STOCK MARKET WAS FEATURELESS.

Brokers Try Hard, but Fail to Stir Up Business.

TRADING WAS VERY LIGHT.

Centennial-Eureka a Seller at $15—Dexter Fairly Active, but Others Were Indifferent.

The stock market was devoid of special feature today, save it be the abnormally small amount of trading indulged in during the morning call. Try as they would, the brokers found themselves totally unable to stir up business, and when they left the pit, disgust was spread upon their countenances, as they read the result—total shares sold, 4,775; selling value of stocks, $5,737.80.

It was one of those days mentioned in its nature, and brought to mind a year ago when such a state was an every day occurrence. First, Centennial-Eureka was bought at $15, a block of 25 shares changing hands at this figure, after which Daly took part. London marked up Anaconda 5 points, this stock selling at $1.21½ and closing with a bid of $1.21. No Dexter there was good business between $2.40 and $2.45, while Four Aces followed with transfers at 27½ cents, and Galena did business at 47½, then at 45, and closed with a bid of 42. Mercur dropped 100 @ 8½, and Northern Light had takers up to 6¢, while Star Consolidated contributed 600 shares at figures ranging from $1.13½ to $1.12, downward scale.

Pursuing stocks of a lower order, the brokers took Horn-De La Mar at 11½ cents and jumped from here to Omaha, where 200 found a taker at 42. Orient did business at 12, and Showers Consolidated at 26, after which Tetro was dealt in at 16, and to close business, Yales handed out 200, this stock going at 1.26.

The closing figures were as follows:

STOCKS AND BONDS.

New York, March 15.—The stock market at the opening showed a declining tendency, partly on weakness of the London market for Americans. Operations were conducted along recent lines, considerable activity and strength developing in specialties. Tobacco reopened yesterday's record price and its affiliated concern, Continental tobacco, was carried up to 60¾.

The iron and steel shares, which have recently commanded attention in points of strength, were under pressure. American Steel & Wire falling 1¾. In the railway list Missouri Pacific and Burlington rose strongly but changes otherwise were less important. Chicago Terminal shares moved steadily upward on expectation of benefits to accrue from the Alton deal. By 11 o'clock the business carried out and successions occurred. Call money rates stiffened to four per cent, and the traders pronounced stocks freely thereby cancelling all the previous improvements.

Liquidation in Manhattan depressed it to 91.84¾, which stimulated short sales in other properties.

GEYSER-MARION IN SPLENDID SHAPE.

Has Ore in All Its Parts and Never Looked Better.

BIG STRIKE IS INTIMATED.

The Triumph and the Sunbeams—Work at Bingham—Parkard's Big Mine—Miscellaneous.

From Morris Bamberger, manager of the Geyser-Marion at Mercur, the "News" learns that this mine was never in better shape than it is today. Mr. Bamberger came in from the property last night, and despite his interest in the mine, his statement as to its condition is to be relied on, stated in a positive way that the mine was showing ore in all its parts, the mineral being of a good milling variety and well calculated to net the company good profits. The gentleman said the miners were sinking steadily and making upraises, and in both drift and stope the supply was getting better right along. The mill is running on its two daily, and so great is the supply that despite several cases near the mill tunnel, which cut off the ore from that section, the shipments for the month of March will exceed those of the past month. Mr. Bamberger intimated that a big strike had been recently struck to go into details concerning it.

WORK AT BINGHAM.

The Mines Busy and the Camp Generally in Good Shape.

Bingham, the Old Reliable, the home of the Highland Boy, and the envy of the Eastern capitalist, was visited yesterday by a number well known mining men, among them F. R. Wilson, J. A. Brown A. L. Jacobs and V. P. Wells, who went out in the interest of the Highland Copper Mining company, that, under their orders, work might be commenced in the operation of that property.

The Highland company owns the Highland Boy, a little below Bingham, and the visitors witnessed the breaking of ground for a shaft, the same to tap the ore bodies at depth, and to be pushed for 700 on the first contract. The work will be under the superintendency of W. H. Stephenson, who for several years past has been in the employ of the Dalton & Lark company, and it is confidently believed by those interested that a mine will be opened up, as indications are very encouraging. Surface float assays as high as 42 per cent copper.

Leaving the Highland Boy, the party pushed on to Bingham proper, where our shipments could be seen coming from all directions. The trains went through the Bingham canon mill, now running on Red Wing ore, and were greatly pleased with the mechanism and modern equipment of the plant. The ore being handled is worked up to 40 and 50 per cent lead, and in the treatment very little loss is occasioned.

The Bingham Consolidated was also a point of interest. This will tap the Dalton & Lark ground at a distance of 1,000 feet, and to date 500 feet in the way in this direction. The Brooklyn, a part of the same group, will be reached at a depth of 2,500 feet, which work, when accomplished, will make possible the draining of the Crooklyn ground, which, when work was suspended, had 9 feet of fine ore in the bottom of the shaft, and showed two splendid veins.

The visitors report business good in Bingham and say the Dalton & Lark company is working 28 men, who are taking ore from the mine and shipping it down the raceway. All the big properties are there are in active operation.

Report of the Alice.

In its annual report just spread before the stockholders, the Alice Mining company, for the year ending December, reports that but one dividend of $20,000 was paid during the year, but regrets to say that the showing for the present is out of date and had a balance January 1st of $10,874.09. The ten cent per share of the report, stopped further dividends, but the sale of ores and bullion during the year brought $440,761.61, an average for ores of $25.64 per ton. A force of 194 men was employed during the year and for mining purposes $441,158.45 was expended leaving a balance of $401,828.45 for milling.

Dividends Paid Today.

Today, the 15th inst., the Centennial Eureka paid its dividend of $15,000, this being the 30th dividend of the $15,000 class, while the Bullion Beck made a distribution of $7,500, which makes this payment the 29th. Both these mines are in good condition and making regular shipments.

Rich Gold Strike.

A letter to the San Francisco Examiner says that the residents of the mining town of Hyder Hill, Washington county, in the extreme northeastern portion of the state, are excited over the report of a rich strike of gold ore. The vein is about 15 inches wide at 35 feet from the surface, and is said to prospects from $2,000 to $12,000 per ton.

Sold for $250,000.

A dispatch today says that the Crystalline group of four mines, located one mile west of Jamestown, Col., on the mother lode, has been sold by C. H. Shafer to an Edinburgh, Scotland, syndicate for $250,000. Active development work is to be begun at once.

PACKARD'S BIG MINE.

Salt Lake Hebrew is Millions and a Half for the Tip Top.

Judge Shackelford, who is here from Hailey, says there is great mining activity on Wood river. Splendid results are being obtained in the Tip Top mine, which the judge says is now in the running mate of the Hailey. He says he was informed the owner, John Q. Packard, refused $1,500,000 for the mine in Utah, refused $1,500,000 for the property. The Tip Top is on the Hailey gold belt. The Tip Top is now shipping on its own account. This property was recently sold by Hebrew Lewis, banker of Deseret, for $1,500,000 to a syndicate of Nebraska parties.—Boise Statesman.

Triumph and the Sunbeams.

Theodore Dupuis spent yesterday in Tintic, where he viewed with satisfaction the work being done on the Triumph. The gentleman says the miners are drifting on the vein from the 100 and the 200 levels, and reports the ore bodies are lively. Mr. Dupuis called the gentleman, whose home was once in Salt Lake City, on one of the Sub-Sun levels, the same running 15 to 20 feet wide copper and showing good values in gold and silver. In the South Sunbeam the gentleman says they are taking out copper stains and chrysolite, which puts this property well to the front as a prospective dividend payer.

MINES AND MINING MEN.

Three cars of Horn Silver concentrates were at the sampler today.

Big gold assays are coming from the Boston and Ely Lo Mar, at De La Mar, Nev.

George Dern came in from Mercur last night. He reports things moving along nicely in the camp.

The Opohonga Mining company has elected W. W. Chisholm, president; William Bassett, vice president; J. W. Hatfield, secretary and treasurer; S. J. Carpenter and W. H. Bradley, the other directors.

BUSINESS NOTES.

The board of directors of the Utah Sugar company met this morning and transacted several important items of business. The regular quarterly dividend of 2½ per cent was declared, and the list to stockholders of record on the 20th. Considerable interest was manifested in the report of Manager Mathews' visit to the Logan factory and other quarterly assembly, and also on the reports present back from the Eastern Idaho fields. Messrs. Mathews, Clark and Barlow Ferguson, who during their recent stay there, visited most of the farmers and secured much valuable information relative to the sugar beet industry. The consensus of opinion of the board, after discussing Manager Cutler's report, was that the capacity of the Sugar company should be nearly doubled, and that a committee be appointed to investigate the subject and submit a report at the next meeting of the board, to be held on the first. The annual stockholders' meeting for the election of officers will be held on the first Monday in May, and the people owning stock to the factory is quite large, it has been found necessary to enlarge the building to accommodate the meeting. We have taken from the office of the company, and the Assembly Hall of the L. D. S. business college. The Templeton Building has been engaged for the purpose.

The board of directors of the Home Fire Insurance company met yesterday and declared the usual quarterly dividend of 1½% on the capital of a quarter of a million dollars, payable April 1st.

* * *

The annual meeting of the stockholders of Clark, Eldredge & Company was held yesterday and resulted in the election of the following board of directors: John Clark, George Sonntag, L. S. Hills, James Sharp and Reed Richards. The report showed the firm had a steady increase in both sales and earnings and a dividend of 2% has been declared payable April 1st, while a sum sufficient to pay several dividends during the year has been laid aside.

The board of directors of Heber J. Grant & Company met in their regular monthly meeting yesterday, and declared the usual dividend of 2% on the capital stock of the company, payable March 31st.

SORES, Ulcers, chronic sores, scrofula, and all impurities manifestations of impure blood, are cured by the powers of P. P. P., which when not all failed, and thoroughly cures. The system, if permanently cured cures of long standing, even though all other means have failed. A record of half a century is its best of merit.
