EVENING NEWS.

Friday, June 22, 1877.

PRICE OF GOLD.

Corrected daily by Deseret National Bank. SALT LAKE CITY, June 22, 1877. Buying at 101. Selling at 101.50.

LOCAL AND OTHER MATTERS.

Thermometer 80 degrees F. in the shade at 1 p.m. to-day. Fine, breezy.

Dusty. - Plenty of dust blowing around this morning.

Body Found. - The following came to hand this morning, per Deseret Telegraph: -

LOGAN, June 22, 1877. - The body of Brigham Woodruff, which had floated seventy miles, was found in a good state of preservation, opposite the Indian farm in Malad Valley. Funeral at ten a.m. to-day.

The Big Fire. - The fearful fire at St. John's, New Brunswick, with the immense loss of property and consequent suffering it has entailed has aroused the public heart to sympathy and assistance. Subscriptions are being taken up at different places throughout the country and help will be promptly forwarded. Has Salt Lake anything to spare for the unfortunate New Brunswickers? Read the further particulars in this evening's News. This paper gives the full account of the catastrophe.

Sea Foam Swindle. - The old time wooden nutmeg swindle has obtained world-wide notoriety. Yankee ingenuity crops out everywhere, and, considering the perversity of human nature, it is not at all surprising that among the many beneficial inventions of the down-easters, there should be some de- signed for the benefit of the seller and the "selling" of the buyer.

The latest of the latter kind that we have seen is the "Family Grindstone." It is represented as composed of "sea foam from South Africa," and each grindstone bears a label with the warning, "Use no soap." It is a small affair, and is sold, with the purchaser, for sev- enty-five cents.

Examination of the "family grindstone" exposes the fact that it is a wooden circular combination, with a thin coating of some com- position, which, like a drunkard's mouth, cannot endure water. Ped- dlers are offering this article in town and country, and we refer to this swindle as a caution to those who are too ready to invest in anything that is new. The coating of "sea foam" on the wooden grindstone is a great deal "too thin."

Surprise Party and Testimonial. - Last evening a very pleasant gen- uine surprise party was given to Bro. Henry Emery at the 16th Ward School-house. Bro. Emery has been leader of the choir for fourteen years, and Superintendent of the Sunday School for eight years. He has been punctual in his attend- ance and indefatigable in his ex- ertions for the public good, and is greatly beloved and respected, as he deserves to be.

As a token of their appreciation of his labors the choir Sunday school teachers and others arranged this party, which was really a com- plete surprise to Bro. Emery. He went to the School-house for the usual choir practice and found the tables spread and about one hun- dred persons present, each with their plate to greet him.

After a splendid supper Bro. John Vincent, in a very neat speech presented to Bro. Emery an Elgin watch with an appropriate inscription. Bro. Emery respond- ed. Then followed music, toasts, recitations, songs and speeches and a general good time.

The supper was arranged by the ladies of the Relief Society and Bishop Keeler presided. Such manifestations of respect and es- teem are calculated to stimulate to further exertion those who spend so much time gratuitously in the pub- lic service.

That Investigation. - The full re- port of the investigation into the suspected buckle ass-in-si-lon published in last evening's News, has been copied into other papers and has caused some comment. The general impression among all classes of the community is that it was a very poor attempt at man- ufacturing a sensation.

The publication of the proceed- ings has been delayed somewhat, in order to have everything fully at- tested, so as to leave no room for challenge of the correctness of the report. Each person's testimony has been submitted to the witness, and affidavits taken by a notary. The folly of attempting to throw any doubt on the accuracy of the report is thus demonstrated. Some people are never satisfied. But the following certificate from the Notary should be sufficient to assure every reasonable person that the utmost care and caution have been exercised to guard against any error in the reporter's transcript: -

Territory of Utah, County of Salt Lake. I, Chas. W. Stayer, a notary public in and for Salt Lake County, Territory of Utah, do hereby certify that the foregoing testi- mony, after having been transcribed from the reporter's notes, was duly read to the respective parties giving the same, and was by them severally subscribed in my pres- ence, excepting that of Daniel Davidson, whose signature I could not obtain, as he was out of the city.

In witness whereof I have hereunto set my hand and affixed my notarial seal this 20th day of June, A. D. 1877, at my office at Salt Lake City, U. T.

CHAS. W. STAYER, Notary Public, Salt Lake Co., U. T.

We think the would-be famous "commissioner of the N.Y. Herald" sensation factory has received al- ready too much notice from the press, and that he and his stupid case should now glide into his appropriate oblivion.

CONDOR MILL BURNED.

The following came in this afternoon: -

Plecho, Nev., 22. - News was brought to Nevada this a.m. that Condor Mill, situated on the mill race, was entirely de- stroyed by fire last night. The fire was first discovered in a wood- shed alongside the boiler furnace, at about 5.30 p.m. An alarm was im- mediately given, and the steam pump set to work, which, after a few strokes, refused to act, and was abandoned, leaving no means of throwing water on the burning wood. The flames easily commu- nicated to the mill, and in a short time the rapidly rising which everything was burned and the time lost in endeavoring to work the pump, prevented the sav- ing of any valuable articles of value. No one was allowed to leave the mill for town till this morning, as it was necessary to en- deavor to stop another mill before circulating the report of the burn- ing. It is supposed the fire was caused by a spark from the furnace fire falling among the wood. The mill and blacksmith shop was the property of the late John A. Plecho, who was a resident of Salt Lake, and learned whether the property was insured or not. The Alps Company have an unexpired lease on the mill, which was to have run until the first of August, therefore the company will be put to serious in- convenience until they get started at some other mill. The engine, boiler, and flywheel can be used for the mill, and the company has on supplies for the mill to \$5,000. The entire loss is estimated at \$80,000.

Interesting from Scandinavia. - Elder O. N. Liljenquist, now in charge of the Scandinavian portion of the European mission, writes to President Brigham Young under date of May 29th.

During the past six months 586 souls have been added to the Church in that country by baptism. Public meetings are well attended and the Elders enjoy a good spirit. Elder Tuigreen was laboring in Finland, where nine persons had been baptized. He and Brother Sundstrom had held eighty meet- ings, but were opposed by the po- lice because they were not natives. On the 3d of January they issued the first number of Nordstjernen (the North Star) in the Swedish language. It is a semi-monthly. It has now over 800 regular subscrib- ers, and its circulation has been in- creased to 1,200. Brother J. S. Sandberg, of Salt Lake City, is doing most of the editorial work.

Bro. Liljenquist was making ar- rangements for the publication of the Book of Mormon in the Swed- ish language. He expected that the emigration this year would be larger than last, 400 or 500 being ready for the first company, the date of sailing not fixed. It was likely that eight of the valley Elders would return this season.

Theatre. - To-morrow evening, the favorite local comedian, Mr. P. Margetta, will take a benefit at the Theatre, on which occasion he will personate "Perkyn Middlewick," a retired butlerman, assisted by Miss Nellie Colebrook as "Violet Melrose," Mrs. Louise Harris as "Mary Melrose," Miss Susie Spencer as "Belinda," Miss S. Napper as "Clarissa Champney," Mr. Lindsay as "Sir Geoffrey Champney," Mr. H. E. Bowring as "Poddies," and Mr. M. Wilton as "Talbot Champney."

Three quarters of a million specie was booked up to noon for to-mor- row's steamers.

A Furniture Factory on Twenty- seventh Street, was burned this morning; loss \$27,000.

Sympathy for the sufferers by the St. John's Calamity.

BOSTON, 22. - A special from St. John's, says a mass meeting was held, yesterday, at which offers of aid were received from Montreal, Boston, Bangor, Portland, Cape Breton, and many other cities, as well as towns in the interior of the province. Chief of Police Savage, of Boston, has also tendered assist- ance to the police of this city, and sympathy has been coming from all quarters. The morning train arrived from Halifax, having on board troops for guarding the goods now in the streets.

At a meeting of the citizens of Halifax \$10,000 was subscribed. The Mayor of that city has arrived here to see what he can do to forward the object of the people of Halifax. A large number of persons who were burned out have gone to the country towns, and others have sought homes in the States.

WESTERN. - Will Give Fair Warning.

SAN FRANCISCO, 22. - A Winne- nua press dispatch says Gov. nor Brayman, of Idaho, has received a dispatch from Winnemucca, chief of the Plutes, now at Silver City, in which the chief assures the Governor that he has no intention of breaking the peace with the whites, that if an Indian outbreak occurs, he will remain friendly, but if he wants to fight he will give fair warning.

Our Country Contemporaries

Ogden Junction, June 21. - Some fifteen days ago Mr. G. F. Senger, of Ogden, struck a good vein of ore in Ogden Canyon, about five miles from the city. Eight men are at work on the discovery, and a shaft twenty feet deep has been sunk. The ore contains a large percentage of lead and silver, with a little gold, and just enough iron to make it self-fluxing.

Paris, Bear Lake Co., Idaho, June 16. - A painful accident oc- curred here yesterday morning about seven o'clock, to Devahon Merrick, son of N. D. Merrick. He was driving cows to Devahon, when an angry steer attempted to head the cows back. The boy set dogs on the steer and tried to turn it, when, by accident, the steer jumped on the boy, breaking his leg. General W. C. C. Rich, who was on the scene, and found the rib had been twisted three times around. The General had the boy taken to his uncle, Brother H. Dwyer, of Ogden, and the boy is living. Dr. Ormsby, of Logan, was telegraphed for, who reached here about 5 o'clock this morning. He found the leg broken about midway of the thigh in one place. The boy was put under the influ- ence of chloroform and the limb set. He is now doing as well as can be expected, and it is hoped he will recover without the painful necessity of having the limb amputated. This will be a great loss to the boy's mother, who resides in Cache Valley, with whom the people sym- pathize. The Doctor while here performed a surgical operation on Mrs. Alice Rich, wife of C. C. Rich, by taking out what was sup- posed to be a cancer, which was lying near her eye. She bore the operation without the aid of chloro- form. R. A. BALLANTYNE.
