

NOT SO BAD AS SHE IS PAINTED.

So Says a Palmist on Reading the Hand of Mrs. Hodge, the Alleged Murderess.

HAS BEEN SADLY HANDICAPPED.

Deprived of a Mother's Care at an Early Age, the Hand of Charity Should be Extended.

And now comes the very latest in the Hodge case. The suspected woman's tactfulness has suggested a psychic channel of communication and a palmist of this city has told the story of her life and ancestry through a mere reading of the hand, an impression of which he secured in wax. That she is truly a remarkable character no one will doubt after reading the professor's learned diagnosis. He says:

"The general shape of this hand belongs to the mixed type, the psychic predominating. This gives the owner an imperfect comprehension of the things pertaining to the material world. The owner of such hands intentionally confound discipline with civilization, i. e., they are narrow-minded respecters of the letter of the law, for they range all rules of duty and only tolerate such impulses of the mind, the soul and the heart as reason (considered from its narrowest aspect), accepts and permits.

THE EARTH HER ABODE.

"Aside from certain psychic indications the earth is pre-eminently her abode. She can see nothing beyond the social life, knows no more of the world of ideas than what the naked eye can know of heaven.

"She will be quite ready to deny all that she cannot feel or understand, and to look upon the limits of her understanding as the limits of nature. Even in reading, what of idealism this hand can comprehend stops short at a very narrow limit. She will keep away from idealism just too much from boldness of thought or novelty of life. The psychic temperament gives her no understanding of the applied sciences; the government of men is entirely wanting.

"It would be a great mistake to suppose that this hand is better protected against the errors incidental to the imperfections of our natures, than others.

"The palm of Mrs. Hodge's hand is unusually hollow, showing great domestic trouble through an absolute lack of judgment in choosing a husband. The palm of her hand is marked by red lines of heart and head, indicating combativeness, and a violent nature under no control, and completely dominating the individuality of the woman.

NO BRUTE FEROCITY.

"The fingers and thumb are quite flexible and yielding, showing a lack of stubbornness, and not any brute ferocity.

"An unfortunate feature of the development of those elevations and mounts under the four fingers shows that the individual's life is ruled by the planet Saturn, which is Jupiter and Mercury. This always gives one tendencies that will need watching. The mount of Jupiter, under the first finger, is thrown over toward Saturn too much to give it the pure type of development. It gives an intense desire for money and a very poor and extravagant judgment regarding it. People with this mount, afflicted by Saturn, have an insatiable desire for fine clothes, expensive jewelry and grand surroundings, which they seldom ever appreciate after possessing them.

IS INDEPENDENT.

"The mount of Saturn, located under the second finger, shows a very unlovely development. It gives our subject a desire for independence, and she is one who can bear no restraint, has a love of solitude and often a dislike of mankind. The mount of the sun, found at the bottom of the third finger, is modified by some unfavorable indications. The intellectual characteristics are dependent almost wholly upon this mount. The weak points of the sun in this hand Mrs. Hodge absolutely refuses to originate ideas. She becomes entirely dependent on some other dominating influence, and accepts without any hesitation suggestions and schemes of any person in whom she has the least confidence.

NOT SO BAD AFTER ALL.

"The mount of Venus, found under the thumb, is of average development, and combined with the hollow palm signifies sensuality under perfect control. It also gives her a great love of individuality, which is a desire for a quiet and peaceful home, country, and a domestic existence. The mount of Venus counteracts in great measure the undesirable markings on the mount of Mercury, which is located under the fourth finger. It counteracts an inherited talent that otherwise would concentrate itself in treacherous scheming and turn the subject out to be a liar and a cheat of the deepest dye.

HER TEMPERAMENT.

"The mount of the moon, which is indicated upon the fleshy part of the hand from the wrist to the heart line, shows in excess in this hand, giving her a superstitious, morbidly fanciful disposition, one of those given to moods and great fluctuations of temper. In the study of characteristics of this type of hand the meaning of the three lines—life, head and heart—properly relate to the health of the subject. It would be wrong to read the line of heart as one showing strong and deep affection, when the palmist takes into consideration the flexible and yielding nature indicated by the supple fingers and thumb. It would be equally erroneous to read the line of head as relating to mentality when the mount governing intellectuality is only slightly developed.

FATES CRUELTY.

"This line indicates orphanage between 7 and 9 years of age. Fate has severely carried out this indication, as it is known that her father suicided later, leaving her an orphan in her ninth year. The line of fate in her right hand shows the line of fate in the lines, up-and-down sort of existence, which latter shows a probable termination between 55 and 60 years of age. It is more signed against Mrs. Hodge than there is against any other person. If there is a destiny that shapes the

THERE IS NO SUBSTITUTE

affairs of our lives, and if palmistry be even slightly true, we cannot put upon this 35-year-old woman all the blame for which she is accused. She was born under a cloud. Fate with her was an ill-favored goddess. She did not raise her as others have been raised. She surrounded her with baneful influences. She gave her a weak-minded father. She gave her a mother of weak constitution, leaving her to be adopted into a family that shows absolutely no guardianship, a disagreeable home life, increased and magnified by the jealousies of a foster-mother, who threw her out upon the world to take care of herself at the early age of 15, instead of giving her the love and care of a mother. Her hand shows none of the finer influences which have been brought to bear upon the lives of the majority of people. The hand shows sympathy, different environment, more friends and a better destiny."

GO THROUGH TO LOGAN.

That is What Promoters of Electric Inter-Urban Road Desire to Do.

The representatives of the proposed electric railway from Springfield and Provo to Logan, yesterday afternoon filed a petition with the board of county commissioners asking for a franchise to construct the road along various county highways and thus make the connecting link between Utah and Davis counties. The petition was signed by T. P. Steffy, Milando Pratt and F. M. Lyman, Jr., who, two weeks ago, also submitted a petition to the council for a franchise through certain streets in this city.

WANT A FLAGMAN.

The board also received a petition, signed by about 500 residents of West Jordan, asking that the Rio Grande Western Railway company be compelled to place a flagman at the crossing between the Rio Grande and the Utah-Pacifi. It was stated in the petition that several persons have been killed by trains at that crossing and that a flagman stationed there would be a great protection to the public. The county clerk was requested to call the company's attention to the matter and request it to voluntarily grant the request of the petitioners.

IRRIGATION DELEGATES.

The board appointed Chairman James H. Anderson and John G. Labrum, chairman of the Parley's canyon water commission, as delegates to represent Salt Lake county at the Irrigation Congress at Ogden.

THE COUNTY'S CASH.

Report of Treasurer Carbis Shows a Balance on Hand of \$25,942.43.

County Treasurer Carbis has filed his report for the month of August with the county commissioners. The receipts for the month were \$18,549.55, which, with the balance on hand Aug. 1, of \$43,457.32, makes a total on hand of \$62,037.38. The disbursements for the month were \$36,194.95, leaving a balance on hand Aug. 31, of \$25,942.43. This balance is distributed among the various funds of the county as follows:

What a Mother Found Out About Food

A mother found out what a change of food can do for a whole family, from the nursing baby to the adults, in this way: "Two years ago, during the summer months my baby was taken violently ill and was very slow getting over the attack. His former diet of cow's milk alone ceased to agree with him so I combined it with an expensive infant's food but he soon became very much constipated.

AN IMMENSE METEOR.

One Twelve Miles in Diameter Passes Over an Idaho Town.

Writing to the Spokane Review W. S. Walker of Moravia, Ida., thus describes a giant meteor recently seen in that section: "On the night of the 22nd inst., at 10 o'clock a large meteor appeared in the southeastern horizon, traversed the heavens and disappeared at the northwest horizon. Its track was nearly on a great circle, crossing the zenith at about 45 degrees above the equator. Its angle with the equator was about 3 degrees, and its angle with the horizon was about 60 degrees. It was a uniform color and volume clear across the sky showed that its contact with the atmosphere must have been at a very low angle. This makes it likely that the meteor had traversed the thin upper air a long time gradually going deeper into the atmosphere, rising in temperature, till it burst into incandescence.

FOUND OUT.

What a Mother Found Out About Food

"Then I shifted to Grape-Nuts food and found that this was just what baby needed, adding it to his milk after softening in hot water. Baby has thrived upon this food and is now healthy and strong and chubby as any mother could ask which you know is saying a great deal.

ROOSEVELT HIS OWN SUCCESSOR.

That is the Political Prognostication of Senator Cullom in Salt Lake Last Night.

DEMOCRACY'S FATAL DIVISION.

Cleveland is Popular With the People, Judge Gray is a Great Strong Man, Harmony is Absent.

United States Senator Shelby M. Cullom of Illinois, arrived in this city with Mrs. Cullom, and three places, last evening, in a private car over the Rio Grande, en route to the Pacific coast. The party registered at the Knutsford and went immediately to the Tabernacle, where a special recital was given them by Organist J. J. McClellan. The party left this morning for the west. In an interview last night, at the hotel, the senator stated his positive belief that President Roosevelt would be elected to succeed himself, and the sole chance the Democracy has of succeeding in the coming presidential campaign is to nominate Judge A. B. Parker of New York. The senator said President Roosevelt would have the solid backing of the great west, while the Republican sentiment in practically every state favors him. The present chilly attitude of eastern financial heavyweights because of the executive's position on trusts and finance will have no material effect in opposition—in fact the senator believed that the European people will in the end support the president.

DEMOCRACY'S DIVISION.

As to the Democracy, the senator calls attention to the divided condition of the Democratic camp, with W. J. Bryan in command of one faction, and Grover Cleveland in command of the other, with the inevitable result that there must be a general fall down unless these factions can be united on a common platform. Mr. Cleveland would make a strong leader, but not strong enough to lead to victory. The policy like Mr. Cleveland, while the politicians and the bosses dislike him, for he has the faculty of showing up at the popular level, and he is a clear-headed man of office he said all but three of the senators refused to have anything to do with him. Senator Cullom spoke highly of Judge Gray, who is a fine gentleman, an able man, a clear-headed and far-seeing man, and says Senator Cullom, he would make an excellent president. The only thing Senator Cullom had against Judge Gray was that he belonged to the Democratic party. At the same time, he thought Senator Gorman of Maryland and ex-Secy. Olney would make strong candidates. As to the vice presidency, that is something no one knows anything about, no one can predict with any certainty how it will come out. The senator declared he did not want it, as he preferred to remain a senator.

TURKEY SHOULD BE CARVED.

Senator Cullom is chairman of the senate committee on foreign affairs, and stated that the senate would act on that committee, Turkey had been a source of endless trouble. He believes that the powers of Europe should take Turkey away from its present rulers and divide it up into the European states. But the trouble is that the powers are afraid of each other, afraid that some one would get the largest slice. The senator thought it a good plan to let the United States warships on the ground, and said there will never be peace until Turkey is divided. The distinguished visitor has been in the United States senate 20 years, and there are only six senators there now who were on the roster when he entered. Senator Cullom expressed himself as charmed with the scenery of the Rio Grande. In speaking of the Royal Gorge of the Arkansas river, he said: "I have traveled all over the world, and I am free to say that I never saw anything so beautiful as the gorge in that gorge. It is worth the time and the expense to make a trip across the continent to see it. The west has scenery that will compare with anything in the world." Although 70 years old, Senator Cullom is a spry, active man, and has lots of work in him yet.

BEST SELLING BOOKS.

Record for July. According to the records of all book-sellers, the six books which have sold best in the order of demand during the month are:

Hot Flaw.

Chop fine a medium sized cabbage and sprinkle with flour. Melt one tablespoon-

ful of butter in a baking dish, add the cabbage and place in the oven. Mix to make a thick sauce of sugar, one of mustard, and one of olive oil, one beaten egg and three-quarters of a cup of cream. Make very hot and pour over the stew after sprinkling the cabbage with salt and pepper, put into a hot dish and serve.

Ladies Cabbage.

Crisp a medium-sized new cabbage and cover with hot water and cook until tender and recover with boiling water; when the cabbage is tender drain and put aside until perfectly cold. Chop the cabbage fine and add to it two well beaten eggs, one tablespoonful of butter and season with pepper, salt and three tablespoonsful of rich milk. Mix all thoroughly together and place in a buttered pudding dish and bake until brown. Serve very hot. This dish is very much like cauliflower and is very delicious and can be eaten by those with delicate digestions.

Cabbage Stewed in Milk.

Place half a head of cabbage which has been chopped fine in a saucepan, cover with hot water and cook until tender; drain off the water and add sweet milk to almost cover the cabbage; add one tablespoonful of butter and a little pepper to taste; simmer to 15 minutes and serve very hot.

Swedish Cabbage.

Crisp and slice one head of cabbage into shreds; cover with a generous amount of boiling water and stand for 15 minutes; drain off the water and cover with sweet milk, add salt, pepper and a bit of whole milk, cook until tender and the milk has boiled away until it only moistens the cabbage. Add one tablespoonful of butter and serve very hot.

Cabbage as a Holland.

Place in an angle saucepan a small head of red cabbage which has been shredded, four fat apples which have been peeled and cut in slices, one large tablespoonful of sweet drippings or butter, half a teaspoonful of white pepper and a level teaspoonful of salt; add to this a slight sprinkling of either grated cheese or nutmeg and cook for three hours. Prepare a mixture of one tablespoonful of vinegar, one tablespoonful of currant jelly and a little salt, and before taking the cabbage from the fire add this mixture and stir carefully, boil for three minutes and serve hot in covered dish.

Inquiries Answered.

Mrs. C. N. K. writes: Kindly give a recipe for maple bisque glace.

Maple Bisque Glace.
Beat the whites of four eggs light and mix with a cup of maple syrup, stir over the fire in a double-boiler until it thickens, then stir in a tablespoonful of gelatin which has been dissolved in a little cold water. Stir until the mixture is cold, then fold in a pint of whipped cream. Turn into a bisque mold and pack in ice and salt and let freeze for three hours.

Molasses Sauce.

B. writes: Will you if able, give a recipe for a molasses sauce served with suet pudding?
Put a pint of molasses in a saucepan with two ounces of butter and let boil for five minutes. Then remove from the fire, stir in two teaspoonfuls of lemon juice and serve.

THE MERRY SAILOR.

Dr. Alfred Wallace, the octogenarian English scientist who claims that he can prove the earth to be the center of the universe, lived in his youth in the Moluccas. One of his neighbors in those remote islands was an old sailor, and of this same man Dr. Wallace sometimes tells an old story.

TO KILL WILD MUSTARD.

Wild mustard is a great pest in many parts of New York. A method of destroying it has been known in Great Britain and Germany for several years, and is being tried in numerous places in the United States at present. It consists in spraying the mustard plants with a solution of copper sulphate (blue vitriol). If the plants are young a two-per cent solution, or about seven pounds of copper sulphate to 40 gallons of water, sprayed on one acre will destroy them. If older a three per cent solution (10 pounds to 40 gallons), or four per cent (13 pounds to 40 gallons), may be necessary. We have not yet found it necessary to use a solution stronger than three percent, says a writer in the Rural New Yorker. Some of our cultivated plants are destroyed by injury, and mustard growing among them may not be destroyed by injury, but by the same treatment, so it is practical to apply it only when the mustard is growing in certain crops. Oats, corn and peas are little if at all affected by the spray, thus enabling us easily to destroy the mustard growing in these crops. Potatoes are very susceptible to injury, and mustard growing among them may not be destroyed by injury, but by the same treatment, so it is practical to apply it only when the mustard is growing in certain crops. Oats, corn and peas are little if at all affected by the spray, thus enabling us easily to destroy the mustard growing in these crops. Potatoes are very susceptible to injury, and mustard growing among them may not be destroyed by injury, but by the same treatment, so it is practical to apply it only when the mustard is growing in certain crops.

ART AND NATURE.

White flour is made from wheat. So is whiskey. But neither one can be said to be a physiological food. Neither one represents those superior qualities native to the wheat and that Nature destined for children. White flour, like whiskey, is the product of Art—not of Nature. It is, indeed, merely a part of the perfect whole. When bread is made from the entire wheat kernel, we have a food that has not been subjected to one single organic element. It represents the complete grain just as the soil, the rain, and the sunshine produced it. No effort to improve the work of the great Master Builder. In this food we have every property to build and maintain every part of the body. Defective teeth and weak nerves evidence the use of defective food. Moreover, in Shredded Wheat we have bulk which the system demands.
