BREVITIES.

There is an epidemic among the silk-worms in Italy.

The principal Chinese Encyclopedia contains only 5,000 volumes.

A man's life is too long when he out-lives his character and his health.

California claims that she can beat the world in silk culture.

Two children have been stung to death by locusts, in Dayton, Ohio.

Indiana punishes miscegenation with \$5,000 fine and imprisonment.

Peace is the evening star of the soul, as virtue is its sun, and the two are never far apart.

For the eight years between 1880 and 1887 inclusive, there were 3,354 disasters on the lakes.

A child wanted to describe a snake to his aunt, and said it was "a thing all tail—clear up to the head!"

Mr. Roosevelt thinks the railroad family must be very large, since it has so many connections all over the country.

To dream of a millstone about your neck is a sign of what you may expect if you marry an extravagant wife.

Eleven young ladies took the degree of A.M. in course, and thirteen the degree of A.B. in course, at the Commencement of the Maine Wesleyan Seminary.

A man out West who offered bail for a friend was asked by the judge if he had any insurance on his farm.

"Oh, yes," he said, "my old woman."

A surgeon whose wife is a great scold, being asked what he thought would be the greatest triumph of the surgical art, replied, "To take the jaw out of a scolding woman."

Sharon, O., has an inhabitant who has not been able to sleep since October last. Yet he is in good health and works regularly on his farm.

The ringing of the great bell of Notre Dame, near South Bend, Indiana, can be distinctly heard at Elkhart, eighteen miles distant.

Brandy punches have a tendency to make the sidewalk very slippery. They also make one's head heavier than his heels, and his purse lighter than either.

There is a Gaelic proverb, "If the best man's family were written on his forehead it would make him pull his hat over his eyes."

A New York philanthropist is waiting for a mad dog to bite him, in order that he may test his new and certain way of preventing hydrophobia.

A man in Boston has recently erected a monument to the virtues of his departed wife, while a gentleman in Chicago erected a monument to the departed virtues of his wife.

A fashionably dressed lady, desirous of purchasing a watch, was shown a very beautiful one, the shopkeeper remarking that it went thirty-six hours.

"What, in one day?" she asked.

A dentist was recently fined one thousand five hundred dollars for breaking a woman's jaw. Since then, all the husbands in that neighborhood have been coaxing their wives to get something done to their teeth.

In the trial of General Cole for the killing of Hisscock, at Albany, New York, on the ground of adultery with his wife, the counsel for the accused made the remarkable statement that "within the last two hundred years no man has been punished by any Court of Justice, either in this country or in England, for shooting the seducer of his wife, his daughter, or his sister, when that motive, and that alone, has prompted the fatal blow."

The social status of the freedmen, as compared with that of the whites, seems to have been finally settled in Starkville, Miss., from the high Indian point of view. An Indian ball-play recently took place in that town on ground owned by an Indian named Johnson. A small admission fee was demanded. On being asked how much, Johnson replied, in broken English, "White man fifty cents; nigger seventy-five cents. Nigger he work, the lot of money; white man he lazy, no work get no money! Nigger pay most!"

A new trade has recently become popular in the streets of London. A class of individuals has sprung up, as if by magic; these take their stand opposite the shops of drapers in common neighborhoods, and offer for sale the patterns of various descriptions of ladies' and children's clothing cut in tissue paper. The business is an occupation that seems to offer a boon to the humbler classes, many of whom have been compelled to put out their work in consequence of being ignorant how to cut out their materials.

The London Medical Times and Gazette says: "M. Ricord, during a recent discussion on the penetration of foreign bodies, related the following anecdote: The celebrated actress, Madeline Brohan, suffered from a tumor of the breast, which puzzled her various doctors as to its nature. The diagnosis was made by its nature; but, before consenting to an operation, she consulted Ricord. He examined the breast with the most scrupulous care, and presently felt certain that a needle, lodged in the substance of the organ, was the source of the mischief; for, during his examination, he felt the end of his finger pricked by the foreign body. To force the needle to project outwardly, and then to extract it was the work of an instant. Great was the amazement of the patient, who had no idea how the accident had happened; and the clever operator, on leaving, cautioned her in future not to place her needles on such a pin cushion. The tumor rapidly disappeared."
