They say in the Paris shops that the American woman buys more wash waists than any other class of women in the world. This is probably true, but the ma-jority of us cannot afford French blouses, so we make them at home. A white wash waist sounds simple white wash waist sounds simple enough. Everything is left to the imagination. The term covers an in-finite variety. It is the detail, the white wash

A NEW SUIT MODEL.

A new model for a mid-winter walking costume shows a novel use of shirrings controlling the fullness of the coat at the waistline and introducing at the same time smart little rippled peplums, the use of which will become more and more general as the winter advances. The skirt is a plain two-piece circular, finished with machine stitching. Cream lace laid over black satin forms the band trimmings of the coat, the wide Fauntleroy collar and cuffs of black velvet contrasting prettily with the taupe-colored cloth of which the frock is fashioned.

A bountiful supper was partaken One should have enough knowledge to separate white wash waists into distinct divisions. In this lies much of the art of being well dressed durdistinct divisions. In this lies much of the art of being well dressed dur-ing the greater part of the day. It is rather remarkable that a woman -nearly all women--will bother, fret and give time, money and vitality, to the choosing and making of a best frock-one for evening or afternoon wear and consider it time lost to both-er about the fit and detail of shirt-waists, collars and cravats. They do not realize the importnce of being smartly put together during the larger part of their lives. Isn't it more necessary to look fashionably dressed in a trig, trim-med way for six days of the week than to look careless and out of style for that time just to look extra effective on the seventh day? It is not the woman who has one good gown and hat and wears it on extra occasions who gets the credit of being well dressed. It is the woman who from breakfast to sundown wears the right kind of shirtwaist, beit, collar and shoes. She is the woman you hear spoken of as "always looking so well." . . .

careless in detail. Whenever you talk this way to a carelessly dressed woman she is apt to take a virtuous stand about life being too serious, too filled with sterner du-ties, to give up so much time to the art of dressing. This is merely an ex-cuse hot a reason; an apology to tag

TWO MATERIALS EFFECTIVELY COMBINED.

Truly Parisian is this bretelled frock made with crossed fronts of plain leather-colored shelma cloth and decorated with long silk tassels and braid motifs. The bodice proper is of cream Lansdowne, with the skirt of the shelma cloth. Long silk tassels decorate the sleeves, which are short and puffed to the elbow. The skirt is cut with a demi-train and draped over an underskirt faced with leather-colored veltevteen fully twelve inches wide.

John Was Silent.

That death "hath no sting" for some people is evidence by the story of a physician whose practise called him to the homes of many of the poorer families who labor in Chicago's stock

yards, "I was summoned to attend one man who was in the last stages of tuberculosis," he relates, "and found him very low. His wife was a sturdy woman of vehement temperament and seemed not the least concerned over her husband's desperate condition. I left direction with her for the man's comfort and promised to call in the morning.

"'Oh,' she said in a tone which seemed to indicate that I had recalled ing the most careful attention on what in appearance is merely a folded or fitted belt. The one in vogue at pres-ent is only shaped at the upper edge. A very common mistake is found in the delusion that a ceinture can be relied upon to pull a doubtful fit into law and order at the waist, whereas all that can justifiably be expected of this adjunct is that it accentuates a fit already consummated. And, when, oh, when will the lady of embonpoint recognize that a buckle worn at the back is the sole prerogative of the elegantly slim figure.

Preacher Becomes Personal.

The Rev. Nathaniel Howe of Hop-kinton, who died in 1837, aged 72, was a Federalist in politics, and his polit-ical sermons stigged the wrath of his hearers, who were mostly Democrats. In the midst of one of these sermons the leader of the opposite party felt aggrieved, and called out: "Why don't you call names. Mr. "Why don't you call names, Mr. Howe?"

"I do not wish to be interrupted," said the parson, solemnly, and went

on. In a little while the voice came more angrily than before: "Why don't you call nameh, Mr. Howe?" "There is no need of it while con-science is doing its work so well," was the quiet response.—Boston Herald.

A judicious touch of tinsel is quite a fascinating feature of the trimming scheme of many a smart design. One of its most bewitching expressions is in old laces, where the pattern of the lace is worked over with fine silver threads.

threads. Do not expect to attain just the cor-rect effect with the cheap sliver tinsel threads that are offered; they all of them tarnish quickly, and not only blacken themselves, but everything they come in contact with. The career of the garment so adorned (?) is a brief, but an eminently unsatisfactory, one.

The working of laces with those bul-lion threads-for that were the better name for them than tinsel, which sug-gosts something cheap and of imita-tion quality-will prove one of the most attractive and at the same time one of the most accommical pieces of "pick up" work for the woman of fashion. fashion. With reference to lace, real Irish is most fashionable, and a great deal of filet, mailnes and chantilly is beautified by means of relief embroidery in art silk.
