MANUFACTURES APPLICABLE TO UTAH.

ARTICLE II.

THE ALKALIES—CARBONATE OF SODA—CAUSTIC SODA.

In drawing public attention to the subject of alkalies, it will at least furnish reading material that is instructive, if it does not induce someone to more fully investigate, and practically demonstrate the profitable benefits that from it may be derived by America and especially the people of this Territory. In England the alkalies are considered her greatest source of wealth, and on them depends the ability to compete with the world in many staple articles of industry, for instance, glass, calicoes, paper, soap, &c., also supplying alkalies for an immense foreign demand.

America is her great mart, and the consumption is enormous, a faint idea of the magnitude of which may be conceived, when you bear in mind that all our carbonate of soda, baking powder, glass, calicoes, paper, coal oil, soap and concentrated lye depend on foreign manufacture, that Utah consumes monthly over 20,000 lbs. of English alkali. How vast then the consumption of the States! This being the case, one would think that the United States would compete, but it has been found that Europe supplies it at less than we can manufacture, owing to cheap salt and sulphuric acid.

These obstacles are removed in Utah. Salt in unlimited quantities can be purchased for $4 50 per ton. Sulphuric acid can be produced *cheaper* than in England, and it shall be pointed out wherein we can undersell England in these articles, for we have it half made, and the most important part, that is, glauber salts, or sulphate of soda.

The manufacture in Europe is carried on in this way. Salt has to be mined, sulphuric acid manufactured, these mixed in proper proportions, introduced into furnaces, and decomposed by heat and the resulting sulphate of soda dried.

Next the sulphate of soda is mixed with limestone and coal dust, fused in a reverberatory furnace, which converts the sulphate of soda into carbonate of soda, forming what is termed black ball or soda ash. The carbonate of soda is now bleached out, and boiled down to a certain strength, at which the carbonate of soda crystallizes out, precisely in the same manner as salt is obtained from salt water, the process with which so many in this country are familiar.

The carbonate of soda having been removed, the mother liquor is evaporated to dryness, and solid caustic soda obtained.

(For minute description of this process see Musprati's Chemistry, vol. 1).

In Utah, four miles from Salt Lake City, is to be obtained vast quantities of native sulphate of soda, in the ponds of Brighton, in the sloughs near the lake, and at some seasons by the shore, merely for the cost of gathering, also somewhat generally distributed through the country. Limestone and coal dust are to be obtained as cheap here as anywhere in the world.

A manufacturing business in this alone could be built up that would find lucrative employment for many people, that would bring in more wealth than all the mines of Utah, that would give us a monetary power over every State in the Union, and would be a grand step to make us the England to America.

The cost of this manufacture is reduced to reverberatory furnaces, leaching tanks, and evaporating vessels, and other apparatus always attached to such enterprises, which could be erected for about $5,000, of sufficient capacity to supply Utah.

The cost of caustic soda in this city is $250 a ton.

The cost of production would be about $60 a ton.

THIS IS THE

MEDICINE OF NATURE

For Destroying and Expelling all Kinds of Worms, Cleansing the Body, Blood, &c.

SYMPTONS OF WORMS.

A few of the most Common Symptoms which indicate the presence of worms:—Changeable Appetite, Offensive Breath, Pains in the Stomach and head, Grinding of the Teeth during Sleep, Pale Face with Hollow Sunken Eyes, Itching of the Nose and Fundament, Irregularity of the Bowels, a Short Dry Cough, Loss of Spirits, Feverishness and Disturbed Sleep, Rising in the Throat causing Sickness, &c.

DO NOT LET YOUR CHILD DIE.

Shall the bud of infant bloom
Soon be hurried to the tomb?
Mother, you with watchful eye,
Do not let your darling die.
Mark the dullness of that eye,
All irregularity;
Mark that paleness, white and deep,
And the feverish fitful sleep,
See the stomach, full and hard,
And the Bowels still debarred,
Mark the spirit, even low,
All be-peaking pain and woe.

SAVE IT—SAVE IT!

Why has your darling never smiled,
The Worm is in your precious child,
And gnaws its vital powers away,
Sinks it to death and dire decay.
Hear then the really welcome sound,
Save it! a remedy is found.
PLANT'S never-failing Powder and Syrup
A cure most sure and speedy makes;
Kills the death-worm, and the gloom,
Changes to matchless health and bloom;
It never fails, it never can,
It cures the child, the youth, the man;
It's taken, too, with haste,
Not unpleasant to the taste.
Hundreds who have tried it all attest
It is the cheapest and the best.
Try it—try it—try it—try it—
Every parent now should buy it,
Wait not till another day,
Till every chance has passed away;
Make at once the solemn vow
That you will try it—try it now!
Mother, you with watchful eye,
Do not let your darling die.
