of a majority of the stock, including those in Boston, have signified their willingness to enter into the alliance. In addition to this, an examination of the properties has been made and it is intimated that the negotiations between Mr. Dern and Captain De Lamar at a later day in Paris will most likely result lu the consolidation of the two onanzas. The wisdom of such a course is apparent and has been predicted by sev-eral mining men of the gold camp. By this means the base ore of the Mer-cur can be transported to the Gate shaft by tunnel quite easily, and with the 1,000 ton mill on the famous Gold en Gate property, and the 600 ton mil at the Mercur, the output of gold bul-lion should be phenomenal. There is some prospect that the Ingot may ultimately appear as one of the stars of the aggregation.

If the reader of this should chance to know of any one who is subject to at-tacks of billouscelle he can do him no greater favor than to tell him of Cham-berlain's Colle, Cholera and Diarthea Remedy. It always gives prompt relief.

Frequently accidents occur in the household, which cause burns, cuts, sprains and bruises. For use in such Via Oregon Short Line. Special train leaves 8:30 a. m.; returning, leave Og-den at 11 p. m., arriving Salt Lake to connect with street cars.

COPPER IN BUCKEYE.

A Large Body Reported in a Drift off the 300 Level. In a drift off the 300 level at the

Buckeye mine about 60 feet south of the shaft a vein of copper carbonates has been encountered, of generous proportions and good values, says the Tintic Miner, H. T. Sappington came out from Salt Lake Wednesday and took back with him about 100 pounds of the ore to submit to the assayer, but the shipping values are too evident to really necessitate a test. The extent of the strike is yet to be determined, but ev-erything points to a big ore body, and if the development of other copper properties in that neighborhood are a criterion, large deposits are to be expected in the sulphide region below the water level.

Mr. Sappington has labored under great difficulties to make a mine of the Ruckeye, and has invested individually a large amount of money. He deserves the success that seems about to crown us efforts.

CAPE NOME BEACH.

Now Believed that it Can be Worked Greater Part of the Winter.

A dispatch from Seattle, Wash., says that newspapers and private letters dated December 9, received here from Cape Nome, via Dawson, yesterday, say that considerable prospecting was to be carried on this winter. Many miners have an idea that at and below low water mark the richest sands will be found. Therefore, as soon as the ice is solidly frozen to the bottom of the shore they were to begin prospecting solve a much vexed question as to the origin of the gold in the beach sands Prospecting in the tundra warrants the belief that it is impregnated with gold much in the same manner as the beach Tundra prospecting, the advices say had not been carried on extensivedly owing to the difficulty encountered in

sinking to the dimently encountered in sinking to bed rock on account of wa-ter. The ground is found frozen to an unknown depth, the same as in the Klondike, and if it should prove rich, an area of country will be developed that will be greater than a score of Klondikes rolled into one. From what had already been done, it was said to be reasonable to predict that the tundra will prove very rich. Big propects, had been found in dozens of places, right from the grass roots, but the weather had not yet been sufficiently cold to enable bed rock to be reached.

BEACH WORKED IN WINTER. Contrary to the general opinion, it is

believed that the beach can be worked the greater part of the winter without 'burning." as is done in the upper Yukon country. The work will be slow, but the quality of the dirt, it is thought, will enable fair wages to be

made Anvil Creek is the Eldorado of Western Alaska, Claim No. 1 below has thus far proven to be the banner claim and is owned by Japhet Linderberg. The output has been enormous, when it is considered that it was worked but six weeks. From this claim \$117,000 was cleaned up, while Discovery yielded \$58,000 in three weeks. No. 2 above, \$20,000: No. 4, \$80,000; No. 5, \$40,000; No. 6 was worked, but the pay streak was not located. No. 7, owned by Dr. Rit-telsen, produced about \$30,000; No. 8, belonging to Price & Lane, \$182,000; No 9, belonging to the Swedish mission, \$68,000; Nos. 10 and 11, owned by C.

cline consideration of all offers of capi-tal until the report of the engineer has been received. No doubt exists of the nature of this report, as the syndicate in receipt of information tends to the confirmation of all that is given in the reports already received. As soon as a favorable report is re-ceived from Mr. Mathez the question of inviting subscriptions of foreign sapital will be taken up."

Park City's Ore Output.

The Record reports the following shipments out of Park City through the Mackintosh sampler during the past week:

Pounds. Apex... 26,100 Ontario 625,240 Valeo 27,160

Mercur Mining Notes.

Late reports from the Daisy are of a more encouraging nature than some of the earlier wild rumors that prevailed. Information obtained through usually well informed circles leads to the belief that the property has not yet had a fair test of its merits since the reconstruction of the milling plant, and it is the general opinion at the mine the property will yet be made a paying proposition. The last few days' run has been very satisfactory, and the em-ployes are satisfied they will receive. under present arrangements, more than Wages.

W. C. B. Allen, the well known Salt Lake mining man, and one of the early operators in this district, came out Thursday to examine and locate work the Geyser-Marion, Mr. Allen has but recently returned from an extended Eastern trip, during which he was su cessful in interesting capital in Utah

Inquiry at the Sacramento elicits the information that everything is moving along steadily and satisfactorily. The mill has been handling its full tonnage so far during the month, losing, how-ever, one day on account of interruption of power by the severe storm last week. Cross-cutting continues from the main tunnel level with encouraging results, and improved values are confi-dently looked for as the work progresses .- Mercur Mercury

Tintic Ore Shipments.

Special Correspondence. Eureka, Feb. 23 .- The ore shipments from Tintic district for the week ending today are as follows: Carloads.

Bullion-Beck .. Centennial Eureka Godiva Uncle Sam and Humbug May Day Mammoth Carissa Swansea...... South Swansea ------Sorenson & Hughes

In addition to the above the Mammoth mill sent out two cars of concentrates.

WEEK IN BINGHAM.

Drifting on First Class Carbonates at the Phanix-Dixon Ore.

In its review of the week in Bingham the Bulletin says: The Neptune and Kempton has out 400 to 500 tons of second-class, which will come down on tram to the Dewey,

Wednesday's ore shipments were four cars Highland Boy ore, two of Petro and two of Brooks (Niagara) concen-trates. Shipments are averaging about

eight cars daily. The Bazouk Consolidated Mining Company having obtained control of the Bazouk mine under bond and lease, it s, we understand, to be actively veloped from now on. The prospect is therefore good that another producer will be added to Bingham's list, as the Bazouk is neighbor to Eagle Bird, Barstow and other well known mines and well known to contain good mineral. D. Lane, were worked on lays, and the Electric hoists for inclines Nos. 2 and

Tintic Miner: A vein of copper ore has been encountered in the Red Rose shaft. at a depth of 400 feet, and this old time producer will again enter the list of shippers in the near future.

A letter from E. H. Airis at Los Angeles, Cal., states the weather is very dry down there for this season of year. Mr. Airis and wife are enjoying themselves and expect to be home in about two weeks.

will reach 9 cars.

The Butte Mining World says that deal for the Madisonian mine was the not consummated and work has been resumed on the property. Frank Turner, one of the owners, says that the mine will be operated on a large scale.

Three men are working at the Trinidad property at Sunshine. A. E. Snow, who was out there yesterday, reports the shaft down 175 feet. It is thought that the vein will be intercepted at 280 feet. Mr. Snow reports considerable activity in the district

Some fine copper speciments have lately been exhibited from the Cedar mining district, says the Reno (Nev.) Gazette. The Fairview property, which shows ore running as high as 70 per cent in the red metal, has been bonded to Salt Lake capitalists for \$15,000.

Frank L. Sizer, who has been visiting the mining districts between Tintic and Cherry Creek, Nev., has returned to the city accompanied by F. Green. Just what the visit portends is not known, though some have associated it with the long talked of railroad to Deen Creek.

The explosion of 20 or 40 pounds of giant powder which had been left in the Eureka-Swansea Mining company's shafthouse at Robinson, caused a great sensation yesterday afternoon. The shaft house was ruined, but no one was hurt, as the miners were down the shaft.

The annual meeting of the Emerald Mining company of Tintic resulted in the election of the following officers, the election of the following binders, says the Eureka Republican: W. F. Earls, president; J. E. Oglesby, secretary and treasurer; J. L. Yundt, manager, who, with C. M. McMabon, constitute the board of directors.

Eastern Utah Advocate: Manager Ferron of the Raven Mining company was here yesterday. He says he has about two hundred tons of elaterite ores on the dump and will make a shipm. ment likely by way of Price in the near future. He is anxious to get the stuff out of the way for dump room. The output will be materially increased the next few months.

Halley (Ida) Times: John W. Redding has leased to W. J. Bonner and Chas. Bonner of Salt Lake the Hidden Treasure and Idaho Central lodes, in Blaine county, Ida., for a term of eighteen months on a royalty of 10 per cent. The lessees have the privilege of buying the property by paying \$5,000 on or be-fore February 21st, 1901, and \$5,000 on or before the 21st day of August, 1901.

Hailey Times: Frank E. Wilson, manager of the Ætna Mining company, is staying at the mine of the company in Greenhorn Gulch, awaiting the completion of a piece of work that is likely to make considerable of a change in the value of the property. He expects to leave for Salt Lake in a week. At-torney T. Marioneaux, who accompanled Mr. Wilson, has returned to Zion.

Superintendent C. E. Allen of the entennial-Eureka came in from that Tintic bonanza last night and reports some delay in the operations of the tramway owing to changes necessary in the chutes. About 60 tons a day is going via the tranway and the rest of the output is being handled by wagons. As soon as the new boiler is ready for use a more energetic campaign of development will begin.
