DESERET EVENING NEWS SATURDAY SEPTEMBER 18 1909

Satisfactory-Bank Report Optimistic.

TRADING IS GOOD OUTSIDE

furst Merclants Experience More Business Than Their Stocks

Can Accommodate.

total money conditions remain with my nucle chauge from the week pretoos. The clearings continue in grativing excess over the figures of the corepanding week in the previous year. woney is beginning to come in from

the sales of sheep, and general business is picking up. The report of the four sational banks issued recently at the all of the comptroller of the treasury. or Sept. 1, shows an excellent increase destures over the report of a most (catures over the report of is months ago. The resources of the arks have increased \$85,521.27, and the eposits have increased \$95,118,84. Five all officies are in Chicago attending a annumi convention of the American x monthis ago. dation, and the transactions of that as outlined in the dispatches are here with interest.

CLEWS' LETTER.

Benry Chews, in his last circular let-"Two factors that fall onlite naturally

in line with a bread spirit of conserva-tion are the harvests and the money situation. The cotton yield is proving distinctly disappointing, and it is necin the instances of the grain to distinctly modify predictions wone to dustingly modely bound to the made earlier in the season that record-marking yields were to be gathered from the grain fields of the west. Instead of a three billion-bushet corn must be government's figures promulated on Wednesday now suggest a sid of 2,649,009,000 bushels, or slightly dow the hurvest of 1998, and below the official crop returns of three other years in the last decade. The governhent's wheat figures suggest a yield or 11,30,390 bushels, or 20,000,000 bushels above the 1905 harvest, but well below the yields of 1906 and 1901. The wealth produced by the agricultural sections all therefore be well above the average; but they will not furnish incentive usidered and spectacular 'proserity' talk

The conservative splrit that is showing itself in trade and industrial cirindicates, of course, that trade demands for funds will in large masure await the release of the crop afficient pressure for funds to cause imagency. Nevertheless it is quite stringenes. fair to assume that money during the amoun and winter will command more prefiable rental rutes than can be scored from the incomes of standard investment securities at the present projected and there will be a disposithe to abstaln from additional pre-class even if a material amount 1941

feadation from this source should not more. The ilquidation of European ans will also constitute a factor. Our whigt crop does not promise an expersurghe sufficient to supply grain bills surghes sufficient to supply grain bills is surthing like adequate propertions; our colon crop as already noted, is a duspromument and will therefore be a restricted factor in the foreign exhange situation; and the uncertainties our tariff relations with France and many are calculated to restrict our export trade with those countries refore the probabilities are that our Sheign Indebtedness must in large

making a good showing in the whole-male trads, as are the lines of broad-cioths and lady's cloths that are being offered as specialis to attract buyers. On the spating of 1910 lines of dress goods and cloakings new being shown the business books is larger than that of this year in lightweight lines. This is in spite of the higher duties. Some stimut contumes made in all wood fancy fabrics are meeting with favor. Capes, cloaks and costumes in the winter styles that are to be delivered before Thanksgiving are now being prepared for sale. On lines of chil-dren's wear for the school season and for early full, the staples in woolens are selling better than last year. Tailored gowns made up in surges and plain breadcloths are finding a good

RETAR. I In the retail trade, desiers report werk slightly quiefer than last week on account of the roturn of warm wenther. When cold weather showed on business started in quite briskly, only to fall off as the mercury rose in

the thermometer. In general, trade is fair, in Tabrics of all colors except white, for which there is at present ned much demand. Suits and dreas goods are going fairly well, so are silks, which appear to be staple in this sec-tion of the country. Cloaks are be-giming to find a readier demand. Obress and hostery are good soliers. The indice are readily buying the new style of sweater which comes in long inclusion form mostly in white. The mil-imits are hot doing much as yet.

Jackel form, mostly in white. The mil-line's are not doing much as yet. The great dry goods trude of the country has reached a state of bal-able, awaiting indication whether the progress already made has been too fast or whether an additional advance shall be attempted. In this and other important trades the point has been reached where the petallers are about to show whether the preparations made in their behalf by the distributors have or have not been overdone. In other

or have not been overdone. In othe words, a disposition towards conservation is becoming manifest all along the line, which is certainly subject to none but a favorable interpretation.

BUSINESS, REAL ESTATE AND BUILDING

The greatest activity in sugar stocks known for many weeks was reported during the week, following the porting of the dividend payable Sept. 30, the of the dividend payable Sent. 30, the notice of which appears in this house of the "News." Brokets report that large blocks changed hands, many of the buyers being out of town people. Advices from all beet fields state that the sunshiny weather is having a good effect on the development of the beets. The factory at Ogden is the first to start up and orders for digging in most of the other facils will be issued

GATHET

most of the other fields will be issued Monday. Brokers also report a strong inquiry for Consolidated Wagan stock, though only a few shares were obtainable. The only a few shares were obtainable. The regular quarterly dividend on this stock is payable Oct. 16. Z. C. M. L. whose semi-annual dividend is payable in October, is also nearly off the market, so closely is it held. Several large blocks of the common stock of the new Consolidated Music company were sold lately at \$100 per share. Following are the latest quotations:

Amalgamated Sugar Co., pfd. 100.00 Home Fire Insurance Co..... H. J. Grant & Co..... .130.00

BONDS

A little more activity is being shown

C. Mortensen, 1056 Kensing ton Ave. 2 lots; Baldwin Gilman, Ogden, 2 lots; Denzil E. Pike, Sandy, Utan, 2 lots; Wilfred Rhodes, Midvale, Utah, 3 lots; J. P. Guerney, 520 Gale street, 3 lots; Seth Kendall, Murray, a lots.

The transfer of the Critchlow apartments at First avenue and E street will be made next week to a holding will be inder next week to a holding company consisting of local people and known as the Critchlow Apartment company on the basis of \$50,000 for the property. The capitalization of the new company will be divided into 50,000 shares of \$1, and the new company will assume the indebtedness. Fourteen local men have entered into the deal which was promoted by the Birrell-Shipp Realty company. The apartment heuse is three stories high and con-sists of 10 five-room apartments, all of which have reated well since its construction about a year ago by John Q. 'ritchiou . . .

Kimball & Richards have just opened up a new subdivision named Glenwood in Forest Dale, near Twelfth South and Fifth East streets, where they are spending about \$5,000 in improvements consisting of tile drainage, cemen walks and graded streets. The subdi-vision consists of 10 acres, and it is the intention to plant it with shade trees this fail, or in the spring. Twee ty teams are at present engaged in grading, and the work is expected to be completed within the next 30 days.

The Birrell-Shipp Realty company is the name of a new company which will file its articles of incorporation next week. The company is the result of the infusion of new blood and more capital into the A. H. Birrell company, which for some time past has done an excel-lent real estate and building business at ient real estate and building business at 55 Main street. The officers of the new company will be A. H. Rirrell, president; R. A. Shipp, vice president; A. N. Rosenbaum, scoretary, and Rod-ney T. Badger, treasurer. The other director is I. R. Barton. The capital-zation is \$20,000, fully paid. The offices of the company will shortly be removed to 16 Exchange place where a general to 15 Exchange place, where a general real estate business will be conducted, the motto of the company being "everything in real estate.

After numerous delays occasioned by shortage of material, the walls of the splendid new M. I. A. gymnasium now splendld new M. I. A. gymnasium now being built at the rear of the bishop's building, will probably be up to the square in three weeks. The walls are to be 58 feet high, and they are now up about 35 feet. The inside walls are practically finished, and preparations are now being made for putting in the upper concrets floor. Nine feet above this floor will be the gallery and 13 feet higher will be the running track. The

A little more activity is being shown in the real estate market, though there is still more or less of a feel-ing of waiting for outside investors, who are expected to join in greater numbers in the near future to help build up a greater Salt Lake. Some capital is coming in from the west as well as other places in adjoining states, where faith in the future of Salt Lake is strong, but there is yet to very marked influx of outside in-vestors, and the market is therefore standy with prices strong. This is inken by real estate men to be a good time for local people to buy, that they might take advantage of the time coming when the demand for Salt Lake realty will be greater than it is now, and prices will be corres-pondlingly higher.

division

that our railroads will be competied to issue during the next few months. have have been tentatively underwrit-

HARDWARE.

The hardware trade reports condi-loss practically the same as last week, eacept that the collections are not units so good, the time heing just prior to the marketing of harvested products. Correspondents write that they are threshing, and as soon as the grain is sold and the money received, bills will be haid without further and Stores be paid without further mbs. Stoves and stove furniture, with builders' bardware and sheet metal are being perticularly called for, while general ines are going out is gratifying quan-ulies. The mail ordering is excep-benally good, showing that retailers the not wait until the regular times for inaveling salesmen to visit them, but and the orders should headed at at and in orders ahead, besides giv-ing dummers orders when they call, in mining machinery, there is quite a for small lots and supplies, but very little in heavy lines.

LUMBER.

The lumber trade reports very little or nothing new, except the domand r building material continues as ending as ever: Cars are still hard ant so shipments from the north-el continue sion and unsatisfuctory. Res continue stiff, with constant tea-by loward higher figures.

be eventually paid by gold ex. Suit Lake is strong, but there is yet far as foreign interests may of to take the new securities vectors, and the market is therefore

no very marked influx of outside in-visitives, and the market is therefore staken by real estate men to be a good time for local people to buy, that they might take advantage of the subscription of the second time for local people to buy, that they might take advantage of the subscription of the second time for local people to buy, that they might take advantage of the subscription of the second time for local people to buy, that they might take advantage of the subscription of the second time for local subscription of the second because of the building line some incom-or the difficulty in getting material. The delay in getting steel is especially annoying to contractors, who say that even after shipments are made, much unnecessary delay occurs in transportation. The Newhouse hotel is being pushed at the Utah hotel because some delay is anticipated in moding the steel. Work on the new M. 1. A. symmasium has also been for being pushed at the Stah hotel bed up because of the shortage of opper in the oity making. It im-possible to get enough for the small optimities on the building. The marbio needed on some jobs is also hard to obtain, and even when word has been received that shipment has been made the time shefore the cars reach Sah has the times before the cars reach Sah has the times defore the cars reach Sah has the times before the cars reach Sah has the manering the contractors, whe are analous to get the buildings is tar along as possible belore winter set along as possible belore winter and the same to be buildings on the short of presend brick this summer are presend brick the summer are presend brick

Architect Craig has completed plans for a 26x27 foot store building for G. S. Holmes, on Second South street, east of the Grand theater. The structure will be built with a view to increas-ing its height to four stories next spring
