MINING, BUSINESS AND STOCKS

HIGH GOLD VALUES OF SO. MAMMOTH

Surprising Assays Come From Late Sensational Strike in Tintic Mine.

IMPROVEMENT SHOWN TODAY

Where, Ore Body Is Located-Supt. Brown Figures Out How Enrichment Occurred.

News from Tintic today was to the effect that the new strike in the Lower Mammoth mine had shown an improvement since yesterday, and that assays of ore taken from the face returned \$112 in gold, 24 ounces in silver and 42 per cent lead. Another lot, ore broken down in the drift, assayed \$173 in gold, 18.6 ounces in silver and 32.5 per cent lead. Shortly before noon the per cent lead. Shortly before noon the drift had penetrated the ore for a distance of seven feet, while the width of the deposit was demonstrated to be from six to eight feet.

The exact location of the find is on the third floor of the south stope of the 1,600 foot level.

The finding of such high grade gold care in the Lower Mammoth mine is

ore in the Lower Mammoth mine is something unusual, in fact heretofore unknown, as the usual returns in this metal have been nearer \$5 a ton.

Supt. Brown believes that the present high-grade showing, which has been growing better for every foot of the 20-odd feet above the 1,600 level, is the concentrated connection between the big stope below and one that is be-ing approached in the ground higher up

LOWER MAMMOTH.

This Tintic Stock Was the Feature of Today's Trading.

Attention during the forenoon calls Attention during the forenoon calls of the mining exchange was centered today largely upon Lower Mammoth. There were some heavy buying orders in for the stock and many of them came from the Tintie mining district; which is one of the best indications that the strike reported yesterday is fully as good as stated. The initial sale was made at 73 cents and advanced without a hitch to 96 cents. Black Jack and Swansea Consolidated were the most active of the so-called Knight stocks.

The stock of the Utah Mine, which has occupied a place among the listed

The stock of the Utan Mine, which has occupied a place among the listed stocks ever since the organization of the mining exchange has been demoted, on account of the company falling to come through with a listing fee of \$100. Accordingly, it will be classed among the unlisteds. This stock sold at \$1.75 today and Silver King Coalston at \$4.05.

Skylark and Wasatch Groups Taken Over by Utah—United Copper Company.

BEAVER PROPERTIES

ARE CONSOLIDATED

ARTICLES TO BE FILED TODAY

Deal Had Been Pending for Some Time-Development Campaign Already Under Way.

A consolidation of the properties of the Skylark Copper Mining & Milling and the Wasatch Mining & Milling companies, all situated in the Beaver Lake mining district of Beaver county, has been effected. The last act in connection with this deal, which has been nection with this deal, which has been pending for some time, was performed today when a new corporation, the Utah-Uintah Copper company, was formed. The new company takes over all the holdings for the Skylark and Wasatch corporations, consisting of 13 lode mining claims, together with all surface improvements, the Skylark turning in ten of the number; two of which are patented.

The capital stock of the new corporation is 600,000 shares of the per value

ration is 600,000 shares of the per value of \$1 each, and in the exchange to be made, charcholders of the Skylark will receive share for share; while those holding stock in the Wasatch company holding stock in the Wasatch company will receive one share in the new corporation for three in the old. James T. Treasure is president of the Utah-United company; A. J. McMullen, first vice president; J. E. Edmunds, second vice president; Charles A. Weaver, secretary; A. D. McMullen, treasurer; who, with Arthur B. Gatrell and T. M. Farrell, constitute the board of directors. No mining properties in the Beaver Lake district yet in the prospective Lake district yet in the prospective stages of development offer more en-couragement than the Skylark and Wasatch groups, and mining men thoroughly familiar with conditions in that region have frequently expressed the opinion that all that is necessary to make larg producing mines out of them is a campaign of systematic develop-ment work. The surface showings are exceptionally good and wherever anything of an exploratory character has been done, results were highly gratifying. The Skylark has been developed to a depth of 300 feet. On the 100-foot level, a cross-cut exposed a vein 21 feet between walls, upon which a drift was run for 32 feet. On the 200, the vein widened out to 35 feet and was drifted widened out to 35 feet and was drifted on for 50 feet. On the 300, a cross-cut has been run for 25 feet without disclos-ing both walls; but on this level no drifting has been done. The ore so far is low grade, but as depth is attained a steady improvement is noticed and re-cent assays of ore from the lowest workings gave returns of 6.2 per cent copper, \$15.40 gold and 52 per cent iron. Sulphide ores came in at 170 feet in the shaft.

The Wasatch was formerly owned by L. N. and Charles Morrison, and contains some splendid surface showings of gold, silver, lead and copper ores. The development work on this property has been limited to the annual assessment work during the past 10 years, It is understood that the consolidated company will push a very active company will push a very active company. company will push a very active cam-paign of development. The skylark shaft is to be sunk deeper and will beshaft is to be sunk deeper and will become the permanent workings, in all probability, of the combined properties. A. J. McMullen, who has figured conspicuously in the affairs of the Skylark company for a number of years, is to take personal charge of the work for the present. Mr. McMullen has had unshaken faith in the two mines for a long time and the consolidation is one of the things that he has been striving for. He has spent much time in bringing this about and now that it has been accomplished, rests confidently in the accomplished, rests confidently in the belief that his energies will be rewarded by the opening of one of the best mines in Beaver county.

The new company starts off with more than 350,000 shares of unissued treasures stock.

treasury stock.

MONTGOMERY SHOSHONE.

That a change for the better has taken place in the development of the veins in the Montgomery Shoshone workings has been stated positively by General Manager John G. Kirchen, says the Rhyolite Herald.

According to Mr. Kirchen, 75 per cent of the ore that is now sent to the big mill is coming from the 500, 400, 300 and 200 levels, and by referring to Mr. Krumb's report, printed in full in the Herald, ... and 3, 1998, it will be noted that the bulk of the ore extraction how being made is coming from points in the mine which Mr. Krumb's report did not cover and from some portions of the mine which Mr. Krumb considered quite doubt-Mr. Krumb considered quite doubt-

mill is coming from the lower levels, namely the 200, 300, 400 and 500. I do not care to discuss the 600 level at this time, further than to say that the cross-cut is exposing the same character of tale ore as in the glory hole, together with sulphide ore. Yes, a portion of the ore from the 600 is going into the mill, but not all of it."

"Is it true, Mr. Kirchen, that a shoot or ore, 60 feet in length has been de-

true. We are stoping from a 60-foot shoot at the 500 level that is averaging \$13.50 a ton as broken. We are raising from the 500 to 400 level in this ore. And for the 600 level, you may say that the west cross-cut is making a satis-factory showing and that in the near future we will commence to raise from

it may reasonably be deducted that the lowest level in the mine is in commer-

cial values, or that the development as the work proceeds to the west is show-ing such an improvement in values that in all probability the raise spoken of will be for stoping purposes.

"What about ore reserves?"

To which Mr. Kirchen replied:
"There is enough ore of a commercial grade actually in sight, in the Shoshone, to keep the mill busy for some

PRINCE CONSOLIDATED.

Conditions at This Ploche Mine Arc Very Satisfactory.

Superintendent William Lloyd of the Prince Consolidated and Ohio Ken-tucky mines at Pioche is in the city on a brief vacation. He expects to spend a couple of weeks resting up after hav-ing put in some pretty hard licks during the summer months. According to what Mr. Lloyd told the "News" to-day the Prince mine is a much bigger proposition than some people realize. That the property has wonderful possibilities, there is not the slightest dealy.

possibilities, there is not the slightest doubt.

"We have the main working shaft on the Prince," said Mr. Lloyd, "down over 400 feet and sinking to the 500 is now in progress: It has been run all the way from the surface in what is known as the maganese vein and has a demonstrated width, in places, of more than 150 feet. From the 400-foot station a drift was run northeast for 120 feet where it encountered what is known as the Prince Royal vein from which we have been getting high grade which we have been getting high grade which we have been getting high grade silver-lead values. A drift on the Prince Royal on this level demonstrated the average width of the pay streak to be from 1 to 4 feet. Independent of the Prince Royal, on the 400 level, has been encountered a bedded vein dipping on an angle of 15 degrees to the east and having an average width of 15 feet. This is an Iron manganese or and assays 10 per cent lead 10 cunces. and assays 10 per cent lead, 10 ounces in silver and from \$1.50 to \$2 in gold. On the third level, a cross-cut of over 100 feet encountered in the Prince Royal vein and a drift was run on the latter for 280 feet; the pay streak averaging here between one and five feet. Independent of this was encountered still another bedded vein, and it

was opened for a distance of 100 feet. The width of this vein averages six feet, with the ore averaging 20 per cent lead, 50 ounces in silver and \$2 in A large tonnage of ore, encountered in the Prince Royal vein during the natural course of development, is now available for shipment. The mine is splendidly ventilated and in excellent shape for stoping operations whenever the management decides to enter the

PARK CITY NEWS.

Last Week's Ore Shipments Show Slight Increase.

The discovery of ore in the winze at the Mountain City, in which local tal-ent is heavily interested, has been the

ent is nearly interested, has been the topic of much discussion this week, says the Park City Record.

Though the ore streak as yet is small, it has the "come-to stay and grow" appearance, and, with men of wide mining experience at the head of the proposition, there is reason to believe that a mine is "coming up" in believe that a mine is "coming up" in that locality. The Mountain City is over in the Iron canyon direction and at present an additional 50 feet of winze is being worked on contract. Deeble has been awarded a con-W. Deeble has been awarded a contract to drive 100 feet of additional tunnel at the property of the Park City Mining and Power company in Big Cottonwood canyon, near the Columbus Consolidated mine. The tunnel is already in 209 feet, and there is also a shaft of 137 feet on the ground, promising indications having been encountered in both places. The property is very favorably located and with the further development now unwith the further development now un-der way may be expected to show up well in the near future. W. L. Hor-wood is at the head of the company.

Silver King, 1,208,000; Daly West, 1, 150,000; New York, 62,500. Total pounds, 3,081,360. NEW PIOCHE STRIKE.

Find in the Jennie Property Said to

Ore shipments.-Daly Judge, 660,000

Be Important. One by one the merits of our district come to light in the way of permanent ore bodies, and we add to the list this week an entirely new proposition near Pioche, says the Pioche Record. A per-sonal investigation of the new discov-ery looked like another Mendah mine.

ery looked like another Mendah mine. It's there, to be seen by anyone who may visit the claim.

E. D. Smiley and Mathew Hunter are the lucky ones in the deal, and have good cause to be more than elated. On the Jennie claim, which they located, a strong iron ledge runs through for a considerable distance, characteristic of the entire country in the immediate vicinity, and the boys had started work on the side hill, more on a thorough prospecting adventure than anything else; they started an open cut

ough prospecting adventure than anything else; they started an open cut and had proceeded but a short distance, practically on top of the ground, removing the accumulated soft wash and a very light time capping, when a large ore body was struck.

The ore body lies at an angle of about 90 degrees and the last reports are to the effect that it is 16 feet long and an average of three and one-hali feet wide. Assays taken from an average sample of the entire ore body, gave returns of gold, silver and lead to the returns of gold, silver and lead to the amount of \$126.50, of the same character as the Mendah ore, and by the way, it is only 15 minutes' walk from the Men-

SHIPS INITIAL CAR.

The Ninety-nine Copper company, operating at Good Springs, Nev., has received notice of the shipment of the initial car of copper ore from its pro-perty. It was consigned to the Independent Smelting company at Ogden.

Articles of incorporation of the Bingham & Orleans Mining company were filed with the county clerk today. The capital stock of the company is fixed at \$500,000, divided into an equal number of shares of the value of \$1 each. her of snares of the value of a sach. The officers named are R. A. Hasbrouck, president; D. H. Wenger, vice president; A. W. Mente, secretary and treasurer, and these, together with William S. Burton and E. V. Benjamin, constitute the directorate. The company takes over a number of claims and patented property situated in West Mountain mining district in Salt Lake county, formerly the property of the St. Joe Mining company. CONCENTRATES.

John Dern, and family, return this afternoon from several month's trip to Europe.

D. P. Rohlfling expects to leave for Beaver county in a few days to look after matters connected with the development of the Lulu mine. Advices from Pioche say that E. F Freudenthal recently succeeded in financing his Lucky Star property in the east. The ground is located in

Pioche. Executive Committeeman Earl Eilers of the American Smelting & Refining company, has arrived in the city on one of his periodical round-ups of the western plants of the big smelting

company. The Ethel Mining company, organized at Salt Lake, has filed articles of incorporation. The capital stock is \$10,000 in a million shares of one cent each. Officers are: W. S. Bing, president; J. J. Gerster, vice president; Richard B. Shepherd, treasurer; Ethel A. Shepherd, secretary, treasurer, and these with A. E. Annakh constitute the directorate. The company will exploit claims in the Clifton mining dis-trict, Tooele county.

EDWARD L. BURTON 11 East First South, S. L. City.

WAS DOWNWARD

New York, Sept. 1.—The whole market moved to a lower level of prices in the

opening dealings. Trading was irregular, the general market being swayed to a large extent by the erratic fluctuations of the Harriman stocks. Opening declines in Union Pacific and Southern Pacific were made

man stocks. Opening declines in Union Pacific and Southern Pacific were made up but fresh selling orders in these stocks and pressure against several other prominent railronds and specialties depressed the whole market again. Another raily to the best by the Harriman stocks caused the general list to harden some. Business was quite duil throughout the first hour.

The stocks of the properties associated with the Harriman name were distinct features and their strength held the rest of the market firm. Illinois Central advanced 2½, Southern Pacific 1¼, and Erie I. Railyway Steel Spring declined 1¼.

Bonds were steady.

Speculative interests continued largely confined to the Harriman stocks. The rest of the list held well although there was little inquiry for stocks. Granby Mining gained 5 points, Baltimore & Ohio 2, Chicago & Alton preferred and Brooklyn Rapid Transit 1½. American Smelting preferred declined 1¼.

The market closed easy. Reading's rise to above 120 brought in selling orders and the whole market fell back. Reactions ran to a point or more in the active trading stocks. Central Railroad of New Jersey and American Cotton Oil preferred receded ½ and American Telephone and American Tobacco 1.

LIVESTOCK.

CHICAGO.

CHICAGO.

Chicago, Sept. 1.—Cattle — Receipts about 7,000; market steady. Beeves, 3,65 @ 7.80; Texans, 3.50 @ 5.00; westerns, 3.20 @ 6.00; stockers and feeders, 2.00 @ 5.50; colves and heifers, 1.75 @ 5.90; calves, 5.25 @ 7.25.

WOOL.

ST. LOUIS. St. Louis, Sept. 1.—Wool, Steady. Territory and western mediums, 14@18; fine mediums, 10@15; fine, 9@12.

BOSTON.

Boston, Sept. 1.—There has been a slight revival in the local wool market with a better inquiry by manufacturers and an increased volume of business. Most grades of domostic wool are steady. Twelve months Texas stock continues in fair demand at 50 to 52 cents scoured and there have been some fair sized transactions in territorial wools.

PRODUCE.

CHICAGO.

CHICAGO.

Chicago, Sept. 1.—Renewed buying today of the December option by a leading elevator concern which was a heavy purchaser yesterday caused a firm tone in the wheat market. Prices at the start were a shade lower to 3½ higher with December opening at 35½ to 35½. Later the price advanced to 3½ to 35½. Later the price of a shade higher at 3½ to 35½ and sold up to 45½. Oats were firm. December opened unchanged to 49½ and sold up to 65½.

Provisions were easy on a decline in live hogs, prices at the start being 2½ higer to 10c. lower. The market rallied a little owing to the firmness of grain. Wheal—Later shorts became active buyers of September which forced the price of that delivery to 37½, an advance of 1½ from the low point of the day December in the meantime sold up to 3½ 495%. The market closed strong with prices up 3½ 5½ to 1½. Final quotations on September were 36½ and on December 36½.

Corn—The high point for September was reached at 79½, a new high record for the season. December advanced to 17½. The market closed strong at the top with December up ½ 40% at 5%. Close—Wheat—Sept., 30%; Dec., 35½; May, 39½.

Corn—Sept., 79½; Dec., 67½; May, 65½; July, 64½.

Oats—Sept., 495%; Dec., 49% 650; May, 50%.

Oats-Sept., 49%; Dec., 49% @50; May,

52
Pork—Sept., 14.55; Oct., 14.70; Jan., 16.20, Lard—Sept., 9.47½; Oct., 9.52½; Jan., 9.42½@9.46.
Rye—Cash, 76; Sept., 75.
