

[SPECIAL TO THE DESERET NEWS.]

By Telegraph.

SACRAMENTO, 24.—It is reported among horsemen that "Occident," this a.m., did a mile in 2,184, without whip or breaking. He goes to Alameda tomorrow.

BUFFALO, 24.—The horse disease has passed the crisis here, and is now abating. But few horses died, and those more from hard usage than the disease. The canal horses have almost entirely escaped, no boats have stopped, and none will, and grain is moving as freely as usual.

NEW YORK, 24.—The horse disease is seriously affecting transportation and business of all kinds here and in Brooklyn, having made alarming progress in the past twenty-four hours. Three-fourths of all the horses of the city are affected, the greatest proportion being among the street railroad and stage horses, of which 70 per cent are sick, while of private coach and other horses which are better cared for, only 45 per cent are affected. The grocers, bakers and milkmen are serving their customers with great difficulty. Great quantities of freight are said to be accumulating at the warehouses for want of horses to move it. Matters are assuming a serious aspect, but it is hoped the disease will subside as rapidly as it has developed.

AUGUSTA, Me., 24.—The Canadian horse disease has reached here, and many horses are afflicted.

NEW YORK, 24.—Mrs. Greeley is worse, and her death is momentarily expected.

CHICAGO, 25.—In the Supreme Court yesterday, Judge Mary rendered a decision in the case of the *Lydon vs. Lyndon*, in which complainant, the young daughter of a prominent wealthy citizen, who recently married her father's coachman, sued for a divorce on the ground of being deceived into marriage. The court denied the decree, and the plaintiff took an appeal to the supreme court.

NEW YORK, 25.—The horse disease has now spread to every stable in the city and symptoms are visible on almost every horse in the streets. The stage street car lines continue to lessen their trips. At 8 o'clock last night there was not on Broadway a stage between the Battery and the City Hall. This morning that thoroughfare seems almost without vehicles. Altogether it is calculated that about eighteen thousand horses are affected. The animals attacked before yesterday generally exhibited worse features, and it becomes evident that dating cases from Monday and Tuesday the crisis is not yet reached. The disease appears from reports to run about five days, culminating on the third and nearly disappearing on the fifth. Not many deaths are reported, but it is known that the same epidemic has spread to Westchester, Staten Island and New Jersey. The trotting stock in the city has not escaped. Dan Mace's horses are nearly all afflicted. The celebrated Dangle team, Darkness and Plimpton, that trotted at Prospect Park the other day with Ethan Allen and Geo. Wilkes, are being treated. A valuable Ethan Allen colt, worth twelve thousand, is also in the doctor's hands. A number of other well known trotters—Stonewall Jackson, Kirkwood, Lady Wheeler, Jules Jurgensen, and Capt. Jinks, are also afflicted in a mild form.

The illness of John A. Griswold, of Troy, is not as dangerous as reported. Tom Fields is said to have gone to Havana or West Indies, where the extradition treaty don't cover the charges against him.

A Washington dispatch says the attention of the State Department has been called to the abuse constantly persisted in on the part of petty German states in transporting their pardoned murderers and highway robbers to this country. It is urged that the Secretary should intervene to promptly arrest this practice.

CHICAGO, 25.—The question of enforcing the Sunday liquor law is absorbing the attention of both friends and opponents of the ordinance. Large meetings were held last night by both parties. The Germans, representing the main opposition, passed resolutions requesting the Mayor to suspend the enforcement of the ordinance till the new city council is elected, pledging themselves to vote for no candidate for State, county, or city officers who is not known to be opposed to the temperance laws. The temperance people have announced their determination to put a strict temperance ticket in the field for members of the Legislature.

NEW YORK, 25.—Tweed says emphatically that he now intends to fight his case through to a conclusion. He remarked to a reporter,

"I am compelled, in going to trial, to bear the offenses of every other man charged with the same offenses. The prosecution has boasted that if they can convict me, it will be easy work to convict Hugh Smith, Connolly, James M. Sweeney and others. I suppose it will, if they can catch any of them. The others I know well enough that if I am not convicted they will never be prosecuted, and so I have not only all their sins to bear, but all their expenses to pay. Why don't the newspapers say something of the others?"

Tweed's trial will probably not occur until next year.

ST. LOUIS, 25.—A few cases of the horse disease have appeared here; preventive measures are being taken.

ROCHESTER, 25.—The horse disease is much worse than yesterday; loss to business very great. The canal horses appear to have the disease in a milder form than the others.

NEW YORK.—Mayor Hall's trial is progressing.

LEWISTON.—Several hundred horses are sick here.

Judge Nelson has refused bail to the conductor of the Brooklyn *Chronicle*, accused of libelling District Attorney Britton.

The horse epidemic is spreading. The 5th Avenue and 23rd Street lines have stopped. The Wall Street trains start at long intervals, but few cars are running.

Mrs. Greeley is still in a precarious condition.

BOSTON.—The horse disease is so general that horses are rarely seen in the streets. In many cases oxen are being used for hauling freight. The large express companies continue to do business as usual, but many of the smaller ones have suspended. Of the 1,200 horses owned by the metropolitan horse railroad, nearly every one is affected, and a total suspension of street railway travel is threatened.

CLEVELAND.—Twelve new cases of the horse disease are reported here tonight.

WASHINGTON, D. C.—A woman died to-day in a miserable shanty belonging to a colored woman. Before she died she told the negroes that her name was Annie Dean; that she married her father's coachman in New York, that her husband left her, and her father discarded her. This is probably the sad sequel to the Dr. Dean wedding in New York about 1860.

ST. LOUIS, 25.—There was a large meeting to-night at which the temperance question and the Sunday laws generally were discussed. Resolutions were passed, pledging support to no candidate who will not stand by general and civil liberty and freedom, or to any candidate for the legislature who will not pledge himself to oppose the temperance Sunday laws.

BUFFALO, New York.—The street cars stopped running this evening, having but three well horses out of three hundred. The disease is abating, but the rainy weather aggravates it.

OSWEGO.—Only a few cases of the horse disease have appeared here. Shipments by canal continue large and uninterrupted.

WASHINGTON, D. C.—The corn crop, according to the October report of the Agricultural Department, promises to be one of the largest ever grown. Only five States, Maryland, Virginia, Delaware, Florida, and Arkansas—return less than an average. Rhode Island has just an average; all the rest have above. The average for all the States is 103. California is set down at 104, Oregon 103. The October crop is increased 3 per cent. over last year. The indications are that the barley crop will not be so large as last year. The quality below the average.

SAN FRANCISCO, 25.—The U. S. sloop *St. Mary's*, arrived this morning from Victoria, winding up a two and a half years' cruise, during which it experienced no casualty nor were there any deaths among the crew. The *St. Mary's* carries 16 guns and a crew of 149 men.

Eighty-nine boxes of dead Chinamen came down from Sacramento, per steamer, last night, for shipment to China.

NEW YORK.—A London special says the names of the Imperial advisers in the San Juan award, on whose reports the judgment is based, are Grimm, Vice President of the Supreme Court; Kiepert, the eminent geographer, and Gieschmidt, a member of the Superior Tribunal of Leipzig. They handed their report in four weeks ago. The reports will not be published. They charge England with vagueness in

wording the Treaty of 1848, and state that the word "Southernly" means the shortest channel to the Straits of Juan de Fuca.

WASHINGTON, D. C.—The President himself contradicts the statement that he would soon issue a proclamation in recognition of the belligerency of the Cubans. He says in addition, that no such subject has been discussed by the cabinet. It is thought he will recommend in his annual message, that Congress will take some action regarding Cuba.

CHICAGO.—At Aurora, Ill., yesterday, M. B. Mattingly, editor of the *Herald*, was seized with apoplexy while walking along the mill race, and fell on his face into the water, only a foot deep, and was drowned.

At DeKalb, Ill., a balloon broke from its moorings and the hanging rope caught the leg of John McMann, a spectator, and carried him up a distance of a hundred feet, when he managed to climb into the car. At the height of about four hundred feet he jumped out and struck the ground a corpse.

HAMILTON, N.Y.—Snow fell yesterday to the depth of two inches, the first of the season.

An assay of Gold Bluff sand, recently made in this city by Hemston, shows \$22,911 in gold and \$147 in silver, total, \$23,058. It is in this material that the Table Bluff Mining Company propose to operate.

NEW YORK.—The horse malady has spread to such an extent that almost all the horses in the city are suffering. It is estimated that in the city and immediate vicinity there are from 30,000 to 40,000 horses afflicted. The disease has begun to exhibit new and alarming phases. Inflammation of the throat extends to the lungs, and the animals pant for breath and become quite cold at the extremities. This seems to be a warning of a fatal ending, and if it continues as widely prevalent as it is now, for a few days longer, there can be little doubt but hundreds of horses will die. The street car companies, some livery and many downtown merchants are still working their diseased horses, and in all these cases signs of fatality are becoming more alarming. In the stables all business has been suspended until the disease is mastered. Very favorable reports are made of the race horses stabled here, nearly all have escaped. At least six hundred cars have been withdrawn from the city railroad lines. The hackmen's charges are in utter violation of the law. The managers of the street railways think that unless the disease is mastered their stock cannot hold out longer than Sunday. It is feared that several of the ocean steamers will have to postpone sailing owing to the impossibility of getting freight aboard.

The horse disease is unabated, scarcely a stable in the city has escaped. The rainy weather is considered unfavorable. On the Seventh Avenue line street railway fifty-six cars have been withdrawn to-day. Upwards of three hundred cars altogether have been withdrawn from different lines. The horses employed by many of the largest wholesale and retail houses are laid up. The grocers, butchers, etc., are unable to supply their customers. The express companies are suffering great inconvenience. The railroad warehouses, wharfs, &c., are crowded with freight, which cannot be moved.

BOSTON.—Banks has accepted the Labor Reform nomination for Congress.

In consequence of the horse disease, horse car accommodation is almost entirely withdrawn in Boston city.

WASHINGTON.—It is denied that Anna Dean is Anna Baker Dean, who married her father's coachman.

DETROIT, 26.—The prevailing horse disease appeared here on Thursday, and a large number now are affected. The street cars on four routes were hauled off yesterday. The disease has also reached the lumbering district north of Saginaw.

NEW YORK.—The ravages of the horse disease continue unabated, but up to this p.m. no fatal cases were reported.

ROCHESTER.—More fatal cases of the horse disease are reported this morning than during the whole time since it appeared. The streets are deserted by horses, but wagons and carts drawn by men are plentiful. The express companies announce that no more goods will be received, as the railroad companies cannot deliver their freight. The reports from Erie canal, particularly between this city and Buffalo, are very bad, and many boats are tied up.

BOSTON.—There are very few horses in the streets, and all the various departments of business requiring horses

are at a standstill. Business is suffering much in consequence. Handcarts are in demand. Numerous wagons drawn by men are the only encouraging feature. A few cases will prove fatal.

NEWARK, Conn., 26.—The Board of Selectmen to-day admitted to the rights of an elector, Mrs. Sarah M. Thurnington. She will vote for the Presidential electors it is believed, and will be the first female voter thus admitted.

CUMBERLAND, Md., 26.—Wm. Craig, a young negro, yesterday was convicted of the rape of Mrs. Lettie Dayton, a white woman, 74 years of age, and to-day sentenced to death.

LOCKPORT, New York, 26.—The horse disease is in this vicinity, cases are occurring in the town and adjacent country, stages find difficulty in making trips and there is a general depression of business.

CHICAGO, 26.—A special dispatch from Toronto to-day says of the horse disease, which has committed such ravages among the equines in Canada and which appears to be spreading over nearly all the Eastern States—

"The epizootic first made its appearance in Toronto and neighborhood about the first of October, and within a few days nearly every horse in the district was attacked, when it created a good deal of alarm and among a certain class of owners a general resort to quack treatment and remedies. The disease is of the nature of catarrhal fever, accompanied by slight inflammation of the throat and bronchial tubes. It is evidently the result of some atmospheric influence, and although a very alarming complaint, it is not attended, if rationally treated, with any great fatality. The disease appears to take from 10 to 30 days to run its course, according to the severity of the attack. It is characterized by discharge from the nostrils and severe hacking cough, quickened circulation and labored breathing. Impure air or exposure increases the symptoms and the lungs become affected, which is the great danger from this disease. On a calculation it appears, when a rational means of cure and treatment have been adopted, that there has been but a small percentage die."

PHILADELPHIA, 26.—Fletcher Mills, twelve years a clerk in the Delaware Safety Fire Insurance Company, has been arrested as a defaulter. He has been systematically defrauding the company by false certificates of scrip. The amount of the swindle is about \$35,000.

BOSTON, 26.—Twenty-seven deaths from small-pox this week.

NEW YORK, 26.—The Anti-Cruelty Berg suggests, as a remedy for the prevailing horse disease, warm blankets, non-exposure to drafts of air, total absence of bleeding, cathartics, twenty or thirty drops of tincture of iron in a gill of Jamaica rum, diluted with water, given every four hours, in order to preserve the strength of the horse, or tincture of arnica will produce relief, or a plaster bound round the throat, composed of one portion of cayenne pepper and two of flaxseed, mixed with sugar, is excellent.

Lograve, who sometime since swindled merchants to the amount, it is said, of nearly half a million, was taken into custody to-day, on his arrival from France, where he was apprehended. He was put in jail in default of \$40,000 bail.

The horse disease to-night is reported unabated, in fact is said to be spreading. Owners of animals not seriously affected are keeping their horses in the stables and giving them every care. The number of cars running is decreased very considerably to-day, although this is not quite so much owing to the disease as to the great inclemency of the weather, caused by heavy rain. The 9th Avenue road has stopped the cars, as did also the 5th Avenue stage company. In some stables the distemper has made no apparent increase. The express companies report several cases among their horses. It is stated that the United States express company has forty car loads of freight in Jersey City in consequence of the scarcity of teams. The European steamers have not been delayed to-day, although they have been inconvenienced somewhat by the stoppage of the cart drivers. Some lines receive cargo on barges. Along the docks and piers it looks like Sunday. The same may be said about the railroads. The novel sight was witnessed this afternoon, of men dragging loaded wagons. The losses to the business community already it is said are very heavy, and will reach hundreds of thousands.

In Brooklyn they are suffering simi-
