In the culture of the apple every means should be applied to form a strong, healthy tree when said bond shall be approved by and filed in the office of young; and when coming into bearing, if the fruit is too thick for the well being of the tree, it should be thinned, so that the fruit may veying the dead when called upon so to do by any who come into good maturity and so that the tree may not be too much overtaxed when young, which is often the case in this country.

CONCERNING THE DISTANCE

That the trees are to be planted apart: this must depend entirely on circumstances; lot or lots, and such lots or parts of lots together with all whether for the orchard or garden and what execution. varieties. One thing, however, is recommended; namely, when an orchard is planted, the burying ground which shall come under his observation, sole object [should be to produce apples. No calculation should be made for growing grain or vegetables in the apple orchard when it is with the name of the physician or nurse who attended in full bearing, and even when the trees are young, either vegetables or grain should be of deceased persons burled in said grounds are hereby re- but feeling assured of his convalescence he ventured out sparingly planted, so that the young trees may their lots, or head boards with the name of the deceased not be retarded in their growth at the onset. apart may be considered a good distance apart for apple trees in an orchard. 4th, and lastly-He wishes to know, also, how long the mill of his village, which is An Ordinance relating to Supervisor of Stree's. moved by a small volume of water, could turn with the liquid absorbed by him during sixty years?

Here is the answer made for him by a smart mathematician:

1st-He has drunk in sixty years, 16,425 pints of brandy.

2d-He has drunk in the same time 10,950 pints of coffee.

3d-He has drunk 87,600 pints of cider.

4th-He has paid to the seller 50,300 francs. 16,425 pints of brandy, 10,950 pints of coffee, and 87,600 pints of cider. Total, 114,975 pints of liquid.

So the mill of La Carriere, which is moved an equivalent therefor. by 1730 pints of water in a minute, could turn one hour, six minutes and thirteen seconds a period of sixty years.

NATIVE WIT .- A good story is told of Dr. McKenzie. Some time ago the doctor accom- delinquent tax payers. panied some fair Philadelphians to the Navy boat the beauty of the surrounding scenery, when a puff of wind gently lifted his hat off his head, and carried it like a bird flapping its wings up the river.

"Good heavens!" cried the doctor, "there's some poor fellow's hat in the air. Well, that's a joke I always laugh at!"

The roar of laughter which greeted him all around, and the direction all eyes took to his head, induced him to put his hand there.
