FLOODS DO MUCH DAMAGE

Street Overflow into Cellars—Storm Plays Role with "Pine and Telegraph Wires."

Postoffice Lease Expires and New Location Wanted—Robert Downing May Play "Corianton."

Monday evening and Tuesday morning a very heavy snowstorm visited Ogden, the snow being extremely heavy and damp. The result was disastrous to the telephone, telegraph and electric wires, as the weight of snow broke down the wires. Nearly half the telephone wires in the city were useless for a time, the telegraph service was badly crippled, and the power had to be shut off for several hours during the afternoon to allow the wires to be repaired.

When the middle of the day came the warmth melted the snow rapidly and floods of water poured down from the hills. The water was so high that it was impossible to cross the city streets. The water was so high that it was impossible to cross the city streets.

After setting out that the petitioners are discriminated against by reason of others selling liquor at retail, without a retail liquor dealer's license, the petitioners ask the council to amend the liquor ordinance so as to make the minimum penalty for selling liquor by the drink without a license ten days' imprisonment and \$25 fine. The present ordinance provides a penalty of not more than \$100 fine or imprisonment for 100 days or both. The petitioners promise their assistance in enforcing the ordinance, if it is amended, so that they desire the council to take the ten days' imprisonment, will act as a strong deterrent to violators of the law.

Attack

Of Fast Heart Lasted 160 Hours.

Doctors Didn't Know What To Do.

Dr. Miles' Heart Cure and Nervine Cured Me.

"For seven years I have been troubled with what the doctors called a 'fast heart,' going at once from the usual beat to twice as fast, which in a short time would exhaust me terribly and only after treatment by a physician it would get back to normal speed. This condition, which I frequently had, came on once a week. Each attack would lay me up a day or more. The attack began January 13th, 1902, lasted 160 hours (about a week). My heart beat almost a hundred and fifty per minute and some times more. During this week my physician consulted with four other doctors, but all to no purpose. My heart finally slowed up, and I was then a serious question with my family what to do next; as for me, I was fast for gone to care much what happened. Dr. Miles' Heart Cure, 'write for advice' and my son wrote, receiving a nice reply. A neighbor told me he had used your remedies with great benefit. I took course, began the use of Dr. Miles' Heart Cure and Restorative Nervine and had taken eleven bottles of the Heart Cure and seven bottles of the Restorative Nervine. I had two slight attacks after I began the use of your medicine the last one lasting only three minutes. For more than three months my heart has run without a flutter. I am cured, and Dr. Miles' Remedies did the work. I have been postmaster here for more than ten years."—M. T. CANTRELL, P. M., Fremont, Kan.

DAMAGE BY FLOODS.

The recent heavy rains melted the snow and the canal, water ditch and ravine became raging torrents. Many homes on Hyrum levee were surrounded with large lakes, and all hollows were filled many feet deep. Cellars were flooded, the water was so high that it was impossible to travel. The water was so high that it was impossible to travel.

A small fish dam gave way Thursday night in old Camp Hollow, about one mile north of Hyrum. The small creek under the bridge on the canal road, not being large enough, the water tore away culvert and bridge, leaving a gap 20 feet wide and about three feet deep. It will cost about \$200 to repair the damage.

The immense bodies of water that came down from Paradise and the side hills caused the city fathers to fear for the levee. The levee was so high that it was impossible to travel. The water was so high that it was impossible to travel.
