A class of fifty ladies assembled yesterday at Miss Parloa's school, No. 222 East 17th street, to attend a lecture on soups. A mixed stock made up of two pounds of meat and bones to a quart of water was shown to the class. The soup, Miss Parloa said, had been simmered slowly for six hours, when a bouquet of sweet herbs, six cloves, twelve peppercorns and one onion were added to each gallon. It was then cooked two hours longer, strained and in the morning skimmed of fat. A ortion of this stock was cleared be fore the class, with a pound of chopped beef, which served both to clear the stock and to color it delicately. Miss Parloa prepared cream of rice soup from a quart of white stock, one cup of rice, a sprig of celery and a small onion. These ingredients were simmered to-gether two hours, cooking slowly. A quart of cream was heated to the boiling point and added to the soup, with seasoning to tastc. The whole was put through a sleve and was then ready to be served.—New York Tribune.

One of the hottest regons of the earth is along the Persian Gulf, where little or no rain falls. At Bahrin the arld shore has no fresh water, yet a comparatively numerous population con-trives to live there, thanks to the co-plous springs which burst forth from the bottom of the sea The fresh water the bottom of the sea The fresh water is got by diving. The diver, sit-ting in his boat, winds a great goatskin bag around his left arm, the hand grasp-ing its mouth; then he takes in his hand a heavy stone, to which is attached a strong line, and, thus equipped he plunges in and quickly reaches the bot-tom.
