An Educational Endorsement. The Rev. C. A. Harvey, D. D., of the How-ward University, of Washington, has written the following letter:

GENTLEMEN-I take great pleasure in stating that I have for two years past been acquainted with the remedy known as Warner's Safe Kidney and Liver Cure, and that in some cases which had been given up by practitioners of both schools, the speedy change wrought by this remedy seemed but little less than miraculous. I am convinced that no remedy for kidney troubles heretofore discovered can be held for one moment in comparison with it.

Respectfully yours,

C. A. HARVET.

WARNER & CO.; GENTS—My wife has been suffering for the just five years from the results of a premature birth, and during that time she has been under the doctors' care and treatment, for a disease peculiar to the female sex, and generally named as a folling of the womb. After a thorough examination the doctors figuily concluded she had inflammation of the likelider, and changed their treatment accordingly, but as before without helping her in the least. We at last despaired of her ever their any better, and after expending an environment of money—gave it up. But a little while ago one of your pamphlets having been left at my house, and her symptoms being so accurately described therein, we concluded to try your Safe Kidney and Liver Gure, and I can truly state that after five years of faithful trial of physicians, this is the only thing that has done her the least good.

Having occasion to be in Spanish chinery? Well, your correspondent has put together more

Kidney and Liver Cure. It is pure, before being reduced to middlings because to the taste and absolutely retain in its results. It keeps those who intelligently use it in perfect inealth, and cures those whose seretions are deranged. For all uri- dlings after the grain has been pulmary complaints of either sex it is verized with the impurities adhermallible. For all bilious troubles it tion is far better than almost an certain. For the hot season it is impossible cure, for it is a fact, that to aluable, and it should be used after some impurities once get in the flour, it is imposible to remove them by any known process after granymptoms. It may save your life ulation. Every practical miller is aware that the ends of the kernels furnish nearly all the coloring mat-No remedy in America has ever ter contained in the grain except when mixed by grinding. When wheat is reduced to middlings and flour with this furze and fibre in it the effects are found in the flour of the first reduction, and what escapes that furnishes returns for the reels

a considerable portion of good stock has to be thrown off and finds its way into low grade. The logical method of procedure, in order to obtain the best results, is kidney and Liver Cure was recommended to to remove all impurities before the actual work of reducing the wheat Intoffourties commenced. This is accomplished sinca satisfactory manner in this mill by the use of Babcock's separator and cleaner, consisting of a number of graded screens or seives, whereby all weed seed, broken kernels, etc., are removed, thence to the smutter and from that to a patent, brushing machine, whereby all dust and dirt are removed and the wheat made as clean on the outside as it is in the centre. This machinery is all of Babcook's patents, and to all appearances it does the work as effectually as Pott's patent, with less complications, a description of which would take up too much space to give in detail. Another step in the march of imprevement is the re-grinding of the middlings which contain the cream of the wheat, being conveyed direct from the reels to the eye of the stone instead of being re-bolted only, as in some mills, thus extracting more of the best nutritive qualities of the grain, making a more profit-able article to the baker, and furnishing bone and muscle to the consumer. The whole fittings and fixings of the mill are sufficient

Farmers should be encouraged in

some way to raise wheat of the highest grade to keep pace with the improvements in milling machinery. An alarm of fire at midnight is a startling thing, but not half so startling to many who hear it as would be the sudden knowledge of their own dangerous physicial condition. Thousands of thousands are hurrying to their graves because they are carelessly indifferent to the insidious inroads of disease and the means of cure. It is the mission of H. H. Warner & Co., with their Safe Kidney and Liver Cure, to arouse men to a sense of their langer and then cure them.—Mamphis Appleal. tested by a double standard it will be found that some varieties of wheat are worth from 5 to 10 per cent. more to the miller for flouring We have what called the Clawson White, starchy wheat, not at all desirable by millers of the present day, and no miller can afford to manufacture www.
