They Want Statehood.
Muskegon, I. T., Nov. 14.—Single statehood for Oklahoma and the Indian territory will be brought to a definite issue at the convention called to meet in the United States courtroom here this afternoon. Three hundred delegates from each territory have come to fight out the issue. The supreme effort of the two territories to secure a single statehood form of government at the next session of Congress will be made. The issue will, it is believed, be squarely divided between the political and the commercial interests of the territories. The Indian territory is in a conceded, are in favor of separate statehood. This view, as far as indications point before the meeting gathers, is opposed by the business men of the Indian territory who want all avenues of trade and industry opened without restriction, and who profess to believe that this could not be secured in making two states of the territory. This is held, is especially true in Indian territory whose undeveloped natural resources, they assert, are as rich as can be found in any state of the Union. Among the first delegates to arrive the current of feeling seemed strongly for single statehood for Oklahoma without delay. Indian territory to be considered later.

Organized labor, the report says, must prepare for the gigantic struggle that is fast approaching, when the very existence of their organization will be at stake.

The Etelka cruised about in the vicinity of where the fire occurred but could find no trace of the crew who it was thought, might have taken to the small boats.

IMPROVEMENTS FOR SALT LAKE.

Directors Decide Upon the Erection of Two Hundred Additional Bathrooms—Dredging Scheme Abandoned—Election of Officers and Board for the Ensuing Year.

The directors of the Salt Lake Beach company held a meeting late yesterday afternoon and discussed schemes, which if carried into effect, will produce a radical change at Salt Lake. The propositions are of no less magnitude than the building of two hundred new bath rooms and projecting them 600 feet due west, so that they will be over a satisfactory depth of water. The other idea is to build an electric railway to go around the entire pavilion and be in touch with the new bath rooms. This latter project is nothing more so far than mere speculation, but

it is not improbable that the improvement will be made.

A committee consisting of Apostle John Henry Smith and L. John Nuttall was appointed to go to the resort, taking with them an expert engineer with them to examine the beach and to look closely into the feasibility of the new plans. The dredging has been abandoned and it is not at all unlikely that the new plans as above outlined will be carried out.

An election was held by the beach directors and President Joseph P. Smith was elected president of the Beach, John Henry Smith was elected vice president, and President John R. Winder and Nephil W. Clayton were elected directors. The Salt Lake and Los Angeles Rail-
