DESERET EVENING NEWS SATURDAY SEPTEMBER 28 1907

Lake," is the title of a story which appeared in the current issue of the Engineering & Mining Journal, The author is William Renton Ingalls, editor of that publication, who visited the foce) plants last July.

6

"About six years ago the Journal editorially expressed the four," says Mr. Ingalls. "that the smelting capacity at Saft Lake City was being overdone. At that time the American Smelling & Refining company was just completing its plant at Murray and the United States Mining company its plant at Bingham Junction. The Germania, Highland Boy and Bingham Consolidated plunts were in operation and it was wondered where the ore was going to come from to keep all of these works. old and new, in full operation. At this late date I may confess Gaat I was the author of the editorial in question and I have some reason to believe that the American Smelting & Refining company had similar doubts at that time. These doubts appear laughable when we view the present situation. The United States Smelting, Refining & The United States Smelting, Refining & Mining company has added a lead a melier of 1,500 tons daily capaelty; the Tintic Mining & Development com-pany has built the Yampa annelter of 500 tons daily capacity; and the Gar-nield Smelting company has built works of 1,250 tons daily capacity. In spite of these great additions, it has proved that increase in smelting capacity has not been provided with sufficient rapid-ity. There has fately been a verifiable deluge of ore, chiefly from Bingham, and the bins at the smelteries have been hasped full. The storage bins at the mines are also kept full to burst-ing and more smelting capacity is uring and more smelting capacity is ur-sently needed to relieve the conges-

PRESENT SMELTING CAPACITY.

"At the present time the smelters of the Salt Lake valley and their daily capacity of charge are the following: Class Capacity, tons Name.

countered at a depth of from 259 to 300 feet. It is stated by Dr. Harvielle of Mam-moth that a carload of ere from the property of the Cherokee-Nevada com-pany of Leiths, Nev. is at the sampler in Salt Lake, and the shareholders in the company who are living here are auxiously waiting returns upon the shipment. The ore carries values in copper and silver and it is believed will net the company a nice margin of pro-fit. The officials of the company say that they are working upon a deal whereby a big block of stock will be placed which will enable them to clear up the present indebtedness and take up the bond which they hold on the ground. Among the local shareholders are Jerre Drikcoll, W. Bird, P. J. Fennell and Dr. Harvielle. Fennell and Dr. Harvielle. The latest incorporation for this sec-tion is the Cow Hollow Mining com-pany, formed for the purpose of devel-oping a group of 14 mining claims lo-cated in what is known as Cow Hollow. In West Tintic. There is a shaft on the property which is at present down is foot and another is feet will be such

5 feet, and another 25 feet will be sunk t for the worl Maurice Kelly right away, a contra having been let to There is splendid of whowing of lead There roppings at several points upon the ground, and those who have visited the property since work was commenced was commenced the opinion that one work will be this summer are of not a great deal more work necessary before something sults. The officers of the new mething good recompany

sults. The officers of the new company are: Lou Merrimon, president; J. C. Sullivan, vice president: Gus M. Hen-riod, scoretary and treasurer, and these with B. F. Fleiner and Thomas Gas-kin form the beard of directors. The lower tunnel at the Wasa com-pany's ground in North Tintle is now in about 500 feet. There is a small force of men at work continuously on the ground, and the showing at the present time is very encouraging to the com-pany.

time is very encouraging to the com-pany. C. J. Hannifin is looking after devel-opment work at the Little Chief mine, in the absence of its superintendens. Joseph Hannifin, who was injured in the workings of the property last week. W. L. Croft left on Wednesday for Beaver county, where he has extensive mining interests, and he expects to be absent about two weeks. D. B. Cronin, a local mining man, has been selected as superintendent at the Godyan mine, succeeding Gus Tetre,

the Godiva mine, succeeding Gus Tetro, who reaigned his position at the Godi-va to take charge of the Seven Devils Consolidated property in Washington county, Idaho. The machinery for the Iron Blossom arrived yesterday and will be taken

pany is istuated near Ogden. The Tin-tic plant (situated in the Tintic dis-trict) is not yet completed. In ad-dition to the above the Utah & Eastern

trict) is not yet completed. In ad-dition to the above the Utah & Eastern Company has a small plant at its mine. "Sait Lake City is at present the most important smalling center in the United States. The preponderating position which it has taken in that respect is due to its proximity to three great mining districts, viz.' Bingham, Park City and Tinic, which furnish immense aupplies of ores which are capable of combination in good smelt-ing mixtures, while the favorable posi-tion of Sait Lake as a railway centor enables it to draw large supplies of ore from Idano and Nevada, and even from Californis. The nature of these ore supplies is such that untimited confidence may affely be placed in their continuance and consequently there is justification for the marvei-lougy large outlays in smelling plants which otherwise there misht not be. In commenting upon the superior conthere is justification for the marvel-lought large outlays in similing plants which otherwise there misbit not be. In commenting upon the superior con-struction of the Murrey plant, some six years uso, to one of the metallic contexts will go off to the tail-lurgists who was largely responsible for them, he replied: We have here for them, he replied: We have here infore been feeling our way in the smelting business not knowing very far ahead as anyone nodds to loak, and that Bait Lake City is going to com-imate an adequate ore supply for as far ahead as onyone endeds to loak, and therefore we feel sufe in building this plant with a view of permanency.

CHARACTER OF ORE SUPPLY.

CHARACTER OF ORE SUPPLY. "Park City and Eingham furnish ga-lena concentrate, the former being de-cidedly the more important. Galana ore is also obtained from the Wood River district. Idaha, and some from the Cocur d'Alene, but the buik of the production of the latter goes to the Pacific coast, to Colorado and to esua-ern works. More or less lead ore comes from neue Hamilton. New, and it is helieved that the old mines at Pieche-will furnish considerable when the rabbelieved that the old mines as Plachs will rurnish considerable when the rul-way to that place is completed. The Tintic district of Ulah contributes or of various kinds viz.; silicious, lead-bearing and copper-bearing. An im-portant source of silicious ore is the new camps in southwastern Nevada, viz.; Tononah, Goldheid, ets, Eurem. Nevada, furnishes oxidized from ore which cantains a little head, and the Cuttonwoods, Ulab, are also a source of that class of are. However, Bing-ham, with its copper see, is the main-stay for basis material. Unfortunate.

Gold Springs Plant. Manager Charles A. Short of the Jen-Manager Charles A. Short of the Jen-nie Gold Mining company, operating in the Gold Springs district of Iron county, is in the city. The mill oper-ated by the company, as stated in the "News" some little time ago, is to be anlarged and Mr. Short stated today that the caparity is to be brought up to 160 tons a day and will include a complete cyanide department. Tests of the ore made recently by Metallargist Ernest Gayford of this city indicates that the Jennie ore makes a perfect cyaniding proposition and if is probable that when the new plant gets to going it will be found

Mr. Short says the mine is showing to spheridily, and that in all the drifts he are holies are setting bigger and better and he estimates that without better and he estimates that without further development there is enough ore in aght to keep a 100 tons mill in contained for two years. The com-puty is now breaking ore from a vein of the width of from 10 to 18 feet. The new sometrication work on the mill will be ranked as requily as pos-able and it is expected that the phint is no enhanced form will be ready for commission nonewhere about the he-glouing of the year. A. Is Martin formerly principal of the Jackson school in this city, is now a mercher of the heart of directors of the Jeanle computer.

PRODUCE.

Chicago, Sept. 23.-The wheat market today opened firm because of bigher ca-bles, but prices soon eased off on the re-port of increased receipts in the north-west. December opened unchanged to ½ ingiter at 1.60 to 1.00%, sold up to 1.00% and then declined to 29%. "Corn was firm at the opening, because of small receipts and firm catles. Later the market declined slightly on realizing sales. December corn opened unchanged to 500% towar at 20% 20% to 50%, and then duclined to 55%." "Data -Trading was chiefly in the May option and prices were firm along with wheat and corn and later declined in sym-opthy with the slump in these gains, becomber oats opened were higher at als, sold at 55% and then declined to a."

The provisions market was firm, be-cause of a 5-cent advance in the price of live hoga. January pork opened 10 cents higher at 15.425 and sold at 15.45. Lard was 2%c higher at 3.55, and advanced to 8.30. Ribs were 2%gos higher at 8.32%gg 8.66. was 8.50, 8.05,
