"Housework is hard work without Gold Dust"

To Clean Matting

Few things can be used to clean matting; salt and soda have been used, but experience has taught that the best way is to have the matting thoroughly swept, and then go over it with a solution of warm water with

Gold Dust Washing Powder

dissolved in it. It is best to use a woolen cloth; a tablespoonful of Gold Dust Washing Powder to a quart of water is the proportion; wring the cloth almost dry and rub quickly, but the moment the water gets dirty, change it for fresh. Then follow the wet cloth with a dry one. This will clean it perfectly.
