MINING, BUSINESS AND STOCKS

UINTA, WYOMING, OIL PRODUCTION

The Field is Proven and Much Development Will be Accomplished Next Spring.

DAILY OUTPUT OF 175 BARRELS.

Product to be Refined Either at Flor ence, Colorado, or Taken to the Pacific Coast Refineries.

C. A. Dorn formerly of Salt Lake, but now of Evanston, Wyoming, is in the city, coming directly from the oil fields. He gives a rather interesting view of the situation of the Uinta county fields which he says are on the eve of a

In summing up the situation he said there was no longer any question about the presence of oil in paying quantities in that part of Wyoming. There is at present seven wells which would give at the least an average of 25 barrels each of the highest quality of oil yet found in the United tSates. One well had been pumped recently and produced at the rate of 1,500 barrels a day, but Mr. Dorn did not think it could keep this up for any length of thine. The one thing needed in the district was storage. There is already on the ground a tank-house which has a storage capacity of 2,000 barrels besides the tanks at the wells, and these were all full. Shipping of the product will not begin until next spring when it will either be taken to the Florence, Colorado, refineries or to those recently established on the coast. In speaking of the future Mr. Dorn said that the American Consolidated company would be running at least 14 strings of tools which represent as many wells. This was only one company though it was the largest perhaps, while others would swell the number to hearly a hundred. Mr. Dorn was recently at the Possil field but says no oil has been discovered there though systematic development work was under way which at any time may change the appearance of things in that field.

The Oil Well Supply company is building a large machine shop at Spring Valley where all manner of repairing cap be done close by the wells. Since leaving Wyoming Mr. Dorn has been at Mt. Pleasant, Sanpete county, Utah. He says there are very strong indications of oil in the well now drilling there. in that part of Wyoming. There is at present seven wells which would give

ON THE EXCHANGE.

The Week Closes on Light Trading and A Falling Market.

The week on the exchange closed on amount to 135 carloads. Among a very unsteady market. The trading was light and stocks upon the whole were a little off. Daly-Judge started off a little stronger, but fell to \$8.85 at the end of the regular call. Daly-West was also weaker and was sold down to \$35.50 per share. May Day was a little transport and was also weaker and was sold down to \$35.50 per share. May Day was a little transport and was also weaker and was sold down to \$35.50 per share. May Day was a little transport and was also weaker and was sold down to \$35.50 per share. May Day was a little transport and was also weaker and was sold down to \$35.50 per share. May Day was a little transport and was also weaker and was sold down to \$35.50 per share. stronger and passed out two lots at and Sta cents. Grand Central though not traded in was offered 10 cents not traded in was offered 10 cents cheaper than yesterday with a bid made of \$2.72½, while Con Mercur was a trader at \$6 cents per share. South Swansea sold at 10 cents and Yankee possed out a 200-share lot for 40 cents. Star Con., remained about the same, while New York moved up and sold at 16 cents. The market for the day and week stood at the close as follows. FORENOON QUOTATIONS.

WAITING FOR THE ROAD.

Bingham Miners are Having Difficulty In Getting Their Ores to the Market.

Inquiry at the office of the Copper Belt railroad people this morning led to the fact being given out that the road would be completed during the coming month. In the meantime those mines which are not possessed of jude pendent tramways, are experiencing great difficulty in getting their ore to the market, providing they lie any dis-tance away. The ore handlers natural-ly do not wish to fit up for winter work when the time is so short before they will be put out of commission by the rallroad. Mine owners say that No-vember's shipments from the old camp will fall far below the average.

HORN SILVER MILL. Machinery Went Into Commission for 60 Days' Run Yesterday.

The Horn Silver mill was again started up yesterday. There has been a large amount of ore piling up in the bins and manager Farnsworth is of the opinion that there is enough ahead to keep the machinery running for at least two months. Mr. Michael Rourke who for so long a time managed the Mammoth mill is to be the superintendent of the mill.

SHIPMENTS FROM TINTIC. Eureka Correspondent Sends a Budget Of Gossip From the Camp.

Special Correspondence. Eureka, Nov. 20 .- The fotal output rom the Tintle district this week amount to 135 carloads. Among the new shippers are the La Clede and Richmond-Anaconda. The shippers

Mr. George Z. Edwards, former sup-erintendent of the Consolidated Mercur mine and mill at Mercur, is in the West Thitic district making an examination of the Orient mine.

Among the prominent mining men who vizited Eureka this week were William Hatfield, E. G. O'Donnell, Samuel McIntyre, Harry Josephs, Isaac Woolf and George W. Rittr.

The Snowflake mine was bulkheaded and closed down Sunday by Supt. William Hatfield. The reasons for the liam Hatfield. The reasons for the close down at this time is said to re-sult from a disagreement byween the management and the stockholders. It is to be hoped that the trouble will soon be settled as the Snowflake is a

romising property.
The jumber from the Old Sioux mill at Robinson is being removed to San-

contract has been awarded to Sandy Markham of Robinson to haul the Lower Mmmoth mine dump to the railroad station at Robinson and large shipfnents are to be made of the low-grade ore which has been thrown over the dump for the past several years.

As there is a large demand for low-grade ores by the smelters since the closing down of the Mammeth mine several of the properties in the Tintic district will commence the shipment of their district. heir dumps. Adams & Sons Co., who has the con

tract for building the Uncle Sam mill expect to have the building complet-ed next week ready to turn over to the ompany. The machinery is about all n place. The water line to the new mill is also completed, and arrange-ments hve been made with the Tellu-ride. Power company to furnish the power to run the machinery. It is ex-picted that the wheels will begin to revolve about the first of next month. Mr W. H. Pack will return to Eureka the first of next week to have the necessary changes made at the Bul-lion-Beck mill so that operation can be non-Beck mill so that operation can be commenced at an early date. The old boilers will be used in connection with a new one to furnish the necessary power. The building will be remodeled throughout and the plant put in first-class order for the new process of treating the ores. The slimes and tailings will receive treatment first and then the ore dumps will be operated upon. When this work is comed upon.

tailings will receive treatment first and then the ore dumps will be operated upon. When this work is completed the low grade ore which is blocked out in the mine will be put through the mill. About 50 men will be required to operate the plant, which means much to Eureka.

The men who are at work in the Bullion-Beck mine trying to recover the remains of John N. Christle who lost his life in a cave-in at that property on Wednesday morning last, expect to locate the body tonight. The remains were drawn down to the 800 level last night together with tons of debris. The stench from the decomposed body was so strong that for a time the heroic men had to cease work. Great credit is due the miners of Eureka who have worked incessantly day and night, risking their lives to restore the remains of a fellow miner to his family so they can be laid to rest in the city of the dead.

WILL REBUILD THE MIDAS MILL.

Plant to be Improved and Every thing Brought to the Highest Degree of Perfection.

WORK WILL COMMENCE AT ONCE

Management Intend to Start a Lively Campaign of Development During The Coming Spring.

Treasurer Chipman of the Midas Minng company gave out this morning that the company had decided to rebuild at once the mill which was destroyed by the windstorm of last week. Contracts for the work had not been let yer, but would be in a short time, and the work pushed during the winter. The mill was built by the Salt Lake Hardware company some years ago, and at the time it was as up-todate as any mill of its kind in the state, Improvements, however, will be made in the new plant, and everything brought up to standard, as well as its size increased to meet the demands of the mine.

Mr. Chipman said that operations at the mine this winter would be almost entirely confined to the rebuilding of the plant. Upon its completion, next spring there will be an additional force of men put on and work will be rushed until the mine was made to produce its maximum of ore,

NEVADA-ALPINE DIVIDEND. One Hundred Thousand Dollars of Velvet To be Passed Around.

The Nevada-Alpine mining company met today at the office of Messrs. J. and W. P. O'Meara, McCornick building, and declared a dividend of locents per share, or \$100,000 in all, upon the capital stock of the company. Some two years ago Mr. T. J. Lynch secured the property upon lease and has worked it successfully ever since. The property is situated upon Lone Mountain, near Tonopah, and has developed into a mine of extraordinary veloped into a mine of extraordinary Though the means of transporting the ores are limited, enough high grade has been shipped to make the present splendid showing

CONCENTRATES.

Development is said to be progressing finely at the Mona.

Another car load of Sacramento-Mer-cury is ready for the market. Pat Ryan has returned from his trip to Lone Mountain.

An assessment of five cents per share has been levied on the stock of the Wabash Mining company. John W. Weeks, one of the directors

of the Boston Con., left Salt Lake for the east yesterday. The annual meeting of the Boston Consolidated will take place in London, England, on Dec. 15 next.

There are 300 tons of Centennial-Eureka ore coming to the United State smelter daily. Messrs. Spooner and Mayne of the Minola at Park City, will go out to the

property tomorrow morning. The Pioneer Sampler reported eight car loads of Tintic ore at their works

The Grand Central of Tintie had eight cars of ore up today. Harry Josepha has returned from his trip to Eureka,

Supt. Cole of the Silver Shield mine is in the city for a few days. The usual dividend of \$5,000 will be ared by the Sacramento directors, net week.

E. F. Frendenthal the well known Pioche. Nevada, Mining man, who has been at Salt Lake for some time, left for home last night.

The Taylor and Brunton sampler reported today one car of Milford, and two cars each of Nerada and Tintic

INVITATION TO CUBA Asked to Come into the American Union as a State.

Washington, Nov. 20.—Senator New lands, author of the resolution annexing Hawaii, today introduced a joint resolution inviting Cuba to become a state of the United States upon terms of equality with the states of the United States and United States and United States States and University States ion. It provides that Porto Rico shall become a county or province of Cuba; that all present officers of Cuba shall retain their positions until their terms expire: that the \$35,000,000 bonds of Cu-ba shall become the bonds of the state of Cuba, with Interest reduced to 3 per cent, and 2 per cent to be applied to a sinking fund: that the present rural guard of Cuba shall be incorporated into the army of the United States; that the money in the Cuban treasury shall become the money of the state of Cuba. The resolution closes with the follow-

The resolution closes with the follow-ing declaration: "The foregoing reso-lution is inspired not by a desire to annex forcibly or to assert soversignty over the island of Cuba, or to exercise any form of compulsion; but solely by a regard for the interest of the two countries and a conviction that the in-terests of the state-composing the fed-eral Union and Cuba are identical and eral Union and Cuba are identical and they can be administered by union un-der one form of government in which all shall be represented on equal terms and to be governed by equal and un-discriminating laws, ensuring freedom of trade and equality of rights and neighbors."

BUSINESS NOTES.

Brokers report that nearly everything in the stock list has shaded off slightly during the week. This is attributed to no known cause, unless it is the fact that when tax time comes smaller investors drop off. Reports of business conditions, collections, and of the trade outlook generally, are more than good from all directions, and from the beet sugar interests, they might be called glowing. The Idaho Falls fac-tory starts up this afternoon; that at Garland on Dec. 1. The plant at Lehi will end its run about Christmas, and those in Ogden and Logan about the same time.

Brokers say that stocks are at their dullest just now, and that no general revival may be looked for till the next dividend periods approach at the close of December.

SIDAHO'S FIRST SUGAR FACTORY.

IDAHO SUGAR, CO'S 600-TON PLANT, BETWEEN IDAHO FALLS AND IONA, WHICH

STARTED UP TODAY.

Idaho Falls, Ida., Nov. 21 .- The sugar

factory at Idaho Falls began the sea-

The above picture is from a photograph taken just before the roof of the factory was completed. It has since been finished. The illustration shows the farmers unloading their beets upon the vast beet pile—the overflow after the sheds were filled. On the other side Special to the "News.")

of beets, of which there are 40,000 tons at the factory, began at 1 o'clock and everything is propitious for a very The Idaho Sugar company was in-corporated in this city on the 5th day of February, 1903. It is, therefore, less than a year since the capital for the enterprise was raised. That a 40,000 tor crop of beets should have been planted, harvested, and delivered, and a million dollar plant constructed and set in op-oration, within that time, is one of the marvels of latter day industry,

marvels of latter day industry, and shows what can be accomplished by the intelligent union of capital, labor, skill and enterprise. Especially does it show, too, what the public spirit of the Idaho legislature and Gov. Morrison, who encouraged the industry by offering a bounty for sugar produced during 1963-4, has accomplished.

The officers of the company are Joseph F. Smith, president; Thomas R. Cutler, vice-president and general manager, and these with Messrs. John R. ager, and these with Messrs. John R. Winder, W. S. McCornick, John Henry Smith, Heber J. Grant, John C. Cutler, Soren Hansen and George C. Parkin-son comprise the board of directors, the secretary and treasurer being H. G.

Whitney. Mark Austin is resident manager and superintendent. The company was organized with a capital of \$1,000,000, of which \$750,000 was paid in in installments early durwas paid in in installments early during the present year. The remaining \$250,000 was called for and paid in on Nov. 1. The factory is built of fron, steel, brick and cement, is entirely fire-proof, and has a capacity of 600 tons of beets daily. The buildings are constructed to allow for the addition of machinery doubling the capacity to 1,200 tons whenever needed. In addition 1,200 tons whenever needed. tion to the plant, which is said to be the finest and most modern yet con-structed, the company owns 640 acres of the finest beet land in the county, all of which has been paid for. The expectation is that the factory will re-quire between 60 and 75 days in which to work up the crop of beets, which will bring the end of the run near the close

January. THE BOUNTY LAW, THE BOUNTY LAW.

Under the laws of Idaho specially passed at the last session of the Legislature to encourage the planting of the beet sugar industry in the state, a bounty of one cent per pound is paid on all sugar produced up to the 3ist of December. The company's expectation is that about half its run, or 5,000,000 tons will be turned out in that time, which would give it an income from the state of \$50,000. The bounty on the other half produced in 1994, would be other half produced in 1994, would be

one half per cent per pound, or \$25,000, making the total income from the bounty, if the estimate of 10,000,000 pounds is correct, about \$75,000. The state board of examiners at Boise, on whom the duty of certifying to the correctness of the bounty claims devolves, have met and appointed Mr. G. G. Wright, the well known business man of Idaho Falls, manager of the Consolidated son's run this afternoon. The cutting Fails, manager of the Consolidated Wagon & Machine Co., at that place, their representative. It will be his duty to stamp each sack of sugar as correct and to issue to the company, his certificate that it is justly entitled to the bounty under the law.

THE FREMONT PLANT.

The other Idaho sugar factory, which will be rushed to completion in order to participate in the bounty of one-half cent per pound for the year 1904 (after cent per pound for the year 1904 (after which the bounty ceases entirely) is that of the Fremont County Sugar company, which will be erected at Sugar city about midway between Rexburg and St. Anthony. The excavation has been dug and the corner stone will be laid in a few days. The contract requires that the factory shall be completed during August 1904 which will pleted during August, 1904, which will enable it to work up its entire crop of beets during the year.

GARLAND MILL TO START DEC 1.

(Special to the "News.") Garland, Utah, Nov. 21.—Practically the entire crop of beets has been delivered here. The finishing touches are now bing put on the factory, but owing to several delays in the receipt of machinery, the mill cannot be started up before Dec. 1. It is positively an-900000000000000000000000
