Report of Climate and Crop Service, Weather Bureau.

Weather in Utah the Past Week; and Reports From the State of the Condition of Crops.

SALT LAKE CITY, Utah.
May 18, 1897.

Throughout the State the weather during the past week has been very favorable to agricultural interests, although a little too dry; some localities for germination of seeds and growth of vegetation. The days were warm, dry and sunny, and the nights moderately cool, with light frosts in a few districts on the 11th and 12 h. Thunder showers occurred on Saturday in Beaver, Cache, Iron, Utah, Carbon, Salt Lake, Emery, Piute and Sanpete counties, and did a great deal of good in the way of sprouting grain and advancing the growth of crops. In portions of Millard, Tooele, Weber, Rich, Kane, Juab and Grand counties, the soil is very dry and rain is needed badly to bring up the late planted grain. In portions of Rich county the fall wheat is looking poorly on account of the prevailing dryness, and in other sections it will have to be watered if rain does not come soon. The lucern is fast recovering from the effects of the frost of the previous week, and in everywhere reported in excellent condition and making rapid growth. Late reports indicate that the first crop was not damaged to any great extent by the recent cold snap, and that the outlook is very bright for a prosperous fruit season. Corn and potato planting is moving rapidly in the central and northern sections of the State; in the southern portion of the State early potatoes are in bloom, and in the vicinity of Moab, Grand county, strawberries are ripe. The first cutting of lucern hay commenced in Washington county.

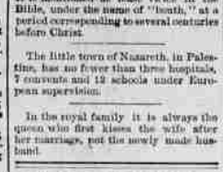
J. H. SMITH,
Section Director, Salt Lake City, Utah.

The origin of soap is a mystery, but we have many evidences of its antiquity. It is mentioned at least twice in the Bible, under the name of "bonth," at a period corresponding to several centuries before Christ.

The little town of Nazareth, in Palestine, has no fewer than five hospitals, 7 convents and 12 schools under European supervision.

In the royal family it is always the queen who first kisses the wife after her marriage, not the newly made husband.



A healthy woman experiences the greatest happiness of all in her life when her first-born, the baby, is in her arms. Motherhood is a woman's duty and privilege, and her pride. There are thousands of women to whom motherhood is a terror because of weakness and disease of the organs that make it possible. This is wrong and need not be. If a woman will prepare herself for the ordeal of motherhood by timely feminine, and learn to take the proper care of her health — to take the proper remedy for weakness and disease peculiar to her sex, motherhood will become an unalloyed pleasure, where now it is dreaded as a time of suffering, pains and dangers.

The best medicine for a woman to take during the period of motherhood is Dr. Pierce's Favorite Prescription. It is the only medicine for this purpose invented by a regularly educated physician, who is a specialist in the treatment of the peculiar diseases of women. It cures all weakness and disease of the organs that make motherhood possible. It makes them strong and vigorous. It rids the expectant period of its usual discomforts. It makes baby's coming easy and almost painless. It is the discovery of R. V. Pierce, M. D., chief consulting physician of the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y. Write him about your case. Every sick woman's "Favorite Prescription" should write him.

Frederick Frederick, of No. 214 ½ Second St., Corsicana, N. J., writes: "I had been in poor health for some time and tried Favorite Prescription' before I got any relief. I then got a bottle of Dr. Pierce's Golden Medical Discovery' and after taking one bottle I felt much benefited. I continued taking the 'Favorite Prescription' and was cured."

Constipation is the cause of health alone. Nothing else. A healthy man can't be unhappy if he wants to. Much sickness is caused by constipation. Dr. Pierce's Pleasant Pellets cure constipation.
