TINTIC MINING EXCURSION,

Sanday, Oct. 28th.

Special train to Silver City, Mammoth and Eureka at \$100 a, m. via Rio Grande Western rallway, \$2.00 round trip.

PORTFOLIOS OF THE PARIS EXPOSITION

They consist of 120 elaborate views on heavy enameled papes, in 20 parts. The Paris Exposition beau-tifully portrayed. Price only 16 tifully portrayed. Price only 10 cents each part to News readers. A book that sold for 75 cents and \$1.00 at the time of the World's Fair. Parts I to 20 now ready at the News Office. Send 10 cents for a set of the Second Secon cents for a sample. You will be charmed with the work.

The owners of the Midas mine at Deep Creek met yesterday afternoon and decided to build a 30-ton cyanide plant. Everything has been arranged except the cost of hauling the ma-terial from Oasis to the mine, about 80 miles. The traighters who headle the The freighters who handle the ore of the Utah mine at Fish Springs, have been written to and as soon as the cost of transportation is learned, the contract will be awarded to Salt Lake men, who agree to complete it in four months.

NEW BINGHAM COMPANY.

West Mountain Mining Co. Incorporated Under Lawsof West Virginia. J. E. Dearborn, who recently negoti-J. E. Dearborn, who recently negoti-ated the sale of the Snyder group in Bingham, writes from Nashua, New Hampshire, that the above group, lo-cated in Freeman Gulch, has been made cated in Freeman Guich, has been made the basis of an incorporation known as the West Mountain Mining company. It is incorporated under the laws of West Virginia with 1,000,000 shares, of which 400,060 shares are placed in the treasury. The stock is non-assessable and fully paid. W. H. Child is presi-dent of the new company, and J. E. Dearborn is secretary and treasurer.

BUTTERFIELD MILL.

Manager George W. Keel Has Placed Order for Machinery.

Manager George W. Keel of the Butterfield Mining company says he has placed an order for mill machinery. A site is to be prepared without unnecesshe is to be prepared without unneces-sary delay, and he hopes to have the mill ready to run by January 1st. It is to be a concentrator of about 30 tons capacity, says the Bingham Bulletin, and will run this winter on ore from 300-level of Eagle Bird mine and above. 200-level of Eagle Bird mine and above. Eagle Bird ore is a very fine concen-trating proposition, and there is a large area showing in the 300. A 150-ton lot was hauled over the divide and treated at Rogers' mill with excellent results. As stated in our former article, Queen tunnel taps Eagle Bird vein at 800 feet depth. Butterfield tunnel when extended about 165 feet further will cut it at an actual depth of over 2.200 feet on the dip. The output of Eagle Bird and other veins will then be treated at concentration works to be built at mouth of the Butterfield. And it may be inferred that all the great reduction plants that may come to Bingham have not yet been commonly discussed,

Increased Water Flow Renders

The Blue Jacket mibe, which has shipped some of the richest copper ore which comes to this market, has sus-pended operations. The miners were told of the intended move but a few hours previous to the actual closing of the mine says the Seven Devils Stan-dard. They were in a way properted for d. They were in a way prepared for move, owing to the fact that it was in to all that the present pumping hinery was unable to cope with the dually increasing flow of water in Blue Jacket workings, Nevertheless announcement came as a surprise d a shock to the camp generally and small amount of depenheartedness is

it was announced to the miners and the camp in general on Monday that e suspension would be only tempory and that work would be resumed a much larger scale so soon as the w pumping plant and boiler could be it in position, and the timber cutters re notified to report for work next

tuart French, superintendent of the e Jacket, passed throuh here sday on his way to Salt Lake to atd to the immediate shipment of the w machinery.

Bingham Notes.

Next week another carload lot of con-entrates will be sent from Last Chance all, making four for the month. The last of a car of good stuff from

eet of work in the lower tunnel on the Liberal claim. A six-ton shipment from the Regu-

lator group at Alta was sold on con-trols which showed 4.7 ounces silver. per cent copper and 60 cents in gold per ton.

Dr. Theo Meyer, Sam Auerbach, Judge Dey, R. G. Wilson and W. R. Wallace, of the Ridge and Valley di-rectorate, expect to leave for Eureka tonight on business connected with the law suit. As intimated in last night's "News"

Mr. J. G. Jacobs of the Salt Lake and Mercur railroad will build and operate a branch line from the present Bing-ham terminus of the Rio Grande Western to the United States mines.

The Yankee Consolidated shipment of two cars of ore were sold yesterday afternoon on controls showing 38.4 per cent lead, 26 ounces silver and \$1.60 in gold. The lot netted the company \$26.52 per ton, or \$1,258.89.

There has been some talk by the Ea-gle and Blue Bell people of utilizing the milling ores of the mine, but noth-ing has yet been determined on. It is extremely improbable that the Eureka Hill mill will be pressed into service. It has all it can do for many months to take care of its own orea. to take care of its own ores.

The declaration of S. H. C. Miner, president of the Granby Smelter compresident of the Granby Smaller com-pany, that there is a profit in \$5 ore, is seriously questioned by mining men of British Columbia. Judging by results up to date, cays the Vancouver News-Advertiser, Mr. Miner's declaration is

not yet proven by any test of com-mercial worth, for no boundary ore of so low a value as \$5 a ton has been shown to have been mined, treated and profitable deat so low a value as 35 a ton has been lower. Heavy, 4.45@4.55; mixed, 4.52 shown to have been mined, treated and @4.55; light, 4.529@4.60; pigs. 3.50 profitably dealt with in or about Grand 4.50; bulk of sales, 4.529@4.65. HIGHER PRICES AT OPENING

Missouri Pacific and Southern Pacific Inclined to React from Recent Advance.

New York, Oct. 27 .- Prices in most

Closing Was Moderately Aclive and Weak-Net Declines 1 to 2 Points in Some Stocks.

BLUE JACKET CLOSED DOWN.

More Machinery Necessary.

cases were higher at the opening this morning, but Missouri Pacific and Southern Pacific were inclined to react from their recent marked advance. Trading became very erratic, but fluetuations were small. Profit taking kept the general run of railroads lower. Pennsylvania made a good gain, but Erie first preferred dipped a point on unfavorable September earnings incident to the coal miners' strike. In sugar and Brooklyn Transit, the movement was very feverish, and the latter suffered a point loss from the opening.

The downward drift of prices continued and reached a point in Missouri Pacific and 1% in American Hoop. The declines ceased with the appearance of the bank statement on account of the expected gain in each, but after a drivial rally, the market turned downward again. ucar, Brooklyn Transit, Missouri Pa-

clic and the steel stocks were heaviest and fell below the former low points. The Chicago & Altons re-acted a point each. The closing was moderately ac-tive and weak, and net declines reached from 1 to 2 points in some of the active slocks. Close;
