

NEVADA FEARS A COAL FAMINE

Nevada Northern Railroad and Dealers Have Small Supplies Stored.

AFFECTS UTAH SITUATION

This State Must Help If Neighbor Suffers—Developments Among Teamsters Not Expected.

While coal dealers and big consumers in this state all report no reason to worry yet, because of the Wyoming coal strike, Nevada has already commenced to report a shortage. From Ely comes the report that a serious coal famine is imminent. The Nevada Northern is in bad straits as it is reported that this company has less than a half month's supply in storage. The Utah roads have been storing for several months and are in shape to run indefinitely. But the Nevada reports are both serious and the Nevada situation, if it becomes as bad as soon as expected, will change the situation in Utah. Railroads and dealers in this state have been storing for themselves but should the situation in the Sugarbrush state become acute, Utah will have to come to the rescue, and what ever goes to Nevada makes the supply on hand here that much less, and the exhaustion of the supply that much nearer. Coal dealers in Ely and the northern portion of the state admit that they are in an embarrassing situation.

TEAMSTERS WORKING.

The report printed yesterday that non-union miners and workmen are being employed in the Wyoming mines was discussed in a great many ways after the "News" had reached the public. Talk of a walk-out of union teamsters employed by the mines, and of coal companies employing non-union miners was heard in various circles, but nothing definite was forthcoming. At the office of the Central Coal & Coke company, it was explained that, so far as the local officials know, the mines of the C. C. & C. company are not being worked at all. Special dispatches to the "News" bring the repeated assertion that the company is in line with other concerns in working non-union men, but ignorance of this is possessed in the offices here. It is explained, further, that the company has not received a pound of coal since the first of the month. Under these circumstances, a walk-out of teamsters is not only possible, but from statements of leading knights of the mine, a walk-out would follow the receipt of news that the company's mines; in other words, the union teamsters would refuse to handle coal mined by "scabs" as they term the non-union workmen. But with no coal at all coming from the mines, the teamsters are staying on their wagons and delivering coal as usual.

CAMPERS ARE QUIET.

A. J. Gunnell, general agent of the Central Coal & Coke company, has just returned from Rock Springs. He reports that there is no indication of the team returning to work in the near future and it is impossible to guess at the probable duration of the trouble. It may be settled before night and again may last for days, even weeks. Coal camps are quiet and no regular strike seems to have been ordered. The men being in doubt as to just why they were ordered out by their union leaders. The whole state and all coal camps are quiet and no disturbances of the slightest nature are anticipated. Most of the strikers are married men. The foreign element among the strikers is under absolute control.

BAD AUTO COLLISION.

Accident in First Avenue During Rain Storm May Prove Serious.

An auto belonging to Dr. H. N. Mayo and driven by himself ran into the side of Heber J. Romney last night, and as a result the latter and his brother-in-law, George J. Ross, were quite severely injured. The vehicle in which they rode was demolished and the auto car was damaged to the extent of several hundred dollars.

The accident occurred about 7:30 o'clock at the intersection of C street and First avenue. Dr. Mayo, Mr. Romney, Mr. Heber Romney, Jr., and James D. Wardrop, were driving north, while the auto, occupied by Dr. and Mrs. Mayo, was going westward. It was raining at the time, and the car was driving fast towards their destinations. The car struck the hind wheels of the buggy, tearing them loose and throwing out the occupants. Mr. Romney fell upon his head and was rendered unconscious. He soon recovered somewhat, but at a late hour today was in a partially comatose state, having been severely injured. The other two occupants of the buggy, Mr. Romney, Sr., and Mr. Ross, were badly bruised, especially about the knees, and today are very stiff and sore from the shaking up and fall. The other two occupants of the carriage escaped without injury. Dr. Mayo at once did all he could for the injured men, and they were taken home in Dr. Pinkerton's auto. Neither of the colliding vehicles was provided with a light, and, as stated, the darkness and rain were responsible for the accident. The horse became detached from the buggy and ran to the Romney home, C street. Mr. Romney resides at 321 D street.

TRIED TO KILL FRIEND.

Drink Crazed Man Fires Bullet from 44 at Companion.

After wandering about town for several hours and consuming a great quantity of liquors, Philip Flynn, said to be a mining expert, and Alonzo Bean, a clerk, went to the Orpheum roominghouse and proceeded to explain to each other what a "time" they had had. Both were badly intoxicated, and Flynn, in the exuberance of his happiness, decided that it would be playful and highly proper for him to shoot his erstwhile friend full of holes with a big pistol. He drew the weapon and placed away point blank at Bean. The heavy bullet crashed through the clerk's hat and his face was filled with powder. He closed his eyes. Flynn, with the assistance of his friend, succeeded in wresting the weapon from the drink-crazed man.

FIREMEN DO THE WORK.

On east First South street the Utah Light & Railway company is preparing to remove the trolley poles from the center of the street and have poles set on the sidewalk. The work of chopping out cement blocks so holes can be dug is rather strenuous and the man who is doing the work literally earns his bread by the sweat of his brow. This morning he started to chop the pavement in front of fire headquarters but was suddenly thrust out of the way and told to sit down in the shade while the firemen did the work. About a dozen of the firemen, armed with sledge hammers, started a "drilling" contest. Capt. Elkrum held the apparatus on the pavement while the fire fighters used the sledges. The result was that the cement was soon chopped through. The firemen had a good time and the railway employe will get paid for the work.

PASSED WORTHLESS CHECKS.

Jed Grant in Jail Charged With Obtaining Money by False Pretenses.

A young man giving the name of Jed Grant, who has been arrested on numerous occasions for various offenses, was again taken into custody early this morning by the police. He was on a warrant issued from Justice Dan T. Smith's court. The complaint against Grant was sworn to by Cleo Starr, a Commercial street house keeper, who charges that Grant passed checks to the amount of \$100 on her. According to the police the alleged offense was committed several weeks ago. It is claimed that Grant entered the resort and began buying beer and wine for the female inmates. He soon ran out of cash and then started to issue checks. The first was for \$25 each. The following day the Starr woman presented the checks to the bank but payment was refused. GENERAL WEDGWOOD HOME.

Speaks in Enthusiastic Terms of the Trip of the Rifle Team.

Adj. Gen. E. A. Wedgwood has returned from his extended absence in the east, the trip extending to Lowell, Mass., his former home, which he has not visited in 29 years. He also stopped to place his son in the Pulver military academy in New York. Gen. Wedgwood is enthusiastic over the Camp Perry, O., rifle shooting. He says there were 50 teams there, over 2,000 men, representing the various states, the all-military team, the infantry, cavalry, marine corps and the naval academy. The rifle team was sent to a representation. The butts were parallel with the shore of Lake Erie, so that bullets went into the water. The team averaged 3,500 rounds of ammunition for 15,000 rounds all told. As each bullet weighed 1 1/2 ounces, there were a little over eight tons of lead and nickel fired away, valued at \$2,300.

Gen. Wedgwood says the experience gained amply repaid the Utah men for making the trip. They learned what could not have been learned at any other place. The other way was to make the trip. The rifle team was sent to a representation. The butts were parallel with the shore of Lake Erie, so that bullets went into the water. The team averaged 3,500 rounds of ammunition for 15,000 rounds all told. As each bullet weighed 1 1/2 ounces, there were a little over eight tons of lead and nickel fired away, valued at \$2,300.

While all of the Utah officers shot, the state officers did not. The captain of the new army rules, Gen. Wedgwood did not expect the Utah team to make any record to speak of on the day of the experience. He was gratified at the showing the Utah boys made, as they scored ahead of Louisiana, Mississippi and North Carolina. They all have come home realizing that they are much better prepared for effective work in the guard now than ever. Gen. Wedgwood is busy going through military papers that have accumulated during his absence.

LIGHTNING STRIKES TREE.

Last Night's Storm Also Puts Electric Power Out of Commission.

The thermometer was rather high yesterday, for the time of year, scoring 86 degrees. There were light showers last night, with considerable thunder and display of lightning. The latter played havoc with the Utah Light & Railway's transformer at Woods Cross, damaging \$7,000 worth of property. The transformer was located at the showing the Utah boys made, as they scored ahead of Louisiana, Mississippi and North Carolina. They all have come home realizing that they are much better prepared for effective work in the guard now than ever. Gen. Wedgwood is busy going through military papers that have accumulated during his absence.
