MINING, BUSINESS AND STOCKS.

GEN W. ALLENANDERS

MINING STOCK MARKET TODAY

Little Change From Quotations of High Grade Copper Ore Disclosed | Outlook is Very Bright for Famous Yesterday Afternoon.

DALY-WEST SLIGHTLY DOWN | SHIPMENTS HAVE PAID WELL | WILL BE PROSPEROUS YEAR

New York Maintains Its Strength and Closed Two Cents Higher -Closing , Quotations and Sales.

The mining stock market was little changed today, compared with yesterday afternoon quotations. A slight improvement was noticed in some and one or two others registered declines, yet summing them all up the differences were slight. The volume of business transacted was only fair being 18,100 shares which brought \$15,226.50. Daly-West opened weak, selling at \$47 even, but it stiffened to \$47.25 at the close. Little Bell started off at \$3, but weakened to \$2.77%. New York held up well on the strength of the reports of im-proved conditions, closing 2 cents high-or than yesterday's last quotation.

Wabash was unchanged. The closing quotations and sales post ed wer ass follows: FORENOON QUOTATIONS.

IDRY CANYON

In Eureka-Ophir.

Buring Past Month-Has Paid 32 Per Cent on Entire Capitalization-Success of "Tenderteet."

Arrivals from Dry canyon bring the information that the property of the Eureka-Ophir mine, which has been opened during the past year by J. W. Calens and associates, is rapidly developing into a big bonanza.

Mr. Cairns has opened a big vein of ore carrying high grade values in copper and lead and netting \$42 to the ton Assays gave average returns of 28.3 per cent lead, 19 ounces silver, 16 per cent copper and an excess of 15 per ent iron over silica. Liuring the past month several car

leads of ore were shipped to the valley smelters from which was realized, it is said, as much as 32 per cent on the entire capitalization. When the present owners took hold of the mine it was remarked that they were "a set of tenremarked that they were "a set of ten-derfeet," and that it was only a mat-ter of a short time until another dis-ma! fallure would be recorded. Some declared that the property was prac-tically worthless, and that it was im-posible to get much more than oc-casional stringer of ore. Such were the views of the chronic pessimists who make themselves nuisances in almost nake themselves nuisances in almost every mining camp. Dry canyon was not an exception; it had a few of this class; who are ever ready to say any-thing but a good word about a property Mr. Calras has paid no attention their wallings but has gone on quietly with his work and it seems has opened up a mine which will become an im-

portant Utah producer. TINTIC ORE SHIPMENTS. April Record Shows That 540 Cars

Were Dispatched. The shipments of ore from the camp of Tintic during April amounted to 540 car loads, which were distributed among the mines as follows:

Bullion-Beck.... Centennial Eureka... Dragon iron mine.. Eagle & Blue Bell.. Gemini..... Grand Central.... Lower Mummoth... Little Chief.... Mammoth..... Martha Washington Star Consolidated United Sunbeam ...

Uncle Sam

Yankee Consolidated 29 CALIFORNIA'S DEATH VALLEY Don Maguire, of tigden, Tells About

That Strange Land. Don Maquire of Ogden, who under stands, the origin and composition o rocks as thoroughly perhaps as any oth-er person in the United States, has contributed an article on Death Vailey, California, to Mines and Minerals. Of this strange wierd land Mr. Mauire gives an interesting portrayal.

Inyo and San Bernardino counties, allfornia, and Nye county, Nevada, taken as one united area comprise the most utterly desert region within the area of the United States. When I state this I do not mean that all of the area above named is entirely an irreclaimable desert, but the greater part of the section is, and within its area lies what may be termed the culmina-tion of sterility, the one spot wherein desolation is supreme, and whose name was well applied, for within no part of the known world is there another such

The land is weirdly desolate, and the dreary regions of the damned are well typified in that locality during the nths of June, July, August and Sep. tember of each year. Like all of the great valley of Nevada and California, Death valley lies oblong from north to south. Its length is about 50 miles and its width from mountain range to mountain range about 35 miles, alough the width of the deepest part of Death valley is less than 30 miles.

together, have made Death valley what it is. These are: First, the surface of the valley is about 219 feet lower than the surface of the ocean. Second, the high range of the Panamint Mountains shuts out from this deep valley the last vestige of moist winds that blow from the Pacific ocean. These winds, even before they reach the summits of the Panamint range on the west, have swept across the Mojave plains and next have blown over the Panamint desert so that what little moisture they carry is exhausted before they roll across the Panamint mountains. In the atmosphere of Death valley in the month of August, there is less than one, half of I per cent of moisture. Third, the country surrounding Death valley, made up of volcanic ranges-black, red, green, yellow and brown-wherein cous

tic mineralization has for countles centuries furnished the elements of sterility to every storm, torrent, and cloudburst that has, during these ages, washed down their sides, thus previol-tating in the deep valley below the de-

posits of borax we now find there. ed by Raiston desert on the north. Panamint desert on the west, Mojave desert on the south, and the Amargosa on the east, and its depression being lower than any of the above, need we wonder that it should be a center of misery, when the het rays of summer pour down upon it and the re-fracted heat strikes it from the Panamint and Funeral mountain ranges.
During the three summer months and
first mouth of autumn the heat in
Death valley rises to 177-9 degrees. Death valley rises to 137-9 degrees, higher by for than anywhere else in the western world; not only does this heat exist there during he day, but also during the n'ght, for the mountain, on either side and the hard surface of the middle valley, during the day heat-ed like the walls of a furnace, do not have time to cool perceptibly until the sun rises again in a cooper sky, and

thus for weeks and months, unfavored

by moisture, this great central isolated region toasts and burns, a land of si-lence and desolation.

ITINTIC CAMP SHOWS ACTIVITY

District.

Much Wark Planned-Development of The Mckinley Property-White Cloud to Resume,

The outlook for the camp is growing very bright. Now that the snow is off the ground and the roads and trails are in good condition, new prospects are being opened up and old ones being worked. Two new business houses opened their doors this week and signs of improvements can be seen on every hand. The Elks are planing the erection of a large building, the lower floor to be used as a theater and dance hall and the upper floors to be used for lodge purposes. Great is Tintic. With her great mineral sources she will not be downed in spite of the "man with the

The McKinley Mining company which owns three claims located north-west and adjoining the Centennialwest and adjoining the Centennial-Eureka mine, will put two shifts to work on the property today. The com-pany is composed of Eureka business men and has but recently been incor-porated. The officers are W. D. My-ers, president: Erick Levin, vice pres-ident; Walter W. Thompson, treasurer and Arthur M. Bowen, secretary. Mr. John L. Anderson has been appointed superintendent of the mine. Already superintendent of the mine. Already this week 10,000 shares of the treasury stock has been sold, and more will be disposed of to continue the development work. The tunnel which is now in 250 feet will be driven another 250 feet to

tap the ore body, which was opened up in the George Wilson shaft above.

Now that the roads around Diamond are in good condition, the White Cloud property, owned by Mrs. Anna Marks, and located just south of the town, will resume active operations. A great will resume active operations. A great deal of work has already been done on the prospect and some rich ore extracted and shipped.

HORN SILVER ZINC ORES. Shipments to be Made at Once From Frisco Mine.

Manager P. T. Farnsworth of the Horn Silver mine, who came in from the east Monday, has announced that he has made satisfactory arrangements for the marketing of the zinc ores of that Beaver county property.

A 200-ton shipment is to be forwarded at once to Antwerp, going by rail to Galveston, Texas, thence by boat to Belgium. Another shipment is to be

made immediately to the plant at Iola, In the Horn Silver mine there are large quantities of ores which run from 35 to 40 per cent in zinc and from 10 to 12 ounces in silver and which the company has been unable to find a market for in the past.

MAJESTIC TOURISTS HERE. Arrived From Beaver Copper Belt

This Forencon. The Majestic excursionists returned from the south this morning and are spending the day sightseeing about the ty. All came back delighted with a looks of the Majestic properties and the great Beaver county copper belt. The party will leave the city tonight for Denver to be in attendance at the annual meeting which is scheduled to take place in the Colorado capital on

General Manager Farish also arrived in the city this morning. He will stay over until tomorrow in order to prepare his report and will accom-President Lewis to the Denver gather-

OUT WITH WASHBOARDS. Two Brokers Accused of Having Them on 'Change Today.

Considerable amusement was had by me of the members of the stock exchange this forencon. It came about over an alleged 'wash sale' of 2,500 shares of New York Bonanza stock, which Harry Joseph accepted from Herman Bamberger at 30 cents per Broker Ed Sheets compla that the sale was not genuine, it being at about two cents above the last transfer made just prior to the occurrence.
Joseph and Bamberger insisted that the
sale was all right, but the governing
board was appealed to and it ordered the secretary to erase the sale from the lackboard, thus removing all doubt. Some members thought the conduct f the accused should have been inestigated more fully. But this being the "first" offense, it was thought best to drop the matter after ordering the

cancellation of the sale. R TU INED FROM OMAHA. R. P. Hills Had a Successful Trip to

Nebraska. R. P. Hills, scretary of the Four Metals mine of Deep Creek, also of the Latham mine, of Spruce mountain district, Nevada, returned home last night from a business trip to Omaha, where he was successful in interesting in-vestors in those two properties, both of which are to be equipped with milling

plants this year. Mr. Hills found that quite an interest is being taken in Omaha in the Deep Creek region, and not a little in the Nevada country in which he is interceted. He expects a party of Omaha citizens to arrive in the city soon who will visit the Four Metals property. The Four Metals mine is one of the best developed properties in the Deep

The Daly-Judge Mill.

It has been decided to keep the Daly-Judge mill at Park City in operation for awhile longer. It was announced that the plant would be closed today pending the installation of some new machinery. Plans have been changed, however, and the plant will continue running as usual indefinitely.

MINING CONCENTRATES. John Kelly, a well known Park Cityite, has been named as superintendent of the Avondale mine at Park City, upon which development work is to

Col. S. B. Milner has dispached a force of men to Iron county to work upon his iron claims, which are under

R. W. Madsen, director of the Century mine, Park valley, has returned from a trip of inspection to that pro-

John G. Stillwell, postmaster and a well known business man of Alta, is in the city. He says the snow is still about six feet deep on the level in that Alpine village. He says the camp will be very prosperous this year.

Thomas S. Van Wagner, formerly with the Salt Lake Hardware company, has been appointed purchasing agent for the Highland Boy Mining company. He entered upon his new duties today.

On account of the roads being impassable above the California mine therefore making it impossible to get a needed supply of coal, sinking has been stopped at the Keystone mine at Park

L. A. Jeff's has returned from a trip to the Wolverine mine at Park City, R. G. Wilson, manager of the New York Bonnanza, is in Park City today inspecting the reported strike of ordin that property. Eight cars of Tintic ores are report-

ed at the Taylor & Brunton sampler to-Senator Simon Bamberger has re-turned from a trip to the northwest.

The California delinquent sale is scheduled for tomorrow.

DEMAND FOR STOCKS NOMINAL

Market Was Stable and the Offerings Small.

PRICES VARIED BUT LITTLE

Declaration of Dividend by Pennsylvanta Rallway Had Not Much Effeet, it Having Been Discounted.

New York, May 1.-While the demand for stocks was only nominal, offerings were equally scant and the early market showed much stability. A few of the less active stocks were about a point above yesterday's close, notably Denver & Rio Grande. The usual speculative favorites hardly varied % from their initial prices. Pennsylvania was lifted 14 and Missouri Pacific a point, with some hardening effect on the general market, but the demand was soon satisfied and the market became very dull again. Prices fell back

became very dull again. Prices fell back a fraction.

Bonds were firm at noon.

The declaration of the dividend in Pennsylvama proved to have been discounted by the earlier rise in the stock and the announcement was without marked effect. Aside from heaviness in Amaigamated Copper speculation was without essential change and room traders were content to await definite operations by the larger speculative interests.
