

States treasury; that the money was taken from "the territorial school tax;" that it was "the polygamists' share of that and other funds," and all the rest of it, show that the writer had started out to manufacture a canard for a sensation; that he chose the "Mormon" Church property as his theme; that he had no understanding of the case in litigation between the Church and the Government; and that his ignorance is a great deal worse than that of the new settlers in regard to the affairs and laws of the country, and much less excusable. The *Chronicle* canard maker has "written himself down" a donkey.

VOTERS, TAKE NOTICE!

At a meeting of the Territorial "Liberal" Committee on the 7th of June, 1890, some Resolutions were adopted, among which was the following, as it appeared in the organ of the committee next day:

"Resolved, By the Territorial Liberal Committee of Utah, composed of Democrats and Republicans, that they heartily endorse the bill now pending before Congress, introduced in the Senate by Senator Cullom and in the House by Representative Struble, providing a test oath for Utah, and earnestly request its passage."

The Secretary of that Committee and meeting, who is understood to have been the writer of the resolution, and was made Registrar for the County, is now the "Liberal" candidate for the office of County Clerk.

People's Party voters, remember this, and also that every scratched ticket counts one in favor of the enemy. The offices of County Clerk and Recorder are those most desired by the enemies of the People. Therefore they are wanted for the men who are to be rewarded for political dirty work, and therefore mud is being thrown against the nominees of the People's and Workingmen's Parties for these offices. Therefore, also, dissension is being promoted among the People for the purpose of inducing some of them to scratch the ticket.

Friends, don't be fooled by the enemy! Vote the straight ticket. Pay no attention to the falsehoods or insinuations of private or public slanderers. There is not a man named on the People's ticket who has pulled wires for a nomination. They were all sought for and chosen. They are not political "strikers and spoilsmen." They are infinitely preferable to the "Liberal" leggers for office, who favor the disfranchisement of thousands

of honest voters because they will not support "Liberal" schemes and candidates.

The two bills which these men "heartily endorse," and the passage of which they "earnestly request," are so utterly wrong and un-American that neither Republicans nor Democrats in Congress desired their enactment when their infamy was exposed. Men who, understanding fully their purport, "urgently request" Congress to pass such measures, ought to be repudiated by every fair-minded citizen. They are not fit to be entrusted with office. They are not fit to have charge of public records. They are unworthy the support of any honorable man.

There are other reasons why they are totally unfit for the places they are working for. But we do not wish to enter into personalities. We have avoided them throughout the campaign. If it is necessary to go into questions of character, certain snide politicians of the "Liberal" complexion, who are simply repeating their old tricks, could not only be "roasted" but entirely burned up. It may become necessary to kindle this fire, but we would rather withhold the match while keeping the fuel dry.

Don't forget this resolution, fair-minded voters, whether you are People's or Workingmen's, or have heretofore trained under "Liberal" insignia—the Carpet Bag placed above the Stars and Stripes—emblem of the bogus loyalty and actual rapacity of political adventurers. And when you go to the polls, cast your ballots for men who are *bona fide* representatives of Young Utah, of Old Utah, of present improvement, of future progress, of toiling industry, of honest government, of equal rights and universal liberty.

A STARTLING EXPOSURE.

WE reproduce from the Salt Lake *Herald* a letter from a former "Liberal," which expresses the feelings of others who have come out from the camp of the enemy to freedom. It is good reading for rational voters. It alludes to facts which it has been the policy of the "Liberals" to make light of, but for which there is abundant proof.

As to the writer we have nothing personal to say. We are not acquainted with him. He speaks well enough for himself. We only consider his letter, which is ably written, and his statements, which are plain and straightforward.

They are corroborated by evidence, preserved, which is sufficient to convince the most skeptical. The fraud and villainy practiced to gain the election for the "Liberals" in February last were simply astounding. It is useless for anyone to deny them. And every attempt of those who have tried to jeer them down, only exposes more and more their participation in the wrong.

This letter shows that while certain individuals were pretending disbelief in the frauds complained of at the time, they were fully cognizant of the offenses committed and were morally *particeps criminis*, if nothing worse.

Voters, read the letter, form your own conclusions, and if you are honest men and desire the permanent welfare of the community, you will not cast a ballot for the nominees of such a gang of political tricksters as it exposes, nor for any person who is put up in reward for doing their dirty work.

We are pleased with the information that comes to us daily of numbers of comparatively new residents who voted the "Liberal" ticket last February, who have had their eyes opened to their mistake, and who will now cast their ballots for the united Workingmen's and People's Party ticket, because it is really representative of the permanent interests of the County and is a rebuke to the tricksters who work for personal ends and political favors.

SCORE TWO FOR THE UTAH COMMISSION.

ON July 31st the Utah Commission very justly ruled in favor of legal voters whose names had been summarily and unlawfully stricken off the registration lists. This was a bombshell in the "Liberal" camp. It was a deathblow to one of their political tricks. It became necessary that another should be manufactured. Who so able to fabricate it as the ten thousand dollar Jeremy Diddler of the last campaign, and the chief reliance of the rattled schemers of the present pull for office? So the "Liberal" organ of August 1st had this precious epistle:

TO LIBERAL VOTERS.

"The Utah Commission decides that persons entitled to vote at the coming election can have their names added to the registry now, although the legal time for such additions has passed. This affords an opportunity for 400 to 500 Liberals who have, from various causes, so far failed of registry, to secure the right to vote. All such are
