MINING, BUSINESS AND STOCKS

BOSTON CON. LETS A BIG CONTRACT

General Manager Hanchett Completes Order for Table Equipment of Garfield Mill.

FOR 286 WILFLEY TABLES.

Work at Mill Site Progressing Rapidly —Railroad to Scene of Steam Shovel Operations.

The Boston Consolidated Mining company, which has begun the construction of its 5,000-ton concentrating mill at Garfield, let a big contract for equipment today. The order calls for 286 concentrating tables and the company has obligated itself to pay therefore a sum in excess of $100,000. A few days ago, General Manager Lafayette Hanchett awarded a contract to the manufacturers of the Johnston concentrating table for 254 machines.

The engineers of the Boston Consolidated company, in designing the big plant, provided for the installation of 540 tables in the concentrating department, consequently the order placed today completes the table equipment of the new mill and means an expenditure in this direction of considerably over $200,000.

At the mill-site is a force of probably 74 men employed at the present time in grading, putting in concrete foundations and doing other preliminary work, while at the mines, Manager Louis S. Cates is carrying forward the "getting ready" campaign with a vim that is characteristic of all heads of departments of the mines under the control of Samuel Newhouse.

The railroad track built out from the high line of the Copper Belt railroad to a point where the steam shovel is to go into commission, will be completed by tomorrow night. General Manager Hanchett said today that two of the locomotives to do service on this stretch of road are under steam and that the shovel would be in operation within the next few days. The latter is to be used for the present in stripping the surface and by the time the mill is ready for operation, early in 1907, the mine will be in shape to respond with a tremendous tonnage from the copper bearing porphyries.

MORRISON DIRECTORS.

Will Probably Decide Today to Purchase New Equipment.

The directors of the Morrison Mining company, operating in Humboldt county, Nev., will hold a meeting this afternoon to discuss the matter of placing an order for new equipment, to consist of a hoisting plant, compressor and power drills, etc.

Sidney Bamberger, one of the directors of the company and consulting engineer, returned from making an examination of the mine, and has reported that the present condition of the mine justifies this expenditure. A good sized vein of ore has been opened carrying fair values, but is of the opinion that by doing some sinking it will not take long to open into some big bodies of high grade shipping ore.

BINGHAM MINING NOTES.

Rio Grande to Build Long Tunnel for Its Sky Line.

A preliminary survey for a 2,400-foot track to run from the Utah Apex to the Yampa mine spur of the Copper Belt has been started during the past week by the Rio Grande engineer, H. C. Goodrich.

The steam shovel to be used by the Utah Copper is now on the ground. Workmen have been busy during the past few days in rigging up the machinery and within the next fornight it will be in use.

The big tunnel of the Utah Copper is progressing as rapidly as can be expected and according to the report from the mine superintendent, everything is progressing satisfactorily.

A tunnel nearly 4,000 feet long will be driven through the mountain for the new Sky Line of the Rio Grande running to the Boston Con. and Utah mines. The tunnel will start in the east side of the mountain just above the depot and will come out opposite the brick schoolhouse.

William G. Brown, a wealthy investor of Gloucester, Mass., Lieut. John E. Cotter of Boston, Henry E. Brown of Boston and R. E. Booth of Bingham Junction were Bingham visitors on Tuesday. Mr. Booth is superintending the development of the Bingham group and the visitors are also interested in the Bingham Metal, being developed by Joseph Kauffman and associates.

Work on the Red Wing mill at the foot of Markham Gulch will begin in a few weeks. The plant is to have a capacity for the treatment of 300 tons a day. The development of the mine progresses steadily with greater tonnage being added to the reserves each day.—Bulletin.

WORK AT SCRANTON.

North Tintic Mine Shipping Forty Tons Or Ore Daily.

The Scranton Mining company, operating a zinc-lead mine in the North Tintic mining district, is shipping ore at the rate of 40 tons a day and has in its employ about 35 men. The recent trouble with miners, who objected to eating food prepared by a Chinese cook is a thing of the past.

The situation of the mine is such that it is a difficult matter to get white help for the boardinghouse and while the management would prefer to employ other kitchen help, circumstances are such that it cannot be very well avoided.

ON MINING EXCHANGE.

Lower Mammoth and New York Furnish Today's Features.

The week opened on the mining exchange with the sale of 24,500 shares for $14,923.50; Lower Mammoth and New York Bonanza furnishing the features. The former created quite a stir in the pit when a lot of 400 shares, offered at 60 cents, was promptly taken. On the open board the stock sold as high as 67 cents and as low as 57 cents, and closed on a sale of 10 shares at 61 cents. New York sank slightly, while Silver Shield of Bingham sold as low as 10 cents.

A single lot of 100 shares of Daly Judge went at $11.75. Columbus Consolidated was in slight demand, but a few sales were recorded at $8.20 and $8.25. Thompson dropped to 43½ cents.

The closing quotations and sales were:

CALIFORNIA TOURMALINE.

The southern countries of California bir fair to rival the Ural Mountains in the production of tourmaline, beryl, topaz and the other precious stones which have been the pride of that region for the last half century. The Palo region in San Diego county has become especially notable in gem production, and Mr. George F. Kunz of the United States geological survey calls attention in his forthcoming report on the production of precious stones in 1905 to the fact that a number of adjacent localities give indication of yielding the same minerals.

CALIFORNIA MINE TO MR. NEWHOUSE

Local Mining Man Joins Michigan Men in Opening a New Copper Camp.

IN SAN BERNARDINO COUNTY.

Purchase Price $120,000— New Machinery Ordered and Work Has Begun.

A dispatch from San Bernardino, Cal., today contained the information that Samuel Newhouse and a number of parties connected with the Calumet & Hecla mine of Michigan had purchased for a consideration of $120,000, the New York mine located in the eastern part of San Bernardino county.

The foregoing was later confirmed by Mr. Newhouse except that he did not know that the property is the New York. "All I know about the deal is this," said Mr. Newhouse, "I was asked by some friends who are extensively interested in the Calumet & Hecla, to join them in taking hold of a California property. I told them that I would do so and they requested me to send my experts on to conduct an examination. Inasmuch as my men were busy in other fields, I could not do so, but was willing to accept the report of the engineers which they had already sent to the scene. I was called on for my portion of the cost and remitted my check. But really, I know very little about the property any more than that there appears to be some large copper ledges there, and that they contain very good values."

This mine is said to be the oldest in the eastern part of the San Bernardino copper belt, is on the east slope of the New York Mountain near Vanderbilt station, on the Santa Fe branch line from Blake. It has been well developed by owners who are residents of New York. Very rich ores are said to be exposed for 700 feet in length, in a vein from 12 to 40 feet wide.

New York mountain is now said to be dotted with camps and great activity prevails in development of copper veins which throughout the district are reported to be of great width and carrying high values in carbonates and oxides, with sulphides appearing wherever sufficient depth is reached.

The copper belt appears to extend through San Bernardino county from near the northeastern corner and generally parallel to the Nevada-California line to the Von Trigger mine, a few miles north of Blake on the Santa Fe railway—a distance of some 50 miles.

A lot of machinery has been ordered, Mr. Newhouse says, and a large force of men is now engaged in opening up the property.

LO. MAMMOTH STRIKE.

Copper Ore Cut Into by Winze at 1,690 Feet Depth.

What appears to be good grade copper ore has been encountered in a winze sunk 90 feet below the 1,600 level. As a result of the find there was much activity displayed by that stock on the floor of the mining exchange today.

COPPER STATISTICS.

How They Will be Conducted After January 1 Next.

After Jan. 1, 1907, the collection of copper statistics for the United States geological survey will be in the hands of L. C. Graton. During the coming summer, Mr. Graton will visit the principal copper camps of the country, including those of the Lake Superior, Bingham and Butte districts as well as the four great camps of Arizona at Clifton, Bisbee, Globe, and Jerome, and the district about Redding, Cal. Mr. Graton will spend most of the summer at Redding, but will visit the other camps en route to California or Washington, taking in the northern camps on one trip and the southern camps on the other. While at Redding he will make detailed investigations of the geology of the district.

The general geology of the Redding quadrangle has been studied by Mr. J. S. Diller, who has written the text and prepared maps for a folio of that area which will soon be published. Within the quadrangle, however, are three small but very important copper areas of which special topographic maps have recently been made. These areas are the Bully Hill, Little Backbone, and Iron Mountain districts. Mr. Graton will study their geology in detail and write a report on its economic features.

OVER THIRTY MILLIONS.

Value of Precious Stone Importations During 1905.

If the importation of precious stones into the country is any indication of general prosperity, then the year 1905 must have brought material blessing to many in the United States. According to the forthcoming report of Mr. George F. Kunz, special agent of the United States geological survey, the value of the precious stones imported into the United States in 1905, was $34,998,513, as compared with the imports of 1904, valued at $26,086,813. The stones imported in 1905 included glazier's diamonds worth $6,850, diamond dust valued at $190,672, rough or uncut diamonds worth $741, unset ones valued at $20,373,304, and other stones, not set, worth $4,144,424. Especially noticeable is the fact of the greater importation of the rough material and the greater decrease of the diamond-cutting industry in this country. The importation of precious stones for the month of December, 1905, was valued at $3,633,379, which is as much as the importation of any entire year up to 1879.

This importation was attended by prosperity in every branch of the jewelry business, the sales ranging from the richest gems to those of the poorest qualities, and even to every known form of imitation.

DEATH OF WILLIAM A. AKERS.

A Los Angeles dispatch contains the news of the tragic death of William A. Akers, the well known mining engineer, in an automobile accident. The mishap occurred on Saturday night and Mr. Akers died in the California hospital at 1:30 yesterday morning. The deceased was formerly a resident of this city and was for a number of years connected with the staff of the Amalgamated Copper company in Montana. During their residence in this city Mr. and Mrs. Akers were popular society people.

CONCENTRATES.

W. A. Rhodes, the well known curbstone broker, spent the Sabbath in Bingham.

Judge W. I. and Grant Snyder were in Park City yesterday. They went to look over conditions at the Odin mine.

Manager Tony Jacobson of the Columbus Consolidated of Alta, has gone to Fairview, Nev., on mining business.

D. C. Jackling has been elected manager of the Bingham Mines company, a new corporation, former last week to develop an attractive property in the upper part of the camp of Bingham.

The West Mountain Placer Mining company has sent out dividend checks amounting to 2 cents a share. The only income of the company is what it gets for the sale of water to the Utah Copper company.

One hundred De Forest Wireless stock at $3.00. Must be sold at once, so give us a bid, E. M. West & Co., Tel. 165. 327 D. F. Walker block.

STOCKS CONTINUE DOWNWARD COURSE

New York, June 18.—Prices at the opening of the stock market today pursued a downward course in the first dealings of the week and stocks were freely offered in all quarters. A sprinkling of small gains on first prices was poorly held. Anaconda sold off 2 points, Virginia-Carolina chemical preferred 1 and Atchison and Smelting large fractions.

Rapid changes in the market's course occurred in the first hour in a large volume of business. The movement of Reading was illustrative of the general market, but the ranges in most other stocks was not so wide. Reading, after dropping ¼ to 128½, rebounded to 130⅝ and was then driven down to 128⅝. By 11 o'clock it was back to 130⅝. The general market was also at the top again. The principal advances were Atlantic Coast Line 2½, D. & H. 2, Union Pacific and Great Northern preferred 1¾, Northwestern 1½, and L. & N., American Car and Pressed Steel Car 1. The declines included 1½ in Illinois Central, 1¼ in New York Central and Smelting, and 1 in Kansas City Southern preferred. St. Louis Southwestern preferred, Lead and United States Realty.

Support became effective andsome points of strength developed. The movement was generally narrow and the strength was irregular. Consolidated Gas moved up 5, Great Northern preferred 3¼, Northwestern, 3, Reading and Anaconda 2, Union Pacific 1⅝ and St. Paul, Missouri Pacific, Atchison, B. & O., Amalgamted Copper, Locomtive and Colorado Fuel 1. Iowa Central preferred receded 3½, Pullman 2, People's Gas 1⅜, Tolodo, St. Louis and Western preferred 1½, and Colorado & Sourthern second preferred 1½. Tennessee Coal 1. Prices receded again before noon, Pennsylvania showing evidence of pressure.

Bonds were heavy at noon.

Renewed efforts were made to drive the short interest to cover in various stocks that have recently fluctuated widely, particularly Reading and B. & O. The buying, however, was of spasmodic character and frequent raises occurred. Reading, after being pushed up 2 points to 132¾, ran off over a point and the market was dull and yielding at 1 o'clock.

The persistent selling of Pennsylvania eventually caused a general decline which wiped out a good proportion of the day's rise. Pennsylvania itself sold 1⅜ below last week's closing and Reading fell 2 points from the best. The latter stock led a rally around 2 o'clock.

LIVESTOCK.

Chicago, June 18.—Cattle—Receipts, 43,000; market 10 cents lower. Beeves 4.60@6.60; cows and heifers, 1.50@5.10; stockers and feeders, 2.75@4.60; Texans, 3.75@4.30; calves, 5.00@6.75.

Sheep—Receipts, 500; market steady. Yearlings, 5.75@6.25; wethers, 5.50@6.15; ewes, 5.00@6.00; lambs, 6.00@7.00.

PRODUCE.

Chicago, June 18.—General rains throughout Kansas caused weakness in the local wheat market today. There was heavy profit taking at the start and initial quotations showed sharp declines. Shorts were the principal buyers during the few minutes, but later this demand was reinforced by buying by commission houses, which caused a steadier feeling. July opened ⅞ to 1 lower at 82½ to 83, and for a time held around 82⅞.

A break in drouth conditions in various parts of the corn belt was the signal for heavy realizing in the corn pit. July opened 1⅛ to 1¼ lower at 52 to 52⅛, sold at 52⅝ and reacted again to 52½.

Oats were weak on improved weather conditions. July opened 1¼ to 2⅜ lower at 39¾ to 41, sold up to 41⅝ and then declined to 40⅜.

Provisions were steady; September pork was unchanged at 16.80; lard was also unchanged at 9.07½, and ribs were 2½ lower at 9.55.

July after declining to 82⅜, rallied on covering by shorts to 83⅛. The close was steady with July down ⅝@1⅛ at 82⅞@83.

Corn—Profit taking continued throughout the day. The close was easy with July down 1½ to 52⅜.

Close: Wheat—July, 82⅞@83; Sept., 82¼@82.
Corn—July, 52¾; Sept., 52⅛@52¾.
Oats—July, 40⅜@40½; Sept., 37¼.
Pork—July, 17.05; Sept., 16.75.
