelve years, and have found that, as a remedy for Coughs, Colds, or Sore Throats, it

Is Unequaled.

J. J. Miller, editor of the "Lutheran Home," Luray, Va., writes: "I advertise nothing that I do not know to be good. I was saved from the grave, I am sure, by the use of Ayer's Cherry Pectoral, and have recommended it to others with the happiest results." L. J. Addison, M. D., Chicago, Ill., writes: "I have never [illegible] in thirty-five years of continuous study and practice in medicine, any preparation of so great value as Ayer's Cherry Pectoral, for treatment of diseases of the throat and lungs; and I constantly recommend it to my patients. It not only breaks up colds and cures severe coughs, but is effective in relieving the most serious bronchial and pulmonary affections."

John J. Uhlman, Brooklyn, N.S., writes: "Twelve years ago, I was afflicted with a severe bronchial trouble, pronounced by a skilful physician to be very dangerous, and liable to terminate in Pneumonia. After using one bottle of Ayer's Cherry Pectoral, I found great relief, and after additional use of it since that time has, I think, extended my life ten years at least." Mr. V. M. Thebaud, Montreal, Canada, writes: "Last spring my daughter was attacked by membranous croup, or diphtheria. The doctor prescribed Ayer's Cherry Pectoral, which cured her of the disease. Being still very weak and sick, she began taking Ayer's Sarsaparilla, which restored her to vigorous health."

Ayer's Cherry Pectoral,

PREPARED BY

Dr. J. C. Ayer & Co., (Analytical Chemists), Lowell, Mass.

For sale by all Druggists.

R. K. THOMAS.
