

MINING, BUSINESS AND STOCKS

CONDITIONS IN
PARK CITY CAMP

What the Record Has to Say
Since Closing Order Has
Become Effective.

THE AMERICAN FLAG MINE.

It Will Continue Development as
Usual—At the Daily Judge
And Others.

The close-down in Park City has been taken in the most philosophical manner imaginable, says the Record of that camp. At the present time all the closing down that is scheduled has been accomplished and still there are 200 or so men employed in the mines and mills of the camp, and some business is being carried on and will continue to be, too, in spite of the belief of a few that the world would come to an end if the mines laid off men. Happy to say though, only a few felt this way about the matter, and the big majority realize that sooner or later all work will be resumed and until that time they will live any way and be as happy as possible under the circumstances.

Not all of the mines have laid off their men, or any part of them. At the American Flag, Supt. Curtis informs us that work will be carried on as usual, and that development and prospecting will continue. It was reported on the street during the week that the flag would close with the rest, but Manager Rathman came up from the city and left the matter in the hands of the local management. Mr. Curtis having no desire whatever to suspend operations, was happy to be able to continue.

Manager Lambourne of the Daily Judge property was up from the city yesterday and informed the Record, before his departure that there were at present about 95 men at his property, since the shut-down. It is the intention of the Judge to prospect extensively during the time that the reduced force is on, and in the course of this week some ore will be mined and the mill will be run one shift per day for the present. Mr. Lambourne stated that he earnestly hoped that the present crippled condition of Park City would not continue for long, but he was unable to give any information as to when affairs would become normal again. The mining companies he said, had no more desire to close down than the people generally had to see them do so, but they could not afford to operate at a loss, and so retrenchment was absolutely necessary. The management of the Judge has made an effort to keep the married men at work at their property. About 175 men are out at the Judge.

Though the big force of workmen usually employed at the great Silver King Coalition company's mine, has been materially reduced since the first of the year, there are still about 134 men on the payroll at the mine and mill, so that the plant is far from an idle one. With the present working force, efforts in the mine will be expended in a large degree to prospecting, while at the mill and sampler houses the shift which will be kept going regularly, some needed repairing and altering will be done. It is the intention to have the mill gang take care also of the samples, tramway, and the output which will come regularly from the King during the "shut-down" will be far better than none, and more than a good many people think for.

The management of the Daily Judge has retained only enough men to keep the mine in necessary repair, the remaining on the payroll includes the engineers, and while very little work will be done in the way of active mining, steam will be kept up and there will be men down the mine every day. With the other operators in common, the Bambergers regret the necessity of abandoning for the present their extensive operations, but feel that such action is entirely necessary.

The work in the drain tunnel will not be retarded in the least by the other reduction of the mine, and the work under way and planned by the companies will continue.

Conditions are bad enough all right, but they might be much worse than there is reason for cheerfulness and hope.

ON MINING EXCHANGE.

Business Fairly Brisk Today—Market
In Better Tone.

Business was fairly brisk for a time on the floor of the Salt Lake Stock & Mining exchange today, and notwithstanding that the smelter situation has not cleared up in the least, prices were slightly better. The metal market is in better tone today and that no doubt has its effect in influencing trading in stocks. Little was done on the open board in the unrelated stocks except to make quotations. The closing quotations and sales were:

WILL BUY FARMS.

A rumor apparently well founded, says a Butte correspondent, has it that the Nevada Copper company and the Washoe Smelter is in course of settlement. The principal farmer in the syndicate, N. J. Hienberg, is in New York in consultation with Amalgamated officials and a letter from him received by friends in Anaconda says a settlement has practically been perfected, and suits to be dismissed and the company to purchase all the farms in Deer Lodge valley affected by smelter smoke.

MR. HENTZ SAYS
IT IS NOT TRUE

That American Smelting & Refining Company Controls
The U. S. Plants.

STORY ABSOLUTELY ABSURD.

Is Way New General Manager
Expressed Himself Today—
Smelter Will Close.

George W. Hentz, the newly appointed general manager of the United States Smelting company, returned from the east yesterday and was visited by a good many of his friends at his office in the Dooly block during the day, who called to extend congratulations upon his promotion.

Of course, the new smelter manager was sought by the representatives of the various newspapers in hopes that he might say something which would straighten out some of the rumors that have been floating about the streets lately and discussed generally by Salt Lake citizens. He expressed as being absolutely absurd the story that the American Smelting & Refining company had swallowed up the United States plants and referring to another intimating that his company would pull out of Utah entirely and go to Nevada. He declared he had nothing to say about any such move having been decided on and if anybody else does they are better informed about the company's business than he is.

Mr. Hentz also declared that there was nothing else for his company to do but to close down its big works at Bingham Junction. "That order sent out to shippers to stop sending in ore," said he, "means just what it says, and we are now cleaning up around the works preparatory to drawing the fire. Just how long that will take, I don't know as I have any right to say, but I am really not informed as to just what will have to be done. But as soon as the supply of ore runs out we will shut up shop. That's all there is to it. But I haven't anything to give out for publication now. You see I have just got home and I don't know just what is going on."

MAY BUILD SMELTER.

Pioche Mining Man Says Senator
Clark Is Interested.

Col. W. B. MacSherry returned from Salt Lake City the forepart of the week where he had been in connection with the different local mining companies with which he is identified, says the Record of Pioche.

Col. MacSherry states that Pioche is still in the line of the Salt Lake mining public, and that some of the monied men there are seriously considering the proposition of building smelters in Lincoln county. This proposition is under consideration by Senator W. A. Clark of Montana, and some of the leading mining men of Salt Lake City have signified a willingness to assist him in this enterprise. MacSherry says that if materialized, it will mean more for this county than any other event that has ever occurred.

WILL STOP ORE SHIPMENTS.

(Pollock Special Wire.)

New York, Jan. 6.—Beginning Jan. 9 the Tonopah mine will practically abolish shipments of crude ore to the smelter and confine itself to mill. Considering hard times, panics and general depression, this is a bold move. In the last six months of 1907, Tonopah and Goldfield railroad earned larger gross than the same period in 1906.

BOSTON CON. REPORT.

Profits of More Than a Quarter of a
Million in 1907.

The annual report of the Boston Consolidated Mining company has been made public here and shows a net profit for the year 1907 of the amount of \$289,486 after deducting interest, depreciation, etc.

During the year \$1,702,548 was spent in development, of which \$782,654 was for mill construction and the balance for steam shovel and property development. Improvement expenditures are made public and show a net profit for the year 1907 of the amount of \$289,486 after deducting interest, depreciation, etc.

SMELTER FOR YERINGTON.

Plant Said to Be Assured and Will be
Built Soon.

That Yerington will not long lack smelter facilities is evidenced by the moves that are being made for the erection of a plant to smelt the product of its mines. In addition a company of New York capitalists is looking over the field with a view to taking definite action. And now comes the Native Copper company with the positive announcement that within 60 days it will begin the erection of a smelter on its property at Yerington.

SAN FRANCISCO MARKET.

CONCENTRATES.

The annual meeting of the Lower Mammoth Mining company is scheduled to take place a week from today. Results of the meeting will be given by John Mining company at Pioche, has received a letter from the mine foreman to the effect that development work is progressing, and with very favorable results. Mr. Frey says when the metal market gets back to normal again and the smelting conditions improve, the Demijohn will begin shipping.

GETTING MINERS TOGETHER.

George Wingfield Intends Taking Men
To Replace Goldfield Strikers.

The visit of George Wingfield of Nevada in this city is for the purpose of getting together a large number of men to go down to Goldfield to take the place of the union men who have put themselves in dire disgrace in that camp by carrying on in such a manner as to thoroughly disgust the owners and the mine superintendents. It is understood Mr. Wingfield has a recruiting force at work and a good sized army of
