EVENING NEWS.
Saturday, October 21, 1882.
BY TELEGRAPH.
AMERICAN.
Geological Report.
WASHINGTON, 20.—The report of the director of the Geological Survey for the fiscal year ending June 30th, is now nearly complete and exhibits important progress in that branch of the public service. From the report it appears that Director Powell, at the beginning of the last fiscal year, resolved to curtail the field work in view of the large mass of unprepared matter which had accumulated, and determined to give more special attention to the office and laboratory work necessary for its publication. This work consists in the identification, description and of chemical and microscopic examination of rocks, minerals and ores; the construction of geological sections; preparation of charts, diagrams and other illustrations; the preparation of reports on various subjects which have occupied the attention of the chief men of the survey. Experiments have been made under the management of the former director, Clarence King, on various phases of the work, and the report contains an examination (chiefly in the laboratory) has been made of the structural geology of the Eureka mining district of Colorado, the important rocks of the great range of Mounts Shasta, Hood and Rainier. Another department of the work has been the study of certain localities in the Sierra Nevada and California. These lakes are now mostly extinct, Great Salt Lake being one of the exceptions, and their study includes a study of the quaternary climate, which leads in turn to the study of the climate of the arid portion of the United States. Another field of investigation has been the study of the glacial formation, extending from the Atlantic Coast to the middle of the great Pacific range, and the study of the quaternary climate and to the character and origin of the present topographic features of the area involved. Investigations will also be conducted relating to the economic geology of Ten Mile district, Summit County, Colorado, and of the basaltic mesa at Golden, which is covered by the great entire Denver coal basin. Much time has been spent in the preparation of the report on the Leadville district, in Nevada. The geological district has been carefully surveyed and a report has been prepared on the Comstock lode and Washoe district. The directors say that all of the investigations in geological geology will have a practical value in determining the characteristics of ore deposits, and will advance the mining industry by pointing out the best methods of systematic development. Early in the fiscal year geological work was commenced in New Mexico, and Arizona, and the preliminary geological examination of the country. In conclusion, Powell says the survey has been engaged during the past part of the year in the preparation of statistics relative to the mining industry of the United States, which are complete and exhaustive in every respect, which are intended for the use of the census bureau.

The "Jeannette."
Lieut. Dismore resumed his lecture before the Jeannette board this morning. He stated that about four o'clock in the morning he was awakened by a seaman who said that the ship was going down. Witness heard the crash and the remarks of two men as they watched her go down. He stated that after all hands were called the ship was found to be broken up by hanging on the Henrietta Island, and swinging around to the northwest. The wreck of the ship was about 10 feet, and the greatest draft of water of any piece of ship was 23 feet. In answer to a question as to the condition of the Jeannette before the heavy storm, he said that the ship was in a very bad condition at that time, would you if in command of the expedition, have deemed it expedient to continue the Arctic expedition? No, for the ship was fitted up originally for three years, and the supply of clothing, provisions, etc., would not warrant another year in the ice; the supply of coal also would have been insufficient for the forthcoming winter, as the crew had already been exposed for two years to the rigors of an arctic climate. Furthermore, it is the custom when a ship is fitted out for a three years' Arctic work to return at the end of the second summer. In reply to a further question, witness said: "Had it been another vessel, however perfect, my judgment would have been the same." The story of the ship's going for the last day previous to her abandonment, of Capt. DeLong, was made part of the record, and the court adjourned till tomorrow.

Washington Items.
A Cabinet meeting was held at the White House this afternoon. The President arrived from the Soldiers' Home, where he had resided during his temporary stay in the city. The session of the Cabinet to-day was short and unimportant. No names were agreed on for the vacation caused by the retirement of Major General McDowell. The political situation in New York and Pennsylvania was informally discussed. The President will remain here a week or ten days, then return to New York. The President to-day appointed E. R. Ferry, of Utah, Director of the United States Pacific Railroad, vice Robt. H. Baker, deceased. It has been reported that the President would remove Senator Spencer, who is one of the government directors. There is probably no truth in this rumor, as the President was officially informed of Spencer's flight to evade the summons of the government as witness in the Star route case, and he took no notice of the delinquency. The President has returned in excellent health. The reports that he was suffering from Bright's disease are incorrect. The President appointed James P. Lacey, register of the land office at Denver, Colorado, and John E. Smith, of New York, consul of the United States at Port Erie, Canada. The stamped envelopes will be sold to the public at a reduced rate of ten per cent. on present prices. The Postoffice Department has also arranged to print and return request notices upon envelopes of the additional charge when ordered in quantities of 500 or more. General Hansen states a fact not generally known, that stamped envelopes when spoiled through

misdirection or other causes can be shared for postage stamps of the same denomination at the nearest postoffice.
Wool.
BOSTON, 20.—The wool market is rather unsettled by several failures of manufacturers and this has given a dull tone to the market here during the past week. Sales, 1,700,000 pounds of all kinds, the smallest business for some months. Prices unchanged, but buyers of undoubted credit will have preference for the present, and a number of buyers may be able to obtain some concessions. Five fleeces firm, as previously noticed, and sales have been at full previous prices. Choice of Ohio XX, 40 @ 42; Ohio and Pennsylvania XX, 42 @ 43; choice XX and above, at 44 @ 45; Michigan X fleeces have been quiet, with sales at 39 @ 41 is a fair price; coming delaine wool is in demand, and is selling at 44 @ 46 for fine delaine, and 46 @ 50 for fine and No. 1 comings; medium coming delaine, and coarse coming delaine are in demand at 25 to 35 for fine and medium, 100,000 pounds of choice medium and low at 18 @ 20. In California wool business has been trifling; pulled wools are in fair demand at 45 @ 50 for choice Eastern and fine super and 30 @ 42 for common and good; foreign wool is quiet, and sales are confined to small lots.
Political.
SAN FRANCISCO, 20.—Salem dispatch: On the 1st ballot, Joseph N. Dolph was elected United States Senator. He received 511 votes. Washington 20.—Secretary Teller expects to start for Colorado tomorrow night, and to be absent several weeks. He says he is not a candidate for the Senate from that State, that he accepted a cabinet position with the intention of retaining it till the expiration of the President's term of office, and that after that time he will devote himself to his business affairs, which have been neglected to a considerable extent since he entered the Senate.
Burlington, Iowa, 20.—The Tribune, formerly a republican paper, this evening came out for the first time democratic ticket, saying editorially that they can "give the eyes to the fact that the democratic party is the liberal one and holds out to all lovers of personal rights the right hand of fellowship, and they gladly join hands against the fatal legislation, abuses and extravagance of the republican party."
St. Louis, 20.—The anti-Filley republican committee of the 11th congressional district nominated Dr. J. H. McLean for the long term, and Geo. Bain for the short term.
Norwich, Conn., 20.—The democratic ticket of the third district is nominated J. D. Penrose for Congress.
Williamsport, Pa., 20.—The democratic ticket of the sixteenth district nominated General H. W. Early for Congress.
Charlotte, N. C., 20.—W. H. Bailey, democratic candidate for the House from Mecklenburg county, was assassinated this evening by A. B. Gillespie, revenue agent, and badly wounded. The attack was made because Bailey stated he was informed Gillespie was using money to buy the election for the republicans. Further trouble is apprehended.
New York, 20.—The following congressional nominations were made to-night: Republican—eleventh district, John W. Russell, Hamilton Park's secretary; eleventh district, Wm. L. Strong, Tammany Hall; eleventh district, John Hardy. The three democratic congressional committee from the eleventh congressional district nominated Roswell P. Flower. In the tenth district the German-American independent citizens' congressional convention chose Abram S. Hewitt. The Irving Hall Congressional convention nominated William C. Robinson.
Columbus, 20.—The democratic justification to-night over the result of the Ohio elections.
FOREIGN.
Egyptian Items.
ALEXANDRIA, 20.—General Wolsey arrived from Cairo and reviewed the troops.
Cairo, 20.—The council of ministers adopted the preliminary scheme of Baker Pasha for the reorganization of the Egyptian army. Baker Pasha recommends that the field officers of each regiment, battalion, battery, etc., be half British and half Egyptian. Agitation threatens from the rank of captain downward be selected from the Egyptians. Albanians and others already in the service of the Khedive. The staff will consist of equal numbers of British and Egyptians.
The expense of the army will be £380,000 yearly. The gen d'armes will be offered by Egyptians, but will have to satisfy British inspectors. Baker Pasha considers that one principal advantage of his scheme is that it will give an examination between regiments commanded by British officers and those commanded by native officers. The army will number 11,000.
It is believed the following will constitute the chief counts of the indictment against Arabi Pasha: 1st. In violation of the right of nations, he hoisted a white flag in a harbor, and under cover thereof retired with his troops and gave up the city to fire and pillage; 2d, that he excited the Egyptians to arms against the Khedive; 3d, that he continued the war despite the news of peace; 4th, with having excited civil war and devastating massacres in Egypt.
Supposed Rebel Fires.
St. Petersburg, 20.—A thick fog smelling of burning turf has covered the whole of St. Petersburg since yesterday. A vast circle of incendiary fires extending from Finland to the Baltic surrounds the capital and are said to include within their circumference the city where the Emperor now is. The fires are the woods under which are turpentine, and they may last for a long time. They are attributed to the nihilists.
No News of Lieut. Chipp and Party.
Paris, 20.—An Irkutsk correspondent telegraphs, "Defarava the ispravnik of Komiinsk, arrived en route from St. Petersburg, Oct. 17th. He is Irkutsk in Siberia last year, when the news from Lena Delta has arrived saying that the Harker party were all well. Nothing is ascertained of the fate of Lieutenant Chipp of the Jeannette. Lena was expected daily at Yakutsk, bringing letters from the Delta."
Conservative Gains.
Berlin, 20.—In all the great towns where the Catholics predominate the elections resulted in favor of the Liberals. The Liberals gain 30 votes in the Diet from the Conservatives. In several new districts in the vicinity of Berlin and Potsdam the conservatives have been victorious. No party will have a majority in the new chamber. In order to have a majority it would be necessary for the government to go into alliance with the clericals and conservatives.
Land League Conference.
DUBLIN, 20.—Parnell has issued a whip to his supporters, inviting them to meet in a conference room of the Commons previous to the assembling of Parliament, where business of great importance, including the implementation of E. Dwyer Gray, will be discussed.

THE CASE
AGITATOR
Ahead of all Other Competitors!
SALT LAKE CITY, August 12th, 1882.
J. W. Lowell, Esq.,
Dear Sir.—The J. I. Case Agitator we bought of you last season is the best machine we ever saw or used; it will thresh more grain and thresh it better and cleaner than any other machine we have ever seen, and we can confidently recommend it to any person wishing to purchase a good Thresher.
Yours, etc.,
G. W. LUFKIN,
W. A. HARRON.
ASHLEY'S FORD,
UNTAIN CO., Feb. 26th, 1882.
John W. Lowell,
Dear Sir.—The Agitator Separator and Woodbury Power that we bought of you, we can truly give entire satisfaction. It beats anything that we ever saw to thresh and clean. We have run seven different kinds of machines, but this is the champion. The cleaning and separating are perfect. We have not had a man find fault with it yet, and we believe that the people here will testify to our statement as being the truth. It comes as near being perfect as it is possible for a machine to be. We cannot tell you upon paper its merits for qualities or how we think of it, but can say this, that could we not get another like it, no money would buy it.
Yours truly,
GEORGE BROWN,
S. J. CAMPBELL,
WM. F. REYNOLDS,
ROBERT BODLEY.
CEDAR CITY, Sep. 23rd, 1881.
John W. Lowell,
Dear Sir.—Our machine, Agitator, is doing excellent work. Cleans the best and threshes faster than any Thresher we ever saw.
We remain,
COURT & HUNTER.
LEHI, Utah County,
February 7th, 1882.
To John W. Lowell, Esq.,
Dear Sir.—As your opinions have often been asked about the merits of the Agitator Threshing Machine we purchased from you last fall, we take pleasure in sending you the following as our experience with it. To answer the numerous inquiries, and perhaps others who would like to know, we recommend the following points of superiority over all other machines we are acquainted with—
1st.—Lightness of draft. Our team of five span of average native horses and mules, being fully equal to the work, and without crowding or hurrying them, they gave us all the speed and power we needed.
2nd.—Thorough threshing and cleaning, and that without extra effort on our part; such a thing as the sieves being crowded or clogged, or requiring the attendance of one person at the tail end of machine, having never occurred or been needed.
3rd.—Lightness of wear. After having threshed 18000 bushels of grain, lucern seed, etc., the general wear on the machine being scarcely perceptible.
4th.—Lightness of running expenses. By comparing notes with our friends of other machines, we find ours have not exceeded half of theirs.
We also consider the capacity for threshing in quantity, superior to other makes of machines. Although the farms here are small, necessitating a great deal of moving, and often to distant points, yet we threshed as high as 800 bushels per day.
We also consider the Straw Stack, End Shake, Elevator, and many other points are all worthy of notice and examination of any and all persons who may contemplate purchasing a machine.
A. J. EVANS,
M. T. WOODHOUSE,
H. M. ROYAL,
M. T. BUSEMAN.
I have helped wear out four machines of other kinds, and I heartily endorse all of the foregoing points.
A. D. RHODES, JR.
CEDAR CITY, March 15th, 1882.
Mr. J. W. Lowell,
We bought one of the J. I. Case 32 inch Agitator Threshers last year and consider it by far the best Thresher ever brought to this country. It runs very light, saves all the grain and is a very durable machine. We threshed grain at the rate 2 1/2 bushels per minute.
Yours, etc.,
COURT & HUNTER.
I also take the liberty to refer Thresher men to the following reliable people who have purchased the Agitator Machines:
Messrs. Robbins & Simmons, Kayville.
Bishop Peter Barton and others, Kayville.
Woolley, Lund & Judd, St. George.
