OLD FOLKS' DAY.

Preparations for old folks' day in the Weber stake are being made by the respective committees who have been at work and now have almost everything in readiness for the event which occurs on Wednesday, August 1, at Glenwood park. The committee is particularly anxious to have it generally understood that the only qualification for participation in the pleasures of old folks' day is that the participant shall be seventy years of age or over. No matter what religion, what nationality or what color, all over 70 years of age are cordially invited, and the bishops of the 26 wards in the stake are instructed to spare no pains in discovering all who have reached that age and supply them with the necessary badges and care for them on that day. Should any be inadvertently overlooked, they need but hint of it to the bishops or their aids, and they will be cared for. The street cars will be at the disposal of all who wear the age badge so that transportation to and from the grounds will be free in any part of the city. Prizes have been donated by those who take delight in making the old folks' day one of enjoyment, and the list of prizes is a large one.

EUREKA.

SERIOUS ROAD ACCIDENT.

Diphtheria Claims Victim, With Four More Cases—Change in R.R. Service.

Special Correspondence.

Eureka, July 25.—Mr. and Mrs. Harry Cramer, who reside at Tintie Junction, met with a serious accident Tuesday night, while they were riding home on a "pull" car.

The semi-annual report of the railroad company residing at the junction often use one of the little flat cars to take them home, which is down grade all the way from Eureka. Mr. and Mrs. Cramer were using this method, and were allowing the car to go at a pretty lively speed, when they crashed into a piece of timber that had been placed upon the track. The car was thrown from the track. Mrs. Cramer escaped with some bad bruises, but Mr. Cramer was not so fortunate.

William Houtz, the 3-year-old son of Mr. and Mrs. Meace Houtz of Eureka, died Monday morning at Springfield from blood poisoning following an attack of diphtheria. The funeral services were conducted at Springfield Thursday.

There are now four cases of diphtheria in Eureka, the cases under quarantine being Mrs. Joseph Clayville, a child at the home of John O'Neil's, another at the home of William Gay, and the fourth one being a child of Mr. and Mrs. W. B. Thurmond.

The wagon road into the North Tintie mining district is now about completed to the point where the boundary line between Utah and Idaho counties. Mr. McCune of the county commissioners states that the county commissioners will be asked to take a trip over the road through the district and see what this county has already accomplished. Then Utah county will be asked to do its share toward the completion of the road.

The Tintie passenger train over the D. & R. G. which has been leaving Salt Lake at 5:10 in the evening, will leave time next Sunday, when it will leave Salt Lake at 4:30 p.m. This may result in the train getting into the district a little earlier.

Last week a cave-in occurred in the Stanton mine in North Tintie, in what is known as the Wolfe stop. Sufficient warning was given before the cave-in occurred, and fortunately none of the men employed at that part of the mine were injured. The damage done was not extensive enough to interfere in any way with the output of the mine.

Hay Fever.

So many patients have applied to Drs. Shores and Shores for treatment lately who have been suffering from Hay Fever and did not know what their trouble was, that Drs. Shores have decided to explain the symptoms, effects and treatment of Hay Fever, that all may tell it at a glance.

In the beginning of an attack of Hay Fever the patient experiences a sense of uneasiness about the nasal passages, with a slight disposition to sneeze. Gradually these symptoms increase, and often there is an intense itching of the nasal passage, with a profuse watery discharge, which necessitates the constant use of a handkerchief. In aggravated cases the discharge drips continually from the nose, later the mucous membrane becomes so congested that the secretions present a grayish color. The inflamed mucous membrane naturally causes more or less stenosis, or narrowing or closing of the nasal passages, which adds greatly to the discomfort of the sufferer, often times the nasal passages are entirely closed up.

If the patient lies on the side, the nasal passage which is uppermost becomes open, while the fluid collects in the parts below; or if the patient lies on the back and the flow passes to rear portion, causing a complete stoppage of the nasal passages. The fluids which escape from the nose are often irritating and very frequently give rise to irritation around the nose and lip and sometimes even result in eczema. The eyes become congested and the lips red and itching. If the disease is allowed to run, an attack of asthma often sets in. The asthmatic symptoms are usually confused with those of breathing, which the patient describes as wheezing.

Hay fever is a treacherous disease and yields quickly to the new treatment. Every sufferer from this insidious and deceptive disease should consult Drs. Shores & Shores at once.
