

PROF. KERR OUT; DR. WIDTSOE IN

New President of the Agricultural College Named at First Session.

STOHL SUCCEEDS MCGONICK.

Five Members of the Faculty Resign And Dr. Widtsoe Will Name Their Successors.

The work of realigning the Agricultural college in its course of study, its faculty, and its aims as a part of the Utah educational system, is now on full force. That important changes in policy are to follow the appointment of the present board of trustees is very evident from the first showing of results.

In the meeting of the board of regents yesterday afternoon, President Kerr's resignation was accepted, Dr. John A. Widtsoe was elected to succeed him, and the resignations of five other members of the faculty were also accepted. Dr. P. A. Yoder was succeeded by D. E. Ball as head of the experiment station. The professors who resigned are Joseph Jensen, M. Elizabeth Wyant, Geo. P. Campbell, Evelyn Moech, W. C. Snow and Prof. D. E. Ball.

It is altogether probable that these are not all the changes which will mark the important transition. Some people are inclined to take a gloomy view of the change, and Prof. Jensen's letter of resignation is a fair sample of this view. On the other hand the controlling forces in the new board, and the sentiment back of the change are decidedly hopeful that the changes mean more co-operation between the two schools, and a day is looked forward to, when all that the Agricultural college may lose in expensive engineering courses, will be made up at the university in courses of that exact nature, available to all students, including the specialists in agriculture, as well as those in other scientific branches. At Logan it is probable that the new direction given to college work will be in the nature of expanding the purely agricultural features, the experiment work, and the out-of-doors education, this plan working in co-operation with the development of the university and if the present policy becomes permanent it is safe to look for more legislation each session, having in view final consolidation, with adjustment of courses to make the two schools work in the harness together. The present changes are regarded as an opening wedge, unless something happens to disrupt the movement before it becomes firmly established.

PROF. KERR'S COURSE.

President Kerr's policies, which are coming to an end with the present year, have been aggressively constructive. President Kerr took hold a few years ago, of a very small institution, and leaves it almost rivaling the University of Utah in many particulars, while passing it in others. Most noticeable among these have been the rapid construction of landscape effects on the campus, the building of a large dormitory, giving the students a home for college life, and a campus spirit, and the development of college social life until it has dominated the town, rather than taking a secondary place and allowing the students to seek social entertainment independent of campus influences. In all but the size of its student body, the Logan school was rapidly becoming a college home as such, as in localities like Cornell, Princeton, and Stanford, where the campus and college dominate the town social life.

The splendid environment built up around the Logan school has led some people to speak of the advantages of consolidation at Logan, rather than at Salt Lake, where the student body becomes lost in the general city life, and the development of college social life is lost permanently from the field. He rather intimates that his future will not lie in Utah educational lines, but it is possible that some position he offered him, which will give him a more fortunate vehicle for constructive ability, than that which he has just relinquished.

THE NEW OFFICIAL.

In reorganizing the board yesterday, Lorenzo N. Stohl of Brigham City was chosen president; Mrs. A. W. McCune, secretary; Prof. J. A. Bexell, cashier, and Allan M. Fleming, cashier of the First National bank at Ogden, treasurer. The new officials were then directed to proceed with the organization of a faculty for next year.

LETTERS OF RESIGNATION.

In handing in their resignations, the retiring members of the faculty sent the following letters to the board:

JENSON'S GLOOMY VIEW.

Logan, Utah, March 28, 1907.
To the President and Board of Trustees of the Agricultural College of Utah.
Gentlemen and Ladies: Just 40 years

CONSUMPTION

Mainly Caused by Chronic Colds and Hangings-on Coughs.

A prominent New England scientist has given a good deal of time to the study of consumption, and finds that comparatively few cases are hereditary.

Mostly all are caused by neglected coughs and colds, which gradually weaken the whole pulmonary system, and before people realize it there is a diseased spot in one lung; spitting blood soon follows and eventually a collapse.

Such an unnecessary end, such a pity for all could be so different. We know of many instances where our valuable cod liver preparation, Vinol, has been most beneficial in such cases. Vinol is able to cure hangings-on colds, stubborn coughs, strengthen the lungs, and thus prevent the development of consumption, because it is the most perfect cod liver preparation ever compounded; it contains no oil or grease to upset the delicate stomach, yet it does contain every one of the fifty odd medicinal curative elements actually taken from fresh cod livers, with tonic iron added. We ask all Salt Lake City people to try Vinol for weak lungs, chronic coughs, hangings-on colds, or run-down and debilitated conditions, and will pay for the medicine ourselves if it fails to benefit.

How can we express our faith in Vinol more emphatically? Dr. J. H. Druehl, Dr. Frank, Druggists, also Smith Drug Co.

NOTE—While we are sole agents for Vinol in Salt Lake City, it is now for sale at the leading drug store in nearly every town and city in the country. Look for the Vinol agency in your town.

Respect YOUR Stomach

GIVE it food that will not irritate or retard the performance of its natural functions, and it will reciprocate in a way agreeable and comforting.

No single ingredient contributes so largely toward wholesome, nourishing, agreeable food as Royal Baking Powder.

Royal Baking Powder's active ingredient, Grape Cream of Tartar, is the most healthful of the fruit products.

This is why Royal Baking Powder makes the food finer, lighter, more appetizing and anti-dyspeptic, a friend to the stomach and good health.

Imitation Baking Powders Contain Alum

"The use of alum and salts of alumina in food should be PROHIBITED. The constant use of alum compounds exerts a deleterious effect upon the digestive organs and an irritation of the internal organs after absorption."

"EDWARD S. WOOD, M.D.

"Professor of Chemistry
"Harvard Medical School, Boston."

ROYAL BAKING POWDER CO., NEW YORK

DR. JOHN A. WIDTSOE.

Who Has Been Chosen President of the Agricultural College to Succeed Prof. W. J. Kerr.

ago the Massachusetts Agricultural college, one of the first colleges established under the federal land grant, opened its doors for admission students to a "purely" agricultural school. Since that time about 50 other land grant colleges, including the Agricultural College of Utah, have been established. Without exception all have recognized the close relationship between agricultural and engineering education, and have co-ordinated parts of their curriculum of course. Old conservative Amherst, the local name for the Massachusetts Agricultural college, stood aloof and alone on a purely agricultural curriculum. Notwithstanding this 50 to 1 ratio in favor of agriculture and engineering against purely agriculture, and notwithstanding the almost diametrically opposed conditions of the two states agriculturally, the Massachusetts school two years ago became the ideal for the Utah school. As a result a law was passed eliminating engineering in every form from the Agricultural college. Regularly enough, just about the same time the Massachusetts school recognized the spirit of the land grant schools, and today a number of engineering subjects, such as surveying, roads and bridges, hydraulic and sanitary engineering, strength of materials, foundations and masonry, construction, topographic surveying, highway construction, railroad construction, earth work, pavements etc., besides the advanced courses in drawing, mathematics and physics leading up to these courses, are found upon its schedule of required studies.

The Massachusetts school, after lagging behind the new education typified by the work of the land grant colleges throughout the country for forty years, without an irrigation problem to solve, finds it necessary to join the procession by introducing engineering. At the same time, the Utah school, which has been in the rear, takes her place in the rear. The folly of this step has been plainly pointed out to the legislative and executive departments of our state, but without remedy.

The conclusion is inevitable; the Agricultural college of Utah took its first backward step two years ago when the law above referred to was allowed to go on the statute books. More recent developments indicate that the movement in that direction is not yet ended. For the reason that the removal of the engineering work would relieve me of half the work which I have, for several years, had immediate charge and for the further reason that I cannot consistently work under a policy which is, in my judgment, retrogressive in its tendency, I most respectfully tender my resignation as Director of manual training in mechanic arts and professor of mechanical engineering in the Agricultural college of Utah, to take

effect at the end of my present period of employment.

Respectfully yours, JOS. JENSON.

MRS. WYANT QUILTS.

To the Honorable Board of Trustees of the Agricultural College of Utah: Ladies and Gentlemen—Fearing that I cannot freely and conscientiously support the policy of the incoming administration of the Agricultural college of Utah, I hereby tender my resignation as assistant professor of English language and literature in said college, such resignation to take effect July 1, 1907.

Respectfully,
M. ELIZABETH WYANT.
March 27, 1907.

CAMPBELL CAST DOWN.

Logan, Utah, March 27, 1907.
To the President and Board of Trustees of the Agricultural College of Utah: Gentlemen and Ladies—Developments in the affairs of the Agricultural college of Utah in athletics, as well as in general, indicate that probably the

POLICE

Red Blood Corpuscles Made by Good Food are the Police of the Body.

When a man keeps good red blood in his veins he has a sort of police squad and is practically immune from disease. Pure blood made from the right food will resist the attacks of disease germs and drive them out or kill them.

The first thing that should be looked to, therefore, is the blood, and prompt action to build up the red corpuscles by food. A lawyer in a Western town tells how he drove Bright's disease out of his system by supplying good red blood by food.

"For several years I had been afflicted with kidney trouble," he says, "which sometimes incapacitated me for business. My condition became such as to cause great fears that Bright's disease was about to fasten itself upon me."

"I had always been very fond of Coffee. When, however, the kidney symptoms became so alarming, I quit the coffee, and began to use Postum Food Coffee. I soon began to feel the force of the new beverage as I had been of the old coffee, and what is more important, my health improved rapidly and steadily until in a short time, the kidney troubles had almost entirely disappeared. I am convinced that my former sad feelings and the symptoms of Bright's disease were caused by the use of coffee, and that the credit for my cure belongs to the Postum. Name given by Postum Co., Battle Creek, Mich.

"Postum Food Coffee and Grape-Nuts make good red blood. They contain food that Nature uses in the process, so prepared as to be quickly assimilated. There's a Reason."

work in physical education in the college will not, any longer, be comparable to that done in similar institutions, or, of itself, at all worth the while. I therefore respectfully notify you that I will not be a candidate for re-election to the position of physicist director. Sincerely,
GEO. P. CAMPBELL.

TO PREVENT THE GRIP.

LAXATIVE BROMO Quinine removes the cause. To get the genuine, call for full name and look for signature of E. W. GROVE, JR.

"THE CRUCIFIXION."

Stainer's Cantata Given in Fine Fashion by St. Paul's Choir.

The first performance of Sir John Stainer's cantata of "The Crucifixion" to be given by St. Paul's choir under the direction of Mr. Brines, was presented with marked success last evening before a large audience. It is not having too long a bow to say that it was one of the best as well as one of the pretentious cantata performances ever given in Salt Lake. The large choir sang with a precision, unison and excellent quality of tone, as well as with the volume that one might have expected from professionals. Concentrated drill and training were very manifest all through the evening. Then the work of Organist John Borkhoof was very satisfactory. The skill with which he handled the instrumental end of the cantata was worthy of all commendation.

There are no woman solo parts in "The Crucifixion," the solos being written for the tenor and baritone. Mr. Brines in the former and Mr. Dougall in the latter parts did work of a high order. Their voices were in good condition, they understood the requirements of the occasion, and their efforts were artistic and effective. The cooperation between Messrs. Brines and Dougall was one of the marked features of the evening. The cantata will be given again this Good Friday, and the church auditorium ought to be filled, and it probably will.

PILES CURED IN 6 to 14 DAYS.
PAZO OINTMENT is guaranteed to cure any case of itching, blind, bleeding or protruding Piles in 6 to 14 days or money refunded, 50c.

MURDERER SOEDER TO HANG.

San Rafael, Cal., March 28.—Leon Soeder, convicted of murdering his brother-in-law for insurance money, will hang at San Quentin tomorrow.

Soeder has expected action by the courts or by the governor to stay the execution, but no further steps to prevent the law's course being followed will be taken. The condemned man, however, at a late hour tonight, had not given up hope of a reprieve.

NO INTERVENTION IN CENTRAL AMERICA AT PRESENT.

Washington, D. C., March 28.—The moment has not yet arrived when the United States and Mexico can intervene to stop the spread of war in Central America. This was the decision arrived at as the result of the conference between Secy. Root and Ambassador Creel at the state department today. The secretary also had the benefit of advice received by the diplomatic representatives of the Central American states from their own governments. The absence of definite information from the seat of trouble is embarrassing to the officials who are desirous of bringing about peace.

It is feared the collapse of the Bonilla government in Honduras and the consequent installation of a provisional government in accord with that of Nicaragua will result in a combined attack by them upon other Central American republics. The apprehension of such a movement has greatly alarmed all of the other states. It is said that there is no disposition on the part of this government to take the part of policeman toward these sister republics, but it would welcome any proper opportunity to restore peace.

NO ANGLIO-SAXON CARDINAL.

Rome, March 28.—A most reliable authority declared positively today that there is no possibility of the creation of an Anglo-Saxon cardinal at the consistory to be held April 15 but that the nomination of an American and English cardinal at the consistory to be held at the end of the year is almost certain.

Quick changes from hot to cold and back again try strong constitutions and cause, among other evils, nasal catarrh, a troublesome and offensive disease. Sneezing and snuffing, coughing and difficult breathing, and the drip, drip of the foul discharge into the throat, are made by Ely's Great Peppermint Cure. This honest and positive remedy contains no cocaine, mercury, nor other harmful ingredient. The worst cases are cured in a short time. All druggists, 50c or mailed by Ely Bros., 54 Warren Street, New York.

Walker's Saturday Bulletin.

Easter lilies

In spite of the reported scarcity of Easter lilies this season, we have secured an immense stock of the finest selected plants. Prices no greater than they have been on previous occasions. Also a beautiful selection of other potted plants and cut flowers. Main Street doors open all day Sunday.

Walking skirts for Spring \$3.95.

A very fetching assortment of these in black mohairs, and fancy mixtures—Prettily pleated and gored—Very stylish models and well worth \$4.75 and \$5.00 each Choice Saturday, one day only \$3.95—

Pretty lawn shirt waists at \$1.95.

At \$2.25 and \$2.50 each, these are unusual values, but for a Saturday we give them at \$1.95. They're made of fine white lawn, trimmed with lace and embroidery and pleated front and back; either long or short sleeves; a very worthy offer.

Women's knit union suits greatly marked down Saturday.

White cotton ribbed suits—made with high neck and long sleeves or low neck and short sleeves—or no sleeves—ankle or knee lengths—one of our standard lines selling regularly at 75c and 85c the suit—Saturday we make these prices—

Regular sizes, the suit, 58 cents.
Oversizes, the suit, 65 cents.

Our beautiful display of Easter hosiery and underwear is worth a special trip to the store to see.

Saturday specials from the me 1's corner.

Garden suspenders—very good line at 50c the pair—Saturday they go at the 39c

Silk line half house—very splendid 35c values—Saturday you choose at the 25c

Remember the splendid \$1.50 and \$1.75 gloves we are selling Friday and Saturday at the pair 1.35

Easter shirts and neckwear.

A very large and comprehensive selection of delicate neckwear for Easter—prices range from 25c to \$3.00 each.

Fine line of shirts—whites and colors—all appropriate ideas and correct styles—at Walker's—the best place to buy men's shirts in the city.

Saturday house-cleaning specials from the "Busy basement."

Fine galvanized wash tubs Saturday special 75c

Crystal wash boards Saturday special 49c

Clothes horses Saturday Special 1.25

Curtain stretchers Saturday special 2.00

Ironing boards Saturday Special 69c

Sleeve boards Saturday Special 75c

Mop sticks Saturday Special 35c

Household ammonia Saturday Special 10c

Carpet beaters Saturday Special 15c

Rope clothes line Saturday Special 49c

Wire clothes lines Saturday Special 75c

Window rubbers Saturday Special 25c

Shelf paper 11 yards Saturday Special 5c

Paper napkins 2 dozen Saturday Special 5c

Suits for boys \$2.95 Saturday special

These are excellent values—Made up in first class style by the best tailors in the country—Sailor, Norfolk and double breasted styles—Dark and medium colors of fancy mixtures—Suits to fit boys 5 to 6 years of age Very special at the suit \$2.95

Girls' spring coats—special at \$3.50

A very pretty line of check and plaids—fittingly trimmed with fancy buttons—Suits to fit little girls from 3 to 14 years old—the price, \$3.50 each, is very special.

Saturday—last day of the rug and drapery clearance.

The great success that has attended this event was beyond even our most sanguine expectations, the values were there—the prices were right and the Salt Lake shoppers were responsive. Saturday will cap the climax—it will be the greatest day this department ever knew.

In addition to the previously advertised specials, we add these excellent numbers.

Cross striped grenadine curtains.

\$4.00 values to go per pair \$2.75
\$2.50 values to go per pair \$2.45
\$2.00 values to go per pair \$1.95
\$2.75 values to go per pair \$2.74
\$1.40 values to go per pair \$1.10
All others at proportionate reductions.

One more day of the great Easter sale of linens and wash fabrics.

To stimulate this event to its utmost drawing power, we offer these numbers in addition to those you've seen this week—Shrewd shoppers will see the wisdom of being here.

Pequot sheets and pillow cases.

Reduced like this for Saturday selling

Size 81 by 98½—Saturday extra special each 95c

Size 81 by 98½—Saturday extra special each 35c

Size 45 by 98½—Saturday extra special each 22c

Size 60 by 98½—Saturday extra special each 24c

Fifty pieces of fine pin head dotted Swiss worth all of 35c the yard—Saturday 19c

ONE HUNDRED PATTERN CLOTHS—Pure linen—worth \$2.00 each—Saturday extra special your choice \$1.25
