MINING, BUSINESS AND STOCKS

DON MAGUIRE **BOOSTS FOR UTAH**

Calls Attention to Mining Regions Of Wonderful Possibilities In Our Own State.

THAT ARE YET UNPROSPECTED

Inducements Are Great, Says He, for The Miner and Investor-Henry Mountain District.

Don Maguire, the well known mining man of Ogden, believes in boosting for his home state. He believes, too, that there are mineral regions in this commonwealth, where the prospector and his burro have never trod, in which possibilities are equally as great as they have been found to be in some portions of Nevada.

Mr. Maguire in a contribution to the Mining Review says that it is passing strange how many people will "follow the crowd" and lose their money cheerfully in wild-cat enterprises when they could withdraw to some new and virgin field, but little known, and acquire something of permanent worth and

This statement is true, and indicates that men who "follow the crowd" are only bent upon speculation, and are not actuated by the idea of safe and profitable investment; for it is safe to say that the majority of those who have a penchant for new boom camps have a penchant for new boom camps and who invest in mining propositions concerning which they know practically nething, will lose out in the long run. or else they will make a quick turn and get out, as but comparatively few can hope to become interested in a really glit-edged mine, for the reason that the number of really meritorious propositions can easily be enumerated, while the number of "wild-cats" and

really valueless prospects are legion. While Nevada has the call at the present time, in the matter of popularity, and justly so, there are many other portions of this western country which, doubtless, are equally as rich and pro-lific in their deposits of the precious metals as are the bonanza districts in the "Battle Born" state which are now the "observed of all observers;" and it is safe to say that if certain localities in Utah, Idaho, Montana, Arizona and Colorado were given due consideration by the prospector, the mining man and the investor, many new camps of ac-knowledged merit would soon be found outside of the "charmed"

This is especially true of Utah, and were an army of prospectors to swarm over the mountains and through the over the mountains and through the canyons of this state in a manner simi-tar to the stampede to Nevada, it would not be long before new and wonderful mineral discoveries would be heralded from one end of the continent to the

other.
In Utah there are many localities which have been barely prospected, as yet. Regions which are rich in their mineral wealth and which offer splendid inducements to the prospector and min-er, to the investor and capitalist.

One such locality is to be found in Garfield county, in southeastern Utah, where in the White Canyon district in the Henry mountains, there is much to attract the a tention of the seeker after gold-bearing zones, and that would invite exhaustive and extensive investi-gation. The Henry mountains is a region of splendid possibilities, and offers gion of splendid possibilities, and offers many attractions for the prospector, and investor. Outside of a few indi-viduals there are not many who knew of and appreciate the opportunities there awaiting careful exploration and the expenditure of a limited amount of money. M. E. Jones M. E. in an artimoney. M. E. Jones M. E. in an arti-cle descriptive of the Henry mountains,

There is no part of Utah which seems There is no part of Clan which seems to the average man so far away as the Henry mountains. The reason is that this section is off from all the routes of travel both by rail and wagon. Until within a few years it was reached only by trail. Of late years, however, the demands of the stockmen for a hort cut into southeastern Utah have led to the building of two roads. One of these starts from Green River, on he R. G. W. railroad, and passes over desert of clay and sand for many the R. G. W. railroad, and passes over a desert of clay and sand for many miles, where there is but little water, and the watering places are far apart. This road goes to Hanksville, on the Fremont river, and follows around and through the clay hills to the Henry mountains, and to what is called Dandy Crossing, on the Colorado river. From Dandy Crossing there is a fair wagon road over to Biuff City, where connection is made with different routes to Arizona. New Mexico and Colorado. This road is considered the best in the winter time, because there are no mountains to cross, and because the sand is more easily traversed and there is no trouble from the heat.

There is no place in Utah which affords an opportunity of knowing better what a real desert is like than that which is found along the road from Loa to the Henry mountains. The air is as pure as crystal, very dry and bracing, and the scenery is beautiful as well as strange. Here the magic rain sculpture on the soft hills has changed them into the most peculiar and remarkable shapes. The different layers of rock and clay are heautifully colored in hands of blue pink, yellow, green, gray

shapes. The different layers of rock and clay are beautifully colored in bands of blue, pink, yellow, green, gray and black. The clay underlying these beds of rock, being softer than the overlying material, has worn away so raphl-ly that most of the hills face the rivers and streams in precipices. Here the geologist, traveling along, can read the story of the rocks in the different layers of strata as easily as he could turn the pages of a book.

LIKES MANHATTAN.

De Witt B. Lowe Returns and Tells

How a Salt Lake Barber Struck It. De Witt B. Lowe, the well known broker, returned from a trip of in-spection to Manhattan, Nevada, last night and like others who had pre-ceded him, is overflowing with en-thusiasm over the possibilities of the camp in which a large colonoy of Utah people have become interested.

Of the Manhattan-Utah property, in

terests not long ago, he says development work is progressing and is satisfied it is going to develop into a property of considerable magnitude. One of the best strikes made in the camp thus far, was on the Paymaster, an adjoining property. A contract for the extension of the tunnel being run on the Manhattan Utah property was let while Mr. Lowe was in camp. The contract calls for 150 feet and ought to take it to the ledge.

take it to the ledge.

a profit of \$4,000.
"Yes, Manhattan is going to be a big camp. While there is lots of 'hot air' in the camp, there are many things of

MR. SHARP ARRIVES. President Acquainting Himself

With U. S. Mining Affairs.

William G. Sharp, who was recently elected to the presidency of the United States Smelting, Refining & Mining company, reached the city yesterday afternoon and is now acquainting himself with the affairs of the big corporation in this state. tion in this state.

tion in this state.

When seen att he offices of the company, in the Dooly block this morning. Mr. Sharp declared there was little he could say any more than that he is here for the purpose of familiarizing himself with things. "I expect to be here for 10 days or more.' said he to a "News" representative today, "during which time I will visit the various mines and smelters of the United States company. I will then go on to Califorcompany. I will then go on to Califor-nia to get in touch with conditions at the Mammoth properties in Shasta county, and thence to Mexico, where the company has acquired extensive inter-

"It seems good to get back to Salt Lake," continued Mr. Sharp, "and meet old friends again, and although Boston will be my headquarters I expect to come to Utah from time to time. At least I will be here much oftener than has been possible for some time

Mr. Sharp comes back in the best of health, and looks just about as he used to when he directed the operation of the big mines of the Pleasant Valley Coal

KIRBY MAKES A REPORT. Tells of Operations of Montana-Tonopah for Three Months.

John A. Kirby, general manager of the Montana Tonopah Mining company has issued a report covering the opera-tions of the company during the first three months of the present year show-ing that within that period a total of 3,061 feet of exploration work has been

"We are stoping shipping ore." says
Mr. Kirby "on all levels, and are only
removing and hoisting what third class,
or mill ore, we encounter in mining the first class. Also have several shoots of first class ore on different levels that we are not working on account of limited hoisting capacity. We intend limited hoisting capacity. We intend continuing development work on the different levels as fast as our machinery will permit, so when the time arrives for steady output and dividends, there will be no delay or let-up.

"During the past three months there have been hoisted 2,638 mine cars of shipping ore, 1,151 cars of third class or mill ore, and 13,422 of waste, making a total of 17,231 cars.

"The new steel gallows frame has are

"The new steel gallows frame has arrived and is now in position, and will be in use in a few days. It has been erected over the old frame, without delaying mine work.

new 12-deill Ingersoll-Serg vint Duplex Compound Air Compressor has been shipped, and is expected in a few days. The new holst will be shipped in the near future. Foundations for the compressor and hoist are now under

"Before the next quarter expires, our new equipment will all be in running order and ready for mining on an extensive scale. The tests made on our mill ores by Mr. Fred M. Field, asmill ores by Mr. Fred M. Fleid, as-sayer and metallurgist, have just been completed and are very satisfactory. The method of milling has not been fully decided upon, but rests between one of the last two tests.'

COUNT WARD IS IN SALT LAKE

Noted London Financier Comes To Look After Bingham Investments.

STATES CAMP STANDS WELL

In England's Money Center-Gratified At Great Progress Made in Copper District.

Count Reginald C. Ward of the firm of R. H. Ward & Co. is at present a visitor in Sait Lake City, and is registered at the Knutsford. While making his headquarters in London, Count Ward is well known in this country, both in social and financial circles. He is heavily interested in Utah mining properties, chiefly at Bingham, notably the Utah Apex mine, under the local management of W. C. Orem, and states at this time that he is here for the purpose of acquiring still further interests.

"At no time during the history of American mining," said Count Ward this morning, "have American mines and American mining securities occu-pied so high a place in the estimation of the British investor. The feeling of confidence in mining stocks as an investment grows daily more pronounced and gradually but surely industrial inand gradually but surely industrial investments are giving place to mining. For many years the Transvall occupied the center of the stage in the eyes of British mining men and the British public at large but since the labor troubles of a few years ago in connection with the use of Chinese coolie labor in certain of the mines there has been a distinct falling off in the amount of capital invested as an investment, and the general tendency has been more and more in favor of the United States. These conditions are reflected in the columns of the London financial papers, and even on the contifinancial papers, and even on the conti-nent the interest of the public is steadily increasing.
"The large investments made in Utah

properties by such men as the Gug-genheims and others has gone far to establish this feeling of confidence, and in London in particular, the feeling to-wards American mining securities and those of Utah in particular were never

so friendly.
"I may say that my firm is highly gratified at the manner in which our Utah properties are turning out, and the fact that we are adding steadily to our holdings may be taken as evidence of our sincerity. I personally have regarded Utah as one of the greatest mining centers of the earth for some time past, and my opinion is now gradbeing shared by the London min

ing public."

Count Ward declined to go into de-tails regarding his recently acquired interests here, but it is assumed that these are in the Bingham vicinity, where so much of the firm's capital has already gone. The count expressed dis-appointment at his inability through lack of time to visit his Bingham in terests he and his sister, Mrs. Carte of Boston, having arranged to leave Salt Lake en route for San Francisco not later than Tuesday. From there the party will return to London, although the count states that he anticipates revisiting Salt Lake at no late date.

THE BINGHAM CON.

President White Returns-Conditions At Smelter Normal.

President E. L. White of the Bing-ham Consolidated Mining & Smelting company returned from California this foreneon and will remain until after the arrival of F. Augustus Heinze, who is expected to reach the city some time during the present week,

Upon his arrival, President White was gratified to learn that the labor troubles at the smelter had reached a conclusion and that conditions at the Bingham Junction were normal again. Assistant Manager H. H. Green reh | been blown in again and that the usual tonnage of ore was being hand-

BULLFROG CONSOLIDATED. Shareholders of Tramp Company to

Get Stock Dividend.

As a consequence of the consolidation of the Tramp Eclipse and Denver prop-erties at Bullfrog, Nevada, the Tramp company has declared a stock dividend amounting to 760 shares for each 1,000 issued, and which is to be exchanged for shares in the consolidated corpora-tion. The Tramp shareholders are to get 950,000 shares out of the 3,000,000 shares of the new company. The Colorado Title & Trust company at Colorado Springs is acting as transfere

ADAMSON HOME.

Nevada Mining Man Back in Diggings After Eastern Trip.

W. G. Adamson, the well known Nevada mining operator, passed through the city a few days ago en route to his home at Winnemucca from a trip east of several weeks' duration. The Star of the latter place notes his

arrival and says:
Mr. Adamson states that work will be resumed on the company's property immediately and that the double comimmediately and that the double com-partment shaft, already down 200 feet, will be sunk at least 200 feet deeper. A gasoline hoist is on the way and will be here in a few days and will be

instailed as soon as possible.

The shaft is being sunk with the expectation of cutting the main ledge, which has produced so much buillion in the past. This ledge in the early days was called the Pride of the Mountain and was worked long before the railroad was built and the ore was hauled by freight teams to the coast and shipped to Wales for treatment, very little being known at that time about the reduction of ores in this country. The ore had to be ex-tremely rich to stand the haul of hundreds of mines by team, thence around the Horn and across the Atlantic to the old country. The ore was rich and yielded handsome returns at that

CONCENTRATES.

M. M. Johnson of the Newhouse staff left for California Saturday evening.

be resumed at the usual hour tomorrow Mr. C. D. Rooklidge, manager of the

Pioneer samples, leaves today on a business trip in to Nevada. John W. Gelger has retired from the position of bookkeeper for the Pioneer Sampling company. He has been chos-en scretary of the Nevada Superior Mining company.

Mr. V. P. Stronge of the engineering firm of Clement & Strange, leaves this evening on a business trip to Nevada. It is understood that Mr. Stronge goes to submit a bid on some work in the firm's line of business.

The Pioneer sampler acknowledges receipts of two cars of ore from Tintic, two from Bingham, five from Nevada, and two from Alta. The Taylor Brunton Ore Sampling Co. has received nine cars from Tintic, three from Bingham and two from Nevada.

Ed Copley, formerly engaged in the brokerage business in this city, but now esstablished in the same vocation in Chicago, was in the city Saturday en route to Nevada with a crowd of investors. tors who have been attracted by the mining possibilities of Humboldt county.

The Bingham Central Mining comrecorder representing property of the value of \$110,100. This company recently placed \$200,000 worth of bonds, the proceeds from which are to be applied in the development and equipment of its properties at Bingham.

George Gunn has returned from a pilgrimage to Mason Valley, Nevada, where he went for the purpose of making an examination of the Mason Valley company's property upon Walley company's property upon which an option is now pending. Until the samples cathered by Mr. Gunn are assayed the fate of the deal will not be known.

LOCAL MARKETS.

In today's markets, dealers have marked up hay \$1 and \$2 per ton, but with warm and dry weather at hand so that farmers are sending in delayed alfalfa, it is not probable that high prices will continue more than a few days. Texas strawberries are being received, with pine apples, egg nig received, with pine apples, egg plant, green peppers and tomatoes from Florida, and new potatoes from California. There is a searcity of bananas as 11 fruit laden steamers have been delayed in a storm in the Carribean sea for several days, and no shipments may reach here before the end of the week. Kinnered salmen is in of the week. Kippered salmon is in the market, also the first limes of the season from Mexico and which are selling at \$1.50 per 100. Southern Winnistead cabbages are being recelved. Pine apples are selling at \$3.50 per dozen.

BUOYANCY

Large Transactions at the Opening Were at Good Advances Over Saturday.

WELL KNOWN STOCKS BOUGHT

Quiet Spell Followed by Renewal of The Upward Movement-Bonds Irregular.

New York. April 16.-There were large opening transactions in the stock market today in most of the prominent stocks at advances of a fraction over Satur-day. The principal gains were in the industrials and specialties. American Locomotive and United States Reduction preferred rose 214. American Smelting 11/4. International Pump and Hocking Valley about a point, and L. & N. and Amaigamated Copper %. Speculation broadened out considerably

and there was a large accumulation of stocks of the lower grade, especially those of industrial companies and of recent formation. All of the well known stocks were also bought on a rising scale, but the demand for these quickly abated when the professional came in to take profits. Business which had been on a very large scale slackened to almost nominal proportions when the market began to run off. A feature of the trading was the perpendicular drop of 13 points in Butterick Publishing company, with variations from 2 to 4 points between sales. Most of the important gains were United States Reduction 3; the preferred 2½, Great Northern preferred and Pressed Steel Car 2. Pacific Coast and Knickerbocker Ice 1½, and L. & N. New York, Chicago & St. Louis second preferred, Amalgamated Copper, Brooklyn Transit, Colorado Fuel and Distillers' Securities 1.

The market became active again with a renewal of the upward movement. Industrials and specialties were conspicuous still. Wells-Fargo Express rose 5. International Power 4. Great Northern preferred 3½, Northern Pacific, D. & H., U. S. Ex. American Ice 1½ and a few others 1. Maryland & St. Louis Southwestern feli 1. Trading became dull on slight concessions before noon.

Bonds were irregular. A \$125,000 block of U. S. Steel sinking fund bonds sold at par for the first time in the history of that bond. stocks of the lower grade, especially those

MINES FILLING WITH WATER.

Columbus, Ohio, April 16.—According to reports received from Illinois and Indiana, some of the mines in those states are filling with water, as those states are filing with water, as the result of the fact that the pump-men and engineers have not gone to work. It is said this question will be one of the most important to come up in the Indianapolis meeting. The operators are going before President Mitchell and demand to know if it is by his authority that the pumpmen and engineers are out of the mines in question, when they are union mines and the unions agreed to keep the pumpmen at work.
