

WHENCE COMES POTATO FLAVOUR?

From the soil, the seed or the fertilizer. Does the flavor of potatoes depend upon the soil in which they are grown?...

Professor Olf, of the University of Wisconsin, replied: "For some time with the opinion that the flavor of potatoes is chiefly dependent upon their starch content, and that the more starch and the less water they contain the better...

The statements made by Professor Johnson, of the New Jersey experiment station, were highly interesting and instructive, whether considered from a practical or scientific point of view. It is found that both manure and fertilizer increase the water content of the tuber...

The cause of sugar and their cause. This element consists, at least as far as actual elements extend, in a number of small worms which infest the whorls and cause the tubers to paralyze for food...

How the soil. At the Wisconsin experiment station, according to Professor King's report on soil to be used later in 1890, the temperature at one and a half inches below the surface from 1 to 9 days...

When George Ford came. It was in the latter portion of the autumn of 1887 that the late president of the Union came to the desert...
