

A Petty Burglar.

The residence of Dr. John R. Park, in the 15th Ward, was entered by a burglar some time between 1 o'clock and the hour of rising, this morning. The thief went in through the north window of the kitchen, and confined operations to that particular department. The family on arising found that a gold ring worth \$7 and \$2.25 in cash belonging to a young lady of the household, had been taken; also two current pieces from a shelf, and a comb. These are all that have been missed, though a great many articles were rummaged about promiscuously. As said, the kitchen was the only part of the house entered by the thief, who must have had a candle, as the floor of the kitchen was strewn with sperm drippings. On the outside of the north window, which had been raised, the ground was quite soft, and upon it were footprints, the heel-mark of which was that of a man's fine boot, or a woman's shoe. It is not improbable that the burglar was of the gentler sex. The missing pie and comb, the fact that other apartments were unmolested (which is not the general custom of your bold male burglar) taken with the fine heel-mark, though they do not confirm, certainly lend some color to, the supposition. The family were nearly all sleeping up stairs. The owner of the house sat up until 1 o'clock, so the robbery must have occurred subsequent to that hour. The only article of value which is considered much of a loss, is the ring, which was an ad value-yeung his intrinsic worth to the young lady owner. These petty depredations are becoming common as the warm weather advances. Windows left open for ventilating purposes give every chance to the "enterprising burglar." Those who cannot sleep in comfort with closed windows should keep a reliable firearm near the bedside, and when the thief puts in an appearance, give him the contents without compunction.

Committee Meeting.

Agreeable to request, the Bishops and Counselors of the various Wards met last evening with the Committee on Invitation of the proposed 4th of July celebration, to receive instructions concerning the coming event, and confer with the committee on various matters pertaining to invitation, etc. The object of the meeting was stated by one of the committee, who said that it had been deemed best in every way to throw the matter of invitation into the hands of the Bishops, with instructions to invite all the residents of their respective wards, irrespective of age, creed or color, to participate in the celebration, and that each Ward proceed separately to the Mill Farm, where its proper place would be assigned in the grand encampment. The Grove is to be divided into sections of various sizes, according to the population of each ward, which will have the privilege of decorating and fixing up as it pleases, furnishing its own flags, banners, picnic, vehicles, music and in fact everything within its power to make the occasion one of comfort and rejoicing. The roll of Wards was called to ascertain how many bands could be furnished, each Bishop answering accordingly. After discussing various things, it was moved and carried that the Bishop of each ward select a committee of two persons to acquire various items of information respecting numbers, music, etc., each Ward would furnish, together with any information the General Committee on celebration might wish to learn and report at the meeting of this body at the City Hall, this evening, at half-past 7 o'clock. The meeting then adjourned sine die.

More Matches.

Mr. L. Davis, of San Francisco, called upon this morning. He is a match-maker by trade, having owned a factory in that large city for over five years. His manufacture is called the California block match, put up in packages of 200, 400 and 1,200. The advantages claimed for them are convenience, cheapness and reliability. Mr. Davis intends going into partnership with Mr. M. Lovendahl, of South Cottonwood, whose products in this line are already known to the public. They will commence manufacturing within a week or two. The factory will be at Cottonwood, with an agency in this city. They will make all kinds of matches, and warrant them of superior quality. Mr. Davis says the California block matches are the only kind used on the Pacific Coast, and they will be sold here at least 30 per cent. cheaper than the matches imported from the east.

A Narrow Escape.

Last evening, Mr. W. S. Crismon, of this city, returned from Granger, on the U. P. and Oregon Railroad, where he was employed, and met with a painful accident last Monday night. He was loading a Winchester rifle, a breech-loader, when on pulling up the lever, the cartridge exploded, the lead splitting in two, and a piece of it whizzing by each side of his head, while simultaneously the powder flashed up and burned his brow. One of his eyes, the right, is affected so that he cannot see out of it, but it is likely no permanent injury will result. He came home, as stated, last evening, and will remain here under medical treatment until he is all right again.

The "Double Marriage."

This is a fine play, and was finely performed last evening by the Claxton Combination. There was a good house, and the audience thoroughly enjoyed the performance. Miss Claxton as "Josephine" played with her usual pathos and effect; Miss Johnson made an excellent part of "Rose"; and the other ladies acquitted themselves with credit. Of the gentlemen, Mr. Arnot was second to none. He is a good actor and a general favorite. Mr. Stevenson also played well, and presented a fine appearance. Mr. Phillips, the "French Doctor," had an excellent "make-up," and made his brief part a very telling one. In fact, nearly all performed excellently, and the audience were highly pleased with the entertainment. "The Double Marriage" is tonight's most affecting play which is sure to be well received.

Another Acquaintance.

The Oden Herald editorially says: "A short time since we published the fact that the narrow gauge railroad known as the Utah Western, would be carried through to California under the title of the Utah Nevada. Yesterday we heard that the U. P. R. R. Co. had obtained a controlling interest in the enterprise. This will insure the pushing of the work through to its successful terminus without delay, as the powerful company into whose hands the line has now fallen display remarkable vigor in the prosecution of their purposes. We have no reason to doubt the correctness of our information, as the possession of the Utah Western or Utah & Nevada would appear to be a necessity in view of the recent purchase by Jay Gould of the Nevada Central. The latter road will secure the interior trade between here and San Francisco, as far as it runs, North and South, while the through line between Salt Lake and California will give independent emptying and supply points East and West. The state of things will sandwich the C. P. R. between two of the U. P. Company's grange—the Utah & Nevada and Granger & Oregon."

A Lively Time.

About noon today, quite a commotion took place at Mark McKinnin's Livery Stables. Dr. Fowler had driven in with his buggy and alighted just prior to the arrival of another buggy containing Mr. Jot Travers. The latter, as soon as he had pulled up, unbuckled the reins and without leaving his seat threw them out. One of them, unluckily, touched the horse, which gave a jump over Dr. Fowler's buggy, ran into some other carriage, turned over and inflicted more or less damage upon several. Mr. Travers was thrown out and literally covered with the wrecks of broken vehicles, but fortunately escaped unhurt, while the frightened horse proceeded on, dragging the buggy to which he was attached, out through a narrow door at the rear, into the back yard, where he was finally secured.

Mr. Travers Immediately Told Dr.

Fowler to send for another carriage as good as the one damaged, at his (Travers') expense, and he would take his broken one.

Crickets, Crickets.

The Southern Union of the 11th, has the following: Many years have passed since Beaver had such fair agricultural prospects as the present year. Up to the present date there has been plenty of water, no late frosts, and everything seemed propitious, now the outlook has changed; for a vast army of crickets has invaded the grain fields and are harvesting the crops at a rapid rate. They come from the north, and having cleaned out the farms on Indian Creek are advancing upon Beaver. One division of the army have headed for the North Creek farms with the intent of devouring the crops in that section, but the main body of vandals remain on the north side of the Beaver field, slowly advancing at a threateningly slow rate. About 40 acres of grain was eaten up sick and clean in 24 hours—and up to date upwards of 75 acres of grain and lucerne have been destroyed. The farmers are fighting them by means of straw spread in their path, and then, when full of insects, burn it, thus destroying thousands in a very effective manner.

Accidents.—From the Enquirer

of Wednesday, we clip the following: "On Monday evening Dr. Riggs, of this city (Provo), while working at his farm, repairing a gate, fell from an elevation of about six or eight feet to the ground, upon his right hip. At first it was believed the bone was broken, but upon examination it was proved not to be, although badly injured. The Dr. is unable to get about and it may be some time before he will be able to resume his labors. We are sorry the mishap befell the aged doctor, and hope he may soon recover."

On the same evening Mr. Z.

West, of Spanish Fork, was plowing in his field, when his horse became fractious, jumping and bucking until Mr. West was thrown down and dragged about, his arm being dislocated at the shoulder. He was brought to this city and attended to by Dr. Pike."

Commercial.—Isaac Moore, Esq.,

Western correspondent of the old-established St. Louis paper, the Journal of Commerce, now called also The Age of Steel, is in the city for the purpose of writing up its commerce, resources, etc. He will visit our business men, who will do well to give him all the information at their command.
