A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE

CHICAGO, ROCK ISLAND & PACIFIC R. R.

IS THE GREAT CONNECTING LINK BETWEEN THE EAST & THE WEST!

Its main line runs from Chicago to Council Bluffs, passing through Joliet, Ottawa, La Salle, Geneseo, Moline, Rock Island, Davenport, West Liberty, Iowa City, Marengo, Brooklyn, Grinnell, Des Moines (the capital of Iowa), Stuart, Atlantic, and Avoca; with branches from Bureau Junction to Peoria; Wilton Junction to Muscatine, Washington, Fairfield, Eldon, Belknap, Centreville, Princeton, Trenton, Gallatin, Cameron, Leavenworth, Atchison, and Kansas City; Washington to Sigourney, Oskaloosa, and Knoxville; Keokuk to Farmington, Bonaparte, Bentonsport, Independent, Eldon, Ottumwa, Eddyville, Oskaloosa, Pella, Monroe, and Des Moines; Newton to Monroe; Des Moines to Indianola and Winterset; Atlantic to Lewis and Audubon; and Avoca to Harlan. This is positively the only Railroad, which owns, and operates a through line from Chicago into the State of Kansas.

Through Express Passenger Trains, with Pullman Palace Cars attached, are run each way daily between CHICAGO and PEORIA, KANSAS CITY, COUNCIL BLUFFS, LEAVENWORTH and ATCHISON. Through cars are also run between Milwaukee and Kansas City, via the "Milwaukee and Rock Island Short Line."

The "Great Rock Island" is magnificently equipped. Its road bed is simply perfect, and its track is laid with steel rails.

What will please you most will be the pleasure of enjoying your meals, while passing over the beautiful prairies of Illinois and Iowa, in one of our magnificent Dining Cars that accompany all Through Express Trains. You get an entire meal, as good as is served in any first-class hotel, for seventy-five cents.

Appreciating the fact that a majority of the people prefer separate apartments for different purposes (and the immense passenger business of this line warranting it), we are pleased to announce that this Company runs *Pullman Palace Sleeping Cars* for sleeping purposes, and *Palace Dining Cars* for eating purposes only. One other great feature of our Palace Cars is a SMOKING SALOON where you can enjoy your "Havana" at all hours of the day.

Magnificent Iron Bridges span the Mississippi and Missouri rivers at all points crossed by this line, and transfers are avoided at Council Bluffs, Kansas City, Leavenworth, and Atchison, connections being made in Union Depots.

THE PRINCIPAL R. R. CONNECTIONS OF THIS GREAT THROUGH LINE ARE AS FOLLOWS:

At CHICAGO, with all diverging lines for the East and South.
At ENGLEWOOD, with the L. S. & M. S., and P., Ft. W. & C. R. Rds.

EVENING NEWS.

Saturday, April 17, 1880.

Correspondence.

HILLSDALE, Iron County, April 12th, 1880.

Editors Deseret News:

This has been the hardest winter I have ever witnessed, to the best of my recollection. Our stock has suffered terribly and a very great many have died through starvation, in consequence of the snow falling so deep that all the feed was covered up, and the stock could not get to even the tops of the tallest sage brush to browse upon. Some of us have lost our all in the way of stock, but we feel to say "The Lord giveth and he taketh away, and blessed be the name of the Lord." Many of our citizens are entirely out of bread stuff, and those who have grain to grind are no better off than those that have not, as we have to depend upon the mill at Panguitch for our grinding, and that is out of order, so that no grinding can be done there. So, some of us are obliged to resort to the coffee mill for grinding, which is a slow process to get a little bread; yet it is a great economiser.

Our settlement is enjoying, as a general thing, very good health.

Our emigration from the spirit world will, I think, compare favorably with any settlement in the Territory. We have 13 families in our settlement and in the space of three years there have been 33 young emigrants located with us, and only three deaths in children, and one adult, Sister Margaret Fredricks.

We have one of the best men for bishop that can be found in the country, always so kind and so fatherly, always on hand to administer to the wants of the poor and needy, the sick and afflicted, and he is trying to unite the people of his ward in the bonds of love and union.

Our Sabbath School is in a healthy condition, and ably managed by our beloved Brother David J. Wilson, and his quorum of teachers. Our day school has been successfully taught this winter by Brother Seth Johnson. Our prospects for an abundance of water for the present season's irrigation look quite favorable, judging from the heavy deposits of snow in the mountains. We are free from the contaminating influence of modern imported civilization. We have no tippling shops nor houses of ill fame, and I believe only three individuals in our midst that make use of tobacco.

I will now give a sure and speedy cure for the sting of a scorpion; a receipt that will not cost money, which I have tried to my own satisfaction. Take a piece or quantity of pine gum or pitch that oozes from the scrub pine, (or any other kind of pine will do,) warm the pitch until it becomes soft and apply the pitch to the wound, change once every day, and in two or three days the poison will all be extracted and a cure effected.

HILLSDALE.

P. S.—Will you please quote the price of the Spanish Testaments, as a number of my young brethren are anxious to get some and study the language. Please insert the price in the NEWS. H.

GUNNISON, April 15th, 1880.

Editors Deseret News:

As the the time is approaching for the planting of the sugar cane, and a great interest has been manifest in regard to syrup and sugar making in Utah, I take the liberty to offer a few items for discussion and experiments in this new industry.

A good crop of cane, producing good, healthful molasses and sugar, is not to be obtained without good seed of the right kind (Early Amber, and Early Orange, etc,); warm, sandy, bench soil, leaning to the south is preferable in this climate, not saleratus bottoms, and not near swampy places, producing stagnating evaporations; good cultivation, with which farmers who know how to raise corn are acquainted. High altitude, warm enough for cane, pure air, much sun, dry summers, cool nights, seem to be essentials for the crystalization of the sorghum juice.

In Pennsylvania, the sorghum juice measures from 7° to 8° B, in Minnesota from 8° to 9° B., in Utah from 10° to 11° B. But the specific gravity given by Beaume's sacchrometer is not necessarily a measure of sugar. If, therefore, parties can afford to get more perfect instruments, as the polariscope, we think it would be to great advantage, to make close observations in different localities as to the saccharine matter developed during the last two months of the growth of the cane. Such data would be a guide for cane growers in regard to soil, cultivation, irrigation, etc.

Sugar manufacturing from sorghum "laid dormant until Professor F. L. Stewart revived it in 1873, by his new process. Many imitators have since sprung up, and no doubt other methods will be found, by which to crystalize the saccharine juices, but hitherto the Pennsylvania Professor's process seems to be the most reliable in turning out sugar from sorghum in paying quantities.

The sugar chemistry, mainly, leaves us still in the dark, and many have been the failures and disappointments, and the most curious contradictions in the line, have been advanced. In Utah, the writer of this article is convinced, that on account of our peculiar local conditions, we will have to paddle our own canoe, to a great extent.

As to the best machinery and appliances needed for syrup and sugar making, we would advise beginners to go slow, and not enter in with expensive outlay, but feel their way through, practically. Arrangements will probably shortly be made for the making of most of our needed machinery at home; and beginners with small temporary factories, there is some time yet for arrangements.

Professor Stewart has offered to publish an article on his process, in one of our leading papers, and his circular will be distributed on applying to C. A. MADSEN.
